

4 BAND MODEL 1040V

The Swan 4 Band Heavy Duty Trapped Vertical Antenna is designed for use on the 40, 20, 15, and 10 meter amateur radio bands. The antenna has a low angle, nondirectional radiation pattern. All traps have been precision tuned and weather proofed. The heavy duty mechanical design of the 1040V means that it will easily take winds up to 100 MPH, and provide years of reliable service.

Power Rating: 2000 watts P.E.P.

Weight: 16 pounds.

5 BAND MODEL 1080V

The Swan 5 Band Heavy Duty Trapped Vertical Antenna is designed for use on the 80, 40, 20, 15, and 10 meter amateur radio bands. The 5 bander is a 1040V with a 75 meter add-on kit installed on top of the antenna. Guying is recommended for the 1080V, especially in areas of high winds.

Power Rating: 2000 watts P.E.P.

Weight: 17-1/2 pounds.

Both antennas come to you complete with all necessary hardware, including all radials.
