

MODIFICATION FOR ASTRO 102BX

Referring to Figure #2, add (2) .001 microfarad capacitors from the microphone and key lines to ground as shown on the diagram. These capacitors will be labeled C104 and C105 respectively. The attached partial schematic of the Astro 102BX Main Chassis and Interconnect diagram will show the electrical location of these capacitors that are to be added. This modification when incorporated into the Astro 102BX will minimize the RF feedback.

PARTS REQUIRED FOR ABOVE MODIFICATION

2	.001 microfarad capacitors	072-006
