Keycommands

This document contains a compiled list of all the keyboard short-cuts and modifier keys available in Reason 1.0. Keyboard short-cuts are keys or combinations of keys that can be pressed to execute various functions. Modifier keys are keys that can be used in combination with the mouse, to execute additional functions.

! In most cases, which key to use is different from Mac to Windows. The keys to use are listed in the left column of the tables below with the Mac key(s) to the left, and the Windows key(s) to the right (e.g. [Mac]/[Windows]).
