

This special report shows you how you can win the fight against cancer...

Diagnosed With Cancer?

Here Are 11 Effective, Natural Strategies To Kill Your Cancer

The information you need to beat cancer is here - available to you for free. You won't have to download a report or buy any book. In fact, some readers have said that this report is better than the ebooks, and they had bought every one. Here you will find information your doctor can't tell you or doesn't know - including information on one product where 51 out of 65 stage 4 cancer patients became cancer free while using it.

Other readers say that this report gave them the most understandable information they found about cancer. You'll learn about the underlying causes of cancer, and what to do to counteract those causes. Effective actions to take to defeat cancer. This information applies to all types of cancer. Lung, prostate, breast, colon, ovarian, cervical, liver, pancreatic, bone, bladder, stomach, testicular, thyroid, kidney, throat, brain, mouth, uterine, esophageal, rectal and more. The fundamental causes of these cancers are the same, so the same strategies work for all of them.

Thousands before you have used these strategies to beat their cancer and now live *happy* normal lives. They are available here at no cost to you.

"In 2003 my husband was told he had a pancost tumor on his upper left lung. He began 6 weeks of chemotherapy and radiation therapy. On April 1st, 2004 he went thru a 10 hour surgery to remove the upper left lobe, parts of his ribs and the tips of the T3, T4 & T5 vertebrae.

"In May 2005 he was informed the cancer had returned in the lower left lung and on his spine causing compression fractures of the C2, T3, 4, 5, & T6 vertebrae. He refused chemo and radiation therapy. We studied the information on your site and began a regiment of detoxing, cleansing, and using several of the products and a complete life style change.

"The recent CT scan, PET scan, blood work and MRI came back cancer free. Thank God. He still has the issue with his back, but no cancer: We will continue taking the holistic approach using your products. Just to name a few: Oxy E, MSM, AFA Blue Green Algae, Ellagic Acid with Graviola, and more. Faith and prayer does work cause without it I would not have found you, many thanks. Our future looks brighter. Thank you..."

Patrick and Olga - August 1st, 2005

"Hi- I will never be able thank you enough. 8 months ago my boyfriend, Pete, was given a few months to live- melanoma was spreading rapidly through his body and was proclaimed to have settled in the lymph nodes and liver. "Doctors" wanted to strip his lymph nodes and cut out a section of his liver, and then chemo him, again. I found your website, printed out all the info on cancer, and presented it to Pete. He agreed to follow the advice- he refused conventional treatment, [We are not advising that you refuse conventional treatments.] and immediately began a regiment of supplements to detoxify, cleanse, oxygenate, alkalize, and support. He also made changes in diet and in mind-set. 8 months later he is free of cancer, as indicated in the recent PET scan! He has energy abound, no longer sleeps half the day, and is looking forward to living instead of preparing to die. Your information is well-presented, logical, factual, and in language a person can understand, AND, it saved a man's life." Leslie R.

Even if you are taking the standard medical treatments, you can safely improve their effectiveness by using the natural supplements covered in this report. Many people have done so.

The Underlying Causes of Cancer

Cancerous cells are *always* being created in the body. It's an ongoing process that has gone on for eons. So parts of your immune system are designed to seek out and destroy cancer cells.

Cancer has been around as long as mankind, but only in the second half of the 20th century did the number of cancer cases explode. Contributing to this explosion are the excessive amounts of toxins and pollutants we are exposed to, high stress lifestyles that zap the immune system, poor quality junk food that's full of pesticides, irradiated and now genetically modified, pathogens, electromagnetic stress, lights, and just about everything that wasn't here 200 years ago.

All these **weaken** the immune system, and alter the internal environment in the body to an environment that promotes the growth of cancer.

Cancer is not a mysterious disease that suddenly attacks you out of the blue, something that you can't do anything about. It has definite causes that you can correct if your body has enough time, and if you *take action* to change the internal environment to one that creates health, not cancer, while at the same time attacking cancerous cells and tumors by exploiting their weaknesses.

Cancer tumors begin when *more* cancerous cells are being created than an overworked, depleted immune system can destroy.

Constant exposure to tens of thousands of manmade chemicals from birth onward, chlorinated and fluoridated water, electromagnetic radiation, pesticides and other toxins, leads to the creation of too many **free radicals** and *excessive numbers* of cancerous cells.

Alone this would be enough to raise cancer levels, but combined with an immune system weakened by a diet of refined and over processed food, mineral depleted soils, and too much exposure to artificial light at night, the immune system at some point no longer is able to keep cancer in check, and it starts to grow in your body.

DID YOU KNOW? Research shows that the immune system needs 9 1/2 hours of sleep in *total* darkness to recharge completely -- the authors of the book *Lights Out* explain. When was the last time you had this much sleep?

Because of this stress and the overload of toxins, you end up with a malfunctioning immune system, and a body that is not capable of destroying the excessive numbers of cancerous cells that develop. Some, sooner or later, survive and multiply. And then you have cancer. Of course, our diets loaded with sugar and refined carbohydrates don't help. Refined carbohydrates digest so fast they act like sugar, and cancer cells love sugar. They have about 8 times more receptor cells for capturing sugar than healthy cells.

Overcoming cancer is a process of **reversing** the conditions that allowed the cancer to develop, and going after and killing cancerous cells.

The exact causes don't have to be known, though certainly the more varied the approaches taken to correct those conditions, the more likely you are going to hit on what works best in a particular case. What you need to do is to **strongly and dramatically interrupt and reverse** the cancer-causing conditions in your body so that it becomes healthier, and stops breeding cancer.

The more cancer there is, the more serious the condition -- meaning much more has to be done -- fast. It may be too late, or it may not. No one knows where that cutoff point is as sometimes people given only a few days to live have pulled through and conquered cancer when they applied these strategies.

What you will be reading in this report isn't about a cure for cancer. It isn't medical advice. It is sort of like information from the National Cancer Society that one of the most important things you can do for your health is to eat five servings of fruits and vegetables a day. Only it is telling you about food supplements and minerals that are much more potent. You'll understand as you read on.

11 Strategies to focus on when fighting cancer...

Cancer Strategy #1: Kill Cancer Cells... Without Harming Your Body

When chemotherapy and radiation therapy are used to kill the cancerous cells, they harm healthy cells in the process. In fact, they sometimes kill people faster than the cancer would have done. This report focuses on natural supplements that do a good job of killing cancerous cells, but don't cause harm to your body. A few natural supplements suggested for fighting cancer do have the potential to be toxic to the body, and should probably just be used in conjunction with a naturopath or alternative doctor. These include cesium, artemisia, and B17. In this report you will learn only about completely safe cancer supplements that can be used with no supervision.

You may well ask why, if a safe and natural product is able to kill cancer, doesn't your doctor recommend it. Of course, he probably doesn't know about it, but even if he did, he's not likely to use it.

It's the nature of the medical/drug industry. Doctors use and recommend drugs that are approved in a process that costs hundreds of millions of dollars. The drug companies only make drugs that can be patented. That way they can sell them for huge mark-ups and have no competition. Unfortunately, anything that has been altered from nature, which is must be to be patented, becomes a toxic substance in your body. Your body can handle natural foods and herbs, the altered ones have toxic side-effects and just don't work well in your body. It's why the biggest cause of deaths in the US is from medical drugs.

No company would ever take an unpatentable natural product through the drug approval process, so the healthy natural supplements aren't approved to be used for cancer or whatever other health condition they may help. As they are not approved, doctors, or at least most doctors, won't use them, and most don't even know about them.

If a doctor is not tied in and blinded by the medical/drug industry, he or she finds that a comprehensive approach to fighting cancer using powerful supplements that deal with the many different issues in cancer, works much better than only using drugs and other treatments that harm the body. But for now you have to turn to other resources to find safe cancer killers.

Cancer Strategy #2: Low Levels Of Cellular Oxygen Breed Cancer... Increasing Oxygen Levels Kills Cancerous Cells

An underlying cause of cancer is **low cellular oxygenation levels**. In newly formed cells, low levels of oxygen damage respiration enzymes so that they cells cannot produce energy using oxygen. These cells can then turn cancerous.

In 1931 Dr. Warburg won his first Nobel Prize for proving cancer is caused by a lack of oxygen respiration in cells. He stated in an article titled *The Prime Cause and Prevention of Cancer* that "**the cause of cancer is no longer a mystery, we know it occurs whenever any cell is denied 60% of its oxygen requirements.**"

"Cancer, above all other diseases, has countless secondary causes. But, even for cancer, there is only one prime cause. Summarized in a few words, the prime cause of cancer is the replacement of the respiration of oxygen in normal body cells by a fermentation of sugar. All normal body cells meet their energy needs by respiration of oxygen, whereas **cancer cells meet their energy needs in great part by fermentation**. All normal body cells are thus obligate aerobes, whereas all cancer cells are partial anaerobes."

Poor oxygenation comes from a buildup of carcinogens and other toxins within and around cells, which blocks and then damages the cellular oxygen respiration mechanism. Clumping up of red blood cells slows down the bloodstream, and restricts flow into capillaries. This also causes poor oxygenation. Even lack of the proper building blocks for cell walls, essential fatty acids, restricts oxygen exchange.

This is why the flax oil in cottage cheese treatment popular in Europe has become a well known cancer treatment. It provides Omega 3 essential fatty acids needed by cell walls so that oxygen can enter the cells. Well actually it is popular because it works quite well. It is great for diabetes and heart or cardiovascular disease also.

To vigorously fight cancer with this approach, use a lot of flax oil or ground up flax seeds mixed in as much cottage cheese (organic preferably) as you need to get it down. Use up to 8 tablespoons of flax oil daily, or 16 tablespoons (1

cup) of ground up flax seeds daily with cottage cheese to enhance absorption. Make sure the flax oil or flax meal if you buy it, has been refrigerated at the store, and keep it refrigerated at home. If you grind up flax seeds, use them immediately or store the extra in the refrigerator or freezer. A coffee grinder or blender works for this. Flax oil goes rancid very easily. And stay away from vegetable oils as they hinder its effects.

What Warburg and other scientists found was that respiratory enzymes in cells, which make energy aerobically using oxygen, die when cellular oxygen levels drop. When this happens, the cell can no longer produce energy aerobically. So, if the cell is to live, it must, at least partially, ferment sugars, producing energy anaerobically. According to Warburg, cells that produce energy by fermenting sugars may turn cancerous. Warburg's contention is this...

The cells that cannot produce energy aerobically, cannot produce enough energy to maintain their ability to function properly. So they lose their ability to do whatever they need to do in the body.

Fermentation allows these cells to survive, but they can no longer perform any functions in the body or communicate effectively with the body. Consequently, these cells can only multiply and grow. And may become cancerous. Or perhaps it would be more accurate to say, they change into cancer cells.

Decades ago, two researchers at the National Cancer Institute, Dean Burn and Mark Woods, (Dean translated some of Warburg's speeches) conducted a series of experiments where they measured the fermentation rate of cancers that grew at different speeds. What they found supported Dr. Warburg's theory. The cancers with the highest growth rates had the highest fermentation rates. The slower a cancer grew, the less it used fermentation to produce energy.

Naturally Warburg's contention was challenged and tested by other scientists.

Some researchers claimed his theory was not valid after they had measured a particularly slow growing cancer, and found no fermentation at all. And if cancer could grow with no fermentation, then fermentation, or lack of oxygen respiration, was not the cause of cancer. Dean Burn and Mark Woods checked those results.

Using more sophisticated equipment, they determined that the equipment these researchers used to measure fermentation levels was not accurate enough to detect fermentation at low levels. Their testing, using newer and more accurate equipment, showed that even in those very slow growing cancer cells, fermentation was still taking place, at very low levels.

Pietro Gullino, also at the National Cancer Institute, devised a test which showed that this slow growing cancer *always* produced fermentation lactic acid. Silvio Fiala, a biochemist from the University of Southern California, also confirmed that this slow growing cancer produced lactic acid, and that its oxygen respiration was reduced.

Further research into Warburg's theory showed that when oxygen levels were turned down, cells began to produce energy anaerobically. *They ultimately became cancerous when levels went low enough. It took a reduction of 35% in oxygen levels for this to happen.*

J. B. Kizer, a biochemist and physicist at Gungnir Research in Portsmouth, Ohio explains, "Since Warburg's discovery, this difference in respiration has remained the most fundamental (and some say, only) physiological difference consistently found between normal and cancer cells. Using cell culture studies, I decided to examine the differential responses of normal and cancer cells to changes in the oxygen environment.

"The results that I found were rather remarkable. I found that... **High O₂ tensions were lethal to cancer tissue, 95 percent being very toxic, whereas in general, normal tissues were not harmed by high oxygen tensions. Indeed, some normal tissues were found to require high O₂ tensions. It does seem to demonstrate the possibility that if the O₂ tensions in cancer tissues can be elevated, then the cancer tissue may be able to be killed selectively, as it seems that the cancer cells are incapable of handling the O₂ in a high O₂ environment."**

Low oxygen levels in cells may be a fundamental cause of cancer. There are several reasons cells become poorly oxygenated. An overload of toxins clogging up the cells, poor quality cell walls that don't allow nutrients into the cells, the lack of nutrients needed for respiration, poor circulation and perhaps even low levels of oxygen in the air we breathe.

Cancer cells produce *excess lactic acid* as they ferment energy. Lactic acid is toxic, and tends to prevent the transport of oxygen into neighboring normal cells. Over time as these cells replicate, the cancer may spread if not destroyed by the immune system.

Chemotherapy and radiation are used because cancer cells are **weaker** than normal cells and therefore may die first.

However, chemo and radiation damage **respiratory enzymes** in healthy cells, and overload them with toxins, so they become more likely to develop into cancer. The underlying cancer causing conditions are worsened, not improved. And the cancer usually returns quickly a second time *unless* you make changes to support the health of your body.

The implication of this research is that an effective way to support the body's fight against cancer would be to get as much **oxygen** as you can into healthy cells, and improving their ability to utilize oxygen. Raising the oxygen levels of normal cells would help prevent them from becoming cancerous.

And increasing oxygen levels in cancer cells to high levels could help kill those cancer cells.

A nurse who works in medical research said, "*It's so simple. I don't know why I never thought of it before. When we're working with cell cultures in the lab, if we want the cells to mutate, we turn down the oxygen. To stop them, we turn the oxygen back up.*"

Ma Lan, MD and Joel Wallach DVD, point out that one type of white blood cells kills cancer cells by injecting oxygen creating hydrogen peroxide into the cells.

It is not easy to get additional oxygen into cells. Most approaches don't work well. Breathing oxygen is still limited by the amount of hemoglobin available, and pH levels. Dr. Whittaker points out, quite rightly, that liquid oxygen supplements that release oxygen into the blood, which most of them only do, **can't** get oxygen into the cells.

He explains that a delivery mechanism is needed to transport oxygen into cells. And though the typical oxygen supplement gets oxygen into the blood, that doesn't mean it gets into the cells.

There is a bit more to this oxygenation story.

If you remember, according to Warburg, it is increased amounts of carcinogens, toxicity and pollution that cause cells to be unable to uptake oxygen efficiently. This is connected with over-acidity.

Cancer Strategy #3: Acidic pH Levels Lead To Cancer... **Normalizing pH Levels Can Stop Cancer In Its Tracks**

There is plenty of research showing that cancer thrives in an **acidic environment**, and doesn't survive in an normal, more alkaline environment. Cancer cells make your body even more acidic as they produce lactic acid. So if you have cancer, your pH levels are low and your body is too acidic.

Taking action to make your body more alkaline is vital in the battle against cancer. Unfortunately...

The majority of the foods and drinks we consume are acidic, such as meat, grains and sugar, with colas and other soft drinks being highly acidic. So unless you have been eating a very healthy diet, full of fresh fruit and vegetables, your body is *way* too acidic. Creating a very good environment for cancer to grow in.

Actually, a too much acidity is an underlying factor in many degenerative diseases -- diabetes, arthritis, fibromyalgia and more. A basic maxim of natural physicians is: Balance the bio terrain. Do this first, then everything can come back to normal.

Taking medicines or supplements while your body is highly acidic is a bit like washing dishes in a sink of dirty water, even when you put in plenty of soap, you can't get the dishes clean.

According to Keiichi Morishita in his book, *Hidden Truth of Cancer*, when your blood starts to become acidic, your

body deposits acidic substances in the blood (usually toxins) into cells to allow the blood to remain slightly alkaline. However, this causes your cells to become more acidic and toxic, which results in a decrease of their oxygen levels, and harms their DNA and respiratory enzymes.

Over time, he theorizes, these cells increase in acidity and some die. These dead cells themselves turn into acids. However, *some* of these acidified cells may adapt in that environment. In other words, instead of dying - as normal cells do in an acid environment - some cells survive by becoming abnormal cells.

These abnormal cells are called malignant cells. Malignant cells do not correspond with brain function nor with our own DNA memory code. Therefore, malignant cells grow indefinitely and without order. **This is cancer.**

As you can see, he is describing, from a different point of view, the process by which low oxygen levels turn some cells cancerous. Alkaline water (including the water in cells) holds a lot of oxygen. Acidic water holds very little oxygen. So the **more acidic** your cells are, the less oxygenated they will be. To make matters worse, the fermentation process cancer cells use to produce energy creates lactic acid, further increasing acidity and reducing oxygen levels.

Sang Whang, in his book *Reverse Aging*, points out that toxins are **acidic**. If your blood is too acidic, toxins will not be released from your cells into the blood. So your cells can't be detoxified. This buildup of toxins in your cells results in acidic, poorly oxygenated cells, which can turn cancerous. He explains,

"In general, degenerative diseases are the result of acid waste buildups within us. When we are born, we have the highest alkaline mineral concentration and also the highest body pH. From that point on, the normal process of life is to gradually acidify. That is why these degenerative diseases do not occur when you are young. Reverse aging requires two separate steps: chemical and physical. The first step is to lower the acidity of the body so that it can dispose of acidic wastes in the blood and cellular fluids safely and easily. The second step is to physically pull out old stored wastes into the blood stream so that they can be discharged from the body."

There is a long history of reversing cancer simply by alkalinizing the body. It is one of the basic strategies in the battle against cancer and for improving your health in general.

Cancer Strategy #4: Lack Of Methylglyoxal Causes Cancer... Getting Methylglyoxal Into Cells Puts The Brakes On Cancer

Dr. Albert Szent-Gyorgyi was the Nobel Laureate in Medicine in 1937 for the isolation and discovery of Vitamin C. Known as the "Father of Nutritional Science", he also discovered iso-flavones and vitamin P. In his last 40 years, he researched the regulatory processes of cell growth, and thereby the regulation of cancer itself.

He made a rather amazing breakthrough about cancer. In 1963 the prestigious magazine "Science" published a remarkable article about his research. In it Dr. Szent-Gyorgyi identified two substances, one called **Retine, which inhibited cancer growth, and the other called Promine, which promoted cell growth and made cancerous cells grow faster.**

He explained that these were very small molecules that were highly potent in controlling cell division. His research using mice achieved shrinkage of tumors by increasing the ratio of Retine to Promine with daily injections of Retine. Other researchers obtained similar results.

There were no harmful or toxic side effects.

In another "Science" article in 1967 he announced that his laboratory had isolated and manufactured Retine, which retards cell growth, in the form of a Carbonyl compound called Methylglyoxal.

Again, in animal studies he showed that injecting Methylglyoxal daily into mice with cancer was highly effective. The study was divided up into 5 groups of 20 mice each. Every mouse in the control group died in the first 26 - 34 days. All mice were observed for 300 days. The first group began treatment 1 hour after inoculation with cancer. 15 survived

In the second group, beginning treatment 4 hours after inoculation, 13 animals survived. The third group began

treatment 24 hours afterwards and 7 survived. The fourth group waited 48 hours and 4 survived.

In an interview in Prevention magazine in 1972 conducted by Jane Kinderlehrer, he explained that he and "Dr. Egyud have found that **retine (methylglyoxal) stops the growth of cancer cells without poisoning other cells.** When retine is present in sufficient concentration, no cell division can occur while vital cellular processes go on unhindered."

The article goes on, "And what is a good bit of luck, and not my cleverness, the white-haired scientist pointed out, "is that if a cancer cell cannot grow, it dies by itself.' According to the researchers, retine is normally produced by the body and, when it is, it prevents the growth of existing cancer cells. But the body can lose its ability to produce this substance...

"Putting the retine back in the body, just as we put insulin back into a diabetic's body, can stop the growth of cancer... The scientists at Woods Hole found that cancer cells are much more sensitive to retine than normal ones, and so cancer cells may be inhibited specifically."

To sum it up, the Carbonyl group - Glyoxal & Methylglyoxal, are retine. They arrest cell division and make cells return to a resting state. If Carbonyl is missing, uncontrolled proliferation goes on, and cells grow wildly and uncontrollably which leads to cancer. Glyoxal & Methylglyoxal are a non-toxic substance that is supposed to be in your cells. Putting them back in your cells has significant anti-cancer activity.

Another well known Nobel Prize winner of that period, Dr. William Koch, worked on this same issue with a different approach. Dr. Szent-Gyorgyi acknowledged his work saying, "A decade ago, a very intuitive researcher, Dr. William F. Koch, came to the same conclusion about the possible importance of Carbonyls in regulation of cell division and carcinostasis."

Later on in this report I will tell you about more about his work and the products he developed.

Cancer Strategy #5: A Weakened Immune System Leads To Cancer... A Strong Immune System Seeks Out And Destroys Cancer Cells

For most of your life, the immune system has successfully dealt with cancer cells, killing them off as they developed. That's its job. For cancer to have developed in you, your immune system must have become worn out, ineffective and unable to deal with the cancer cells.

Thus it is vital to strengthen the immune system so that it can better fight cancer. Especially if you are getting medical treatments that wipe out the immune system, and make the body more **acidic** to boot.

Many natural supplements support the immune system. The trick is to find and use the ones that work the best, as it is easy to squander resources on products that won't get the job done. The other concern is to make sure you take **enough**. Cancer is not something to pussyfoot around with. Taking 5 to 10 times the normal supplemental amount seems to work best when using natural supplements.

Cancer Strategy #6: Candida And Fungal Infections May Cause Cancer... Eliminating These Fungal Infections Is Vital For Getting Rid Of Cancer

Some doctors theorize that candida or other systemic fungal infections cause or at the very least contribute to the *development* of cancer. This makes sense. A body wide candida infection plays havoc on the immune system. Not only does the immune system become overwhelmed and worn out from fighting the infection, but candida (or other fungus) **excrete toxins** that further weaken and harm the body.

The major waste product of candida is *acetaldehyde*, which produces ethanol. Ethanol may be great in cars, but in your body it causes excessive fatigue, and reduces strength and stamina. In addition, it destroys enzymes needed for cell energy, and causes the release of free radicals that can damage DNA.

Ethanol also inhibits the absorption of iron. Because iron is one of the most important oxygen supports in the blood, ethanol in your body creates low oxygen levels. And you know what happens when your body can't oxygenate well.

Deal with candida if you want to beat cancer.

There is a simple test to tell if you have candida overgrowth.

First thing in the morning, before you put ANYTHING in your mouth, get a clear glass of water. Better still; leave it by your bed the night before. Work up a bit of saliva, and then spit it into the glass of water.

Check the water every 15 minutes or so for up to one hour. If you have a candida yeast infection, strings (like legs) will travel down into the water from the saliva floating on top, or "cloudy" saliva will sink to the bottom of the glass, or cloudy specks will seem to be suspended in the water. If nothing develops in 30 to 45 minutes, you are probably candida free.

Some doctors implicate fungi as a cause of **leukemia**. In 1999 Meinolf Karthaus, MD, watched three different children with leukemia suddenly go into remission upon receiving a triple antifungal drug cocktail for their "secondary" fungal infections.

In 1997 Mark Bielski stated that leukemia, whether acute or chronic, is intimately associated with the yeast, *Candida albicans*, which mutates into a fungal form when it overgrows.

Milton White, MD. believed that **cancer is a chronic, infectious, fungus disease**. He was able to find fungal spores in every sample of cancer tissue he studied. Other doctors feel the same. The cancer fighting strategy one Italian MD uses is to attack the candida by alkalizing the digestive tract. He has his patients drink a teaspoon of bicarbonate of soda, baking soda, in a glass of water 30 minutes before breakfast. Some of his patients eliminate their cancer just doing this.

Author Doug Kaufmann asserts that fungi in foods may play a role in cancer. He has seen children become free of their documented leukemia once the child's parents simply changed the child's diet. Kaufmann's diet is based on the widely published problem of mycotoxin contamination of our grain foods.

Grains such as corn, wheat, barley, sorghum, and other foods such as peanuts, are commonly **contaminated** with cancer-causing fungal poisons called mycotoxins. One of them, called aflatoxin, just happens to be the most carcinogenic substance on earth.

He says we consume, on average, from 0.15mg to 0.5mg of aflatoxin per day. So it is not sugar alone that is the problem in our western diet, but fungal toxins that are found in the sugary grains. More than once has Kaufmann interviewed a caller (on his health talk show) who absolutely craved **peanut butter** and **popcorn** just prior to their diagnosis of cancer.

Kaufmann feels that *antibiotics* may play a role in this. Antibiotics destroy the normal, protective gut bacteria, allowing intestinal yeast and fungi to grow unchecked. Resulting in *Candida* overgrowth. This can lead to immune suppression, symptoms of autoimmune diseases, or even cancer.

"If the onset of any symptom or disease, cancer included, was preceded by a course of antibiotics," he says, "then look for a fungus to be at the root of your problem."

Cancer Strategy #7: Toxins (Including Genetically Modified Foods & Chlorine) Cause Cancer... Reducing Toxic Overload Vital For Eliminating Cancer

An eminent German oncologist says that cancer is caused by environmental toxins. Others agree. While there are obviously other issues, fungus, viruses, genetics, etc., the major change in the world that could have led to the explosion of cancer over the last 100 years has been the introduction of tens of thousands of chemicals into the environment. Chemicals that we had never been exposed to before. Ones that our bodies don't know how to handle.

They overwhelm the defenses of your body and cancer develops. Unfortunately, if industry and the government they control have their way, it may even become worse.

Biotech companies have been aggressively promoting the use of genetically modified food. It's a financial goldmine for

them. Unfortunately, there are several problems with genetically modified food. Even the scientists at the FDA resisted them till political pressure from the top approved it. Every independent study has shown problems with the eating of genetically modified food. Abnormal cell growth being high on the list. And no wonder.

Jeffrey Smith, author of Seeds of Deception writes on SeedsOfDeception.com:

"More worrisome is that the **"promoter" used inside GM foods** could get transferred to bacteria or internal organs. Promoters act like a light switches, permanently turning on genes that might otherwise be switched off. Scientists believe that this might create unpredictable health effects, including the **potentially pre-cancerous cell growth** found in the animal feeding studies mentioned above.

"Milk from rbGH-treated cows contains an increased amount of the hormone IGF-1, which is one of the highest risk factors associated with breast and prostate cancer, among others. Soy allergies skyrocketed by 50% in the UK, coinciding with the introduction of GM soy imports from the U.S."

Foods are not required to be labeled as GM foods. The only way to make sure you are not eating food that has been genetically modified is to eat organic food or food labeled non-gmo. Eating organic food will also reduce the amount of chemicals you are ingesting.

Types of toxins in your body

There are several types of toxic buildups in the body that need to be dealt with when fighting cancer. First there is **cellular toxicity** caused by the shunting of toxins into cells due to excess acidity in the blood, and the inability to release toxins in the cells for that very same reason.

Next is **heavy metal and chemical toxicity** coming from years of exposure to highly toxic heavy metals and chemicals. While many come from the environment, silver amalgam fillings, many vaccines and some other drugs put mercury and other toxins into our body. Most large fish have elevated mercury levels. Elevated levels of heavy metals disrupt the immune system, and *must* be dealt with when fighting cancer.

And then there is the **toxic buildup in the colon** of undigested foods and hardened fecal matter. Nutrient absorption is disrupted, and toxins sitting in that decaying mess are reabsorbed back into the body. This creates a constant stress on the immune system, and a further load on the body's detoxification systems. Colon cleaning needs to happen on the journey to good health.

The Chlorinated Water and Cancer Connection

Pathogens in water have led to many diseases. But did you know that what's put in your water to purify it may be causing your cancer (and heart disease)?

The French, with their lower cancer rates from consuming OPC's and resveratrol in red wine, have made red wine famous for its health benefits. There is another side to their lower cancer rates that most people don't know...

The French **do not** drink chlorinated water. They ozonate their water to purify it.

Does this make a difference? Absolutely.

"We are quite convinced... that there is an association between cancer and chlorinated water."

Medical College Of Wisconsin research team

We don't use chlorine because it's safe, we use it because it is *cheap*. We essentially still pour bleach in our water before we drink it. The long-term effects of chlorinated drinking water are disastrous.

According to the U.S. Council Of Environmental Quality, "Cancer risk among people drinking chlorinated water is 93% higher than among those whose water does not contain chlorine."

It may cause much heart disease too. Dr. Joseph Price wrote a highly controversial book in the late sixties titled *Coronaries/Cholesterol/Chlorine*, and concluded that nothing can negate the incontrovertible fact, that the basic cause of arteriosclerosis, heart attacks and stroke, is chlorine.

Dr. Price later headed up a study using chickens as test subjects, where two groups of several hundred birds were observed throughout their span to maturity.

One group was given water with chlorine and the other without. The group raised *with* chlorine, when autopsied, showed some level of heart or circulatory disease in every specimen, the group *without* had **no** incidence of disease. The group without chlorine grew faster, larger and displayed vigorous health.

This study was well received in the poultry industry, and is still used as a reference today. As a result, most large poultry producers use dechlorinated water.

When chlorine is added to our water, it combines with other natural compounds to form Trihalomethanes (chlorination byproducts), or THMs. These chlorine byproducts trigger the production of **free radicals** in the body, causing cell damage, and are highly **carcinogenic**.

