FOR INFORMATIONAL & STUDY PURPOSES ONLY! DO NOT ATTEMPT TO MAKE THIS EXPLOSIVE. THIS CD IS FOR READING ENJOYMENT ONLY. MAKING THIS EXPLOSIVE COULD INJURE OR KILL YOU. THIS CD IS NOT INTENDED AS A RECIPE BOOK.

Contact Explosives

This is sort of a mild explosive, but it can be quite dangerous in large quantities. To make contact explosive, do the following:

- Mix iodine crystals into ammonia until the iodine crystals will not dissolve into the ammonia anymore. Pour off the excess ammonia and dry out the crystals on a baking sheet. Just let it sit overnight.
- Be careful now because these crystals are now your contact explosive. Friction will set them off.

THERE IS NO WAY TO SAFELY MAKE THIS..DON'T EVEN TRY
