# **T-150 TRANSMITTER**

The T-150 is a compact, high-power AM-CW transmitter that's sure to rate a place in your Ham setup. Providing bandswitching coverage of the 80 through 6 meter bands, the T-150 operates at a power input of 150 watts. Built-in AM modulation is provided by a combination of screen modulation and controlled carrier. Thus, at low cost, practically the equivalent talk-power of plate modulation is obtained.

Designed to provide a minimum of TVI, all leads going in-and-out of the case are bypassed for RF. There is more than ample gain in the audio circuit to operate from any high-impedance, dynamic or crystal microphone. Keying is clean and chirpless with no hazardous voltages at the key contacts.

- HIGH POWER, 150 WATTS INPUT ON 80 THROUGH 10, 100 WATTS ON 6 METERS
- BUILT-IN, HIGHLY STABLE VFO OR CRYSTAL OPERATION
- ADJUSTABLE IN OUTPUT NETWORK MATCHES A WIDE RANGE OF ANTENNAS
- AM PHONE AND CW OPERATION
- ALL STAGES KEYED — NO SHOCK VOLTAGE ON CONTACTS
- BANDSWITCH COVERAGE OF 80 THROUGH 6 METERS
- FULL METER SWITCHING