"Although concentrations of these carcinogens (THMs) are low, it is precisely these low levels that cancer scientists believe are responsible for the majority of human cancers in the United States". *The Environmental Defense Fund*

Dr. Robert Carlson, a highly respected University of Minnesota researcher, sums it up by claiming, "**Chlorine is the greatestcrippler and killer of modern times!**"

Breast cancer, which now affects one in every eight women in North America, has recently been linked to the accumulation of **chlorine compounds** in the breast tissue. A study carried out in Hartford Connecticut, the first of its kind in North America, found that:

"Women with breast cancer have **50% to 60% higher** levels of organochlorines (chlorination byproducts) in their breast tissue than women without breast cancer."

It is not just *drinking* chlorinated water that is the problem.

Up to two thirds of our exposure to chlorine is due to **inhalation of steam and skin absorption while showering**. A warm shower opens up the pores of the skin and allows for accelerated absorption of chlorine and other chemicals in water.

The steam we inhale while showering can contain up to *50 times* the level of chemicals than tap water due to the fact that chlorine and most other contaminants vaporize much faster and at a lower temperature than water. Inhalation is a much more harmful means of exposure since the chlorine gas (chloroform) we inhale goes directly into our blood stream.

"Showering is suspected as the primary cause of elevated levels of chloroform in nearly every home because of chlorine in the water."

Dr Lance Wallace, *U.S. Environmental Protection Agency*.

If you take showers using chlorinated water and are dealing with cancer, clearly installing a **shower filter** to dechlorinate your shower water makes good sense.

Other Toxin Sources

In the process of eliminating as much toxic exposure as possible, you need to limit exposure from the chemicals in your carpets and walls of your home. Unless you've already taken special efforts to have a chemical free house, **formaldehyde** and many other chemicals have been outgassing toxic fumes in yours for years. Hulda Clark, in her books on fighting cancer and other diseases, recommends that all carpeting be pulled up, paneling and walls taken out

and replaced, and so on - if you want to beat cancer. Pretty drastic stuff. A less overwhelming solution would be to get a photo catalysis air cleaner. Using technology developed by NASA, it puts out molecules that interact with VOC's, the chemicals put out by carpets, etc. and changes them into harmless carbon and water molecules.

Personal care items like shampoo, conditioner, or skin lotion often contain ingredients that *add* to the overburden of chemicals your immune system must get rid of. Try to use as natural and pure personal care items with as few chemical listed in the ingredients as possible to reduce that overload. The less overwhelmed your immune system is, the better it can fight the cancer.

The buildup of toxins in your body reduces cell oxygenation and toxins will damage DNA, causing cell mutation. The key is to protect your cells by making sure you are taking plenty of antioxidants, stop drinking chlorinated water or taking showers in it, and get rid of the buildup of toxins in your body using safe and natural detoxifiers.

There are three types of detoxification to be done, cellular detoxification, intestinal detoxification and a more general body detoxification in which we will include heavy metal detoxification. There is some crossover here, any detoxifier will work in more than one way. And remember, it is very important to alkalinize the body as that *must* happen before a great deal of detoxification can be done.

Cancer Strategy #8: Free Radicals Promote Cancer By Damaging DNA... **Free Radical Scavengers Protect Cells From Damage**

One of the causes of cancer is excessive free radical damage in your cells that harms your DNA and results in some cells **mutating** into cancerous cells. Every chemical and toxin in you body causes free radical damage. The carcinogenic ones cause even more. Combined with high acidity and low oxygenation, you've got a prescription for cancer.

Another reason we have too much free radical damage and too much cancer is that processed foods generate more free radicals than whole foods, and have fewer nutrients to act as free radical scavengers to help protect you from those free radicals. On top of this, you are exposed to **70,000 chemicals** -- 20,000 of which are known **cancer-causing** agents. These *all* cause free radical damage.

Cancer Strategy #9: Low Levels Of Enzymes Always Found In Cancer... **Use The Right Enzymes To Kill Cancer Cells**

Researchers have noted for years a correspondence between low enzyme levels and cancer. In fact enzyme therapy has been used with **good results** against cancers in Europe, and by some doctors in the United States. To literally digest cancerous cells.

In the early 1900's a doctor in Wales, John Beard discovered that pancreatic enzymes destroyed cancer cells. Making some brilliant observations, he deduced that cancer cells come from stem cells that become uncontrolled stem cells. He noticed that the fetal pancreas starts working and secreting enzymes at the 56th day of gestation. Fetus' don't digest anything till they are born. Beard wondered why did the pancreas in the fetus start working so early? He noticed that the day the pancreas started producing enzymes was the day the placenta stopped growing. The enzymes stopped this rapid growth.

His theory was that many placental cells remain in our body. When these misplaced placental cells get lost and can start growing, turning cancerous, if you don't have enough pancreatic enzymes. (By the way the medical community thought he was crazy. Now a hundred years later, technology has confirmed there are these cells.)

In 1911 he tested pancreatic enzymes for stopping cancer in mice and it worked. Naturally and unfortunately, he was blackballed and died in obscurity. Decades later Dr. Kelly read about his work, and cured himself of cancer using pancreatic enzymes and started treating and curing many cancer patients using pancreatic enzymes. Dr. Gonzales, sent to investigate Dr. Kelly, liked what he saw so much that he also treats cancer using pancreatic enzymes.

The major reason enzymes levels become depleted is that we eat mostly processed, irradiated and cooked food.

The digestive system was designed to process **raw food**. Raw food, when it is picked ripe, has enzymes in it that help break down that food in the upper stomach where it sits for 30 to 45 minutes. The enzymes in the food predigest that food. Then in the lower stomach the pancreas excretes more enzymes.

When you eat cooked, irradiated and processed foods, the enzymes have been killed; the food does not predigest in the upper stomach. So when it reaches the lower stomach *two things happen*. The pancreas must make extra enzymes to try and break down the food.

And often the food is only partially digested.

The pancreas, after decades of overworking, eventually is no longer able to produce an adequate supply of enzymes. So you develop **low enzyme levels** of all types of enzymes, and your body *cannot* naturally kill cancerous cells using enzymes.

In addition, food that is not completely digested all too often makes its way into the bloodstream. Especially if you have leaky gut syndrome from candida overgrowth. This partially digested food is treated as a toxin, and the immune system has to get rid of it. This puts an additional strain on the already overworked immune system.

Studies have found that the immune system treats the ingestion of cooked food as a toxic poison, causing a jump in white blood cells in an attempt to get rid of it as fast as possible.

Taking a good quality enzyme supplement with meals, one that has high levels of protease to digest protein, lipase to digest fat, and amylase to digest carbohydrates helps break down food in the upper stomach. So that the pancreas doesn't have to produce extra enzymes. Food is better digested. You also need to take **Betaine HCL** and the **HCL Activator** to help break down protein.

Also, it is important to take enzymes on an empty stomach. A stack of research shows that enzymes, when taken in this manner, will go into the bloodstream and clean it up. **And in the process may digest and kill cancer cells**. Take both a plant based digestive enzyme along with pancreatic enzymes high in Trypsin and Chymotrypsin for the best results. Take both with meals for improved digestion, and on an empty stomach to get into the body.

This will also unstick clumpy red blood cells. Sticky, clumped up red blood cell clusters clog up capillaries and reduce circulation. So that cells cannot oxygenate properly. Which as you have gathered by now, contributes to cancer.

Cancer tumors produce a thick fibrin protein to help protect them from the immune system. This also helps to stick the cancer tumor to wherever it is.

Enzymes in the bloodstream can digest and dissolve the fibrin coating. Large amounts of enzymes would need to be taken, and they would need to be enzymes high in protease, Nattokinase or other fibrin digesting enzymes like Serratiopeptidase to break down the fibrin.

Cancer Strategy #10: Cancer Cells Have Low Subtle Energy Vibrations... Raising The Vibratory Level In The Body Disrupts Cancer Growth

Conditions that lead to cancer can also be viewed energetically. In fact, low energetic vibrations may well set the stage for the development of cancer. Cancer cells have much *lower* levels of vibratory subtle energy. For a cell to turn cancerous, its vibratory energy must be low. Raising the energetic level of the body alone has helped some people conquer cancer.

You can raise the vibratory levels of your cells. One way is to **drink fluids that have been energized**. Liquids vibrate at the rate fluids near them are vibrating. Drinking high-energy water will raise the energetic level of cellular fluids. The higher they are raised, the harder you make it on cancer.

Electromagnetic Fields (EMF's) are another possible cause of cancer. You are exposed to them by electronic appliances. Cell phones, computer screens and microwaves are among the biggest offenders, but even the clock radio by the side of your bed is putting out unhealthy levels of EMF's for a foot or two. Your car puts out quite a bit of it.

Radiation from cell phones can literally *eat holes* in your blood brain barrier, which functions to prevent toxins from entering the brain. When it is full of holes, toxins get into brain, causing much damage. **A Swedish study has found that heavy users of cell phones had a 240 percent increase in brain tumors on the side of their head that the phone was used on.** The study defined 'heavy' use as more than 2,000 total hours, or approximately one hour of use per workday for 10 years.

There are two ways you can deal with EMF's You can try to avoid exposure to them, or you can wear or use an energized product that counters the effect of that radiation to your body's energy field. For example, you can choose to not use a cell phone or any portable phone, or you can put a good cell phone energy neutralizer on the phone to neutralize the radiation.

Geopathic stress has been implicated by many alternative health practitioners in Europe as a cause of cancer. Simply put, geopathic stress is unhealthy energy coming from the earth. One cause is underground streams that creates friction that produces the wrong type of energy.

Two developers of energized products both had cancer that would not resolve until they were told to check and see if they slept over geopathic stress. They did, changed their sleeping arrangements, and then were able to get well. A study in England noted that gypsies, even though their diets and smoking habits were poor, were not near as likely to get cancer because they were always moving so were not likely to have been sleeping in an area of geopathic stress for years at a time.

Cancer Strategy #11: Psychological Stress Leads To Cancer... **Resolving Stressful Issues Vital For Success Against Cancer**

Dr. Hamer, a German oncologist, developed cancer in the late 70s, shortly after his son's untimely death. Theorizing there was a connection between the stress of his son's death and his development of cancer, he began to investigate his cancer patients' histories, and found that they too had experienced an unexpected shock or trauma shortly before their cancer.

Next, he analyzed his patients' brain scans and compared them with the corresponding medical and psychological records. Amazingly, he found a clear correlation between shocks, specific areas of the brain damaged by certain types of shocks, and particular organs where cancer developed depending on the type of trauma.

Based on over 40,000 case studies, over a number of years he developed a theory that every disease originates from a shock or trauma that catches us by surprise. The moment the unexpected conflict occurs, the shock strikes a specific area in the brain causing a lesion (called Hamer Focus), visible on a brain scan as a set of sharp concentric rings in MRI's. The brain cells that receive the impact send a biochemical signal to the corresponding body cells causing the growth of a tumor, a meltdown of tissue or functional loss, depending on which brain layer receives the shock.

He theorized that specific conflicts are tied to specific areas in the brain because, during evolution, brain areas are programmed to respond instantly to conflicts that could threaten survival. For example, let's say that a woman is walking with her child. Suddenly the child runs into the street, and is struck by a car. The moment a mother sees her child injured she suffers a mother-child-worry-conflict, and in a split second the special biological program for this particular type of conflict is switched on.

This always impacts in the brain area that controls the function of the breast glands. This is because, in biological terms, an injured offspring recovers faster when it receives more milk, extra milk production is immediately stimulated by increasing the number of breast gland cells. Even if the woman is not breast feeding, this event is still triggered. As long as the child is in the hospital, the breast cells will keep dividing and multiplying, forming what is commonly called a glandular breast tumor. When the child recovers, the mother will start to heal.

So you correct the problem that is causing the stress, like getting a new job if you have been fired, or a new spouse if there has been a divorce. Or you psychologically learn to deal with the issue so that it no longer is causing stress. Either is vital for healing from cancer. Done in conjunction with conventional treatments, the results have been exceptional.

Dr. Hamer suffered over the years for his controversial theories. One prosecutor pulled his records, and went through patient after patient. Out of 6500 patients with terminal cancer, 6000 were alive. Pretty impressive.

Cancer has many more causes than only being initiated by stressful events. But it does look like they are much more important in initiating cancer than anyone had previously thought. What is undoubtedly true is that stress knocks down the immune system significantly, which could certainly translate into accelerated growth of cancer cells. Continued stress from unresolved traumatic events *must* inhibit your body's ability to fight cancer.

Fortunately, there are now ways of dealing with, and releasing, events and problems that cause stress which work much faster and more effectively than traditional psychotherapy.

What The Medical Industry Won't Tell You About Treating Cancer

There was a woman whose daughter was in the advanced stages of brain cancer. She asked her oncologist if it was ok to give her daughter a superfood called blue green algae. Her doctor told her that it was no problem, that in fact a number of his patients had used that supplement with success in fighting cancer.

Naturally she wondered why he didn't tell her about this product a year before when they came to him.

Unfortunately, he couldn't tell her about this or any "natural or alternative health therapies" and stay employed. **Insurance regulations would preclude such suggestions.** And he could get into administrative trouble by recommending natural, non-drug treatments for cancer.

His advice is controlled by a large medical industry that makes mega money off expensive cancer fighting drugs and treatments. An industry that doesn't look favorably on natural supplements or other cancer treatments as they cannot patent them to make high profits.

Fifty years from now, the current conventional cancer treatments used by doctors will on the whole be viewed in the same light that we view the old medical practice of using **leeches** to cure illnesses.

Chemotherapy and other treatments *damage cells* and tear down and weaken the immune system. But the problem in the first place is that your immune system is already weak, and that your cells are already damaged.

Even if tumors do go into remission, these treatments will have damaged other cells, which are more likely to turn cancerous. The immune system, unless it is supported by supplements and diet to help it recover, will be in **worse** shape then ever.

While it may have taken decades for cancer to develop the first time around, the second time usually takes a year or two.

Another reason why doctors ignore sensible, safe and healthy treatments for cancer, and recommend costly and illogical treatments instead -- is human nature. They advise and prescribe what they know. Just what we all do.

You go to them and you get what they know. You assume they will do the best they can for you, while in fact they only do what the system teaches them, promotes and allows them to do.

A Doctor's Shocking Closed-Door Confession ...

In a survey of 79 oncologists from McGill University Cancer Center in Canada, 64 said they would *not* consent to treatment with Cisplatin, a common chemotherapy drug, while **58 oncologists** said they would reject **all** the current trials being carried out by their establishment. Why? "The ineffectiveness of chemotherapy and its unacceptable degree of toxicity." Philip Day, *Cancer: Why We're Still Dying to Know the Truth*

This information is shocking to say the least. But consider this ...

Doctors today are not very different than they were 150 or 200 years ago. Back then the common practice was for

interns and doctors working on cadavers to walk down the hall to deliver a baby *without* washing their hands. Many women died from the subsequent infections.

Finally a doctor in charge of a clinic figured out what was happening, and had them wash their hands. The infections stopped. When he published his results, **the medical profession was outraged**. Good doctors could not be the cause of something like this. The doctor was ostracized and fired.

He went elsewhere and repeated the experiment. Again, deaths dropped. Again he announced the results, and again the medical profession rose up against him. The end of the story was, he lost everything, went insane from the tragedy of it all, and eventually killed himself.

Bottom line: Don't expect a doctor working inside the system to buck the system. The risks are too great.

It is not all gloom and doom with chemotherapy. For two decades Dr. Perez Garcia has been using a treatment he calls Insulin Potentiation Therapy (IPT). It consists of giving a patient a dose of insulin followed by a tiny dose of chemotherapy.

Cancer cells have 15 times more insulin receptors than normal cells. The insulin dose helps to target chemotherapy into cancer cells because they have so many more insulin receptors. So small doses of chemotherapy can be used that cause little harm to normal cells. With Stage 1 or 2 cancer, IPT is, I read, about 80% successful, mixed results for more serious cancers. So after two decades of use, how many doctors were using IPT in the USA? 29. Hard to believe isn't it.

Many oncologists make much of their income from the markup they make on chemotherapy drugs, and small doses don't make big money.

You don't have to avoid chemotherapy or radiation therapy to receive benefits from natural products and supplements. In fact, nutritional supplements are quite useful when used in conjunction with chemotherapy, radiation therapy and surgery. The best ones work to support the body so that radiation and chemo will actually work better. In addition, the immune system will be stronger, and better able to keep cancer from developing again.

It makes sense, doesn't it, to supplement your chemotherapy or radiation treatments with other options that support your body and actually help it be much more effective in fighting cancer.

Many people *only* do chemotherapy and radiation therapy, and do not also support their body's fight against cancer in other ways. All too often, the cancer is not destroyed, or comes back a short while later. And no wonder...

If the immune system has been wiped out by chemotherapy or radiation, cancer is bound to overrun the body even faster than before.

Seeking other options *after* the doctors throw in the towel and say there is nothing else they can do, is necessary. It makes more sense to correct the underlying causes of cancer early on when the odds are much better. Especially with natural supplements that can do no harm.

Natural supplements won't hurt you. They can only help. *They won't make chemotherapy or radiation therapy less effective*. Instead they amplify the power of whatever cancer treatments you may be doing by attacking cancer in other ways, or supporting the health of the body and immune system. For example, research studies have shown that when you oxygenate cancer cells, radiation therapy is more effective at killing those cells. And beta glucan, when used in conjunction with some types of chemotherapy, produced marked improvement over chemotherapy alone.

Certainly some people beat cancer using chemotherapy or radiation therapy. But look at the number of deaths from cancer, and you see that to many people don't. Not using natural supplements to fight cancer is like being in a life and death struggle, and choosing to fight with one hand tied behind your back.

Hit cancer hard. This is one fight you don't want to lose.

The more support you give your body, the better you will be at handling any possible side effects of chemotherapy and

radiation therapy, and the better your body will be at fighting cancer. A natural approach to cancer is based on making your body *healthier*. To strengthen a depleted, worn out, under energized immune system that is not capable of killing cancer cells as fast as they are multiplying.

There are so many supplements that have anti-cancer properties, the choice of deciding what are the best to use can be overwhelming. This report will help you filter out the good or bad from the great. Besides taking into account feedback from users, speaking with manufacturers and industry insiders, we use **energetic testing** to help determine what products are important to use, and which may be a waste of time and money. The testing is subjective so we check and re-check the results to make it as accurate as possible. What it does is give you a general ballpark idea of what may be no good and what may be really good. The scale goes up to 1000, the higher the number the more healing power the supplement or procedure has. The numbers don't mean anything in and of themselves. They just enable a comparison of various supplements.

We gear this to what works best for cancer. Currently the best products we have found are a few in the 500 to 600 range. There are a few more in the 400s and more still in the 300s. Poor quality products, which are the vast majority of vitamins and supplements sold, will be in the 30s or 40s. Something less than 100. Products that may sound like they should be great, but are just good, will be in the 100s. In the 200s products are starting to get quite good, but they are not great. We will give you the numbers we come up with throughout this report to better enable you to decide what might be worth trying and what might not.

Cancer Strategy #1: Kill Cancerous Cells

This strategy covers some of the strongest cancer cell killers you'll come across that are completely safe to healthy cells. They are all new and unique, so neither your doctor or your alternative health professional is likely to have heard of them. By the way, while the feedback from users of Zeolite Enhanced now with DHQ has been superb, with many people saying that it alone got rid of the cancer in their body after they had been sent home to die, it is not the best supplement covered in this report. Though we have heard so many good stories about it, we feel it should always be part of a cancer fighting protocol. Let's first cover in general the area of cancer killers.

When chemotherapy and radiation therapy are used to kill the cancerous cells, they harm healthy cells in the process. In fact, they can kill people faster than the cancer would have done. This report focuses on natural supplements that do a good job of killing cancerous cells, but don't cause harm to your body. A few natural supplements suggested for fighting cancer may have the potential to be toxic to the body, and should probably just be used in conjunction with a naturopath or alternative doctor. These include cesium, artemisia, and B17. In this report you will learn only about completely safe cancer supplements that can be used with no supervision.

You may well ask why, if a safe and natural product is able to kill cancer, your doctor doesn't recommend it. Of course, he probably doesn't know about it, but even if he did, he's not likely to use it.

This is because of the nature of the medical/drug industry. Doctors use and recommend drugs that are approved in a process that costs hundreds of millions of dollars. Because of this high cost, the drug companies will only make drugs that can be patented. That way they can sell them for huge mark-ups and have no competition. Unfortunately, because these drugs have been altered from nature, which they must be to be patented, they become toxic in your body, with harmful side effects. Your body can handle natural foods and herbs, the altered ones have toxic side-effects because your body can't handle them. This is the reason why the biggest cause of deaths in the US is from medical drugs.

Because of the cost of getting approval for drugs, no company would ever take an unpatentable natural product through the drug approval process. Consequently natural supplements aren't tested in multi-million dollars trials so can't be approved by the FDA to be used for cancer or whatever other health condition they may help. (Not that the FDA would approve a natural supplement that threatened the drug companies they are in bed with.) As they are not approved, doctors, or at least most doctors, won't use them, and most don't even know about them.

Alternative doctors not blinded by the medical/drug industry, find that a comprehensive approach to fighting cancer using powerful supplements along with chemotherapy, works much better than *only* using drugs and other treatments that harm the body. But for now you have to turn to other resources to find safe cancer killers. One of the best has proven, through anecdotal use, to be a special liquid zeolite.

When fighting a cancer, you are always most likely to succeed if you hit it in many different ways. Many many people have got rid of cancer using one or two products only, but some people have a tougher cancer or condition and must do much more to be successful. If you have time on your side, you can always try one or two and see if you are able to beat the cancer with just those. If you find this is not working for you like it did for some people, with good improvement in a month or two, take it as a warning that your body needs more support than you have been giving it. And use more anti-cancer, health promoting supplements to turn your health around.

if you are not inclined to take a bunch of nutritional supplements, or can't afford to get but one or two, make sure that that one of them is Zeolite Enhanced - Now with DHQ.

We say this after seeing and hearing many testimonials where someone only took Zeolite Enhanced, or Zeolite Enhanced and another product or two, and got over a tough cancer. So while it makes the most sense to take a lot of different products to maximize the chances of success, don't give up hope if you can only get one product. It could well get the job done.

For example, Theresa was giving Zeolite Enhanced only to her sister with advanced small cell lung cancer that had spread to the liver. Small cell lung cancer, if you are not aware of this, is one of the most aggressive and deadly cancer. And spreading to a major organ like the liver didn't make likelihood of survival any better. Yet after several months of only using Zeolite Enhanced, the cancer was completely gone. She said, "The doctors call it a miracle, but we call it Zeolite Enhanced!"

In July 08 I was told that my PSA was 28. A Biopsy was performed which confirmed that I had a most aggressive prostate cancer (4+5=9) on the Gleason score, bone scan plus MRI followed. My scan and MFI showed that my bones were clear but the cancer had progressed into my lymph glands. The doctor recommended that I start hormone therapy before starting chemotherapy, after 3 months of the hormone therapy. On looking on the internet I came across Zeolite Enhance, this I have been taking since the beginning of August at a dose of 120 drops per day. Yesterday the 29th Oct. 3 months after starting to take zeolite I had an appointment with my doctor, only to be told that my PSA was now 4.1 and that I didn't need any further treatment except to continue with the 3 monthly hormone injections with a revisit to the doctors in 6 months. If you wish to use my name and address, please fill free to do so! Yours, Mike Player

Zeolite is a unique volcanic mineral that is highly effective at destroying cancer cells. In fact, results have been so impressive, anyone fighting cancer or wishing to prevent cancer should be using zeolite. It comes in two basic forms, a liquid zeolite, and a powdered micronized zeolite.

Part of what zeolite does is to work on a couple of the basic issues in cancer. It is a powerful detoxifier, and improves the alkalinity of your body. More importantly though, zeolite is a cancer killer as it can, when pulled into cancer cells, **activate the P21 gene which tells a cancer cell to die**, or literally **destroy the nucleus of cancerous cells**.

Zeolite works exceptionally well at fighting cancer as an informal 14 month study several years ago showed.

65 people with mostly stage 4 cancer, who had a prognosis of about 2 months to live, were given a type of liquid zeolite. At the end of the study, 51 people were cancer free and six more were alive, but still fighting cancer. This is a 78% cure rate for terminal cancer, an incredible 89% survival rate.

This study was actually similar to what happens in the real world. There was no control as to what drugs people were taking, or what other protocols they were on. Every person in the study basically answered an ad in a newspaper that said, "If your doctor has given up on you, call us." So they were mostly people who had end-stage cancer, whose doctors had sent them home to get their affairs in order.

Throughout the study, many patients used some sort of adjunctive treatment. For example, a lung cancer patient was told to go home and get his affairs in order. After three months on this liquid Cellular Zeolite, he was feeling much better. He went back to his oncologist, who suggested that he was strong enough to undergo more chemotherapy and radiation. So he stayed on the Cellular Zeolite, but he also went on chemo

and radiation at that point.

Not bad for a bunch of folks sent home to die. For several years now liquid zeolite has been used extensively by individuals for cancer.

Testimonies have been impressive.

“Hi, I ordered the zeolite for a 20 year old girl with lymphoma-last stage, who never had chemotherapy. Today is the 7th day since she is on zeolite and the progress she is having every day is amazing. Because she was in very bad situation it was my decision for her to be given 25 drops and a few other products, but as I have said from a very ill girl - just for seven days she is now a girl looking forward in her life and making plans. Thank you so much...

With regards and many thanks”

Lina

My sister began using the following products on Monday 25th of August, Elixirs, zormus, prp factor, liver balance plus, oxy e and zeolite. Her blood tests on the 28th of August showed a great improvement with her liver functioning. She had done a blood test the previous week which had pretty bad results. Hopefully the products are working.... I will keep you updated on her progress.”

Dayan

Great Great news my mum has had confirmation that her lung cancer has gone. Thanks to everyone a miracle has happened. I will now cut the supplements down, and the remaining supplements I will cut the dosage.

Kind Regards,
Margaret P

(She was using Zeolite Enhanced and about 20 other products suggested in this report for just a few months.)

“My dog was diagnosed in August as having a malignant tumour. He had accidentally bumped his head about two weeks earlier, & a large lump had quickly developed. The vet more or less wrote him off, as his insurance would not have covered the large sums of money involved in providing treatment. Also, he's about ten years old, a large dog, & I really didn't want him to have to endure the upset of receiving scans, radiotherapy, etc. In my desperation to help him I searched the internet for something that would treat cancer. I soon found a site which pointed me in your direction. So, I started to treat him with Liquid Zeolite with DHQ on 3rd September. For a few weeks it was difficult to see any difference in the tumour. Although his arthritic condition improved, as well as his chest problems.[He had begun to cough & splutter during the summer.]

Within the last few weeks however, it has become obvious that the tumour has started to shrink. Although it's difficult to be accurate, I would say that it has shrunk by as much as half. So hopefully, it will be gone by Christmas. I have been giving him 25 drops four times a day.... Perhaps you think that I'm overdosing, but the cancer is so virulent that I thought that a high dosage was best. I have been telling everyone I meet about liquid zeolite, because I can see that it really works. Hopefully, by making people aware of it lives will be saved. I just wanted to let you know what has happened, & to thank you for all your help. I will let you know of any further progress.”

John H

I am delighted to tell you that I have received my order in the post this morning. I am so relieved as I realize that Christmas post could have caused the delay! My father is taking the medication following a course of radiotherapy for inoperable throat cancer. Over the last few days we have noticed that the huge lump on the side of his neck has almost disappeared and yesterday he was able to eat solid food for the first time in a few weeks. We are continuing to give my father the treatment and will update you on his condition. Thank you for your kind and attentive service.

Regards,

Janice P.

Janice's father was using Zeolite Enhanced with DHQ and the Koch formulas.

While Zeolite Enhanced with DHQ can do wonders on its own, you are best off to use a comprehensive approach that involves numerous ways to correct the underlying conditions that caused the cancer.

Here's how zeolite works.

Zeolite is a negatively charged volcanic mineral that naturally attracts positively charged toxins to it, (all toxins are positively charged) and traps them in its cage-like structure. It absorbs toxins. Zeolite's ionic charge turns slightly positive when it is full of the positively charged toxins it has absorbed. Normal cells have a neutral charge while cancer cells have a slightly negative electrical charge. So the now slightly positively charged zeolite molecule is attracted to cancer cells. Once inside the cancer cells, it does a couple of things that kill the cancer cells.

1. **Zeolite activates the p21 gene. The function of the p21 gene is to tell the cancer cell to die.** P21 acts as a tumor suppressor as it controls cell cycle progression. The activation of P21 appears to halt the growth of tumors by directly suppressing growth signals. **In in-vitro studies, all cancer cells tested were destroyed in 72 hour.** There are no side effects because it specifically targets cancer cells as it is not attracted to normal healthy cells.
2. Another thing can happen once zeolite is pulled inside a cancer cell. The tri metallic part of the zeolite may **destroy the nucleus or the cell or the cytoplasmic organelles.** Some cancer cells are destroyed in an outward burst of the cytoplasm. In other cases cells are destroyed when their wall and membrane collapse after the nucleus is destroyed. Most often, after the nucleus and the cytoplasm are destroyed, the entire cellular contents dissipate into the surrounding environment. The membrane of these now dead cancer cells remain intact, but no cellular structures are left.

Again, because of its ionic charge, zeolite is attracted to cancer cells only. It does not get into ordinary, healthy cells.

More remarkable results....

"I can't thank you enough. I went into this Christmas thinking it would be the worst ever, but because of you I have had the best Christmas I could have ever wished for. Thank you.

"My father went for his monthly check up on Friday 23rd December 05. The doctor greeted him with a smile on his face from ear to ear. He told my father and mother to sit down because he had some good news. He said that the cancer had receded at a remarkable rate. He just could not believe it. He said that he should not worry anymore, and if things went on like this then he would make a full recovery. The Doctor kept using the word remarkable!!! My father has only been taking the liquid zeolite for two weeks and the results are just a miracle.

"Thank you, thank you, thank you."

