

THE SWAN
SWAN 600-R

600-R AND 600-T TWINS

The Swan Twins were introduced in 1971. The receiver, the 600-R, featured 10-80 meter coverage, and a .25 microvolt sensitivity rating. The 600R has a built-in power supply and sold for \$395.00 US. An optional matching speaker sold for \$18.00 US. Selectivity is rated at 2.7 Kc bandwidth, with 1.7 shape factor is standard. Options also included a 0.5 Kc CW filter, 4 Kc AM filter, and a SS-16 super selective 16 pole crystal filter.

SWAN 600-T

The Swan 600-T transmitter featured 600 watts PEP input SSB, 150 watts AM. The 600T also comes with its own power supply, and sold for \$495.00 US when introduced.
