

AMERITRON ATR-30 TUNER

Handles a 1.5KW CONTINUOUS CARRIER!

It has a high current edge wound silver plated roller inductor, 500pf capacitors with 6.1 vernier reduction drives, 3-core choke balun, 6-position antenna switch, and an illuminated cross-needle SWR/Wattmeter for true peak reading measurements. Selectable peak or average position gives forward and reflected power plus SWR readings. You can add an external 12 VDC power supply or use an internal 9 volt battery for the meter lamps. The ranges are 300/3000 Watts.