Glenn

"Jeff and I went to Emory yesterday, the 29th for his follow up visit. He had gone from a 12,000 tumor marker down to a 10.2 and they scheduled him to come back in three months for his check up, not every six weeks.

He and I would like to thank you so very much for all your help and recommendations. You have been an answer to many, many prayers. God has blessed you with information that needs to be shared with so many other people around the world. Thanks for all you do and the very much needed help you have provided.... Thanks again, our lives will never be the same !!!" Jennifer J.

(He had used for about one month Zeolite Enhanced, the Methylglyoxal Combo and a couple of the Elixirs.)

Again, while these reports of very quick turnarounds are most impressive, most people do take longer. There are many many people who have got over their cancer while using zeolite. Certainly the more cancer there is in the body, the longer it may take as it will require more zeolite to kill all the cells. While other issues may need to be dealt with, zeolite has proven itself to be at the forefront of the cancer fighting supplements. It also takes a load off the liver and kidneys.

Ammonia is a toxin that has no place in a healthy body. Thousands of people with liver and kidney disease die every year from too much ammonia in their blood. The average person can handle low levels of ammonia in their blood, but even a low level adds stress to the immune system, and compromises health.

Most ammonia in the body forms when protein is broken down by un-friendly bacteria in the intestines. It is also produced by parasites, yeasts and molds. These organisms produce ammonia both as a waste product, but also as a mechanism to keep their host (your body) in an unhealthy state. And as candida is almost always overgrown and infecting the whole body of someone with cancer, you may well have high levels of ammonia in your body.

A healthy liver converts ammonia into urea, which is then eliminated in urine. *A key benefit of dietary zeolite is its ability to remove ammonia directly from your body*, which means less stress on your liver and kidneys. A big bonus for your health. Of course, reduced ammonia is also a bonus for healthy digestion, pathogens and parasites are weakened, and beneficial bacteria can better recolonize.

For this reason the use of dietary zeolite may be very helpful if your liver is not working properly. Ammonia that remains unprocessed because the liver is not working up to par can enter the bloodstream and invade the central nervous system, causing many dangerous symptoms. Even your brain can be affected. In advanced cases of liver disease, for example, the ammonia may cause at first a mild mental aberration which can progress to coma, and ultimately, death. Increased levels of ammonia in the blood are characteristic of liver failure.

Zeolite Enhanced with DHQ

Zeolite Enhanced is a frequency enhanced liquid zeolite, that has been, ever since it was developed, the most potent liquid zeolite supplement available. And much better than any powder or capsule. Bar none. Not because it is specially cleaned or activated, as one major brand touts. That cleaning doesn't help the zeolite get into cancer cells. Not because it has humic or fulvic acid as other brands tout, though it does indeed contain humic acid. Humic acid or fulvic acid both enhance absorption, but don't help zeolite get into cancerous cells.

And getting the zeolite into the cancer cells is what you want. That's where zeolite needs to get to, to kill the cancer cell. What sets Zeolite Enhanced above all other zeolites, is that it has been *energized* or imbued with special vibrational frequencies 8 or 9 different ways that have three anti-cancer activities, all equally important.

1. The energetic frequencies enhance the zeolite's capability to be attracted to cancerous cells. So you get more zeolite to those cells. Making Zeolite Enhanced more effective.
2. These special frequencies improve the ability of the zeolite to enter cancer cells. And that's the name of the game when you are fighting cancer with zeolite. You see, these special vibrational frequencies send messages to cells, influencing what they do. They communicate with your cells. The frequencies in Zeolite Enhanced influence cancer cells to take the zeolite into the cell.
3. Finally, the specific frequencies that energize Zeolite Enhanced are able to kill cancer cells on their own. Cancer cells have a low vibrational frequency but they naturally must try to match or entrain to the high frequencies in Zeolite Enhanced. This ends up killing the cancer cell because they don't operate at those frequencies. The same frequencies make your healthy cells stronger.

Zeolite Enhanced has homoeopathically activated natural paramagnetic and diamagnetic substances

enclosed in the humic molecules along with the zeolite. These supply additional healing energies to the liquid.

Another big boost in healing power happened when Dihydroquercetin (DHQ), was added to Zeolite Enhanced. Energetic testing put the healing power for cancer of Zeolite Enhanced at a high **430**. Adding DHQ to the humic acid molecule increased its healing power to **561**. A very big jump.

DHQ *must* be mixed in with the liquid, actually put inside the humic acid molecule like it is with Zeolite Enhanced Now with DHQ, to get this large a boost in performance. One online company (that sells their inexpensive liquid zeolite to other online vendors too) has a liquid zeolite with humic acid that is frequency enhanced with M-Water. While this sounds good, in our energetic testing it comes in at **214** in terms of healing power.

They are now selling DHQ capsules with their liquid zeolite saying it is best to take them separately. Unfortunately, DHQ taken separately, not put inside the humic acid molecule along with the zeolite, doesn't seem to work near as effectively. Energetically, the healing power of the DHQ capsules taken with that zeolite liquid jumps to a **259**. A bit of an increase.

DHQ is a powerful free radical scavenger, and your body's principal fat-soluble antioxidant. Much of your body's free radical damage occurs in fats, such as cholesterol, and in fatty membranes of cells - exactly where Dihydroquercetin protects the body. As a major chain-breaking antioxidant (free radical scavenger), Dihydroquercetin halts the cascade of free radical damage in cells. About 40% of DHQ's direct action fighting cancer is its free radical scavenging ability.

Research on DHQ shows that it may be used to reduce metastasis of tumor cells from different malignancies, including carcinomas, lymphomas, and sarcomas. And in fact this cancer killing ability is about 60% of its benefit when it comes to fighting cancer.

DHQ does something else though. It's ability to condition blood cells, to make red blood cells softer and more flexible, improves circulation, and gets more zeolite to the cancer cells. (The frequency enhancing helps the zeolite be more effective at penetrating the cancer cells once it gets there.)

Zeolite Enhanced with DHQ comes in a one ounce, 30 ml, bottle, making it a better value than the 15 ml bottle of original liquid activated zeolite. By the way, it is easy to get confused by all the zeolite products on the market, each claiming they are the best. As a matter of fact, our energetic testing for their benefit in fighting cancer has most of them being about the same.

The **original activated liquid zeolite**, what we call Cellular Zeolite, with the cleaned out molecular structure, energetically tests at **320**. The cleaned out molecule will absorb more toxins, but that isn't of great importance since we want a zeolite molecule that is full of toxins because that is when it gets attracted to cancer cells. Zeolite molecules do not release any toxins they may have in them in the body. It take heat of around 600 degrees and an acid bath for that to happen. Not exactly the conditions in the body.

There is a Super zeolite that comes in at **312**, a Supreme one that is **328**. A Trinity liquid at **315**. These are all good, they do fight cancer well. They are just not as good. Even **Zeolite in the powder form** is a good cancer fighter. It comes in at **300**. As a pound of the powder is relatively inexpensive and is a month's supply, it is well worth adding on to a cancer fighting protocol.

Optimal results come, using Zeolite Enhanced with DHQ to fight your cancer, from using 3 bottles a month for an early stage cancer, and for an advanced stage cancer, use 6 bottles per month. *Up to 9 bottles a month is suggested if you have an end stage cancer.*

"Hello my name is Robert and I have ordered Zeolite Enhanced in March for my mother and her cancer disappeared and totally dissolved. I might order again to keep following up, and to help other people . Thank you." Robert C.

There is only one source for this energized Zeolite Enhanced – Now with DHQ. The supplier in the resources section of this report. We mention this because when Zeolite Enhanced was first frequency enhanced and got our recommendation as the best zeolite product, that online liquid zeolite company with

the inexpensive poorer in quality zeolite immediately claimed that their's was a frequency enhanced liquid zeolite. Which confused some people.

By the way, to help clear up more confusion, a bit more information. Another website has made the claim that frequency enhancing means nothing, that the original activated zeolite is naturally enhanced by nature, whatever that means. It may be, but it is not frequency enhanced with healing energies that have a proven track record of enhancing healing, and it doesn't have DHQ.

They also say that I am just a marketer pushing my particular zeolite brand. As a matter of fact, this information is not about pushing Zeolite Enhanced with DHQ. It's about giving you the best information I have, all of it, about what helps beat cancer and about how well it helps. There are four or five products in this report that are higher rated than Zeolite Enhanced with DHQ. Though for your money, this may be the best cancer fighting value.

Personally, there is no way I would recommend an inferior product just because it would be of benefit for me. Not when it comes to life and death situations. So I am all the time adding on new product recommendations and changing product suggestions as I find out about better products. This nurse, unfortunately, who is a network marketer, does not seem to have such qualms. She is stuck selling the same old products, some that I used to highly recommend, but dropped because better products came along. As a network marketer, that's about her only option. She is tied into a particular company and their product line. I search around to find the best products from anywhere. And as you will see, the list is quite extensive.

By the way, one person had been taking 75 drops a day of the original activated zeolite for months. She switched to 75 drops a day of the original Zeolite Enhanced. And experienced a healing crisis. The detoxification effects or cancer killing effects were so much more that she experienced fatigue, headaches, and feeling a bit tired for a few days. This is a clear indication that Zeolite Enhanced was more potent. You want to go through a healing crisis because that means you are healing.

Another woman noticed a change in the tumour in her breast, and an improvement in the way she felt, the day after she started on the Zeolite Enhanced. This is unusual. Most of the time you are looking at weeks or more to see a significant change. But it can happen fast and sometimes does.

You may also want to consider using **Zeolite Powder**. It doesn't get throughout the body as well as Zeolite Enhanced with DHQ, but you get a lot of zeolite into the body when you take the powder, and it does get to cancerous cells that might not otherwise have been killed as soon. In the colon, where most of it stays, it is an important cancer fighter to use.

Zeolite fights cancer several other ways.

It chelates and removes heavy metals, pesticides, herbicides, and other toxins from your body. It does this in a hierarchical manner. It is most attracted to lead, mercury, cadmium, arsenic and other heavy metals. Then chelates out pesticides, herbicides, plastics, and so forth. It also acts as a natural trap of viral particles which stops production of the viruses.

Because it traps toxins in its molecular structure, it detoxifies without overloading the detoxification system in your body. As toxins are an underlying cause of almost all cancers, taking zeolite on a regular basis is an excellent cancer preventative. Especially as it can kill any cancer cells that may develop.

In addition it traps free radicals in its molecular structure so it acts as a free radical scavenger too. It will also help to normalize body pH levels. And helps to boost the immune system as it increases levels of CD4 immune system molecules.

Zeolite Safety

There are some people who claim zeolite is neither safe nor effective. As you will see, they are misguided and somewhat confused. To look at it simply, there is no question that a high quality zeolite is remarkably effective against cancer. Years of use prove this. This particular type of zeolite has been used for many

years by humans for prevention of diarrhea so it has a history of safety and use behind it. So safe, it is on the Generally Listed As Safe list of the FDA. So what's the problem?

Confusion is caused because there are many different types of zeolite minerals. The specific type used in Zeolite Enhanced and other zeolites marketed for human consumption as a detoxifier has been proven to be safe. But some people don't do enough research and get confused, and give some bad advice. Or maybe like some doctors, some nutritionists don't like something new that interferes with their program. And zeolite is relatively new. But let's go into some details to further relieve your mind.

If you get scared off by bad information, and don't use zeolite in fighting your cancer, you are missing out on a remarkable anti-cancer agent.

One manufacturer of a powdered zeolite supplement claims that the heat and acid bath that goes into making the original activated liquid zeolite breaks down the zeolite so that heavy metals in the zeolite are released in the body. And that the powder is as well absorbed and is equally capable of getting into cells. He sounds convincing it is just not the case.

The liquid zeolite base used in Zeolite Enhanced with DHQ does not use this activation process of heat and acid. Of course, this is not really an issue because the original activated zeolite doesn't break down and release toxins in the body like this manufacturer claims. It has been used by detoxification clinics where they test heavy metal and other toxic loads before and after use, and their testing shows that it actually works very well at getting rid of toxins. So much for that false claim. And I've talked to chemists and folks who specialize in minerals and zeolite who say that it is much harder to absorb and assimilate the powder. Our feedback from talking to many people who have used both is the liquid works faster and better.

Another site writes, "Mineral crystals - both fibrous and non-fibrous - have a long history of causing disease. For instance, silica crystals - ordinary fine sand - cause lung cancer and a fast-acting deadly lung disease called silicosis that kills cement workers and miners." The type of zeolite used in zeolite supplements is *not* one of the types that cause lung damage, as the writer must well know. In addition, you are not breathing in the zeolite, which you have to do to get lung damage with some of the dangerous types of zeolite. You are taking it internally.

He then writes that there is "electron microscope data indicating that the crystals of this product have sharp edges." and that a principal of the company "states that these crystals enter the bloodstream (presumably through the small intestine), cells, and intercellular spaces, and that they are highly reactive." Again, studies quoted below and a history of use by humans and animals show no safety concerns, no matter what type edges it has. And it is highly reactive, but only to attracting heavy metals and other toxins to it, because of its ionic charge. Not to biochemical interactions as he implies in the questions below.

This particular form of zeolite used in both the liquid and powdered version we recommend, clinoptilolite, has been labeled 100% safe and non-toxic by the FDA for use in water filters. Just like with mushrooms, many types of zeolite are harmful, some aren't. There are more than 100 different zeolites. As an example, asbestos is a zeolite and causes cancer when inhaled as a fine powder. The zeolites we are talking about have been proven to be safe. It is a naturally-occurring non-fibrous clinoptilolite zeolite considered to be extremely safe and entirely non-toxic (even when inhaled).

A study published in 1993 concluded that "clinoptilolite type zeolite had no carcinogenic activity." (Tatrai E, Ungvary G. Study carcinogenicity of clinoptilolite type zeolite in Wistar rats. *Pol J Occup Med Environ Health*. 1993;6(1):27-34.)

Another study noted that the absence in this zeolite "of fibrous particles capable of producing hydroxyl radicals makes this zeolite sample non-toxic and noncarcinogenic, at least when applied orally." (Pavelic K, et al Natural zeolite clinoptilolite: new adjuvant in anticancer therapy. *J Mol Med*. 2001;78(12):708-20.)

Additionally, detractors suggest that there are no long-term animal or human toxicity studies. This is also incorrect. This type of zeolite has been used in water filtration, air purification, plant fertilizers and animal

feed for more than thirty years in the United States. Hundreds of published studies and articles outline its uses and benefits in humans and animals. A Med line search for "clinoptilolite" has no fewer than 140 articles on the uses of zeolite: removing heavy metals, improving the health of animals, treating viral disorders, removing fungal toxins, remediation of soil and treating cancer. In fact, there has been extensive testing done on this type of zeolite for use as an anti-diarrhea drug for humans.

They claim that the aluminum that makes up the structure of the zeolite molecule is a danger. Again, they get it wrong. The zeolite molecule is composed of silica and aluminum oxides, one AlO_4 four SiO_4 molecules. It is a crystal with a pyramid structure (tetrahedral) with the small Al-O_4 in the center of the four Silica molecules. The aluminum is trapped by the silica in this virtually indestructible particle. The aluminum is NEVER bio available.

Another website claims that research shows that zeolite is virtually insoluble in the body, and that if it did get into the body it would be the "scientific marvel of the year." Perhaps this writer ignored or was not aware of the research with one liquid zeolite showing that 60% of it was excreted through the kidneys - a clear indication that 60% of it was getting into the bloodstream. Another clear indication that even the micronized powder gets into the rest of the body is the fact that it has been sold for several years in the USA for hangovers as it rapidly detoxifies the toxins alcohol produces in the body. Rapid results with autistic children using liquid zeolite shows that it works in the brain.

Then the article goes on to criticize the research that went into the patent. Calls the stage 4 cancer study with the 78% cure rate one of the "coincidental anomalies". Wouldn't you like to have a 78% chance of being an anomaly. And claims that it couldn't really have happened with the way medical research is conducted. (This wasn't a standard medical study.) Finally it says that who knows if the people in the study really had 6 weeks to live. I agree with the writer entirely on this. It's got to be just a rough estimate. But does it really matter to you if it were 6 weeks or 3 months. People in the study answered an ad asking for people the doctors had given up on. And the liquid zeolite proved to be very beneficial to them.

There are claims that the clinoptilolite zeolite to be indiscriminate in what it adsorbs - that it will absorb nutrients. This too is incorrect. Dozens of published studies outline the reactivity series of zeolite, (what it absorbs). It has a preference for the heavier metals and larger compounds that carry a positive charge. The reactivity series starts with mercury (Hg). It is: Hg, Pb, Sn, Cd, As, Al, Sb, Fe, Ni and so on. Smaller compounds may go into the zeolite, but will not be trapped. In fact, several animal studies show that adding clinoptilolite zeolite to animal feed actually increases overall nutritional health of the animal rather than making it worse.

Clearly, Zeolite Enhanced with DHQ is a remarkable product for fighting cancer. Its non-toxic, a great detoxifier, helps to improve pH levels, and the vibrational frequencies in it greatly increase the effectiveness of the zeolite at killing cancer cells. If the drug companies had drugs that would come anywhere close to zeolite in effectiveness, they'd have every doctor prescribing them for cancer. There's no reason not to take this powerful cancer fighter.

It has been successfully used with chemotherapy and radiation though you must stop it three days before any chemotherapy that uses a heavy metal such as platinum or lithium and wait 3 days after the chemotherapy so that it will not pull out the platinum or lithium. These include Cisplatin, Carboplatin, and Oxaliplatin for the platinum based therapies. Lithium may sometimes be given in conjunction with platinum chemotherapy.

(Consult your oncologist on any medical question.)

Of course, Zeolite Enhanced – Now with DHQ must be taken in large enough quantities to make a difference. Again, if used on its own to fight cancer, use three to six bottles a month of Zeolite Enhanced with DHQ. Up to nine bottles a month can be used effectively for end stage cancers.

CANcore-1 and CANcore-2

Even stronger at killing cancer than Zeolite Enhanced with DHQ, is a new liquid called CANcore-1. The trace minerals in CANcore-1 are produced in such a way so that they are able to penetrate chaotic cells like cancer cells and disrupt them quickly. This causes a breakdown of the cancer cells and subsequently kills them. CANcore-1 is brand new, developed by a lab that has been creating state of the art high tech designer mineral supplements for years, using them for everything from killing viruses to improving cardiovascular disease.

Their latest creation is a real winner. Some early users have seen tumors disappear in weeks. In fact, it kills cancer cells so effectively, after we have observed its use for a while we made it one of the top cancer killers in this report, or anywhere. This is so new there are not yet a lot of stories to tell you about CANcore-1. What we do hear confirms that the small amount of liquid that makes up CANcore-1 does an utterly remarkable job of killing cancer cells. If you need to vigorously attend to your cancer, and can afford this combo, get it. Along with some of the less expensive top anti-cancer supplements. CANcore-2 contains two minerals which are required to be in the body for CANcore-1 to work most effectively. They cannot be put in the bottle of CANcore-1, otherwise the cancer cell destroying reaction which should take place in your body, takes place in the bottle. So take one bottle of CANcore-2 monthly just to make sure you have adequate amounts of these minerals.

*This combo of CANcore-1 and CANcore-2 is one of the few supplements we have found that energetically test over 500 when used in the suggested quantities. **565** - very close to being the best of any possible supplements or procedures to use to defeat cancer.*

For an early stage cancer, 2 bottles a month of CANcore-1 is suggested, which is 6 drops in the mouth morning and night. Along with 1 bottle of CANcore-2, 5 drops morning and night. (This is very easy to use, even for people who are not able to take anything orally.) For an advanced cancer use 3 bottles monthly of CANcore-1, 9 drops in the mouth morning and night. For end stage cancer increase to 4 bottles monthly, 12 drops morning and night. No matter how many bottles of CANcore-1 used, only 1 bottle of CANcore-2 is needed.

CANcore-1 only kills cancer cells. It does not aid in the detoxification of you body like Zeolite Enhanced with DHQ does, nor does it oxygenate and alkalize your body like some of the other top cancer killers we will cover lately. But for killing cancer cells, there are none better. Take CANcore-1 and 2 at least 30 minutes after taking zeolite, just to make sure the zeolite doesn't interfere with its absorption.

As with any cancer killing situation, supporting the liver, kidneys and lymph system is valuable to aid in getting rid of the dead cancer cells. Especially when using powerful cancer killers like CANcore-1. The following liquid supplement, using similar technology to CANcore-1 but with herbs, not only kills cancer cells, especially cells found in the blood, but it works to clean the dead cancer cells from your blood.

CANcore-4

This newly developed supplement is a cancer killer and blood purifier that also supplies excellent detoxification support. It comes from the manufacturer of CANcore-1 and makes use of the same revolutionary technology. But is completely different in size and what it does. Instead of taking just drops a day, with CANcore-4 you take ounces, or at least an ounce, a day.

Using fractions of molecules of herbs in a special process that makes them 100% absorbed and more potent than the whole herb or molecule would be, this quart of liquid is extremely powerful. So much so that we suggest starting with less than the suggested dosage and gradually increasing. Instead of taking a tablespoon or more two or three times a day, start out with just a teaspoon twice a day.

CANcore-4 is a blood purifier so works in the blood. One user was actually able to feel it moving through the blood. Whatever it was doing, it was powerful. It is such a strong cancer fighter in its own right, CANcore-4 is one of the highest rated anti-cancer supplements in this report. It contains a fractionated, proprietary blend of Ganoderma lucidum, Radix sopharoaf, Scullcap, Discorea, Caulis Ionicerae, Rhizoma imperatae, Herba Hedyotis diffusae, Angelica bark, Purella vulgaris linn, Taraxaci cum radice.

Energetically testing puts its cancer fighting power at a very high **520** when taken in the suggested quantities. Suggested use is 1 bottle a month for early stage cancers, 2 bottles a month - advanced stage, 3 a month - end stage cancers. Again, work up to the full dosage of CANcore-4 as you introduce it to your body.

Other detoxification organ support supplements include the frequency enhanced elixirs covered later in this report, an excellent immune system booster, Seasonal Rescue, also supports the liver and kidneys, UltraLiver8 and Liver Balance Plus both support the liver in different ways. Kidney Rescue supports the kidneys and Lymph Drainage supports the flow of the lymph system.

Our next cancer fighter kills cancer in a completely different way. It is called....

Zormus

Zormus is a homeopathic beryllium formulation designed to reduce pain, inflammation, fatigue, and is stated in homeopathic literature to reduce cancer tumors. Homeopathy has been around for about two hundred years. When homeopathic literature states that a particular formulation does something, like reducing the size of cancer tumors, it states that because that is what has been observed in its use. What sets Zormus apart from an ordinary homeopathic beryllium remedy is the fact that it has been supercharged, making it considerably more potent. It is energized with M power technology and other frequency enhancing which makes it much more effective than ordinary homeopathic remedies.

It is also used for arthritis pain, general joint and muscle pain, headaches, flu, sore throat, deficient digestion and elimination and depression/anxiety. In fact, the cancers it is the most valuable for are the ones where you need to reduce inflammation as much as possible. This is because you get inflammation reduction along with cancer killing.

The one fluid ounce spray bottle lasts a month for early stage cancer; use three bottles a month for advanced stage cancers. Zormus, with energetic testing putting it's healing power at **345** for cancer, putting it among the better anti-cancer supplements.

Other Cancer Killers

There is a cancer killing supplement on the internet that people ask about, a **miracle mineral** supplement great for malaria. Where the minerals may kill cancer cells too. Unfortunately, while it seems to work wonders for malaria, energetic testing puts this at a low **45** for cancer. It just doesn't work that well.

Cesium with some additional potassium and magnesium has been touted for fighting cancer. With some impressive results. It seems to be good but not great. Energetic testing puts it at **324** for fighting cancer. Take it while working with a doctor or naturopath as you can get your mineral levels messed up using it.

Artemisia has been touted by some as a cancer killer. There has been some concern about making sure you don't take too much of this herb. Though certainly it is much much safer than chemotherapy or any drug for that matter. Energetic testing puts its cancer fighting value at **230** when used in correct doses.

An **extract from the Venus's Flytrap**, is a highly touted cancer cell killer. It dissolves primitive cells including cancer cells but does not harm healthy cells. Energetic testing gives the high quality powder a healing power of **246**. The liquid extract is better. It comes in at **327**. Unfortunately it tends to be expensive and you need to use a lot of it.

Most **chemotherapies**, because of the damage they do to the body, and because of their low success rate, energetically test in a range from **30 to 40**. **Radiation** therapy, if properly applied and focused on a tumor, is a **60**. If the radiation damages too much other body tissue, it drops to a **25** in our energetic testing.

There are many other excellent supplements that deal of the underlying causes of cancer. So let's take a look at the best supplements for another effective cancer fighting strategy, increasing oxygenation of the body.

Cancer Strategy #2 - Fight Cancer By Increasing Cellular Oxygen Levels

There are several ways to significantly increase oxygen levels in your cells so that you can kill cancer cells and also prevent them from spreading. The most effective way is to take an oxygen supplement that will literally produce much more oxygen in your cells. We will first cover these supplements in the section below. You can also increase the efficiency of the mitochondria, enabling it to utilize the oxygen to create energy aerobically. The mitochondria that become damaged by lack of oxygen cannot produce energy using oxygen, leading to the development of cancerous cells. And finally, you can enhance circulation so that more oxygen and vital nutrients get to your cells. By increasing oxygen in your cells, and its utilization, you will go a long way towards eliminating cancer. In fact our new top suggestion in this field may be the best cancer fighting supplement there is. Let's start by talking about oxygenating supplements. They are not all created equal.

There is a miracle cure ebook selling like hotcakes talking about all the ways increasing oxygen levels in your body is valuable to you. It's good information. Unfortunately, their low cost solution is a bit dangerous and not all that effective for cancer. This is drinking diluted **food grade hydrogen peroxide**. I first became aware of a problem with this therapy years ago when a naturopath said that he was tired of patching up holes in the stomach of people drinking food grade hydrogen peroxide. Another drawback is that oxygen released by hydrogen peroxide treatment and also oxygen salt supplements that release oxygen when they are ingested, tend to cause free radical damage. In addition, only a small portion of the oxygen they release gets into cells as there is not a delivery system that naturally takes oxygen from the blood and gets it into cells. Our natural deliver system picks up oxygen in the lungs and carries it to the cells.

Energetic testing for drinking **hydrogen peroxide** comes in very low, about **25**, making it a poor solution to oxygenating your cells. The **aerobic oxygen salts**, at least the good ones, test much better at **165**. However the best oxygenating supplements make use of deuterium or heavy water to split water molecules into oxygen and hydrogen. The most heavily marketed one, found in most health food stores, energetically is much stronger than the aerobic oxygen salts at **214**. However a different oxygen supplement from an mlm company is even higher, coming in at **320** if you were to use it in the extra high doses we now suggest. Better still though is the supplement we have recommended for years, **Oxy E**. Energetic testing puts this at **432**.

These numbers are good only if the supplement is taken in the suggested quantities for the stage of cancer. Especially with oxygen this is important. Supplements like Zeolite Enhanced with DHQ or CANcore-1 are always going to kill some cancer cells, no matter how little you take. That's what they do. The more you take, the more you kill.

Small amounts of oxygen, on the other hand, don't do much against cancer. Cancer cells can handle small amounts of oxygen, some people even claim they may do better with small amounts. So the quantity you take is especially important. For years the standard therapeutic amount suggested was around 100 drops a day. When we started doing energetic testing, the oxygen supplements like Oxy E were not among the top cancer fighters. Coming in at 145 or less, which is okay. However, after learning that the original developers of this type of supplementation over 30 years ago had been using much higher quantities, and increasing the suggested dosage significantly, 200 drops a day for early stage cancer to 300 drops a day for advanced stage cancer to 360 drops a day for end stage cancers, the energetic testing went through the top, with **Oxy E** coming it at **432**, finally making it truly one of the top cancer fighting supplements.

Below we will tell you more about it and how it works. And then tell you about new upgraded oxygenation supplement from the developers of Zeolite Enhanced with DHQ. **OxyDHQ**. Used in the same high doses, **OxyDHQ is close to the top of the energetic testing charts at 693**. More on it and Oxy E below. First, though, let's finish up by covering the energetic testing on some other oxygenation treatments.

Hydrogen peroxide baths, check online on how to do them, come in much stronger than drinking hydrogen peroxide, at **233** for cancer. **Hydrogen peroxide IV's** if you can find a practitioner to give you them, are just a hair better, at **246**.

Two standard therapies suggested by top oxygenation doctors come in even better. **Hyper baric chamber treatments** where high pressure drives oxygen into cells, comes in at **312**. And the oxygen therapy where you breath oxygen while exercising on a treadmill, where the increased circulation from exercising carries the oxygen to more parts of your body, comes in at **314**. These all can be done along with taking Oxy E or OxyDHQ if you want to work on oxygenation from several angles.

Oxy E - Cellular Oxygen Enhancer

Oxy E creates oxygen in your cells. Plus it acts as a free radical scavenger, and produces extra hydrogen to increase pH levels and combat free radicals.

This one ounce bottle of liquid contains an acid based formulation of sea water minerals, dissolved oxygen, plant based amino acids and plant based enzymes. It interacts with deuterium, a trace mineral naturally found in water. And ends up creating hydrogen and oxygen as it splits the chemical bonds in water molecules.

What sets Oxy E apart from your typical oxygen supplement is that this oxygen producing reaction can take place **inside** the cells. Where you need to get the oxygen. Many oxygen producing products like hydrogen peroxide, vitamin O (energetic testing a 30), or Aerobic 7- there's a whole slew of them - get oxygen into the blood. As Dr. Whittaker points out, what they can't do though, is to actually get the oxygen into the cells.

The typical oxygen supplements always cause free radical or oxidative damage in the body. Oxy E does the opposite. In its process of creating stable oxygen molecules, it actually eliminates free radicals.

