SMOKE BOMB

Mix:

This is the Mother-of-all smoke bombs.

2 part Potassium Nitrate
1 Part Granulated sugar.

Put this under a very low heat source and melt the sugar and potassium nitrate. After it is melted let it set and get hard. When it gets hard, just take outside and hold a lit match on an area of the smoke bomb and wait till it lights. You will know when it is about to ignite because the stuff turns black and will then spit and sputter and smoke will pour out of the compound. You also can light it without melting it but it burns too fast and will make a huge flame while the other one does not.
