HTH CHLORINE SMOKE BOMB

Take HTH pool chlorine and some non-silicon brake fluid and mix the two together in a ratio of 4 parts chlorine to 1 part brake fluid. When you mix the two together they will begin to sizzle and then it will begin to smoke. It will take about 30 seconds to start smoking fully. When it does begin to smoke it will produce a cloud of thick white smoke (CHLORINE GAS!). It could burst into flames and burn the container. Suggest use of glass container. The smoke is known to last for over 2 minutes and is very toxic

DANGER! VERY TOXIC! WILL CAUSE PERMANENT LUNG DAMAGE & DEATH