The oxygen transportation problem is solved by Oxy E in a unique way. The ionic trace mineral blend in Oxy E carries it into your cells, where it then makes oxygen. As maximum oxygen creation from Oxy E occurs 6 to 8 hours after ingesting, there is plenty of time to be taken into cells. It forms an O⁻ molecule with a negative ionic charge, which eliminates an O⁺ free radical by combining with it. This produces a stable oxygen molecule.

Oxy E is able to supply the body with a **steady** diet of free oxygen, hydrogen, full spectrum minerals, amino acids, and enzymes all the while cleansing cells of toxins and lactic acid. In addition it will enhance absorption of nutrients taken with it into the cells. And pull toxins out of your cells.

It works on two other fundamental causes of cancer, over-toxicity of the cells and pH. You can't take too much, your body only uses as much as it needs. Because it is a powerful detoxifier, increase the dosages slowly.

"I am contacting you for a friend of mine as she does not have a computer to ask a few questions. Her husband has Denotation (lung cancer). He has been on Oxy E for approx. 3 weeks. The results have been remarkable to his well being. He is sleeping very well, eating great and has boundless energy, looks and feels better. The improvement started after three days, he is on the maximum dose." Pat G.

Ed McCabe, a noted oxygen researcher, in an article in **Well Being Journal** gives some examples of how supplements like Oxy E helped some people with cancer.

"Dallas TV 11 had to repeat the Francis Guido story because there was so much demand for it by viewers. Francis loves to garden. One day she "No longer felt good." **Pancreatic Cancer**. Blood work and CAT scans every 4 months confirmed its continuing growth for a year and a half. Finally her doctor told her there was "nothing more they could do," and sent her home to die. She had no energy, couldn't get out of bed, or brush her teeth. Food would stick in her throat. She prayed over her dilemma, and the name of a local Naturopath popped into her mind. By this time **her throat was so closed off** she stopped drinking water. Dr. Revis helped her to drink an 8-ounce glass of water with drops of this supplement in it. Over a month she worked up to 72 drops per day. She started eating and drinking again. When she returned to her medical doctors they scanned all of her organs and bones, from head to toe, and *couldn't find any trace of Cancer!* A year and one half later, she looks so much younger, alive and vital, no one recognizes her at the supermarket. She reports: "I'm not dying! The stuff works, but you have to want to live, and continue doing it."

Ed continues, "Let's take the case of Joe Ritter, 66, from Fallbrook, California. Throat Cancer and surgery combined with **40 radiation treatments** left him burnt and scarred inside. He heard about and started taking the supplement, and when I interviewed him he was working out at the gym 4 hours a day, and considers himself way ahead of others who had the same surgery and radiation a year ago. He has the blood pressure of a 20 year old, the **lowest** his has ever been.

"For a variety of reasons not everyone gets the same results with any supplement, but it's hard to pass by another of my interviews, this one was with William Lee. He's 69, he loves fishing, hunting, yardwork, and working with flowers in South Dakota. He had 4 heart attacks, and after a stressful period his Cancer of 6 years ago flared up in his colon,

stomach, blood, and prostate. His Naturopath guided him, working him up to taking **high dosages** of it, several times a day for the past 7 months. He had the usual classic cleansing reactions as the body finally had the building block raw materials needed to *purge* itself of unwanted diseased tissue. He reported lumps of foul smelling substances that looked like "rotten hamburger" flushing out of his colon, his urine was strong and dark, and he had occasional headaches. As he said, "It is doing its job!" His doctor reports he's free from the Cancer, his heart is improving tremendously, and all previous heart pains have disappeared. William concludes: "It's a fantastic product."

Suggested Use: Add drops to eight ounces of purified water or juice and take with or after meals. It will improve assimilation of supplements you take with it. For a therapeutic dosage, increase slowly to about 10 to 15 drops 6 to 10 times a day. Or you can drink up to 50 drops in a quart of water three times a day. Just remember, Oxy E is a detoxifier so you may experience detoxification symptoms like headaches, fatigue, nausea and diarrhea if you increase the amounts rapidly, and thus detoxify faster than your body can comfortably handle.

John, a 58 year old man with **stage 4 osteosarcoma** (cancer of the brain) and cancer of the blood was given 6 to 10 months to live with radiation and less without. "At this point in time, John could no longer walk or drive. As he was about to die, John was then told to 'Get your affairs in order.'

"John immediately started taking MSM (organic sulfur), an increasing dosage of Oxy E, changing his diet to an *alkaline based diet*, and drinking lots of clean water everyday. In two weeks time John drove to his doctor and walked into his office for a check up. To his doctor's amazement, John's swelling in his brain had been reduced by 90% and his speech, his vision and his walking had returned to almost normal. Remember this was **only two weeks later!** His doctors could not believe his progress, and they were very mad at John for driving a car and not taking his medication. Nevertheless, they told John, 'Whatever you're doing, keep doing it.'

"They still wanted to give him radiation because he had a particularly rapid growing aggressive type of cancer. John refused the radiation and told them that he was going to be just fine, and that he was going to beat this cancer faster than anything that they had ever seen. John religiously continued taking the MSM and the Oxy E. He also continued his strict diet and drank lots of pure water every day.

"Six weeks after his surgery John went back to his doctor for a MRI to see where the cancer was at that point. To his doctors' complete amazement, they found absolutely no swelling in the brain. **All brain functions had returned to normal and there was NO CANCER at all.**"

These testimonies were all at much lower doses than now suggested. Oxy E will work better now when used in the substantially higher doses. It is a good also helping to increase energy, and works to adjust pH levels and detoxify too. We do suggest you work up to the top dosages, but do so quickly. You can always cut back a bit if you get a headache or some other detoxifying too fast symptom. As the drops are acidic, you dilute them in water or juice, not a milk product, and spread out the dosages throughout the day. Can be mixed in with the Zeolite Enhanced with DHQ. If your stomach is in bad shape and can't handle acidic drinks, try taking it with meals to buffer it till your stomach improves. By the way, even though it is acidic in the stomach, it reduced acidity in the body. Just what you want.

OxyDHQ

Our highest recommended oxygenation product, and actually the new number one anti-cancer supplement suggestion, is OxyDHQ. It uses at its foundation the same type of oxygen producing formulation as Oxy E, a deuterium fortified water with 84 minerals, 39 enzymes, 19 amino acids. Well, that is a bit more enzymes and amino acids than usual. Quite a few improvements have been made to it to make it a much better product.

First and foremost, it contains therapeutic levels of **DHQ** which on its own is a powerful free radical scavenger that also conditions red blood cells so that they are more flexible and work better. Increasing circulation. Next a special Vitamin C, *ascorbo-phosphate*, is added. This makes the DHQ work even better - and is about 16 times more potent than regular vitamin C. These two additions alone up the anti-cancer levels significantly, and may be able to extend healthy cell life up to 240% in test tubes.

It will also have 15% sea ormus - which brings in that healing force of energetic frequencies to OxyDHQ. Over the next few years you'll be hearing a lot more about ormus.

It's creation of free oxygen and hydrogen helps to stabilize toxic elements in the body by polar bonding and electrical charge, to create new unharmed elements and leaves the harmful compounds inert or soluble. In other words, to detoxify the body. The hydrogen ions release by OxyDHQ work with the oxygen ions to normalize pH levels. Bringing them up if too acidic, down if too alkaline.

OxyDHQ, as an electrolyte, has the ability to stimulate healthy cell growth by adding the proper amounts of voltage to the cell. In addition, this increases cellular energy, just what you want to prevent cancer growth.. It also kills parasites, bacteria, viruses, mold and fungi. But does not harm beneficial microorganisms.

OxyDHQ comes in a more convenient 4 ounce bottle. This gives you better value for a better product. For early stage cancers, consider using 3 bottles a month. Advanced cancers are handled better by using 4 bottles monthly. An adult would use 5 bottles a month for end stage cancers. Again, this is right at the top of anti-cancer supplements when used in these high dosages, a superb **693** for fighting cancer. As OxyDHQ is acidic, not everyone can use it. If you are not able to handle acidic drinks like orange juice, or if you are throwing up liquids and everything else, get Zeo3 instead. It is almost as good when used in high quantities, it is not acidic, and you spray it into the mouth so you don't have to drink a bunch of liquid with it, though it would be good to do so if possible.

Zeo3

Zeo3 is another unique oxygenation product that gets oxygen into cells, increases pH and even supplies a bit of zeolite. It's principal benefit is oxygenation and improving the alkalinity of your body. It is not as good to use as OxyDHQ but it is close.

The energy in a water molecule can be measured by the hydrogen bond angle. In general this varies from 101 degrees (dead water) to 109 degrees (high). In steam the angle increases to 120 degrees because of its high energy. Zeo3 undergoes a proprietary process involving thousands of heating and cooling cycles in an ozonated chamber to produce a highly functional, purified water with an increased hydrogen bond angle. In essence this is exactly the process water goes through in nature, heating (evaporation), cooling (rain) and ozonation as the water vapor high in the atmosphere is exposed to sunlight. This process loads up the water in Zeo3 with the following components:

Zeo3 is fully charged with **oxygen** levels at around 38%. Tap water comes in at only 8 to 10% oxygen. It is full of **electrons** from the extra **hydrogen** ions in the water. Vitamins need electrons to bring them to life. Pathogens and viruses are killed by electrons and oxygen. Old age creeps in as you lose electrons. Because of how it's made (it has extra electrons in the water), Zeo3 is a natural storehouse of electrons that your body uses in countless ways.

In addition, a high concentration of proprietary **humic and fulvic acid extract** that has been prepared with **zeolite** added to it. Humic and Fulvic acid come from soil organic matter, and are powerful antioxidants and free-radical scavengers. The humic acid's "molecular baskets" pick up the smallest zeolite particles, making them soluble, and then the new solution is filtered at 0.02 microns which is a "sub-cellular" size – they can easily enter into the cells to revive and regenerate. Not as potent as Zeolite Enhanced, but a useful addition.

Next they are energized with paramagnetic Aulterra and Shamir minerals. Trace amounts of these two remarkable materials are added to the solution prior to bottling. Each has distinct energetic properties that enhance the availability and absorption of the nutrients within the Zeo3.

Zeo3 improves overall hydration and increases the oxygen carrying capacity of the blood. Use 7 bottles a month for early stage cancer, 10 bottles a month for advanced stage cancers, and 12 bottles a month for end stage cancers. That's 70, 100 or 120 quick sprays 4 times a day - ideally after having drunk a cup or two of water or juice each time. Energetic testing puts its healing power when dealing with cancer when used at these high levels at **627**.

Support Your Cell's Ability To Utilize Oxygen

Another valuable aspect to this issue of defeating cancer is repairing the mitochondria and enabling it to better utilize oxygen to produce energy. There are two types of supplements we know of that help specifically with this. The first one will be covered fully in the following section on Methylglyoxal. **Koch Energy**. This 2 ounce bottle of liquid is a frequency delivery supplement that contains the original energies Dr. Koch developed years ago to fight cancers. One

of its functions is to stimulate repair of the mitochondria that have been damaged by free radicals and lack of oxygen in the cells.

Overall, it comes in at **352** on the energetic testing for use against cancer when used in the suggested quantities, 3 bottles a month for early stage cancer, 6 bottles monthly for advanced cancer. **DCA or Dichloroacetate** works to reactivate mitochondria function and has been the subject of a bit of research. Energetic testing puts it at **230** for fighting cancer.

A supplement vital for the production of energy in the mitochondria is **CoEnzymeQ10**. CoQ10 is used in the mitochondria to transport oxygen. If a cell doesn't have CoQ10, it can't produce energy aerobically, and it is more likely to become a cancerous cell. It must be there for your cells to produce energy using oxygen. This is especially important in elderly patients whose levels are usually quite low. In fact, after about age 35, people start using more CoQ10 than they make. As you will read below, Coq10 has a history of use and success with cancer.

(It is also vital for congestive heart failure which is often just Co-Q10 deficiency. If you take statin drugs, you need CoQ10. Those drugs block the production of CoQ10 and cause tens of thousands of deaths yearly from congestive heart failure.)

There are several types of CoQ10 on the market. Cheap stuff from China. Energetic testing puts its healing power at **30**. Good quality CoQ10 from Japan comes in at **100**. There is a new increased absorption **ubiquinol** form that comes in higher still at **238**. Much more effective. The most effective is the ester delivery system Q10 suggested below. Part of its increased benefit is due to the oxygen enhancing **germanium** in it. Energetic testing puts **Ge-ProCoQ10 Max** at a powerful **534** when therapeutic doses of 6 bottles a month are used to fight early stage cancer and 7 bottles a month are used for advanced stage cancer.

Ge-ProCoQ10 Max

Interest in coenzyme Q10 as a potential treatment for cancer began in 1961 when a deficiency of the enzyme was noted in the blood of cancer patients. Low blood levels of coenzyme Q10 have been found in patients with myeloma, lymphoma, and cancers of the breast, lung, prostate, pancreas, colon, kidney, head and neck.

Most of the original research on CoQ10 centered on the treatment of heart failure, but two older journal articles highlight it's potential in combating cancer and maintaining a cancer free life. A Biochemical and Biophysical Research Communications paper (April 15, 1993;192:241-5 - Folkers), presents anecdotal results of 10 cancer patients given CoQ10 for heart failure. One example is a 48-year-old man started taking daily CoQ10 17 years before after a diagnosis of inoperable lung cancer. He has been symptom free of heart failure and cancer since then.

A European cancer specialist Knud Lockwood, M.D., also presented his treatment of 32 "high-risk" breast cancer patients in Biochemical and Biophysical Research Communications (March 30, 1994;199:1504-8). Employing antioxidant vitamins, essential fatty acids, and CoQ10, he reported "No patient died and all expressed a feeling of well-being" and "These results are remarkable since about 4 deaths would have been expected. Now, after 24 months, all still survive; about 6 deaths would have been expected."

New CoQ10 research in 2005 performed at the University of Miami Medical School is even more impressive, Researchers reported that in laboratory and animal studies where CoQ10 was delivered to cancer cells and tissues, it induced apoptosis, which is the normal programmed cell death that goes awry in the disease process.

"The most amazing part is that we've been able to restore a cancer cell's ability to kill itself, while not impacting normal cells," said Niven Narain, research associate in the Department of Dermatology and Cutaneous Surgery at the Miller School of Medicine.

Scientists made two presentations at the annual meeting of the American Association for Cancer Research in Anaheim, Ca. The first presentation involved the most common prostate cancer cell line, PC3. The researchers showed that adding CoQ10 to the cells in vitro, or in the laboratory, there was a 70 percent inhibition of cell growth over 48 hours.

"We saw evidence that the remarkable reduction in cell growth was due to apoptosis, showing that CoQ10

restored the ability of the cancer cells to kill themselves," said Narain.

In the second presentation, the researchers showed that CoQ10 greatly inhibited the proliferation of breast cancer cells, while providing a stabilizing effect on the normal mammary cells.

"This suggests to us that CoQ10 could be an effective adjuvant anti-tumor agent in breast carcinomas," said Indushekhar Persaud, research associate in the Department of Dermatology and Cutaneous Surgery at the Miller School of Medicine."

Ge-ProCoQ10 Max is the new standard in CoQ10 supplementation. The solubility and absorbability of CoQ10 in Ge-ProCoQ10 has been increased by using esters to make it more bioavailable. **Human trials show that taking it results in 18 times higher serum levels of CoQ10 than the same amount of standard CoQ10.**

Human Trials show that at just 30 mg per day, ProCoQ10 reduced daily DNA damage in humans by 51%. It was also shown to shrink human skin wrinkles in 6 weeks. Now 30 mgs is a small dosage. **The amount of ProCoQ10 in this product is 200 mg per capsule.** At 18 times better absorption, this is equivalent to the amount absorbed in 3600 mg of the old style, normal CoQ10. Therapeutic usage of the old style CoQ10 is 300 mg a day, so you get much much more with Ge-ProCoQ10.

Ge-ProCoQ10 contains another powerful oxygenation promoting ingredient, Organic Germanium 132.

Germanium132 improves cellular oxygen levels. It is an oxygen-rich organic form of germanium which has been studied for its antiviral, immuno-stimulative and free-radical scavenging actions, and for supporting improved oxygen utilization. Studies have shown Germanium 132 protects cells against radiation damage. Since radiation damage is oxidative, this protection suggests it has strong antioxidative activity. Germanium 132 also increases the production of interferon, which helps activate immune system macrophages and T-suppressor cells, and enhances Natural Killer Cell activity. Each capsules supplies 50 mg of this organic germanium.

Each Ge-ProCoQ10-Max capsule provides 350mg **Soluble Rice Bran Complex (SRBC)** which is 100% usable and absorbable... with a full spectrum of health-restoring nutrients that man-made supplements can never provide. It is completely digestible because only the soluble part of the stabilized rice germ and bran is used. When taking just one capsule you receive the equivalent nutrition of a pound of ordinary brown rice, without all the starch. This nutritious Rice Complex strongly supports maximum absorption of ProCoQ10 - and further enhances its far ranging benefits.

It provides a broad range of antioxidants including tocotrienols, which have been found to be six thousand times more effective than vitamin E. Also natural B-Vitamins that boost energy, stamina and help stabilize blood sugar. (Including natural B-Vitamins that cannot be synthesized such as Pangamic Acid.) It is a natural source of Alpha Lipoic Acid, Squalene and IP6.

For best results, and the dosage that give the high energetic testing of **534**, with early stage cancers use **6 bottles of GeProCoQ10 Max** a month, 6 capsules a day. Increase to **7** bottles a month for advanced cancers.

Improve Oxygenation Of Cells (and Nutrient Absorption) By Increasing Circulation

One cause of poor oxygenation is poor circulation. If oxygen cannot be transported to cells because of reduced circulation, then they become oxygen starved and are more likely to become cancerous. When circulation increases, oxygenation improves. In addition, more nutrients will be carried into the cells. So one of the advantages of adding on one of the following two circulation increasing products is that using either or both would increase the effectiveness of the other supplements you are taking. The first supplement gives you a couple other important anti-cancer benefits also.

FlamOxide

There are three main benefits FlamOxide will give to you as part of a protocol to beat cancer. It improves circulation, kills cancer cells and is a strong anti-inflammatory supplement. The basis of FlamOxide is an array of minerals, herbs, vitamins and amino acids that when taken together, stimulate the production of nitric oxide in the body. Nitric Oxide serves many functions in the body. Your immune system uses it to kill pathogens like candida and viruses, and to **kill**

cancer cells.

Nitric Oxide also signals blood vessels to dilate or expand, thus **improving circulation** throughout the body. FlamOxide is very good at producing additional nitric oxide, and thus is excellent for improving circulation. And finally, while most anti-inflammatory supplements and medicines interfere with the production of nitric oxide, FlamOxide contains two anti-inflammatory herbs that do not interfere with nitric oxide production. Making it an excellent **anti-inflammatory** supplement.

One of the issues when fighting cancer, especially if the tumor is in the brain, or against the spine, or anywhere else that you don't want it to get any larger, is that when you start to kill off cancer cells in a tumor, the immune system gets rid of the dead cancer cells in an inflammatory process. Thus even though you are killing off the cancer cells, the tumor may inflame and get even bigger temporarily. This can put pressure on the brain or spine if the tumor is located in these locations, causing problems. FlamOxide is especially valuable and important to take in this case.

Overall, for fighting cancer, with its ability to increase circulation, kill cancer cells, and reduce inflammation, **FlamOxide** tests energetically at a high **464** as an anti-cancer supplement when taking the maximum dosage of 3 capsules 3 times a day, 3 bottles a month.

It has a couple of potential drawbacks. You must take it at least an hour away from food, drugs or poor quality supplements. And you cannot be taking anti-inflammatory drugs or supplements like Tylenol, Aleve, Motrin, Ibuprofen, or supplements like glucosamine and MSM. They inhibit the production of nitric oxide and thus it doesn't work as well. But of course, FlamOxide itself will deal with the inflammation. If Flamoxide won't work for you, but you wish to increase circulation so that more oxygen and nutrients can get to your cells, get the following herbal formula.

Life Support Increases Circulation - Kills Cancer

Life Support is a herbal formula designed to increase circulation. It contains some of the most powerful herbal circulation enhancers known. Cayenne, Wasabi Japonica, Cinnamon Bark, Ashwagandha Root, and the B vitamin Niacin - in a base of Beet Root Powder. Use of these herbs increases the ability of the body to oxygenate the cells, and enables more cancer killing nutrients to get into cancer cells. Thus helping to increase the efficiency of all the other supplements and medications you take.

Not only can it increase circulation so significantly that you may notice an increase in energy, but the wasabi that Life Support contains is a strong cancer killer on its own, containing compounds, including isothiocyanates, effective against cancer. In six different studies, extracts from wasabi have been shown repeatedly to be effective against stomach cancer cells. One compound from wasabi inhibited the growth of colon, lung and stomach cancer cells by as much as 44 percent (Weil 2005). When combined with the other circulation enhancing herbs in Life Support, the wasabi phytonutrients are better able to get into cancerous cells. Because Life Support increases circulation, it is able to increase the amount of nutrients that can get into your cells to support your body. Including of course, oxygen. And it is able to increase the amount of cancer cell killers that can get into cancer cells.

Use three to four bottles of Life Support monthly. Especially if your circulation is poor and FlamOxide doesn't work for you. (Or use both together for the biggest increase in circulation.) Energetic testing on Life Support puts it at **300** in healing power if you have poor circulation, **213** if your circulation is good because it is not as important in that case.

And finally, a couple of other things that can help with oxygenation.

O3Right Releases Oxygen In The Colon

Its special formulation of magnesium dioxide and citric acid interact with the acids in the intestinal tract to release oxygen. This oxygen becomes a powerful colon cleanser as it softens and loosens the hardened matter in the colon. And of course, as you have read, the oxygen will kill cancer cells and other pathogens. So for colon and rectal cancer it energetically tests at **327**. It is also useful for other cancer near the colon where the oxygen released by O3Right will easily travel to. Cleaning the colon is also quite valuable in the fight against cancer as it will enable your body to better detoxify. You only need to use one bottle a month of this product. Start out taking just 1 capsule at bedtime and gradually work up to taking 6 capsules nightly.

The next strategy is also intimately tied up with oxygen levels in your body. When your pH level is low, your blood and cellular fluids can hold very little oxygen.

Cancer Strategy #3 - Raise pH Levels to Reduce Body Acidity

Virtually *everyone* with cancer has low pH levels. This is because cancer is created, and thrives, in a body that has low pH levels, a body that is acidic. Low pH causes your body to store more toxins in cells, and reduces oxygen levels, both of which are fundamental to the development of cancer. When cancer cells grow, they produce even more acid. Making it very difficult to raise pH levels, especially when cancer is present.

When you take something to increase pH levels, your cells notice the difference and start to dump some of the toxins they are holding back into the bloodstream now that they have a chance to get rid of them. (Toxins are acidic and the cells won't release them if the blood is too acidic. The blood must be kept in a narrow range around neutral pH.) Because the cells are releasing some of their stored toxins, your pH levels drop again. This detoxification process can take months to complete. In addition, because cancer cells pump out lactic acid as a byproduct of how they produce energy, they create even more acidity. You need to work a long time at normalizing pH because of these factors, but as you do, you will make your body, in a sense, cancer proof.

Because of the fundamentalness of cancer thriving in too acidic conditions, there are many sites and books or ebooks promoting various ways to beat cancer by alkalizing the body with their particular product suggestions. Coral calcium and alkaline water machines are a couple that have been pretty popular. Also a combination of oxygen catalyst drops and a high quality green drink. So it can get a bit confusing as to what the best thing to do would be. For a while, as some of the more important cancer fighting suggestions like Zeolite Enhanced with DHQ did work to increase pH levels, our primary suggestion was to drink 3 teaspoons of baking soda in water every day. Its virtue being that it is inexpensive to do so why not do it. But as pH is so fundamental to fighting cancer, we did some energetic testing to get some idea as to which ways to increase pH levels in your body were best for fighting cancer. The results were pretty interesting.

Alkaline drops, where you put a couple in everything you drink, tested at a low **35**. Not very good, perhaps because they are not that healthy a thing to be doing. Getting a machine that makes alkaline water, and drinking the water tested at **135**. A machine that vortex's water, oxygenates it and adds minerals to increase pH is a bit better at **195**. They are certainly fine to do, but not what you'd call really good. The 3 teaspoons of **baking soda** in water every day was a **142**. Taking **Coral Calcium** was better, a **235** for fighting cancer. A high quality **green drink** marketed for alkalizing the body came in at a **214**. For adjusting pH only, **Zeolite Enhanced with DHQ** is a **235** when used in the quantities suggested for cancer.

OxyDHQ tests energetically, for its pH adjusting ability, at **345**, virtually tied with the **Oxygen Catalyst** used for adjusting pH, which comes in at **346**. (OxyDHQ tests much higher for fighting cancer, **674**, because the oxygen it creates also does an especially good job of killing cancer cells. Overall for fighting cancer, the Oxygen Catalyst comes in at **200**, it doesn't do as good a job at fighting cancer as at adjusting pH levels.)

The best pH adjuster we have found is an herbal formula developed by one of the manufacturers we have contacts with. Interesting, this manufacturer did not originally develop the formulation for adjusting pH. It was designed to reduce inflammation and support the heart and lungs. But when he checked to see how well it adjusted pH levels, he discovered it did a remarkably good job of increasing pH levels in the body. So good, in fact, he renamed the supplement **pH Balancer 8.0**. Energetic testing bore out his conclusions. It comes in at an excellent **499** when taken in the suggested quantities. The highest score by far.

The best way to adjust pH levels is to take a combination of supplements. Usually something green and an oxygenator. For example the **Oxygen Catalyst and the high quality green drink** are always bundled together as the best way to adjust pH levels. As a combo they are excellent, testing energetically at **380** for adjusting pH, not as a cancer fighter. Testing much much higher though are the **OxyDHQ and pH Balancer 8.0** when taken in the suggested quantities to beat cancer. They come in at a remarkable **800 for adjusting pH**, and for their overall cancer fighting ability, energetic testing is an astounding **723**. Clearly the combination to go with.

pH Balancer 8.0

As mentioned above, this is easily the best body alkalizer we have found coming in at **499** in the energetic testing. Especially so if taken with OxyDHQ, which as a cancer fighter energetically testing at **674** is something you should be using if at all possible anyway.

The proprietary formulation of herbs, minerals and amino acids in pH Balancer 8.0 include: L-Taurine, Hawthorne Berry, Safflower, Wasabi Japonica, Wild Cherry, Allium Cepa, Barberry, Bilberry, Cinnamon, L-Carnitine, L-Arginine, Turmeric, Cayenne, Wood Betony, Dioscorea, Pleurisy, Potassium, Fritillaria, and Magnesium. There is no one particular ingredient that is the key to its effectiveness. It is the particular combination in the right quantities that makes it work so well. In addition, as it is often important to reduce inflammation when fighting cancer, you get its ability to do so as an additional benefit.

There are 90 tablets per bottle. As with most supplements you take more for an advanced cancer than for an early stage cancer because you have more cancer to deal with so you need to be more vigorous in your approach to dealing with it.

For an early stage cancer, consider using 3 bottles a month, for advanced cancer get 4 bottles for a month's supply, and if trying to reverse an end stage cancer, go up to 5 bottles for a months supply. They can be taken with meals or on an empty stomach. *It is best to take them at the same time you are taking the OxyDHQ to optimize the synergy these two products give each other.*

Below is an additional way to help increase pH levels in your body - while at the same time improving digestion and fighting cancer.

Betaine HCl with an HCL Activator

In the late 1920s Dr. Walter Guy and Dr. Ferguson made extensive use of hydrochloric acid therapy to cure many ill health conditions, including cancer. These doctors found that administering HCl (hydrochloric acid) balanced pH and had other cancer fighting benefits.

Hydrochloric acid in the stomach is needed to break down protein. With age, or if you have a hiatal hernia, its production decreases. About 2 grams is required per meal. No acid means poor digestion. Hydrochloric acid is the only healthy acid in the body.

Symptoms of acid indigestion almost always come from not enough hydrochloric acid because that causes the fermentation of organic waste acids in the stomach. Rather than using antacids, taking hydrochloric acid is required, so that the organic waste acids are not produced. Don't take it if you have ulcers though.

Bob Livingston in his newsletter describes how lack of HCL may lead to cancer.

"Cancer victims always are high in lactic and carbonic acids. This definitely calls for the need of a larger supply of hydrochloric acid in cancer patients. When a weak solution of hydrochloric acid is introduced into the tissues, either by mouth, vein or muscles, it acts chiefly in clearing out the poisonous waste acids of the body from the lymph channels, increases the elimination of CO₂, restores normal pH reaction and desensitizes the tissues to disease proteins."

The doctors in the 1920s doing the HCL protocol, found that no matter how the HCl was given, it was useful. Especially if combined with potassium.

To get additional HCl, take Betaine HCl. When used in conjunction with the HCL Activator, it will boost the immune system and increase the ability of red cells to transport oxygen. Taking it with meals will both improve digestion, and get more into the body where it will help to balance pH. The **HCL Activator** supplies the potassium and other co-factors in a capsule form that is in a similar quantity to what the doctors used.

Taking adequate amounts of **Betaine HCL** with meals will also help reduce the amount of enzymes the pancreas will be required to produce for digestion, leaving more capacity for producing enzymes to fight cancer. Using several bottles each of **Betaine HCL** and **HCL Activator** a month would be worth doing when fighting cancer. Energetically they come in at **320** for use with cancer, and of course, they aid digestion too.

Next you are going to learn about two highly effective and almost unknown cancer fighters that were first developed decades ago by Nobel Prize winners.

Cancer Strategy #4 - Get MethylGlyoxal Into Your Cells

Koch Energy

Developed by Dr. William F. Koch, his homeopathic energy remedies have for over 60 years been used time and again to conquer cancer and other major illnesses. Energized from glyoxal molecules, one of the main functions of the Original Koch Energy supplement, about 40% of what it does, is to stimulate the body to repair damaged respiratory enzymes in cells. Damaged respiratory enzymes are a fundamental cause of the development of cancer.

The other important cancer fighting function it performs is to stimulate the body to produce methylglyoxal, thus putting the breaks on uncontrolled cellular replication that characterizes cancer cells.

It was Dr. Koch's opinion that his remedy tapped into healing at the level of DNA in all the cells of the body. Primarily by triggering a cell's oxidative mechanisms to regenerate the impaired aerobic oxygen respiration that causes the cell to go cancerous. Restoring a cell's ability to use oxygen to produce energy is fundamental to Otto Warburg's theory on how to stop cancer. And it works...

Dr. Koch used his remedies successfully for treating cancers, allergies, polio and infectious diseases. He postulated that it worked against pathogens because the increased oxidation initiated by it would kill the disease causing pathogens in the cells.

And Methylglyoxal, if you remember, literally tells cancer cells to stop their abnormally high replication rate. Cancer cells are geared up to replicate rapidly, many times faster than normal cells.

As Dr. Szent-Gyorgyi discovered, when cancer cells can't replicate in an uncontrolled fashion, they die. And of course, at the same time as the Original Koch Energy turns off the replication of cancer cells, they initiate the repair of respiratory enzymes in the cells, stopping the spread of cancer and helping to slow down the growth of, or to even kill, cancer cells.

The Koch Energy contains the energies from Dr. Koch's full range of homeopathic formulations of glyoxal that stimulate your body to create more methylglyoxal in the cells. As we mentioned before, **Koch Energy** tests energetically at **352** for fighting cancer.

The Original Koch Energy comes in a 2 ounce dropper bottle. For early stage cancers use two bottles a month, 2 squeezes of the dropper bulb twice a day. Hold in your mouth 30 seconds before swallowing. For an advanced stage cancer, use 4 bottles a month. Eight squeezes a day. This does not have to be by itself, away from food or supplements. You do not have to be on a vegan diet as you did with previous formulas. It works excellent on its own, but works best when used with...

MG Concentrate

The slightly more potent methylglyoxal product, especially when used with the Original Koch Energy, is MG Concentrate. This became one of the better anti-cancer products after it was stabilized - with vitamin C also being added to it. Energetic testing puts **MG Concentrate** at **342**. The **Methylglyoxal Combo** of 1 MG Concentrate and 3 of the Koch Energy for a monthly use tests even higher at a very strong **475**. MG Concentrate was originally conceived and developed by the Nobel Prize winning Dr. Szent-Gyorgyi back in the Sixties. Because methylglyoxal is a natural molecule and can't be patented, he couldn't get funding to carry his work to human trials, even though the animal trials he conducted proved that it worked exceedingly well against cancer.

Dr. Koch and Dr. Szent-Gyorgyi took different approaches to supplying methylglyoxal to the body. Dr. Szent-Gyorgyi developed a way to take quantities of methylglyoxal just like you would take a vitamin. It worked. Researchers Apple and Greenberg showed that it significantly inhibited tumor growth in mice with leukemia and tumors. It was observed to inhibit mitochondrial respiration and energy production of malignant tissues and cells, but had no effect on normal,

nonmalignant tissues and cells.

These studies proved it is a potent anticancer agent that acts against cancerous cells, but not normal cells. And that it works best when augmented with vitamin C. But no testing on humans had been done. In the late 90s, a group of doctors at the University College of Science in India tested a less potent version on a group of mostly stage 4 advanced cancer patients. Of the 19 patients who completed the 25 week study, (5 patients moved away), 11 were in excellent health, 5 were stable and continuing with the Methylglyoxal, and only 3 had died.

Remarkable results when dealing with advanced cancers. In fact, in the abstract of this study, the doctors state: "The results strongly suggest that this formulation is by far more superior than other present forms of treatment against cancer." The study has continued on throughout the years with equally successful results.

MG Concentrate, because it has been stabilized, may be over twice as potent as the methylglyoxal formulation used in this study.

Use 4 servings a day of 7.5 ml or one and a half teaspoons of methylglyoxal diluted in water, followed each time by a mixture of B vitamins. The **Max Stress B Nano-Plex** is a natural source vitamin B that works well for this. It can be used in small doses because it is very well absorbed. Use two bottles a month.

The 900 ml. bottle of MG Concentrate is a month's supply. It is relatively unknown, but is one of the few natural supplements that has extensive use in clinical research proving that it works exceedingly well for cancer. The **Methylglyoxal Combo** of a bottle of the **MG Concentrate** a month and three of the **Original Koch Energy** are significantly better than doing either one separately.

Cancer Strategy #5 - Strengthen the Immune System

As the immune system is so important in fighting cancer, and as so many well known supplements focus on immune system support, we have energetically tested a bunch of supplements to get an idea of what really does work well. And it is pretty interesting. Some of the well known ones were just not that good. We hope you find this valuable. It is all too easy to waste money, or worse yet die, from taking supplements that are not as good as they sound. This may help you pick your way through some of the confusion as to what is just okay, and what is very good. We will divide these supplement suggestions up into different broad categories of similar products.

Enhancing Cell Communication - Aloe Vera, Glyconutrients and more

First let's go over why this type of supplement is valuable for fighting cancer. Cancer cells are viewed by the immune system as **non-self**. As are viruses and other pathogens in our body. By increasing the ability of the cells to communicate with each other and with the immune system, the immune system may be better able to identify what is non-self, and get rid of it.

One type of product that has proved to be so effective at helping the immune system do this, a new science has developed around it. The science of **Glycobiology**, which deals with the role of essential long chain carbohydrates in cellular communication.

To maintain a healthy body, cells must "*talk*" to each other. Their language is one of touch, written in saccharides (or simple sugars) on the cell surfaces. Like thousands of different "keys" projecting from the cell surface, they either unlock the required functions of the adjoining cell or not. If the right keys are available, the body functions smoothly. If not, it doesn't.

In March, 2001, Science Magazine dedicated virtually the entire magazine to the science of Glycobiology and the essential saccharides that make up these cellular communication keys.

The University of California, San Diego, announced the establishment of a Center for the further research and development of the Science of Glycobiology. And the President of the Royal Academy of Medicine in London, Dr. John Asford, said that "Sugars are going to be the molecules of the next decade."

Eclipse Magazine reviewed the results in Uganda where they are using these glyconutrients on AIDS and cancer patients and seeing remarkable results, and the child with Progeria (fast aging disease) who is experiencing reversal in his aging process once on glyconutrients.

The best source for these special, long chain carbohydrate molecules has proven to be properly processed aloe vera. One of the top researchers in the field, Dr. Danhof, gives some details on what it does. (These are Dr. Danhof's words based on his and other research.)

"The Aloe Vera MPS is a long chain sugar molecule composed of individual sugar molecules connected together in long linear chains. There is wide range in the size of the MPS molecule. The varying sizes determine their healing properties.

"1. Anti-inflammatory and Blood Sugar Normalization Small size molecules.

MPS reduces inflammation which is involved in such diseases as ulcerative colitis, arthritis, and gastric reflux. Also helps with the reduction of blood sugar with both type I and II diabetes.

"2. Free Radical Scavenger Medium size molecules.

Whereas vitamins and minerals can only function outside the cells, MPS are effective intracellular antioxidant and free radical scavengers - very important in preventing and treating arteriosclerosis, heart disease and Parkinson's disease. With the ever-increasing chemical pollution all over the planet and loss of nutrients in the soil, the increase in free radicals and loss of cellular oxygen will only become worse with time.

"3. Anti-Pathogenic Large size molecules.

Has a direct antibacterial, anti-viral, anti-yeast/fungus and anti-amoeba effect. This is important with all the new infectious diseases cropping up, and the older ones becoming more virulent and mutating from long term use of antibiotics.

"4. Immune System Enhancement Very large size molecules.

The very large molecules are immune modulating, which has a powerful healing effect on AIDS, Chronic Fatigue Syndrome, other chronic infections, multiple chemical exposure, cancer, heart disease, auto-immune diseases and many other immune system disorders. MPS is important with the ever-increasing number of infectious diseases that are gradually becoming resistant to antibiotics.

"The MPS molecule activates the Macrophage directly and through the liver to produce a cascade of healing effects: increases phagocytosis by the macrophage to engulf and **destroy** infected cells and damaged cells (the garbage eater in the body); increases interleukin and interferon levels in the body, which then increases the number and response of T-Cells and Monocytes; wound healing via fibroblast activity as well as dramatically increasing the growth of new cells and the anti-pathogenic response with viruses, bacteria, yeast fungus and amoebas.

"MPS also causes the body to produce tumor necrosis factor that destroys tumors by shutting off their blood supply."

Dr. Danhof

Several small pharmaceutical companies are developing drugs using these long chain polysaccharides to fight cancer. Between them and the general research showing many cancer fighting benefits to taking aloe, there is a good amount of research on the use of aloe vera extract for fighting cancer.

What makes a difference in the effectiveness of various aloe products is a combination of how many of the more potent molecules or essential sugars are in the aloe or glyconutrient supplement, and how much of the supplement is comprised of not as useful molecules. This primarily has to do with the kind of processing used to extract and preserve all the active ingredients. The stabilized muco polysaccharides.

When an aloe vera leaf is cut, the mineral salts and enzymes immediately starts breaking down the MPS molecules in it which reduces their effectiveness. If something is not done to prevent this action, the molecules are broken down into small sizes and are primarily valuable for inflammation. The better the extraction process, the better the MPS

molecules will be able to assist in the improvement of cellular communication and the fight against cancer.

Aloe vera gels, pills and juices that you find in your local health food store or section, don't use a special extraction process that protects the molecules. Consequently while they may be good for inflammation and constipation and more, energetic testing for the ability to help with cancer comes in a poor range of barong **35**.

The next step up comes with the higher quality **glyconutrients** from an mlm company and a few of the aloe powders with the polysaccharides, like Nutri..., that compete with it. Energetic testing on them comes in at the **120 to 135** range. Okay to do and useful, but not great.

The next step up in energy testing are the **MPS and 3X** powders. They come in significantly stronger at **210** and **253**. Next comes

Get Healthy Aloe MPS and 3X

These are frequency enhanced versions of the MPS and 3X powders. The frequency enhancing increases their healing power to **294 and 345**. Starting to get in the very good to use range. Here's the story on these two supplements.

The proprietary extraction process used in making Get Healthy Aloe MPS, involves freeze drying the gel into a powder which eliminates the enzymes and mineral salts to prevent their destructive action. You tend to get a bit more of the most powerful long chain molecules. Even the filler, larch tree powder, is beneficial. It acts as a pre-biotic nutrient feeding your friendly intestinal bacteria. And is an immune system enhancer too with independent research showing it is good for fighting cancer. Get Healthy Aloe MPS contains the complete MPS molecule intact. The dalton weight for some of the molecules goes up to over two million. These higher dalton weights, over one million, are necessary for effective immune system healing, bolstering and balancing the immune system cells, and for producing tumor necrosis factor.

Get Healthy Aloe MPS is taken as a loose powder mixed with water on an empty stomach in the morning. For health maintenance a quarter to half a measuring teaspoon a day is used, with an ounce lasting 4 to 8 months. For serious health concerns, **usually 2 measuring teaspoons or scoops a day** are used, with the large size container lasting a month. For advanced cancers three times this amount is suggested, 3 bottles a month.

A woman in her middle forties was diagnosed with a high-grade progressive malignant bladder cancer. X-rays and a biopsy showing that her bladder was 20% consumed by the cancer, which had invaded the muscle tissue and was considered to be one of the most aggressive types. She was scheduled to have her bladder **removed**, but after a few weeks of taking a high dose of Aloe MPS she went in to have the operation for bladder removal and the medical doctors found that her cancer was gone!

One man had advanced liver cancer. Chemotherapy treatments were *unsuccessful*. Bleeding in the intestines required months of blood transfusion. Five days after beginning one teaspoon a day of Aloe MPS, his bleeding stopped. His health gradually improved, and he returned to a more normal routine of day to day living.

Another man in his early seventies, who was undergoing chemical and radiation therapy for **pancreatic cancer**, had lost a tremendous amount of weight, so much that his family became very concerned and ordered Aloe MPS. Within two weeks of using a very high dose of Aloe MPS mixed with water, 6 level measuring teaspoons, he began gaining weight and had much less nausea from the medical treatment he was receiving.

One woman, taking 7 1/2 tsp a day, said she felt it going directly to her cancer and working on it every time she took it. (She had very extensive bone cancer.)

Get Healthy Aloe 3X is a aloe vera concentrate that boosts the immune response threefold when taken *with* the regular Aloe MPS. Use it with the regular Aloe MPS. Take half as much of the 3X as the MPS. The weight range of the polysaccharides in Aloe 3X was proven via scientific studies to increase immune system response by **300%**. (Aloe 3X

contains components of the galactomannan molecule that target the immune system.) So for fighting cancer, it is slightly more potent than the Aloe MPS. The bottle is half the size of the large Aloe MPS bottle so one large Aloe MPS and the half sized Aloe 3X will last the same time.

Suggested usage for early stage cancer is one container of each per month. That would be 2 scoops first thing in the morning of the Aloe MPS mixed with one scoop of the 3X in water. Flax oil or lecithin can be added to this to increase absorption. Three containers of each per month is suggested for advanced cancers. This combination, when used in the suggested dosages for fighting cancer, comes in at **432** in our energetic testing. Recently, however, another aloe based glyconutrient powder has been developed that is even better.

Glyco Ultra

Glyco Ultra has some of the same concentrate as makes up the Get Healthy Aloe MPS. However additional aloe molecules from other sources have been added to it. Along with other nutrients to increase absorption into the body. There are enough new sugars added to it that it can be called a true glyconutrient, hence its name.

These changes make it considerably more potent than any of the other glyconutrients and aloe powders we have checked. After **Glyco Ultra** has been frequency enhanced, our energetic testing gives it a very high **568**. Which makes it one of the highest rated immune system support supplements we have yet tested. Use 1 large bottle a month for early stage cancer, 3 a month for advanced stage cancers.

There are two products discussed later in this report that also work on enhancing cellular communication. The primary activity of the glyconutrients and aloe powders. These are an energized or frequency enhanced elixir, Clear Circuit Elixir. And an organic herbal formula designed to work with the elixir to further enhanced cellular communication. Clear Circuit Herbal Formula. They work synergistically with Glyco Ultra, and because they work on the same thing in such a completely different manner, using all three products together is especially effective. When take in the suggested quantities, 1 bottle of each of the three for early stage cancer, 3 bottles of **Glyco Ultra**, 3 bottles of **Clear Circuit Elixir** and 3 bottles monthly of **Clear Circuit Herbal Formula** for advanced stage cancer, *energetic testing put the ability of this combo to fight cancer at an astounding 897.*

Only one other product combination even comes close to this, the combination of **OxyDHQ, Zeolite Enhanced with DHQ and pH Balancer 8.0**. This combination, when used in the suggested quantities, tests energetically at **873**. Other two or three product combinations of the supplements covered in this report do not come in nearly as strong.

Mushroom, Beta Glucan and Similar Immune Support Supplements

Some of the better known cancer fighting supplements are found in this section. A surprising number are not that good. Some are good, and we'll cover a few of those. None are great- at least not that we've checked on so far. Mushroom based supplements help to increase Natural Killer Cell activity. Beta Glucans which also come from mushrooms also work on increasing the number of T cells. All valuable things to happen when fighting cancer.

The **AHCC** mushroom extracts have been around for years with a good deal of research behind it. I've spoken with mushroom product formulators who say that it is a bit out of date and not that good. They may be right. Energetic testing on this comes in at **44**. Not what you'd like to see in a product if you're taking it to beat cancer. It is sold under various names.

A number of the individual mushroom supplements came in at around 100 in energetic testing. These include good Maitake and Shitake supplements. **UltraCeps**, a cordyceps mushroom formulation comes in at **120** for fighting cancer. (We suggested it previously for improving the ability of the blood to carry oxygen and for helping to heal the liver.) As does a **Reishi Complex**, one of the better ganoderma supplements we found.

Beta Glucans have long been touted for their immune boosting ability. The very best one, with a lot of testing showing it is better than other similar products, however, energetically tests at only **150** for cancer. I suspect that in general products that are isolates just don't work as well as you would like - in the body.

There are a few companies producing **Rice Bran Arabinoxylan Compound (RBAC)** immune boosting products. MGN... being the most well known. It and Peak Immun... both energetically test good. At **200**. Some other off brands, so to speak were much less, around **130**.

There are a few mushroom combination products that test just a little better than 200. As we haven't come across anything better, and as they are in the good range and we've heard of them helping with cancer, we will cover them in more detail.

UltraImmune9

UltraImmune9 specifically targets and nutritionally supports optimum anti-cancer performance. It is based on a little known Chinese Medicine anti-cancer formulation, giving you a high concentration of nine established immune boosting mushrooms. These nine mushrooms have both historical and modern track records of proven performance, and provide a broad base of nutritional support for a hard working immune system. Energetic testing puts the cancer fighting power of **UltraImmune9** at **730**, when used in high therapeutic doses.

Below is a summary of the medicinal and anti-cancer properties of each mushroom in it.

1) Trametes Versicolor or the Turkey Tail mushroom.

This mushroom has long been treasured in the East; in Japan it is known as kawaratake (mushroom by the river bank), and in China it is called Yun Zhi or Cloud Fungus. In Japan around 1965 a chemical engineer investigated this mushroom for its anticancer constituents after observing his neighbor's life-threatening cancer was cured after taking Cloud Fungus. This led to the discovery of PSK and later it's closely-related PSP (Polysaccharide-Peptide).

Decades of clinical experience indicate PSK is very gentle on cancer patients and works well for cancers. PSK significantly extended survival at five years or beyond in cancers of the stomach, colon-rectum, esophagus, nasopharynx, and lung (non-small cell types), and in a HLA B40-positive breast cancer subset. It's sister, PSP, in double-blind trials, significantly extended five-year survival in esophageal cancer. PSP significantly improved quality of life, provided pain relief, and enhanced immune status in 70-97 percent of patients with cancers of the stomach, esophagus, lung, ovary, and cervix.

PSK and PSP boosted immune cell production, ameliorated chemotherapy symptoms, and enhanced tumor infiltration by immune system cells.

2) Agaricus Blazei

With a high beta glucan content this mushroom assists in the production of interferon and interleukin which are potent in fighting cancer, especially in the uterus. Anti-tumor effects come from a range of polysaccharides including "beta/ alpha/ xylo/ galacto/ and protein glucan. And its steroids, nucleic acids, lipids and lectin have cancer inhibition properties. *In Japan, intensive research done with guinea pigs showed that Agaricus Blazei blocks cancer development 99.4% and reverses growth in 90.0%.*

3) Grifola Frondosus or Maitake Mushrooms

Along with Ganoderma lucidum (Reishi) and Lentinula Edodes (Shitake), this is one of the most thoroughly studied of the medicinal mushrooms. It is an extremely rich source of polysaccharides which stimulate the immune system in diverse ways including boosting T-cells and NK-cells. Extensive studies also verify its liver support efficacy.

4) Ganoderma Lucidum or Reishi Mushroom

Ganoderma lucidum is one of the most thoroughly documented mushrooms with extensive human trials verifying its highly effective pharmacological characteristics which include Anti-cancer tumor inhibition, Histamine inhibition, Antioxidant, anti-inflammation, anti-allergy activity. Research indicates that the polysaccharide beta-1, 3-D-glucan in Reishi boosts the immune system by raising the amount of macrophages T-cells. This has major implications for people suffering from AIDS and other immune system disorders. Nutritional support to boost immunity, fight cancer and heart disease, calm your nerves, and relieve allergies.

5) Cordyceps Sinensis

Cordyceps Sinensis is one of the most versatile multi-purpose medicinal mushrooms, with quite extensive modern human and animal studies confirming its effectiveness. One study demonstrated that Cordyceps added significant enhancement of NK cell activity in normal individuals as well as in leukemia stricken individuals. Natural Cordyceps enhanced the NK cell activity of normal patients by 74% and increased the NK activity of leukemia patients by 400%. Similar improvements of NK cell activities was found in big melanoma cancer.

6) Lentinula Edodes or Shitake Mushroom

The shitake has been used since the Ming Dynasty to cure respiratory illnesses, liver trouble, exhaustion, and poor blood circulation. This mushroom has also shown potential for successful treatment of heart disease, cancer, and AIDS. Its two polysaccharide derivatives, Lentinin and LEM, have been extensively studied in Japan, and are officially approved as cancer therapy adjuncts by the Ministry of Health.

7) Polyporus Umbrellatus

Like many of the other of the medicinal mushrooms listed, it fights bacteria, inflammation, viruses, and benefits the immune system, the liver, and the respiratory system. It is renowned for its urinary tract benefits in particular, and is used for treatment of lung, gastric, cyst and cervical cancers.

8) Flammulina Velutipes or Winter Mushroom

The health benefits of Winter Mushroom include supporting liver and ulcer repair. Its anti-tumor activity is suggested in many studies including effects on proliferation, apoptosis and colony inhibition in human breast cancer cells.

9) Hericium Erinaceus or Lion's Mane

Lion's Mane has been traditionally used in both Japan and China for centuries. Recently, Japanese researchers have isolated a NGSF (Nerve Growth Stimulant Factor) from the mushroom that causes brain neurons to re-grow. This has important implications for helping to cure senility, neurological degradation, and increasing intelligence. It has been proven to help the digestive system and is used as a tonic for the nerves.

Studies in China proved that it is effective on "ulcers, inflammations, and tumors of the alimentary canal. Ingestion of this mushroom is said to have a remarkable effect in extending the life of cancer ridden patients. Ying (1987) reports that pills of this mushroom are used in the treatment of gastric and esophageal carcinoma."

You need to use a lot of UltraImmune9 to get an energetic rating of 730. Use 6 bottles a month for early stage cancer. Nine bottles a month for advanced stage cancers. That would be 18 or 27 capsules a day.

Agaricus Enhanced

This liquid extract is a highly potent Agaricus Blazei hybrid mushroom, with Sasa Bamboo leaf extract. Using , patented extraction technology that captures each and every nutritious element from a hybrid mushroom that took years to develop, and Sasa Bamboo leaf, it is a source of beta glucans and other immune factors. Frequency enhancing, the same as what is done for the Glyco Ultra, is what makes it just a little better than these other mushroom supplements. Before it is frequency enhanced, energetic testing for its benefit in fighting cancer is **156**. Frequency enhancing increases its potency to **230**, which is why it is called Agaricus Enhanced.

Research in the 1970s, revealed that the consumption of a special kind of wild mushroom, known as the Agaricus Blazei, was the reason natives of the region lived to more than 100 years of age with great health. In fact, the natives referred to their locally grown Agaricus as, "the king of mushrooms" or "the mushroom of life."

Scientists combined the original "mushroom of life," with another potent Agaricus Blazei mushroom. The levels of nutrients in the new "hybrid" mushroom were higher than either of its parents. This mushroom is the most powerful Agaricus mushroom grown - with significantly higher beta glucan levels and nutrient content.

Sasa Bamboo leaf extract, the other ingredient in Agaricus Hybrid, is considered by many to be the world's most powerful antioxidant. Sasa Bamboo has been used for centuries in Japan as a traditional medicine and to preserve food, most notably sushi, for days without refrigeration.

This product uses a patented, 10-stage extraction process to ensure that every nutrient from the Hybrid Agaricus mushroom and Sasa Bamboo leaf is bio-available. It comes in a 10 ml. liquid bottle. Use 2 bottles a month for early stage cancer and 4 bottles a month for advanced cancer.

Finally is a formulation with a special mushroom and herbs. Perhaps they are what make it more potent?

Defense

Defense uses a Tsi-Ahga mushroom conk combined with some herbal anti-cancer ingredients. It is excellent for knocking out tumors. For instance, within three days of taking just 1/4th of a capsule twice daily, the cat's tumor started making dramatic changes. Then on the fifth day, more changes -- the tumor began disintegrating. It turns out that the tumor actually liquidized and leaked out onto the driveway where the cat was lying in the sun. This was after 2 years of using Graviola and other natural supplements that had not been successful in stopping the cancer.

Energetic testing for its cancer fighting ability puts **Defense** at a very good **378**.

The four main ingredients in "**Defense** are Black Cumin, Muscadine Grape Seed, the Native American Sacred herb "Tsi-Ahga" and Allicin-Release Product (ARP) from garlic. Each one is demonstrated in scientific research to strengthen, support and modulate the immune response in different ways.

Garlic extracts have been used for thousands of years successfully to aid in a wide variety of conditions. Allicin is the natural defense mechanism of the garlic plant that science has proven to be effective as a defense for us as well. Some research-supported actions of Allicin are: reduces blood pressure, kills microscopic organisms, poisonous bacteria, parasites and fungal infections, aids in preventing neoplasm, reduces high blood cholesterol, removes heavy metals and other toxins, scavenges and removes free radicals, repairs immune system cells by providing high sulfur compounds, and increases blood circulation.

Even though Allicin was discovered in 1944, its volatility means that most garlic based products contain hardly any Allicin. Using a patented process, Defense has pure allicin in it that is stabilized and effective. The amount found in two capsules of "Defense" is equivalent to eating 45 bulbs of garlic!

Black Cumin has impressive scientific research behind it that shows it stimulates the bone marrow to produce immune cells, increases interferon production, protects the body against viruses and inhibits infection. Black Cumin has also been proven effective against the development of cancer.

The Cancer Immuno-Biology Laboratory of South Carolina ran a series of experiments in which mice were infected with tumor cells. Two thirds of the animals treated with Black Cumin oil were still alive thirty

days after being infected. In contrast, ALL of the mice that did not receive Black Cumin treatment died within thirty days.

The makers of Defense use a patented process to turn the black cumin oil into a powder without losing any of the essential phytonutrients found in the oil. In its capsule form it is much easier to take than the oil. It is the highest quality cumin, organically grown in Egypt.

Tsi-Ahga is a Native American Medicine derived from conks that grow on certain cone-bearing trees. The Beta-3D-glucans which make up part of the cellular structure of these Conks cause a modulation of T-Cells, Macrophages and Neutrophil White Blood Cells, when ingested. In fact, it has been established that the number and viability of these particular cells is increased by as much as 4000% within 20 hours after taking Tsi-Ahga!

Macrophages and Neutrophils are the two cells upon which all other immune cells depend. You can have many viable B-Cells and T-Cells, but they will not be effective without the programming provided by these macrophage and neutrophil "Communicator" cells. Tsi-Ahga also contains bitter triterpene compounds that support the thymus and spleen (essential to insuring that immune cells are properly programmed), anti-tumor polysaccharides, blood pressure-reducing angiotensin re-uptake inhibitors, and perhaps the highest source of germanium in nature. Germanium is an oxygen catalyst, and one of the most powerful free-radical scavengers found in nature.

Muscadine Grape Seed contains higher levels of antioxidants than blackberries, black raspberries, blueberries, cranberries, red raspberries, and strawberries. This finding was established in the early 1990s by Mississippi State University, as well as by the National Institutes of Health. Because it is so much higher in antioxidants, Muscadine Grape Seed protects and restores immune function resulting in a wide variety of protection throughout the body.

Defense is a good cancer fighter. Relatively inexpensive too. Use four capsules a day for early stage cancer to six capsules a day, 2 or 3 bottles a month.

Herbs (and more) That Fight Cancer

I've had too many people tell me what nutritional supplements they were taking for their cancer. Where the supplements they mention, to my consternation, just weren't strong enough to vigorously fight cancer. A lot of those supplements were herbs, vitamins and minerals. Some juices. We'll start out this section by giving you the Energetic Testing results for a lot of them. So you'll have a better idea what may work better, and what isn't so effective.

Some good quality herbs known to boost the immune system response do not test all that strong individually for cancer. In the **30 to 40** range of the energetic testing were Golden Seal, Pau d'Arco or Teehebo, Echinacea, Green Tea and Green Tea Extract. Cat's Claw comes in just a hair better at **55**. Still nothing to get excited about.

PawPaw comes in at **110**. **Graviola** used therapeutically at **120**. **Gerson** protocol at **120**. **Hoxley** tonic at **132**. **Essaic** teas varied in quality from **120 to 320**. The best **Chinese herbs** for fighting cancer, if you are fortunate enough to run across someone who knows what they are doing, energetically test at **324** for fighting cancer. The highly touted fermented wheat germ product is also good, a **321**.

A bit less than the best of these are **Raspberry Seed Capsules** at **286** when doing the usual therapeutic amounts of 2 to 3 bottles a month. And about the same potency as the Chinese herbs, but easier to take is...

YewImmune5

This is derived from the Pacific Yew Tree which has a long history of use as a cancer fighter. YewImmune5 is an all natural supplement made from the needles of the Pacific Yew tree. These chlorophyll laden needles have additional nutrient benefits over the bark alone. The number 5 in YewImmune5 represents the five body systems this little known nutritional powerhouse supports: 1. Endocrine 2. Cardiovascular 3. Respiratory 4. Digestive 5. Immune.

Yew has been used for centuries to treat many different ailments, and has a long history of medicinal use. North Americans referred to the Pacific Yew as "Chief of the Forest" because of its incredible and miraculous healing powers when utilized for strength and endurance. Salves made from the Pacific Yew needles were used to treat skin tumors and

diseases, bronchitis and respiratory problems. Pioneers brewed the needles and bark to relieve colds, fevers, headaches, stomach, kidney and lung problems as well as for sore swollen joints from arthritis and rheumatism.

Users have noticed that its ability to strengthen the immune system and ward off illness surpasses other herbs or supplements. YewImmune5 quickly and powerfully supports the body's ability to fight cold and flu symptoms such as stuffy nose, blocked sinuses, sneezing and watery, itching eyes, as well as aches and pains.

Is YewImmune5 proven to work? Absolutely. Government research done on the Pacific Yew tree showed that it contains many health promoting substances. Most notable were the anti-cancer phytochemicals present in the Pacific Yew. The unique anti-cancer constituents of the Pacific Yew were discovered for the first time in the 1960's and are called **taxanes** (inspiring the brand name Taxol). Pacific Yew taxanes are incredibly powerful plant chemicals that exert some of the strongest natural anti-cancer properties ever seen in cancer research.

How do taxanes work? Taxanes fight cancer by preventing cancer cells from dividing. Cancer cells reproduce when the parent cell grows small tentacle-like tubes called microtubules. New cancer cells grow at the ends of the tubules, and when they mature, the tubules disintegrate so that the new cells are freed from the parent cell and can reproduce and function on their own. Pacific Yew taxanes, unlike any other anti-cancer drug or substance, actually prevent the disintegration of tubules, so the new cancer cells cannot separate from the parent cells. This paralyzes cell division and the cancer cells eventually die.

Not only does Pacific Yew contain anti-cancer taxanes, it also provides a wide range of other plant chemicals such as glycosides, flavonoids, lignans, benzenoids and enzymes, all of which have been shown to have powerful natural anti-inflammatory and immune boosting properties that work to help your resistance to illness. Its anti-inflammatory substances help alleviate symptoms related to inflammation such as stuffy nose and sinuses, fever, as well as aches in the muscles and joints.

Dr. Elias Gutierrez, M.D. and Mildred Nelson, R.N. from the BioMedical Center in Mexico states about YewImmune5 "Over 20,000 of our cancer patients have included Pacific Yew tea, capsules and salves to their treatments. Patients are advised to continue Yew in their diets for one year after we can no longer detect cancer in their systems and periodically thereafter for preventative care..The immuno-stimulant, anti-viral, anti-inflammatory, anti-parasitic and detoxification properties of Pacific Yew are also extremely beneficial..."

YewImmune5 has wide ranging benefits - with the proof to back it up. There are 180 capsules per bottle. Energetic testing puts **YewImmune5** at **366** in its ability to fight cancer when used in the suggested doses of a couple of bottles a month for early stage cancers and 3 bottles a month for advanced stage cancers.

Ellagic Acid Formula with Graviola

A few years ago an acquaintance told me story after story of people with cancer experiencing quick and dramatic improvement in their condition using Ellagic Acid. Such as a woman with **stage 4 breast cancer** virtually going into remission in two weeks. Now I don't know why the breast cancer disappeared that fast, but there is research showing that Ellagic acid has potent anti-cancer properties.

The Hollings Cancer Center has conducted extensive research on Ellagic acid. Their past nine years of study have shown that ellagic acid in the test tube, is causing G-arrest within 48 hours (inhibiting and stopping mitosis-cancer cell division), and apoptosis (normal cell death) within 72 hours, for breast, pancreas, esophageal, skin, colon and prostate cancer cells.

Clinical tests show that ellagic acid prevents the destruction of the p53 gene by cancer cells. Additional studies suggest that one of the mechanisms by which ellagic acid inhibits mutagenesis and carcinogenesis is by forming adducts with DNA, thus hiding binding sites on the DNA from the mutagen or carcinogen.

Dr. Daniel Nixon, MUSC, began studying ellagic acid in 1993. His recently published results show:

- * Cervical cancer cells - HPV (human papilloma virus) exposed to ellagic acid experienced apoptosis (normal cell death).
- * Ellagic acid leads to G1 arrest of cancer cells, thus inhibiting and stopping mitosis (cancer cell division).
- * Ellagic acid prevents destruction of the P53 gene by cancer cells. P53 is regarded as the safeguard of

mutagenic activity in cervical cells.

* Tests reveal similar results for breast, pancreas, esophageal, skin, colon and prostate cancer cells.

Ellagic acid has also been shown to **inhibit** the initiation of **tumors** in many types of cancer. It acts as a **scavenger**, and binds to cancer causing chemicals to make them inactive. It even prevents their binding to DNA and thus has been shown to *reduce* the incidence of cancer in human cells exposed to carcinogens.

Ellagic Formula with Graviola has high amounts of Ellagic acid and several other antioxidants with proven anti-cancer properties. While individually on their own these anti-oxidants are not that valuable, as a group they do provide some benefit. These are:

OPC's from grapes seed extract and **Resveratrol** from the grape skin both have been shown to be quite potent. Resveratrol in particular has been heavily researched. Not only does it inhibit the growth of cancer cells, but it can cause cancerous cells to **revert** back to normal, and helps prevent them from turning cancerous in the first place.

Green tea extract, which has long been known to fight cancer and heart disease. In addition the formula contains recommended amounts of most of the major antioxidant vitamins including **Selenium** and **Vitamin E** which protect against cancer and heart disease.

How well does this formula work?

One health food store owner says she has never seen *anything* work better against cancer. She tells of the story of a 90 year old man with **prostate cancer** which had spread to the **bones**. On his own he started taking 21 capsules a day. In a few months his cancer was **gone**. He was alive and in good health 3 years later. Not bad for a 90 year old man.

To make this formula even better, an extract from a rainforest tree is included. **Graviola**. There is a very interesting story behind Graviola. In 1976 a billion dollar drug company started investigating Graviola's cancer fighting properties. They found 2 phytochemicals in it that were:

- 10,000 times more toxic to colon cancer cells than a common chemo drug
- Lethal to 12 different kinds of malignant cells, including lung, prostate, and breast cancers
- Extremely safe as it protects healthy cells instead of killing them
- Something that *doesn't* cause extreme nausea or hair loss
- A treatment that doesn't make cancer patients drop huge amounts of weight, get weak, or compromise their immune systems

Of course, this is just in test tube research.

Does the drug company tell the world? Nope. Instead, the company sends researchers into the lab to isolate the natural chemicals so they can crank out a patented, prescription version of the drug. They do this for **seven years** before they finally give up... the synthesized version just wasn't working. (And you can't patent natural compounds -- it's against the law.)

So what do they do next? Instead of publishing their findings, they box up the research and put it away to collect dust. However, research on Graviola did continue, though it took a couple of decades for it to do so. Purdue University, funded by the NCI and NIH, has done a good deal of it. In 1997 they reported that the Amonaceous acetogenins found in Graviola: *"not only are effective in killing tumors that have proven **resistant** to anti-cancer agents, but also seem to have a special affinity for such resistant cells."*

These cells resist drugs by developing a pump that pushes the drug out the cell before it can kill it. Graviola inhibits the production of ATP so that cells cannot produce as much energy. While this may does not cause a problem in normal cells, it wrecks havoc on the cancer cells with pumps because of their high energy requirements.

What I like best about energetically testing supplements for their cancer fighting ability, is that this can help separate out the poor quality supplements from the good supplements. And let you know what might be just good, though it

sounds great. **Ellagic acid with Graviola** formulation tests good, at **384** when used in the therapeutic amounts. It's better than a lot of supplements, but it's not great. One bottle contains 180 capsules and a high therapeutic amount would be using 18 to 24 capsules daily, 3 to 4 bottles monthly.

Seasonal Rescue

This is another herbal formula designed to fight colds and other seasonal illnesses. It will also activate the liver, kidneys and lymph system so that they will be better able to handle the toxins and dead cancer cells that need to be eliminated when you are attacking cancer. You may even want to start it first, a day or two before other supplements or treatments, if time is not an issue, to get those organs in better shape before inundating them with toxins and dead cancer cells.

According to some anecdotal reports, Seasonal Rescue is a powerful cancer fighter too. This is because it contains wasabi and herbs that facilitate wasabi's transportation into cells and activate the wasabi. There have been a number of Japanese studies showing that wasabi is a powerful cancer killer. Plus it has a number of herbs that boost and enhance the immune system. As you will see, it works quite well.

One man with a spot of skin cancer decided to fight it with Seasonal Rescue. He took 5 tablets 6 times in day. By the end of the *second* day the cancerous spot was gone. A woman, upon learning she had ovarian cancer also took 5 tablets 5 or 6 times a day. In 30 days her cancer was gone.

This product is better than the information makes it sound. Energetic testing puts **Seasonal Rescue** at **375** for fighting cancer. Use 3 bottles a month for early stage cancer, 4 bottles a month for advanced. There are 180 tablets per bottle. Consider it both for supporting your detoxification organs and for its cancer fighting abilities.

Immune Power Herbal Formula

This tea is proving to be one of the top immune boosting, cancer fighting products we know of. Containing many more herbs than Essaic or even Medicine Man Tea, it is a more powerful product. It is both anti-inflammatory and supportive of the immune system. A Ph.D. medical researcher specializing in cancer developed this tea by drawing on the best cancer fighting herbs from many cultures, including traditional Persian culture medicine. It is also supportive of digestive function, increasing assimilation of nutrients.

The herbs are organically grown and include: Dandelion Leaf, Rose Petal, Milfoil, Verbenia, Orange Peel, Hyssop, Red Raspberry Leaf, Angelica, Shavegrass, Ginseng, Star of Bethlehem, Sweet Violet, Cleavers, Red Clover, Burdock.

Again, not much of a story to tell on **Immune Power Herbal Formula**, but energetic testing has it coming in at a very high **436** for fighting cancer. One container supplies two cups a day for a month for early stage cancers. Use up to 6 cups a day for advanced cancers.

Whole Food Based Immune System Support

Bovine colostrum supplements have been touted for years as excellent immune system booster. As usual there is a range of quality and effectiveness. Energetic testing puts the lesser quality colostrum supplements at around **40**. The good quality ones are significantly better at **120**. Better still are the transfer factor colostrum supplements. These come in close to **200** in healing power. Below is the colostrum immune factor supplement with the highest energetic testing, **246**. Probably because, as a spray, it absorbs directly in the mouth and does not get as reduced in potency by digestion.

PRP Factor

PRP Factor is a proline-rich extract of grade A bovine colostrum that gives you thousands of bioactive nutritional compounds including high therapeutic levels of PRP's and Cytokines. It is an excellent immune system modulator. This means it will both help to cool off the inflammation that so often occurs with cancer, and also boost the immune system's ability to kill cancer cells.

In addition it provides nine distinct growth factors, dozens of known immune system regulators, Lactoferrin and

Transferrin. These nutrients nutritionally support the immune, cytokine and endocrine systems, and recent research indicates that they also have powerful action against degenerative conditions and infections of all types.

"PRP in bovine colostrum has the same ability to regulate activity of the immune system as hormones of the Thymus gland. It activates an underactive immune system, helping it move into action against disease-causing organisms. PRP also suppresses an overactive immune system, such as is often seen in the autoimmune diseases. PRP is highly anti-inflammatory and also appears to act on T-cell precursors to produce helper T-cells and suppresser T-cells" ...Drs. Staroscik, et. al., Molecular Immunology.

PRP Factor provides all the immune factors found in colostrum. Because absorption starts when it is sprayed into the mouth, these immune factors are not damaged by the stomach's digestive process as ordinary colostrum or transfer factor capsules are. Use 4 sprays twice a day. One doctor calls this a miracle product as every one of his patients improves when he gets them on PRP Factor.

Use one bottle per month for early stage cancers, 2 bottles a month with advanced cancer, making it one of the least expensive and more powerful supplements you can use to fight cancer.

Whole Super Foods

Years ago one of the first supplements I heard stories about knocking out cancers was the **Super Blue Green Algae**. Only when used in super high doses. I recommended it for years and it did help many people when used along with other supplements. When we finally began to do energetic testing to help determine what was great and what was just okay, the algae turn out just to be okay, with an energetic reading of **145**.

Currently there are folks promoting the ability of **stem cell enhancing algae extracts** with a few other nutrients to fight cancer. Unfortunately, energetic testing rates their cancer fighting ability a little lower than the high dose whole algae, at around **100**.

Other folks have been promoting the anti-cancer effects of the next life just a hair higher up the food chain, **marine phytoplankton**. Unfortunately, the original version and a version that combined a bit of the marine plankton with a host of other nutrients in a liquid form, have fairly low doses of the plankton. Energetic testing puts them at around **130**. The version below, perhaps because it just has more of the phytoplankton, perhaps because of its other ingredients is a bit better. Here is the story.

PlanktonPlex

A few years ago the owner of a company harvesting and growing phytoplankton from sea water to feed a fish farm was told he has cancer, and that he didn't have long to live. For some reason, and much to his daughter's disgust, he started eating some of the phytoplankton paste he was producing, just scooping some up with his fingers and eating it. Three months or so later his cancer was gone, his blood sugar normalized too. He started having other people take it, and their health improved also. So he started selling the stuff.

While it was very good stuff, the product included only small amounts of the phytoplankton and a vast majority of some unhealthy filler. So we jumped at recommending PlanktonPlex when it came available. With more marine phytoplankton per capsule. Its "filler" was highly potent and valuable fossilized red algae, Broccoli Seed Extract which is a very effective immune system booster and cancer fighter on its own, Chia Seed Extract, Sprouted Flax Seed, Humic/Fulvic organic acids, Vitamin C, and Aulterra trace mineral extract.

Plankton form the base of the whole food chain in the ocean. Wild. Full of nutrients, it is a marine macro algae. It contains long chain polysaccharides that enhance cell communication, making it a powerful immune system supplement. Kills candida, and more. For an early stage cancer use two bottles a month, to deal with advanced cancer you need to be using three bottles a month. **PlanktonPlex** comes in at **230** for fighting cancer.

Health Juices. There have been several medicinal juices that have been touted as being great for boosting the immune system response and fighting cancer. Unfortunately while the best of them may be good, they are not great. Energetic testing for therapeutic amounts of the best Mangosteen juice comes in at just an okay **100**. This has been touted as

being especially powerful for cancer when you drink super high doses of a bottle a day. And it is better. **242** Good but not anywhere near great. And very expensive for what you get.

Another well know competitor, **Goji Juice**, didn't fare as well in the energetic testing. It was only a **43** for therapeutic amounts. **Acai Juice**, at least the best one, was slightly better than the Mangosteen. **130** for the usual therapeutic amount. **250** when drinking a bottle a day.

Two Other Excellent Immune Support Supplements

There are a couple of other supplements I didn't quite know where to put. Here seems as good as any place. They are:

Total Hormone Support

This product is included in the immune support section because people with cancer have a collapsed hormone system. And you need a strong functioning hormonal system to control the immune system response. Total Hormone Support is a unique formula that feeds the glands that make up the hormonal system, and activates the whole system so that it starts working properly. This allows your brain to better connect with the body and direct the fight against cancer.

It is a 2 ounce liquid herbal extract made from isolated fractions of Indonesian yams. This is combined with subtle frequency technology to activate and energize the hormonal system. It is very good for fighting cancer, coming in at **347**. However, as the Clear Circuit and Quantum X elixirs do some of what it does, it is only suggested if you are getting a full range of products for cancer. We highly suggest it though, for balancing out hormonal cancers like estrogen dependent breast cancers. Then it is quite valuable.

Vitamin D Forte Emulsified

Getting enough Vitamin D is vital for fighting cancer. In fact, a lack of it may contribute to cancer. There is more cancer (and MS) in the higher latitudes of the North because weaker sunlight produces less vitamin D. Vitamin D has been used to treat breast, prostate and other cancers. Vitamin D is really not a vitamin. In fact, it is a steroid hormone, with a wide array of bioactive properties. Anti-cancer functions of this exotic vitamin include:

Regulation of some genetic functions that help to reduce cell proliferation (cancer cell growth). Prevention of cancerous transformation in cells, and modulation of apoptosis (cell death). Vitamin D seems to help prevent and even treat a variety of cancers, including breast, colon, prostate, lung, and lymphoma.

Some health practitioners recommend 4000 to as much as 10,000 units a day when dealing with ill health situations. Actually some recommend 50,000 units a day for short periods of time. Most people don't get enough vitamin D from the sun, even in the south. This emulsified vitamin D is the best source for a supplement because of its increased absorption and assimilation. Also, it is very easy to take. One drop supplies 2000 IU. Energetic Testing puts **Vitamin D Forte Emulsified** at **304** for its cancer fighting abilities. Best to use 3 drops a day in this case. There are 600 drops in a bottle, so it is approximately a 6 month supply. Because it is very inexpensive, and because it can benefit virtually everyone, everyone fighting cancer should be getting a bottle of this.

Cancer Strategy #6: Kill Candida Yeast Infections

If you decide to get the top anti-cancer product we have yet seen, **OxyDHQ**, and are taking it in the suggested quantities of 3 to 5 bottles a month for early, advanced or end stage cancer, you will be using an excellent candida killer. Also if you add on the **pH Balancer 8.0** and use it along with the OxyDHQ, you will be using another supplement that will help considerably at dealing with the candida.

Even the baking soda and water will help, though not as well orally as the pH Balancer 8.0. Here's a bit more on that story.

One Italian doctor, Dr. Tullio Simoncini, has a theory that all cancer is caused by candida. The

candida fungus forms a vital role in cancer's ability to survive. Candida makes toxins that impair the apoptosis process, which allows cells to become cancerous. And they intertwine with tumors, protecting them with a positively charged acid glue that holds candida (and the tumors) together.

His original solution, drink a teaspoon of baking soda (bicarbonate of soda) in a glass of water half an hour before every meal. It pulls acids out of the cancer cells, and neutralizes the acid glue holding the candida together. Without the candida to protect the cancer, cancers self-destruct.

This is simple and cheap. As we mentioned before, it comes in at **142** for fighting cancer in our energetic testing. He reported many remissions using this procedure. Now a few doctors in Italy inject pharmaceutical grade bicarbonate of soda into tumors - with better results. Tumors can disappear within days or weeks. His breast cancer protocol call for surrounding a breast tumor with up to 120 cc of 5% sodium bicarbonate solution daily if tolerated. After several sessions most local cancers are gone. A lot better than surgery! Energetic testing puts this procedure at a very good **431**.

For distant cancers use IV's to get it into the body. 500 cc of a 5% bicarbonate solution over about one hour. Best if it is in an artery leading to the tumor. Unfortunately, you're not likely to be able to get your oncologist to try either of these.

If you aren't taking the more potent pH Balancer 8.0, make sure you are taking a teaspoon of baking soda in a glass of water about half an hour before each meal.

If you have no money at all, you can increase the potency by using 2 teaspoons of baking soda in a quart of water. Drink 5 quarts a day of this mixture. **230**. (And make sure you are eating about a cup of freshly ground up flax seeds daily blended in an equal amount or more of cottage cheese or yogurt.) **201** in our energetic testing.

So you may not need to take any additional supplements for candida if you are taking the OxyDHQ and pH Balancer 8.0 or doing the baking soda regime. However, candida overgrowth and chemotherapy both kill off your friendly bacteria. Lack of friendly bacteria allows the candida to quickly and easily regrow. Friendly bacteria may be involved in as much as 70% to 80% of your immune system response. Getting these friendly bacteria back into your system right away, or at the very least a bit later on, is important to do. The probiotic we like the best for this is...

TotalFlora15

This probiotic, unlike most probiotics, is able to kill Candida, *and* does an excellent job of recolonizing the intestinal tract with 15 billion friendly bacteria per capsule. Even in the presence of candida. There are estimated to be one hundred trillion bacteria living inside the human intestine including 500 different species. This number amounts to more than TEN TIMES the number of cells you have in your whole body. These bacteria together weigh two to three pounds and could be considered your first organ of defense against disease.

Most of these bacteria are referred to as "good" but others provide little or no benefit. The ideal balance between them is 85% good and 15% "other". If the "others" numbers grow too large, you're not going to feel great and candida yeast or other harmful bacteria will overgrow and cause all types of health issues. This is why it is so important to help the "good" numbers stay high.

TotalFlora15 brings together two of the most widely accepted groups of probiotics - the Lactobacillus and Bifidobacterium species. They work together to maintain a balance of "good" bacteria within your digestive tract.

Also added to this combination is the Streptococcus Thermophilus, a highly versatile fast acting strain of friendly bacteria that also acts as a free radical scavenger. This additional strain works hand in hand with the 10 strains of Lactobacillus and four from the Bifidobacterium family to kick start a good bacteria bloom that promotes healthy

intestinal function, and works with your immune system to inhibit candida overgrowth.

For maintenance use 2 capsules daily from this 60 capsule bottle. To fight candida double the amount to 4 capsules daily. Energetic testing puts **TotalFlora15** at **324** for its ability to deal with cancer and **643** for its ability to deal with candida.

Cancer Strategy #7 - Reduce Toxicity & Support Detox Organs

Toxicity is certainly one of main underlying causes of cancer. In fact, if you have cancer, your body is toxic. Dead cancer cells are highly toxic. To protect your health, ease detoxification symptoms, and to better fight cancer, you need to detoxify and to support your detoxification organs so they don't get overwhelmed.

As with the candida strategy above, a couple of the top cancer fighters in this report happen to be two of the best detoxifiers you can get. That would be the **OxyDHQ** and zeolite, both **Zeolite Enhanced with DHQ** and **Zeolite Powder**. OxyDHQ creates oxygen which is a powerful detoxifier. In fact its detoxification power is the main reason you need to start taking OxyDHQ in smaller doses and gradually increase dosage size till you get to the full dosage.

And the very core of what zeolite does is that it first absorbs toxins, including the hard to get rid of heavy metals. It grabs hold of them and carries them out of the body without your liver having to handle them. As OxyDHQ and Zeolite Enhanced with DHQ are two of the most important supplements to use for fighting cancer, this section is going to focus more on detoxification organ support, helping your body deal with the dead cancer cells, which are highly toxic, and the toxic overload from chemotherapy.

Let's start by suggesting a supplement for cleaning out the colon. This is especially important for colon cancer. It was first mentioned in the Oxygenation Strategy. **O3Right**. Not only does it create oxygen in the colon which can help with the fight against colon or rectal cancer, but it softens any crud on the intestinal wall so that the magnesium in it can move it out of the body. Use a bottle a month. For cleaning out the colon, energetic testing comes in at **439** for **O3Right**.

Next let's introduce you to a product that replenishes your body's main cellular detoxifier and anti-oxidant, glutathione. Your liver also uses a great deal of glutathione to neutralize toxins.

Glutathione PleoLyposome

When you have a build-up of toxins in your body, as you do with cancer - and especially if you have had or are receiving chemotherapy, the glutathione levels in your cells (and liver) become depleted, and toxins build up in your body. This is because glutathione is your body's primary cellular detoxifier and antioxidant. Your liver's too. Depleted levels always occur with chronic ill health situations like cancer.

Glutathione is an amino acid, and thus is available in vitamins. Unfortunately, especially so for something this important, free glutathione as a supplement is not absorbed by your cells. Whether you take it in pill form or via injections, almost none gets into your cells or the liver. For years health practitioners have tried to come up with a way to get glutathione into cells. The only solution available before Glutathione PleoLyposome, was to consume undenatured whey protein like **ImmunoPro** or **RenewPro**. The amino acids in this type of whey can be used by the body to make glutathione. However, this process works slowly, and requires that you be able to properly digest the proteins.

Glutathione PleoLyposome has changed all this. I consider it a real breakthrough in detoxification, for any situation where toxins must be eliminated from the cells, like autism, Parkinson's, MS, and other autoimmune diseases. In it, glutathione has been bonded with a pure high quality essential phospholipid of Omega 3s and Omega 6s in a four to one ratio. That's good in its own right. Because this phospholipid is identical to the composition of your cell walls and blood brain barrier, it is very well absorbed into your cells. This enables the glutathione to be directly carried into your cells with virtually 100% absorption. Using Glutathione PleoLyposome, you can more rapidly and effectively detoxify your cells than you can with any other product.

Using Glutathione PleoLyposome is probably most important if you are suffering from nausea and other side effects of

chemotherapy. While Zeolite Enhanced with DHQ is known to have helped with this issue, **Glutathione PleoLyposome** can make a real difference with this. Energetic testing puts it's ability to help deal with the side effects of chemotherapy at an extremely high **742**.

The more you use, the faster the results. There are 10 teaspoons of liquid in a bottle. While a bottle a week, 1 1/2 teaspoons a day is the usual therapeutic dosage, as much as half a bottle a day can be used in life and death situations. It does have cancer fighting abilities. Energetic testing puts its cancer fighting ability at **210**.

Glutathione may inhibit the cancer cell killing abilities of vitamin C, selenium, melatonin, curcumin, ellagic acid, vitamin D and vitamin K. These all work by generating reactive oxygen species which are counteracted by glutathione. While it is a great detoxifier, you may want to moderate it's use if you are taking these or similar cancer fighting supplements.

Supporting the liver and kidneys will help to minimize detoxification side effects and be a significant help in detoxifying your body. The kidneys flush waste toxins from the body. Every muscle, organ, bone and tissue you have depends on the kidneys to keep them free from corrosive salts and chemicals. The liver filters and cleans the blood, breaks down toxic substances, and tries to deal with the overwhelming amount of chemicals and toxins we are exposed to when battling cancer.

UltraLiver8, Liver Balance Plus, Kidney Rescue and Lymph Drainage

Liver Balance Plus and Kidney Rescue are herbal formulas that are designed to work together to support the function of these two organs. (**Seasonal Rescue** supports both organs too.) If you are embarking on a cancer fighting program which will detoxify your body, taking both the Liver Balance Plus and the Kidney Rescue will help you avoid some of the detoxification symptoms. Best results come from using 3 to 4 bottles of Liver Balance Plus per month, 24 to 32 tablets a day, and 2 to 3 bottles of Kidney Rescue a month, 12 to 18 tablets a day. Less can be used.

This would enable you to more rapidly increase the amounts of the cancer fighting supplements you take, and can even help prevent death that sometimes occurs from to rapid killing of the highly toxic cancer cells in people who are in weakened states.

UltraLiver8 focuses on liver support too. It 's main ingredient also happens to be the top medicinal mushroom for fighting cancer, Reishi. Which just happens to be great for the liver. It also makes use of the herbs Triphala and Burdock as the two other major ingredients for liver support. With additional ingredients to enhance assimilation and use. None of the ingredients in UltraLiver8 are used in Liver Balance Plus so these two products form a good combo for liver detoxification support. Best results come from using 3 to 4 bottles of UltraLiver8 per month, that's 9 to 12 capsules a day. As with all herbs, best to take with meals but can be done anytime.

Lymph Drainage is a homeopathic formula that gets your lymph system moving. When you kill of cancer cells, or ar exposed to a lot of toxins through chemotherapy, your lymph system can get clogged up and stagnant and can't get rid of toxins. Use a couple of 2 ounce bottles a month of Lymph Drainage to improve the flow of your lymph system. Lymph Drainage is especially important if you have cancer in the lymph system. Then it becomes one of the more valuable supplements to be using - after you get some good cancer killers.

Energetic testing puts the value each has for supporting detoxification and helping the body deal with dead cancer cells and the toxins from chemotherapy at: Liver Balance Plus - **394**, UltraLiver8 - **438**, Kidney Rescue - **329**, and Lymph Drainage at **296** when the cancer is not in the lymph system, and at **793** if you do have cancer in the lymph system.

Cancer Strategy #8 - Free Radical Scavengers

Free radical damage from toxins plays such a fundamental role in the development of cancer, it is no wonder some of the first supplements people think of taking for fighting cancer are free radical scavenging vitamins. Unfortunately, most of them are just okay at best.

Energetic testing comes in at **43** for **high dose vitamin C** supplementation. **Super high dose** where you take as much as bowel tolerance allows come in a bit better at **64**. A course of **intravenous vitamin C sessions** at much higher doses

does better, **245**. Good, but not near as good as many of the supplements covered in this report. By the way, another popular vitamin treatment for cancer **vitamin B17 or Laetrile** energetically tests very close to this, at **247**, when used in the correct dosages. Eating optimal amounts of **apricot pits** comes in at **127**.

When used in therapeutic doses, **Vitamin E** energetically tests at **30** for its value in fighting cancer. **Vitamin A - 40**. The commonly sold **grape seed extract** is around **40** also. **Alpha Lipoic Acid - 60**. **Resveratrol - 120**. **Selenium**, which acts both as a free radical scavenger, and as a mineral that helps prevent cells from turning cancerous is considerably stronger at **200**. Many of these vitamins are in **Ellagic Formula with Graviola** covered in the immune supplements.

There is a well known cancer supplement whose claim to fame is its high anti-oxidant value. Again unfortunately, energetic testing puts Proto... or Can... at a good but not great level of 249. High quality **pycnogenol** energetically tests much higher, **421**. Which is why we've heard reports of it knocking out cancers on its own. A slightly better version is the European sourced **Health First Grape Seed Extract**. It comes in at **489** when used in high therapeutic doses.

Health First Grape Seed Extract

This grape seed extract is 40 to 50 times more potent than the typical grape seed extract sold everywhere. This is because it is made using Masqueleir's third and final patent which utilizes expensive vacuum and low temperature processing to protect the anti-oxidant capabilities of the grape seed. Masqueleir was the researcher who discovered the OPC's in grape seed extract, and researched the many health benefits they provide.

It is highly anti-inflammatory, great for pain relief, the cardiovascular system and cancer. OPC's have a history of being powerful cancer fighters as they protect cells from free radical damage and boost immune response. As reported in PubMed, the conclusion of one study on OPC's and colorectal cancer is: "These data indicate that OPC caused cell death by apoptosis through caspase pathways on human colorectal cancer cell line, SNU-C4."

Most people don't get powerful results using grape seed extract because the extract they use has not been processed correctly so it is largely impotent. And they don't use enough. Even with the highly potent Health First Grape Seed Extract, you have to use a lot when fighting cancer. Use about 12 capsules daily for an early stage cancer, 18 a day for an advanced stage cancer. That's 6 to 9 bottles a month for this very good cancer fighter.

Special Alpha Lipoic Acid

There is a well known and quite expensive anti-cancer supplement that combines a heavy metal with alpha lipoic acid in order to deliver the alpha lipoic acid into the cell. It has a few other vitamins and nutrients also. Energetic testing puts this supplement, when taken in the suggested high doses, at **249**. Which seems to be another case of something that is not as good as it sounds. You can accomplish something similar at a much lower cost - if you want, with...

DHLA Nano Plex Enhanced

DHLA is a fully reduced and thus immediately usable alpha lipoic acid. It has far superior free radical quenching power than even the previous best form of alpha lipoic acid, R-lipoic acid. What makes it even better is that it has been broken down into nano sized particles by probiotic fermentation.

In addition, it is frequency enhanced with vibratory energies, to further enhance absorption of DHLA into cancer cells. This reduced, nano sized and frequency enhanced alpha lipoic acid doesn't need a toxic heavy metal to help it get into cancer cells. Energy testing puts its cancer fighting ability at **248**, virtually tied with the other product.

What DHLQ does once it gets into a cancer cell is increase the amount of energy going the mitochondria of that cell. Because cancer cells produce energy anaerobically, they have very low energy production, and no longer have the energy pathways that a healthy cell has to handle the increased energy. So the mitochondria in a cancerous cell eventually becomes damaged when the DHLA gets into the cell, and the cancer cell releases enzymes that initiate apoptosis, a programmed cell death.

Healthy cells produce much more energy, so have the pathways to handle the increased energy production. DHLA only

helps them work better. Use 3 bottles a month for an early stage cancer, and 4 bottles a month for an advanced stage cancer.

Next we are going to take a look at how enzymes could help you beat cancer.

Cancer Strategy #9 - Enzymes & Catabolic Wasting Protocol

The pancreatic enzyme protocols for treating cancer make use of large amounts of pancreatic enzymes. They are taken on an empty stomach so they can go into the body to digest cancerous cells. And are taken with meals so that your pancreas doesn't have to produce as many enzymes to digest your food. This allows the pancreas to produce more enzymes to send into the body to fight cancer. The enzymes naturally produced by the body will be more effective than any enzyme supplement. Thus the protocols tend to use more enzymes with meals than taken on an empty stomach.

In the past we suggested using pancreatic enzymes along with the digestive PhytoBio Enzymes. A bit more potent than the pancreatic enzyme formulations though, with the best one we have found coming in at **298**, is a formulation of mature green papaya powder with additional support nutrients. The product is:

PapayaPro

The main ingredient in this formula is **mature green papaya powder**. Papain is the principal and most active enzyme in this powder. Papain possesses a very powerful digestive action superior to pancreatin, or pancreatic enzymes. Changes in intestinal alkalinity or acidity do not interfere with the unique digestive activity of papain. Taken on an empty stomach, it will work more aggressively than even the pancreatic enzymes in attacking and destroying cancer cells.

Taken with a meal, it will also help digestion. Papain, one of the most powerful plant proteolytic enzymes, will aid in protein digestion in an acid, alkaline or neutral medium. This is of vital importance if you are enzyme deficient or have low hydrochloric acid output in the stomach. The pepsin produced in the stomach for protein digestion is activated only in an acid medium. This requires a healthy output of hydrochloric acid which is insufficient in most people. Due to the powerful proteolytic action of papain, a more active digestant than pepsin, a major digestive problem for most people will be helped by the daily ingestion of mature green papaya powder.

The second major cancer fighting ingredient in PapayaPro is Citrus Pectin. It has the potential to prevent metastasis, or the spread of cancer. Modified citrus pectin's small molecules enter the bloodstream and act as decoys for lectins (cancer cell surface proteins), which are seeking the sugar galactose in cells. When lectins encounter the pectin, which also contains galactose, they attach to it as they would to a cell. Once bound to the pectin, lectins are unable to attach to other sites in the body and start new cancer colonies. Thousands of research studies have demonstrated citrus pectin's cancer fighting abilities.

PapayaPro also contains other immune boosting and cancer fighting ingredients such as mangosteen powder that act synergistically with the papaya powder. Use one to two of the 300 gram containers monthly on an empty stomach to fight cancer. Get an extra container if your digestion is poor and you want help breaking down protein. Energetic testing puts **PapayaPro** at **368** for its healing power for cancer. Its papaya enzymes will, on an empty stomach, get into the bloodstream and work to clean it up. Their extremely high levels of protease will also help to **break down the fibrin coating all cancerous tumors** so that the immune system can better *attack* those tumors.

Here is what you need to use if you are suffering from muscle mass loss caused by catabolic wasting.

Catabolic Wasting Protocol

Catabolic wasting can occur in the end stages of cancer, AIDS and other serious illnesses. It is a major cause of death in cancer. No matter how much someone eats, how much nutrition they get, they lose weight and muscle mass. They are not able to metabolize or make protein. Recently scientists have figured out why this happens.

Dr. Chojkier and Martina Buck, Ph.D., of VA, UCSD and the Salk Institute for Biological Studies, described the steps by which tumor necrosis factor (TNF) alpha, an immune-system protein, prevents the production of albumin. Low

levels of albumin, a critical protein made in the liver, is a keynote of wasting.

Drs. Buck and Chojkier showed that TNF alpha causes oxidative stress in the liver cell and also causes the addition of a phosphorous molecule to a protein called C/EBP beta, which normally joins together DNA in the nucleus of the cell to make other proteins, such as albumin.

This extra phosphorous causes the C/EBP beta protein to leave the nucleus and go into the cytoplasm, where it can no longer make the albumin. "We found that this phosphorylation makes the C/EBP beta exit the nuclear area and go into the cytosol, where there is no DNA for it to bind with. This means it can no longer produce the protein," said Dr. Chojkier. And this inability to produce albumin leads to the muscle wasting and weight loss.

The researchers found several ways of stopping the downward spiral caused by TNF- alpha. One way was to use antioxidants, especially ones that focus on the liver. This blocked the chain of events leading to the export of C/EBP beta from the nucleus of the liver cells. "If we block oxidative stress, we normalize everything," explained Dr. Chojkier. "C/EBP beta remains in the nucleus, it contacts the DNA, and proteins are produced.

As you can see, protecting the liver and normalizing liver function is vital to reversing or stopping wasting. If you don't stop wasting, you won't make it. You'll basically end up being killed by the wasting before the cancer kills you.

Fortunately, there is a protocol to stop catabolic wasting. You can notice improvement in a couple of weeks. Follow this protocol for at least two months to completely stop the wasting. Continue to take other anti-cancer supplements in advanced stage dosages while using this protocol. With the addition of Fulvitea, this protocol has been greatly changed from previous suggested protocols. While the past protocols were good, this is better. There are two products in this protocol.

The first is **Rejuvin**. Three liter bottles of this frequency enhanced water is a month's supply. You need Rejuvin because it stimulates cells to repair themselves. And in catabolic wasting the liver needs to repair itself so that it can start processing proteins again. What happens with Rejuvin is that the water in Rejuvin carries specific energetic vibrational frequencies that deliver a message to your body when you drink the Rejuvin. The message the cells get, in the case of Rejuvin, is to regenerate. Take one ounce or two tablespoons of Rejuvin 3 times a day. You will read more about this in the Energy section following this section.

Fulvitea is the second product you need to stop catabolic wasting. It has two basic functions. First it is a source of pre-digested protein that your body doesn't have to process to use. So you can actually start making muscle again. In addition it contains RNA and DNA repair factors to stimulate repair of the liver and also of cancer cells. It helps to normalize cancer cell function so the cancer cells die a normal death, apoptosis.

This 300 gram container of powder contains Hydrolyzed Marine Collagen from wild Alaska salmon which is 95% pure protein in a hydrolyzed (broken down) amino-acid form. In addition it has Fulvic Acid powder which intensifies the metabolism of proteins, increases DNA content in cells and increases the rate of RNA synthesis. The Green Tea Extract in it helps to drive the nutrients into the body. And does have some anti-cancer benefit.

It also contains NutraFlora - a short-chain Fructooligosaccharide assisting in the absorption and utilization of minerals and amino acids. It passes, intact, through the stomach and small intestine to the colon, where it is fermented by beneficial bacteria into short-chain fatty acids. These lower intestinal pH to an optimal level for keeping calcium, minerals and amino acids in solution for a longer period of time, making them much more absorbable. Absorption is further enhanced by Aulterra magnetic powder from an ancient seabed mineral deposit, Aulterra supports the utilization and effectiveness of nutraceuticals and herbs in the diet. And

Pascalite. A rare, calcium bentonite/montmorillonite, non-swelling clay, which has a long history of health uses. Pascalite provides trace minerals in oxide form, so they are easily assimilated.

By getting more energy to cancer cells, and stimulating repair of cancer cell RNA and DNA, Fulvitea is an excellent anti-cancer product in its own right. Energetic testing puts **Fulvitea** at **323** for fighting cancer, **496** for helping stop catabolic wasting. Use two containers a month for dealing with catabolic wasting. One container a month for early stage. We find it works best to shake or blend the powder into a smoothie or some sort of drink. It can be taken as a tea but doesn't taste quite as good that way.

There is a similar and more well known product that has been just for fighting cancer and wasting for years. It is a fermented soybean protein drink. For wasting and advanced cancers you need to drink a bottle a day of this ill-tasting or so I'm told, drink. Quite expensive too at \$50 a bottle. For fighting cancer, energetic testing puts it being as good as Fulvitea when both are used in their suggested doses, a **321**. Interesting, it is not as strong for catabolic wasting, perhaps because it has nothing to stimulate RNA and DNA repair. For catabolic wasting it comes in at **353**.

Using Rejuvin and Fulvitea for catabolic wasting, you may see results quickly, and be able to successfully turn around this deadly killer. Be sure and take as many as possible of the anti-cancer fighting products too.

PhytoBio Enzymes are the best digestive enzyme we have found. Take a capsule with each meal, during the meal, to help break down the food better. This takes a strain off the pancreas so it can produce more metabolic enzymes. And enables you to better digest your food, which will be of benefit in catabolic wasting.

Cancer Strategy #10: Energetically Fight Cancer

With some of the more powerful health promoting products we have tested...

When we started writing this report years ago, work on energetically enhancing your body's ability to fight cancer and improve health was in its infancy. As a consequence, fighting cancer energetically seemed something useful to do, but not vital. Though it made sense. Quantum physics had proved that everything was essentially energy so why not deal with the basics. Visionary health professionals talked about how in the future energetic medicine would be the strongest form of healing. Now this vision is coming true.

At that time we recommended products like an **energized water pitcher** that increased the vibratory energy of the water you drink. As cancer cells have very low vibration, the high energies could disrupt the cancer cells. These products were good, but not great, and when we test them energetically now, they come in at **200**. The granddaddy of energetic devices, a **Rife Machine**, tests energetically for fighting cancer at **120**. Better is the **Vibe Machine** which comes in at **233**. Some Indian Healing Stones with low dose radiation test even better at **310**.

With the development and release of a series of powerful frequency enhanced elixirs starting in May of 2008, using energetic frequencies to fight cancer is now possible. The Elixirs we are going to tell you about are proving to be powerful healing supplements and cancer fighters.

The principle they work on is simple. Research has shown that water will vibrate at the energetic frequencies they have been exposed to. The developer of these elixirs has been able to concentrate and stabilize these frequencies so that when you take a little of these elixirs, the fluid in your cells also picks up this vibration and respond to it. The elixir is essentially delivering a message to your cells. Depending on the vibrations being delivered, the cells will be stimulated and influenced to respond in a variety of ways. This is essentially what homeopathy does. The difference lies in how the elixirs are energized, and in the fact that the energies use have great ability to stimulate healing in the body.

Before vitamins, minerals, and enzymes, before tissue pH, before any molecular component can play a role in facilitating human health, your cells are reliant on electricity. The human body generates 3 volts of electricity. This energy is used by the brain to send signals, by the heart to respond to stimuli, and is used by every cell to communicate with each other in order to facilitate cellular change. A drop in electrical activity is most noticeable in terminal patients that are "wasting away". These Energy Elixirs enhance and energize your body's electrical activity with the special energetic frequencies that they give to your body when you take them. Let's go over them, starting with the most important one to use when fighting cancer.

Custom Elixir C

The most recently developed elixir was developed specifically for fighting cancer. And it does a very good job at just that. Energetic testing puts it cancer fighting power at a super high **863**. More than any of the other elixirs you will read about, the frequencies it transfers to your body disrupt and kill cancer cells. That's about 70% of what it does. Enhancing cellular communication so that the immune system can better identify and thus attack, cancer cells is the remaining 30% of its activity.

All the elixirs come in a two ounce dropper bottle. Anywhere from one to three dropper squeezes of whatever elixirs you may be using can be taken together and held in the mouth for a minute before swallowing. They must be taken at least 20 minutes away from any other food, drink or supplements so that the energies can better be transferred to the body. For an early stage cancer you would need one bottle per month. Advanced stage cancers require 3 bottles monthly for best results. Next comes our most powerful elixir in overall healing.

Clear Circuit Elixir

Because it doesn't focus as much as the Custom Elixir C on killing cancer cells, it is not as quite as potent for cancer. Energetic testing put is at a still very high **495** in healing power. Add on an herbal formulation designed to support what this elixir does, the **Clear Circuit Herbal Formula**, and the healing power increases to **531**. The herbal formula uses 7 herbs chosen for their traditional use in supporting the immune system. They are all highly nutritious, tonic and cleansing herbs which help increase circulation and cellular communication. They are all organically grown: Shavegrass, Clover flowers, whole Yarrow plant, Borage, Nettle leaves, Celandine and Fennel Seed. They provide nutrients that enhance cellular communication. Working in conjunction with the communication enhancing Clear Circuit energies.

The Clear Circuit Elixir energies do more than disrupt cancer cells and enhance the immune systems ability to fight cancer, though they do that also. They support the detoxification organs, and in general give the body much more life force energy. So the worse off someone is, the more likely they will need this elixir combo and the other elixirs described below to help keep someone alive and kicking till the cancer can be eliminated.

The Clear Circuit energies come from tapping into the quantum, formative process of the Universe, that which keeps us healthy and alive. Using the decoded information of ancient manuscripts, this elixir contains and delivers the information of over 2200 energetic circuits, creating a subtle flow of vibrational signals, prompting long-lasting quantum coherence. This coherence brings about powerful changes on an atomic and molecular level for all chemical structure and function in the body.

Clear Circuit Pendant

This pendant is a small hard plastic disk encoded with the 2200 energetic circuits. So it emits as a subtle vibrations these energies. Wear it around your neck, keep it in a pocket, put in under your pillow, tape it over your cancer. It will intensify the energies the Clear Circuit Elixir delivers to your body. Or get it by itself. As a one time purchase it is a less expensive way of exposing your body to these energies for a long period of time. The pendant is not as powerful as the elixir, it comes in at **350** in the energetic testing.

Quantum X

Along with the Clear Circuit Elixir, Quantum X is the second of the two super elixirs, delivering healing energies that are much stronger and more intense than the other elixirs. For fighting cancer it comes in at **410**. It delivers a different type of energetic frequency than the Clear Elixir. And so supports the body in a different way. All the other elixirs below do also. *The healing force and life energy they all supply to the body is most important for people with **end stage cancers**.* That's because the energy in these elixirs is so powerful and works in such a profound manner, taking these elixirs may be enough to keep someone alive long enough for them to literally beat cancer. At least it gives someone a better shot. They supply a hugh amount of life force energies to the body and support all aspects of health - physical, mental, spiritual and emotional.

All these elixirs use the ancient model of healing based on subtle vibration and energy to discharge patterns of disease. Energy healing has been used for thousands of years in many cultures throughout the world via a wide spectrum of modalities from breathing and movement techniques, to meditation, acupuncture and natural herbal remedies. What brings about dramatic healing from the above-mentioned energy modalities is the transfer of subtle energy to the cells guided by vibration. The importance of vibration can not be overstated in terms of how subtle energy communicates with our cells, enabling them to change their structure and function. Vibration encodes how the energies are used by the cells.

Quantum X *encourages cells to release their toxins and establish a new pattern of repair*. This supports wellness at all levels; physical mental and emotional. The energies in Quantum X work on the quantum level of basic matter and energy units. They influence the chemical structure of the cells and intra-cellular constituents to be rebuilt to a new model of health.

Below are the 13 remaining Energetic Elixirs listed in order of their healing power. We divide them up into the Top 4 elixirs as part of All 13 elixirs. You could use the **Top 4 Elixirs** only for an early stage cancer, as their healing power is slightly lower at **300**. **All 13 Elixirs**, with their higher healing power of **350** and wider range of frequencies, would be best for an advanced cancer. They all work in slightly different ways - providing different healing energies - to stimulate healing in your body.

13 Additional Elixirs (in order of importance)

Get either the Top 4 or All 13 Elixirs as combos for best value. These elixirs will support the body in many different ways and are suggested for very advanced cancers where you need all the support you can get.

ARC Elixir

The energies that make up this most powerful of all the elixirs are based on the ancient geometry of the golden mean rectangle, the golden mean spiral and their three dimensional organization with ARC of the Covenant geometry. Years ago the developer of these elixirs learned how to use of the energies these geometric shapes subtly produce for healing purposes. And then he figured out how to capture, stabilize and intensify these energies - making the elixirs possible. The technology created with the Arc of the Covenant geometry creates a golden spiral effect to enliven water molecules with sacred geometry structural changes. Giving the elixir a unique and strong healing power.

Amrita Nadi Elixir

The Amrita Nadi Elixir works on descending and ascending energies in the spine and chakras. More importantly, it influences a special channel that travels between the sino atrial node of the heart and the crown of the head. From the sino atrial node on the right side of the heart, the opening of the Amrita Nadi vibrates into every cell. More electrical life force energy is produced in this one small part of the heart than the nervous system and all other cells combined.

Amrita Nadi translates as the Immortal Current of Bliss Energy. The elixir will open this energy channel and radiate bio electric and life force energy into every cell. This elixir is amplified by technology that is connected to sacred energy sites around the planet. Not only could this elixir create healing miracles by opening the Amrita Nadi from the bio electric heart center, but may also help a person to relax into, and abide in, an effortless state of consciousness.

Grail Elixir

The energies that make up this elixir come from the sacred geometries associated with the Holy Grail that are found in many traditions. A high level of light energy is connected to the body when taking this elixir, which is said to bring about the transmutation of denser energies into that of clear light of very high purity. We do know that is one of the more potent elixirs.

Love Elixir

The Shweta (white) Matsya Shaligram Shila healing stone used to make Love Elixir is said to give out the energy of unconditional love. Love Elixir's healing capability has its foundation in the expression of unconditional love on a cellular level. Books have been written the healing power of love. This elixir may provide, at the cellular level, just a bit of that love. Adding this elixir to the over all combination of elixirs will give some of the healing powers of unconditional love to the user. 100% of its benefit is boosting the healing powers of the body with the energy of unconditional love. What is missing in most people's lives, especially when in ill health, is Unconditional Love. The Love Elixir connects a person with this.

The following elixirs comprise the rest of the **13 Energized Elixirs** which would be one of the more important product suggestions for advanced cancers.

Trinity Elixir

Trinity Elixir is energized with the healing energies of three rare Salagrama Sila healing stones each working in slightly different ways. One is focused on absolute Purity, one on absolute Tranquility and the other on Infinity. Or so they were described by the Vedic experts who used them. These are three of most powerful Salagramams in the world, as acknowledged by the Vedic and Ayurvedic experts in India who have used them. The Trinity Elixir may literally eat up disease, producing results much faster, and giving the individual using it greater life force and healing power. 40% of its benefit is boosting the healing Life Force in the body. 60% comes from its ability to energetically disrupt cancer cells.

Cosmic Elixir

This elixir is made by using Tantric methods on a Shaligram Shilas healing stone, enhanced by a sacred meteorite that focuses energy. Tantrik implies relationship, and thus the Cosmic Elixir helps create a resonance between cells, and between a person and the environment. This is necessary to bring about complete healing.

The meteorite and Salagramams have been used by Tantric practitioners for eons. When you consume Cosmic Elixir, its effects can be described as attracting the forces of nature to bring about immediate and direct change on all levels - physical, mental, emotional and spiritual. 40% of its effect is psychological, subtly getting someone into a better state of mind to fight cancer. 60% is physical as it enhances the immune systems ability to fight cancer cells.

Rainbow Elixir

The Rainbow Elixir is made with a totally white Shaligram Shila that brings all the colors of the rainbow to the cells of the body. This corrects imbalances in the aura (electromagnetic field) around the body. This elixir creates a better environment for light energy to function on a cellular level. As light is used by cells to communicate, Rainbow Elixir improves cellular communication.

Immortality Elixir

In Tibetan medicine there exists a special stone that was activated through secret methods over two thousand years old. This activation method creates stones that connect the human body to the organizing power of life force energy. By consuming just very small amounts of water energized by this process, Immortality Elixir, cellular aging may slow down because it gives the genetic level of the body the capacity to fight against disease, and promotes the strongest level of health in cells. 70% of its activity when fighting cancer is to prevent cells from becoming cancerous. 30% of its activity is making cancer cells normal so they can die a natural cell death.

InLightEner

InLightener is made with a very powerful Maha Laxmi Shaligram in order to amplify light energy in the cells. This has important implications for improving immune system response. The immune system can be perceived as a very complex and vast communication system, and on the most fundamental level, the immune system cells exchange information via light impulses. The light energy in InLightEner greatly enhances the cells communicate via light (photons).

The vibrational information in InLightEner allows light energy to create faster and more coherent cell to cell communication to defeat disease, and to defend against disease before it can get started. The US Navy did research on how the cells communicate via light, and found that increasing the speed and efficiency of cellular communication has a profound effect on reversing mutation tendencies in DNA mechanisms. InLightEner also has an influence on the speed and response of the nervous system. This increased efficiency helps fight and prevent cancer of all kinds as well as many other diseases. 40% of its benefit comes from its ability to improve the immune system by enhancing cellular communication. 40% is its ability to enhance the Life Force in the body. 20% of its benefit comes from its ability to disrupt cancer cells.

Dream Time Elixir

This energized elixir is based on Australian Aboriginal healing methods, which involve a sacred stone used by Shamans that is a major source of their power. It is made with a very rare Tektite (even rarer than the Shaligram Shilas), which was used by Aboriginal Shamans in Australia for healing and other supernatural purposes. Dream Time is the primordial cause of everything in Australian Aboriginal Tradition, which is accessible through the Elixir created with this special Tektite. Dream Time Elixir works on our belief systems, helping to change them from a system that leads to poor health to one that creates vibrant health in the body.

Salagram Elixir

Salagram Elixir captures the healing energies of a powerful salagrama sila healing stone from India. A stone noted as being so strong the Indian experts who have used this stone say it heals better than all the herbs and supplements put together. Salagram healing stones have frequencies and energies that help to create health by virtue of their power to connect a person to the universal life force of the infinite. About 50% of the benefit this elixir provides for cancer fighting is its ability to disrupt cancer cells. The remaining 50% is its ability to greatly enhance the energy and healing power of the body, enabling it to heal itself. It is made with a Laxmi Narsimha Shaligram Shila.

Vortex Elixir

Vortex Elixir captures vortexing energy created in a small, contained water supply which are supportive of living chemistry at a cellular level. Taking it enhances all the vortexing energy in your body. This comprises all your acupuncture points, the energy chakras, and even the energy traveling up the spine. Thus, it accelerates and enhances the flow of life force energy in your body. Taking Vortex Elixir every day will produce quick and dramatic healing changes on every level: physical, mental and emotional.

Made with a very rare type of geode found only in Oregon, United States, this Elixir formula causes life energy flow in the body to become amplified and integrated based on the power of the vortex. The body itself is surrounded by a vortex, each cell is surrounded by a vortex and energy moves through channels and centers in the body based on the power of the vortex. In Chinese Medicine each acupuncture point is regulated by a vortex to allow life energy to reach the cells. 50% of its energies enhance Life Force. 50% improves the flow of energy in your body.

BioVibe

The energies in BioVibe act as an immuno-modulator that is effective for both immune compromised disorders like cancer, or autoimmune disorders. It enhances the electrical interactions and communication between cells which in turn provides optimum health and quality of life. 60% of BioVibe's effectiveness against cancer comes from its ability to disrupt cancer cells by altering their vibratory frequencies. 40% of its benefit comes from its ability to stimulate and improve immune system response against cancer cells.

That's it for these energized elixirs. They all come in a 2 ounce dropper bottle. They can be taken all at the same time, by putting them first into a glass, or one right after the other. Hold each or all of the dropper squeezes in your mouth for one minute before swallowing. Wait at least 20 minutes after ingesting any drink or food and wait at least 20 minutes after taking them to eat or drink.

Next we will tell you about an energized water that is anti-inflammatory and stimulates cellular regeneration.

Rejuvin

This is a water that enhances rejuvenation of the cells in your body. Using sacred geometry and other energization processes, this water has been frequency enhanced so that it helps to reduce inflammation, boost the response of the immune system, and most importantly, stimulate cellular regeneration. It appears to be able to rejuvenate the mitochondria of cancerous cells so they are able to produce energy aerobically. This normalizes a cancerous cell and thus allows it to die a natural death. Apoptosis. It is not as effective as the elixirs or the Koch Energy at doing this, with energetic testing results of **200**. It's ability to stimulate cellular regeneration makes it part of the Wasting Combo as it stimulates the liver to heal. For this it tests energetically at **435**. Using Rejuvin over the years is likely to slow down the effects of aging. It tests energetically at **494** for helping to slow aging. A bottle is a month's supply. For advanced cancers use 3 bottles a month.

Energies To Avoid

It is also important to avoid energies that disrupt the natural energies in your body. That have been shown to lead to cancer.

Electromagnetic Fields (EMFs) do so. You are exposed to them by electronic appliances. Cell phones, computer screens and microwaves are among the biggest offenders, but even the clock radio by the side of your bed is putting out unhealthy levels of EMFs for a foot or two. Your car puts out quite a bit of it.

Radiation from **cell phones** can literally *eat holes* in your blood brain barrier, which functions to prevent toxins from entering the brain. When it is full of holes, toxins get into brain, causing much damage. **A Swedish study has found that heavy users of cell phones had a 240 percent increase in brain tumors on the side of their head that the phone was used on.** The study defined 'heavy' use as more than 2,000 total hours, or approximately one hour of use per workday for 10 years.

There are two ways you can deal with EMFs. You can try to avoid exposure to them, or you can wear or use an energized product that counters the effect of that radiation to your body's energy field. For example, you can choose to not use a cell phone or any portable phone. But if that is not possible, put a cell phone tab on the phone to neutralize the radiation.

Geopathic stress has been implicated by many alternative health practitioners in Europe as a cause of cancer. Simply put, geopathic stress is unhealthy energy coming from the earth. One cause is underground streams that creates friction that produces the wrong type of energy. *Two developers of energized products both had cancer that would not resolve until they were told to check and see if they slept over geopathic stress.* They did, changed their sleeping arrangements, and then were able to get well.

A study in England noted that gypsies, even though their diets and smoking habits were poor, were not near as likely to get cancer because they were always moving so were not likely to have been sleeping in an area of geopathic stress for years at a time.

Cell Phone Tabs

The best thing to do regarding Cell Phones is to stay away from them. But if you must use them, get three Cell Phone Tabs to put on each cell phone. This may give as much as 97% protection, according to our energetic testing, from harmful electromagnetic radiation.

Even casual use of a cellular phone can damage the DNA in your brain. A study conducted by Dr. Henry Lai of the University of Washington showed that at low levels, exposure to electromagnetic fields and radio frequencies caused DNA damage to brain cells of rats resulting in loss of short and long-term memory and slower learning. He noted that DNA damage in cells is cumulative.

A study done at Penn State University concluded that EMF exposure produced no effect for the "first few minutes, . . . then a cascade of microbial destruction occurs." The levels at which damage occurs have been shown to be as low as .024-.0024 W/kg -- much lower than any cellular phone. Some well known alternative health doctors claim that over time, the wide use of cell phones is going to lead to an epidemic of brain cancers. Dr. Mercola feels they are contributing to the continued epidemic of autism among our children.

Using an earpiece will not keep you out of danger from EMF exposure. Earpieces can act almost like "conduits" to funnel as much as three times the harmful radiation to your brain. And it turns out the portable phones and their bases can actually produce more EMFs than cell phones.

Put one to three **Cell Phone Tabs** on each cell phone and cordless phone you have, and on the cordless phone base. Stick one or two on your computer and screen, or any other electrical device you may be exposed to over a period of time, such as a clock by your bed. The tab is a tiny ceramic button. Put them close to the antenna if possible.

According to our latest energetic re-evaluation of the Tabs, using one Tab gives **35%** protection from cell phone

radiation. Putting two on your phone gives **80%** protection, and a maximum of 3 Tabs on your phone provides **97%** protection from the harmful effects of cell phones. Energetic testing puts the value of using **Cell Phone Tabs**, 3 on a phone, at **529**. They won't cure a cancer, but may well help prevent you from getting a brain tumor. Use of these tabs is especially valuable for children who are more harmed by the EMF's.

Quantum Touch and Hands Off Healing

The Quantum Touch classes, or their DVD Workshop and Book, teaches anyone how to do hands on healing quickly and easily. Everyone can do it. You learn techniques that have been used and refined for several decades to do hands on healing or even distant healing. You can literally be doing it within an hour or less.

On the first DVD you will hear stories of doctors seeing a white glow around a tumor while Quantum Touch was being done on it. Of tumors literally disappearing through the use of this technique. Doing Quantum Touch helps put you in charge of the healing process. Learning to do **Quantum Touch**, and doing it, or getting it done for you, comes it at a very high **397** on our energetic testing.

If you would like a hands off, long distance healer to zap you with some good healing energy, contact **Michael Limacher**. His information is in the resources section. He found as a child he had the gift of healing and has been using this gift all his life. Energetic testing puts his ability to help someone with cancer at **328**. Not as strong as Quantum Touch, but you don't have to learn how to do it, and you can get it done right away.

Next we are going to cover that other important but hard to pin down issue that effects your ability to beat cancer, the psychological factor.

Next we are going to cover that other important but hard to pin down issue that effects your ability to beat cancer, the psychological factor.

Cancer Strategy #11 - Get A Handle On Stress

Stress wipes out the immune system, and as Dr. Hamer has so clearly discovered, undealt with emotional issues may well lead to cancer. In fact he claims that some undealt with issue is always involved in the development of cancer. These could be a loss of a child, close family member, or spouse, loss of a job, divorce, moving, retirement. And more. If you or any person with cancer has experienced any of these events, then you should seriously consider the following course of action. If Dr. Hamer is right and all cancers have this emotional content, then everyone with cancer should consider it.

Dr. Hamer recommended psychotherapy for his patients. However, there are now ways of dealing with, and releasing, events and problems that cause stress which work much faster and more effectively than traditional psychotherapy. The best one we have come across is...

NeuroModulation Technique (NMT)

Practitioners of NeuroModulation Technique have found that nearly any illness can be improved, and many completely resolved with NMT treatments. By correcting faults in the body's regulatory systems, NMT restores the body's innate capacity to heal. Your nervous system is separated into conscious/voluntary, and autonomic/unconscious control systems. We aren't aware of the Autonomic Control System (ACS) that functions in the background of our nervous system – otherwise our conscious mind would be so distracted by body processes that we could not do anything.

NMT uses Muscle Response Testing (MRT) to communicate with the ACS, to find the faults in ACS function that are responsible for an illness. Then it uses a system of questions and statements to push the control systems of the body towards normal function. Questions are used to find control system errors, as shown by the muscle testing. Then the NMT practitioner uses specific corrective statements to train the ACS toward normal function – the first step in the return to wellness. A brief tapping and breathing pattern is done after each statement to set the ACS function.

A NMT treatment can be performed long distance via the phone, or one on one. It has proven to be very effective for everything from autoimmune diseases to allergies to pain relief. Many users have reported success with cancer too.

Now, the NMT practitioner is not treating cancer. He or she is merely correcting the faults in the autonomic nervous system so that the immune system can better handle whatever happens to be wrong with you. It would make sense that Dr. Hamer's stressing events, that he has identified as leading to the development of cancers, have caused faults in the ACS.

NMT also deals with faults or errors in the sensitivity setting of sensors that tell the nervous system what is happening in the body, and in the processing of information from these sensors. They have found that NMT often provides quick and powerful pain relief by correcting these errors. NMT can also help the body to recognize external toxins and chemicals. NMT treatment gets the body to purge these harmful substances from the tissues, and eliminate them.

Energetic testing puts the value of using **NMT** as part of the strategies to get back to health, to correct the autonomic nervous system errors caused by stressful events such as the ones Dr. Hamer describes, at a strong **437**. The practitioner we recommend for long distance work is given in the resources section of this book.

Usherite Tetrajacks

This is a set of 5 tetrajacks made of usherite. These are a geometric shape composed of tetrahedrons stacked together surface to surface. It turns out that the sum total of the angles on the surface of this shape is 888 degrees, which just happens to be the number associated by some with Universal or Christ consciousness. So essentially, these shapes emit a subtle vibratory energy that helps align whatever is around it with the basic energy underlying the universe, which might be how quantum physics would describe it.

At any rate, when you keep these tetrajacks close to your person, their energy will subtly reduce your stress at the cellular level. Nothing dramatic. This reduction in stress will accelerate your healing, will increase your ability to fight cancer because stress disrupts the immune system response. They can help your body heal better, and as they are inexpensive, these tetrajacks are probably worth a try. Energetic testing puts their value for helping deal with cancer at **200**.

This covers a whole lot of what can be done to fight cancer, and hopefully has educated you on what's worth doing and what's not. Next let's go over some other things to consider when fighting cancer. And then review the highest rated supplements.

Even one cancer fighting supplement could get the job done.

When you or a loved one is battling cancer, you need access to every single weapon available. 11 Natural Strategies To Defeat Your Cancer is the most comprehensive and up-to-date information on natural supplements for fighting this terrible disease. Below you will find a quick, easy-to-read review of the supplements suggested.

Cancer can be beaten. Never doubt that. We hear from people who have succeeded all the time. Soon your story could read like these...

One man wrote in saying his mother had been taken off chemo three weeks before because it wasn't working. Doctors told him there was nothing else they could do and to look into hospice solutions for her as she was in bed all the time and didn't have long to live. Shortly before that, she had started taking Oxy E. A week later her energy had improved so much she was up and active all day long, going out shopping and feeling good. Hospice was not needed.

A nutritionist reported that she had put someone on Ellagic Formula with Graviola a couple of months before. After going through 7 bottles, the tumors in one lung and in the lymph nodes were gone. The main tumor in the other lung was still there, but the doctors said it was dead at its center.

**More is better when it comes to fighting advanced cancer.
You can only do too little... not too much.**

All of the products mentioned in the report are valuable. Some are more potent than others, and you certainly want to concentrate on using those top products in order to most effectively fight the cancer. Every person's chemistry is

different, so the required products and amounts will vary. You shouldn't feel afraid to try multiple natural supplements, they can only help the healing process.

We received great news from our oncologist yesterday after viewing Nikki's CT scan. Yes, she is responding very well to the treatments and yes, her remaining tumors are shrinking.

Compared to the CT scans done three months ago, they have shrunk by at least 80%. As such, Jenny and I have agreed to her continuing four more treatments. But it is my firm belief that our holistic approach is working and I must thank you all for contributing in one way or other to her recovery.

It will take another three months before the chemo regime finishes. Another CT scan will be held after that. Hopefully, by then, nothing is left of whatever tumors in her lungs and liver. Of course, we shall be ever so careful not to fall back on previous 'lifestyles' but to continue the new one into the future with fine tuning along the way. D. K.

You may very well be thinking...

"I'm completely overwhelmed. There are so many products that sound good, what should I be taking?"

Remember, you don't have to make an either/or choice about whether to take chemo or radiation, or go with an alternative approach to cancer. These products have all been successfully used while undergoing chemotherapy and radiation -- in fact they even help chemotherapy or radiation be more effective. You will have better results because the supplements attack cancer in ways that chemotherapy and radiation can't. They will also help you deal with the side effects of chemotherapy.

The top tier products are effective cancer fighters even on their own, without chemotherapy. They are natural and safe, and you can take high therapeutic amounts with no side harmful side effects. (With some you do have to start with small amounts and work up, or you may experience detoxification or healing reactions as described above.)

Even if chemo and radiation alone are initially successful, far too often cancer comes back within two months to two years. Chemo puts quite a strain on the body, and does nothing to improve the internal environment to make the body healthier. So the cancer can and often does come back quickly unless you take action to improve the internal environment of your body. Cancer is usually worse and tougher to beat the second or third time. *This doesn't have to happen.*

Supporting your body with supplements before, during and after chemotherapy will help you reverse the underlying causes of cancer, and strengthen your immune system to keep you cancer-free for good.

Using chemotherapy or radiation therapy or even getting surgery, without also using supplements is like fighting someone trying to kill you with one hand tied behind your back.

Using chemotherapy, radiation therapy or surgery without taking potent herbal and nutritional supplements doesn't make sense. They can do no harm, and have been shown again and again, in study after study, to help.

A healthful diet gives your body the healing tools it needs.

Diet is a crucial weapon in your cancer-fighting arsenal. You should eat organic whole foods whenever possible to reduce toxins. Increase your intake of essential fatty acids from organic cold-pressed flax oil (take two tablespoons with cottage cheese as the Europeans do to fight cancer) or fish oil.

Cancer thrives on sugar and refined grains. Cut them out as much as possible, and don't use artificial sweeteners as they are not healthy. Recently, new healthy sweeteners such as stevia, xylitol, and Laknato have become widely available.

Research indicates eating too much animal protein, more than your body can utilize in a day, may be one of the causes of cancer. One study injected mice with aflatoxin, one of the strongest carcinogens there is (it's a mold often found in peanut butter). Some were given low doses of aflatoxin, some high doses. At the same time, their diet included a range of a milk protein.

Researchers found it didn't matter how much of the aflatoxin the mice were injected with. Mice whose diet included over 12% milk protein (more than their daily dietary needs) got cancer. Mice whose diet included less protein did not. Even the mice given high doses of aflatoxin did not develop cancer if the amount of protein was low.

The study suggests too much animal protein acts as a cancer promoter. Cancer promoters are substances in our diets that can trigger the growth of cells that have been damaged by carcinogens and are present in the body. Without these promoters, those cells which have mutated will likely remain inactive. So it is a good idea to reduce amounts of animal protein (meat, milk products and eggs) and eat more vegetable protein like nuts, beans, etc.

The right multi-vitamin can be beneficial.

Synthetic vitamins are not good for you. You may have taken multi-vitamins for years figuring that they wouldn't hurt you. Unfortunately, research shows that taking these manufactured "fake" vitamins is actually worse than not taking anything.

- In 1941, research done by Dr. Agnes Faye Morgan at the University of California found that animals fed synthetic vitamins had toxic reactions or died more quickly of degenerative diseases compared to those fed whole foods. She stated that the enrichment of processed foods with synthetic vitamins may "precipitate conditions worse than the original deficiency."
- A study of 29,000 Finnish smokers proved that synthetic vitamins increased death rates significantly enough to stop a 10-year study prematurely. The risk of cancer increased by 16% and there were more heart attacks, more strokes, and an 8% higher increase in the overall death rate.
- A Harvard study of 22,000 physicians reported no health benefits from synthetic vitamins. Other studies report toxicity and serious side effects. In one case, synthetic beta carotene blocked antioxidant activity and anti-cancer activity of 50 antioxidants in the diet.
- In a Fred Hutchinson Cancer Research Center study, 18,000 American men and women at risk of lung cancer took either a placebo or supplements of synthetic vitamin A. The researchers led by Dr. Gilbert Omenn stopped the study in January 1996 because the group on supplements had a 28% higher incidence of lung cancer.

Most of the multi-vitamins and many of the individual vitamins on the market are made with synthetic vitamins. The profit margin is huge compared to whole food vitamins. But as you can see, they not only don't work, but they actually harm your health.

Fortunately, there are a few multi-vitamins that do not contain synthetic vitamins. An excellent one is **Life Essence**, created by the man who virtually started the whole food vitamin field. Vitamins are not that important for beating cancer, but for long term support of your body, get a natural source one.

Eliminate environmental toxins to give your body a fighting chance.

Cancer is not some mysterious disease that just happens to you. It has definite causes, and when you correct those causes, you get well. Natural treatments work remarkably well.

If the powers that be were to work on prevention of cancer by reducing our exposure to the huge number of toxins and other cancer causing environmental issues like electro-magnetic fields (EMF's,) we would win the fight against cancer.

Unfortunately, cancer is very big business, with huge profits, and preventing cancer is not profitable. So you will continue to see more toxins in our environment, more genetically modified organisms (GMO's), and more cancer.

Eliminating environmental toxins from your diet (by eating organically grown foods and avoiding chlorinated/fluoridated water) and your surroundings (by using non-toxic, natural cleansers, cosmetics, furniture, building materials, and clothing) will go a long way toward eliminating cancer from your life.

Read the book **Cancer-Gate** by Dr. Samuel Epstein for a full understanding of this. He explains how the National Cancer Institute and the American Cancer Society have betrayed us, spending tens of billions of dollars of taxpayers and charity money primarily targeting silver-bullet drugs while ignoring strategies for preventing cancer in the first place.

Lifestyle change is one of the easiest and most effective cancer-fighting strategies there is.

With this advanced understanding of how cancer works, you do not need to fall victim to cancer. You can take action to prevent cancer or to beat cancer, even in the later stages of the disease. A comprehensive approach, doing as much as possible, is best.

The only reason not to use a multiple supplement approach is cost. Some of the best products are expensive, but there are plenty of relatively inexpensive ones among the top tier products. The more angles you attack from, the better, so in making a decision as to what to get, choose a variety of the top products, if possible.

One of the best things you can do to learn about diet and lifestyle changes that can improve your health is to get the book *Diagnostic Face Reading and the Holistic You*. It is full of useful information that can help you take charge of your health. In addition, you'll learn how to use diagnostic face reading to determine which organs need extra help. (Our recommended supplier does carry this book.)

Here are some more simple lifestyle changes to help you win the fight:

- Eliminate refined sugars, oils and carbohydrates
- Eat more fruits and vegetables. (While a grape diet has eliminated cancer in some people, you typically want to stay away from eating a lot of fruit, as sugar feeds cancer cells.)
- Eat organic whenever possible.
- Make sure you are getting enough essential fatty acids, especially Omega 3.
- Spend some time out in the sun to get vitamin D or take supplemental D.
- Stay away from chlorinated drinking water and chlorinated water in showers.

Natural Cancer-Fighting Strategies: Product Overview

You can't do too much when you're fighting cancer, only too little. The more you're doing, the more ways you're attacking cancer, the greater your odds of success.

Even if you are taking a supplement that has helped many people, it may *not* be all you need because you have other issues that supplement doesn't address. A broad, wide-ranging approach to supporting your health and fighting cancer always works best.

Continuing your natural treatments for up to a year after you are cancer-free will give your body the time and energy it needs to fully recover. Consider getting some NMT treatments to clear up unresolved stress that disrupts your immune response and could prevent you from beating cancer.

INSIDE TIP: Even if you are taking a number of supplements in moderate doses, you need to use high therapeutic amounts of at least one or two of the top-tier cancer fighting products discussed in this report.

All of the products can be used with each other, and don't have negative interactions with medications you may be on - other than zeolite. Zeolite pulls platinum out of three chemotherapy treatments that use platinum. Cisplatin, Carboplatin, and Oxaliplatin. You must stop zeolite supplements 3 days before chemo treatments with these three and wait 3 days afterwards.

If you use supplements in *addition* to what your doctor recommends, you will amplify the benefits of the chemotherapy.

Remember, the more ways you attack cancer, the better your chances are of beating it. The best alternative cancer clinics in the world use multiple supplements and holistic treatments. They don't do just one thing. If possible, do the same yourself.

These cancer fighting strategies do work. We hear reports all the time of people getting over tough cancers using these strategies and supplements. Hit cancer as hard as possible with a variety of cancer fighting products and diet improvements. (The book *Diagnostic Face Reading* gives information on health issues and diet, plus you can determine what organ systems need the most support too.) It makes no sense to do less.

What To Do? Where To Start?

We have covered a large number of supplements in this online ebook. As this can be a bit overwhelming, we are going to summarize them so that you can better make a decision as to what to do, if you want to do anything. We will do so by grouping the supplements according to their energetic testing results. Following the logic that the higher potency supplements, with the higher numbers, are more powerful cancer fighters. And the more of these you use, the better. This is born out in practice.

Then we will give you some further tips about the product combinations. But before that, here is a summary of some things to do if you feel you can't afford to purchase supplements. These suggestions have more value than many of the supplements we hear about being used to fight cancer.

Low Or No Cost Suggestions

For starters, stop eating processed, refined, sugarized foods. Eat simple. Whole grains, lots of vegetables. Cut down on animal protein though a little is okay. Try to make that organic. Cut out all sugars, cookies, chips, etc. Now of course, you may not want to change your habits. That's okay, you have every right to live or die as you like.

Adjust pH levels using the **baking soda and water protocol**. At least 1 teaspoon half an hour before meals to as much as 2 teaspoons per quart of water, and drink 5 quarts a day. This comes in at around 200 for the higher dose.

Do the Budwig **flax seed protocol**. Grind or blend up flax seeds fresh every day or stored in refrigerator, as they are much less expensive than flax oil. Eat a cup a day blended in with cottage cheese or yogurt to enhance absorption. You can make a smoothie with this if you want. Berries are good to use as they are not as sweet as other fruits. Again around a 200.

If there are relatives or friends who are willing to do hands on healing on the person with cancer, get the **Quantum Touch** book and learn how to do it. The DVD course with the book is better, but more expensive. Still it is just a one time purchase. Energetic testing put this even higher, at a very strong **397** if it is done twice a day on the person with cancer. About 15 minute sessions each time.

Something the person with cancer can and should do is the Louise Hay healing affirmation for cancer. People have beat

cancer using this affirmation.

"I lovingly forgive and release all of the past. I choose to fill my world with joy. I love and approve of myself."

Following in line with Dr. Hamer's research, Louise Hay says that cancer is connected with deep hurt, long standing resentment. Or a deep secret or grief eating away at the self. Or maybe carrying hatreds or feeling what's the use. Say the affirmation 10 times a day, in one session is fine. Energetic testing puts this affirmation, when done, at a strong **310**. Not as potent as NMT, but something anyone can do for themselves.

The Best Cancer Fighting Supplements We Have Found

This summary is grouping them according to their energetic testing numbers. Actually anecdotal reports would give about the same groupings. The testing is more accurate, in our opinion, and is what we go by. Even the lowest rated products summarized here are superb cancer fighters, in the 300 range. But there are so many better supplements in the 400 and above range, you are not likely to use any of, or just a few of, the 300 range supplements unless you are planning on doing as much as you can, and expense is not an over-riding factor. There are just too many powerful supplements to do. Other than it does make sense for everyone to get the **Vitamin D Forte Emulsified** with a 304 rating. It is inexpensive and lasts for months.

There are a few others like Defense, Zeolite Powder or Betaine HCL with the Activator that may fit in that category too as they are relatively inexpensive. In other words, if your budget is about maxed out, but there is just a little room on it, drop down to some of the less expensive supplements in the 300 range and consider getting one or two of them. And take a look at what you may be spending money on right now for fighting cancer. Chances are very good that most of the supplements or procedures would be in the 200 range or less, and are just not as good as you would have hoped they were. It would likely be advantageous to switch to more potent cancer fighting supplements.

Along with the product name will be the suggested number of bottles to use in a month for an adult as the ranking is based on using an that amount of the supplement. The first number is for early stage cancer, the second number is for Stage 4 cancer. If a third number is given, it is for end stage cancer. We will also tell you what section the supplement is in.

There are a few of the top products that work particularly well together. Those groupings will be covered also. Let's get started with the stratosphere....

600 and Higher Rated Supplements

Custom Elixir C is 863. 1 or 3 2 ounce bottles per month. This is the highest individual testing result we have seen. Because this is a new product, you may want to make sure you are also using OxyDHQ and UltraImmune9 or some of the other top products, and take this in addition. Quite likely it will prove to be the best cancer fighter we've found so far, but for now, don't use it alone. Consider it as the third supplement to use. Energetics

UltraImmune9, when used in high therapeutic dosages of 6 or 9 90 capsule bottles a month, comes in at **730**. That would be using 18 or 27 capsules a day. Immune System

OxyDHQ comes in at **693** when used in the suggested quantities of 3, 4, or 5 four ounce bottles a month. If you were only able to get, or wanted to use, just one supplement, this would be it. Start with lower doses and gradually increase to full dosage. Oxygenation

Zeo3 is **627**. Use 7 to 12 bottles of this spray monthly. Use in place of OxyDHQ if your stomach cannot handle acidic drinks which is what OxyDHQ makes. Oxygenation

OxyDHQ works especially well in combination with our previous longtime top single product to use suggestion of **Zeolite Enhanced with DHQ**. And **pH Balancer 8.0**. With these three you are thoroughly covering alkalinity, oxygenation, detoxification and just plain killing cancer cells. This combination, when each supplement is taken in the appropriate quantities for the stage of cancer, comes in at **873** on the energetic testing. With the testing scale maxing

out at 1000, you can't get much better than this. However there are two other combinations that energetically test just a hair better.

UltraImmune9 and OxyDHQ also work together extremely well. Energetic testing puts this combo, when used in the suggested doses, at **910**. Your best bet, add UltraImmune9 and the Custom Elixir C on to the combo of OxyDHQ, Zeolite Enhanced with DHQ and pH Balancer 8.0.

Glyco Ultra, the new and upgraded glyconutrient/aloe powder and the **Clear Circuit Combo** of the Clear Circuit Elixir and the Clear Circuit Herbal Formula, test energetically at **897**. You would use one of each for an early stage cancer, 3 of each for an advanced cancer. This combo isn't as proven as the OxyDHQ combo, but it may be a hair better.

500 Rated Supplements

The first four supplements are in a dead heat, closely followed by a couple of others.

Glyco Ultra is **568**. Use 1 container a month early stage cancer, 3 per month advanced. Immune System

CANcore-1 using 2, 3 or 4 bottles a month - along with 1 bottle of **CANcore-2** per month comes in next at **565**. Zeolite (Cancer Killers)

Zeolite Enhanced with DHQ is **561**. Use 3, 6 or 9 one ounce bottles a month. Because of its slightly lower cost, ease of use, less likelihood of causing any sort of healing crisis or stomach upset, if you were just getting one supplement to use, this may be the one to go with. Remember, Zeolite can be used with all chemotherapies - except you must stop taking it 3 days before platinum based chemotherapies and wait 3 days after to restart. Zeolite (Cancer Killers)

GeProCoQ10 Max comes next at **534**. Use 6 or 7 of these 30 capsule bottles a month. Because it works on oxygenation, and OxyDHQ focuses on oxygenation, if using OxyDHQ it is not quite as important. Consider using some of the higher rated 400 supplements before it, maybe putting it in after FlamOxide. But if you have congestive heart failure, GeProCoQ10 Max is a must to do. In many cases congestive heart failure is CoQ10 deficiency. Also use a magnesium supplement like Magnesium Fizz. Oxygenation

Clear Circuit Combo of Clear Circuit Elixir and Clear Circuit Herbal Formula is **531**. Use 1 or 3 of each. Works great with Glyco Ultra. Energetics

CANcore-4 Blood Purifier is the final 500 rated product. It comes in at **520**. Use 1, 2 or 3 of this quart sized bottle per month. Work into this one also. It is potent. Because it focuses on the blood, for any of the blood cancers, such as leukemia or multiple myeloma, it is the number one supplement to consider using, if affordable. Zeolite (Cancer Killers)

400 Rated Supplements

pH Balancer 8.0 is a **499**. Use 3, 4 or 5 of these 90 tablet bottles per month. pH Levels

Health First Grape Seed Extract is a **489**. Use 6 or 9 of these 60 capsule bottles a month. Anti-Oxidants or Free Radical Scavengers

Methylglyoxal Combo of 1 900 ml bottle of **MG Concentrate** and 3 two ounce bottles of **Koch Energy** is **475**. Methylglyoxal

FlamOxide is **464**. Use 2 or 3 of these 90 capsule bottles a month. Oxygenation

Neuro Modulation Technique is **437**. Not a supplement but well worth doing, especially if you are aware the person with cancer has suffered a loss, or some sort of stress. Psychological or Stress section

Immune Power Herbal Formula is **436**. Use 1 or 3 containers of this loose herbal tea a month. You would probably not get this if you were using the Clear Circuit Herbal Formula as part of the Clear Circuit Combo. Immune System

Oxy E is **432**. Use 10, 15, or 18 one ounce liquid drops per month. Not needed if getting OxyDHQ. Oxygenation

Pycnogenol is **431**. Not needed if getting the Health First Grape Seed Extract which is more potent and does the same thing. Anti-Oxidants

Quantum X is **410**. Use 1 or 3 of these 2 ounce bottle per month. As there are some other frequency enhanced elixirs higher up, you would probably consider using Quantum X after a few of the top 300 supplements. Energetics

300 Rated Supplements

Ellagic Formula with Graviola is **384**. Use 3 to 4 180 capsules monthly. Immune System

Defense is **378**. Use 2 or 3 60 capsule bottles monthly. Immune System

Seasonal Rescue is **375**. Use 3 to 4 180 tablet bottles monthly. Immune System

PapayaPro is **368**. Use 1 or 2 300 gram containers of this powder. Enzymes

YewImmune5 is **366**. Use 2 or 3 180 capsule bottles monthly. Immune System

Diagnostic Face Reading Book and DVD is **361**. This isn't going to kill cancer cells, so this score indicates the usefulness of the information. Review section

Clear Circuit Pendant is **350**. Use either if you are getting as much as you can to work on a tough cancer, or as it is a one time purchase, in place of the Clear Circuit Elixir or Combo, as something that works in a similar way, but not quite as potent. Energetics

Elixir Combo All 13 is **350**. **Top 4** is **300**. Use one set a month. Useful to support the body and detoxification organs in end stage cancers. Energetics

Total Hormone Support is **347**. One bottle lasts 2 months in early stage cancer, a bottle a month advanced. Consider using most when fighting estrogen positive cancers as it will help balance out hormonal levels. Immune System

Zormus is **435**. Use 1 or 3 bottles monthly of this spray. Zeolite (Cancer Killers)

Healthy Body is **341**. Use 2 bottles a month of these liquid drops. Immune System

Michael Limacher is **328**. Consider using him if you want to get some healing energy going right away. Energetics

O3Right is **327** for colon or rectal cancer. Useful also for constipation in general. Oxygenation

TotalFlora15 is **324**. Use 2 60 capsule bottles monthly. Fungus or Candida

Cesium Chloride is **324**. Use only with a practitioner and follow their instructions. Additional mineral should be taken with this.

Fulvitea is **323**. Use 1 or 2 containers a month. Very important for dealing with Wasting where it is used along with 3 bottles of **Rejuvin**. Enzymes

Betaine HCL and HCL Activator is **320**. Use 1 or 2 bottles of each a month. Oxygenation

Vitamin D Forte Emulsified is **304**. A bottle of these liquid drops lasts 4 months. Use 5 drops daily when dealing with

cancer. Inexpensive and lasts a long time. Immune System

Fermented Wheat Germ Extract is **301**. Follow manufacturer's instructions. Immune System

Zeolite Powder is **300**. Use 1 container a month. Zeolite (Cancer Killers)

You don't have to use everything in the suggested therapeutic amounts. However, you are better off getting 1 supplement in the appropriate therapeutic amount rather than getting 3 or 4 things in too small quantities. Many times using several supplements in therapeutic quantities is important in order to get enough to make a difference.

Because these products are natural, they can be used with whatever else you may be doing. If there are any issues at all, like with zeolite and platinum based chemotherapy, we mention it. You can undergo chemotherapy or radiation and take them. You can be on heart medication and take them. The more advanced a cancer is, the better it is to do more. A multi-angle attack will increase your odds of success.

These strategies have worked for many people. The sooner you start using them, the greater your chances of success. Some health practitioners say that your chances are almost nil if you don't use natural supplements that promote health along with doing whatever your doctor has you do.

(Don't worry too much about the side effects of chemotherapy if you are using several of these products. They help reduce or eliminate the side effects. And in general, help the chemo work more effectively. These supplements are so powerful, it doesn't make sense to lose organs or parts of your body when a strong natural approach such as featured in this report will most often get rid of cancer on its own if you hit it hard enough.)

If you have time on your side, chances are very high that employing these strategies will stop and even reverse your cancer because they correct the underlying conditions that allowed the cancer to develop in the first place. Even if your cancer is quite advanced, you can beat cancer if you have enough time to give the supplements an opportunity to do what they do. And if you take enough to get the job done. You need to do more to get on top of the cancer.

Plan on continuing a cancer fighting regime for at least a year. Even if the cancer is gone in a few months, you need to support the body to help it recover so that the cancer doesn't come back later. Just reduce dosages and the number of supplements you are using as the year progresses.

These strategies won't help you if you don't use them. The recommended supplements are safe and natural; they won't hurt you in any way. They only do good in your body. Use them in addition to what your doctor has you do, or use them on their own.

Good luck with your battle against cancer. Here is your....

5 Step Game Plan

1. Take your time and read over the cancer-fighting descriptions, more than once if necessary.
2. Look for the products you have decided to use and purchase them.
3. Start taking these products faithfully and in the suggested dosage as discussed above.
4. If you see results, great. Continue with the protocol. If not, alter your protocol with more products and vary the dosage till you see results.
5. You may want to get the personal guidance of a naturopath using these suggested strategies

7 Resources For Beating Cancer

A few of the best supplements you'll need to beat cancer and win are widely available. Most are hard to find. Below is a source where you can stock up on these special supplements - the ammunition you need - to overcome your cancer. Plus links to other information you might find to be of interest.

1) **GetHealthyAgain** is an excellent and helpful online store specializing in effective immune support supplements. It carries the supplements, and more. They can answer questions you may have about the supplements, and can help you figure out how to use whatever products you get in combination. Call them at: **800-832-9755** or **907-235-5556**
In addition, you get a 30 day money back satisfaction guarantee on their products.

2) To read about a skin cream so effective and powerful it is used in some cancer clinics for taking care of skin cancer, [click here](#).

3) **NeuroModulation Technique** or **NMT** will help eliminate unconscious autonomic nervous system dysfunction cause by stress or other issues that may be an underlying cause of cancer. Find a therapist locally to work on you if you can. You can do this by phone with our recommended therapist, Luminara Serdar. Go to www.luminaraserdar.com to learn more. NMT is also excellent for pain relief and would help with nausea too. They do not work on disease per se, just on eliminating these dysfunctions and blocks which do effect your health.

4) With a tough case of cancer, it never hurts to put an energetic healer to work on you. A good healer like Michael Limacher can help, and with some of the people he has worked on, long distance or in person, their cancers just disappeared. If you have an interest in him working with you long distance, give Michael a call at: **907-299-1852** cell, **907-235-7575** home. His website, which isn't much because he is a healer, not a web guy, is www.threecircle.org. P.O. Box 3001 Homer, AK 99603. Minimum donation \$75.

5) People sometimes ask what foods are good for you, and what aren't. Other than general common sense like staying away from sugar, refined flours, and most refined vegetable oils, it's very hard to say what's good for you and what isn't. That's because your metabolic body type plays a big part in determining what foods are good for you and what aren't. There is a science behind this that can help you determine what foods may be good for you, and which ones you may want to minimize. [Click here](#) to learn more about the **metabolic typing diet** and to get a test to determine which metabolic type you are.

6) The Whole Food Farmacy has raw foods that are healthy snacks or meal replacements, including raw nutrient dense powders that you can mix up in a drink for a liquid diet. Expensive but good. [Click here](#) to go to their website, and substitute a healthy raw food snack for the not so healthy stuff you may be eating now. They now have an organic coffee where the beans have been infused with the extracts from 4 mushrooms. There's some interesting information too.

7) Two websites provide extensive education on the dangers of Genetically Modified foods - which will likely cause many cancers, and could become a huge disaster that needs to be stopped. Learn what you can do to stop this craziness. www.thecampaign.org focuses on what to do. www.seedsofdeception.com focuses on what's wrong with genetically modifying food.
