

Date of Issue: August 2016

Affected Publication: API MPMS Chapter 4.9.4, *Proving Systems*, First Edition, October 2010

ERRATA

Section 6.3.4, item 37: *change*

8 through 80
to

Repeat the steps in 6.3.3 and 6.3.4 until the criteria for a satisfactory calibration have been satisfied.

Section A.7: *change*

[Equation (A.10)].
to

(See A.4 and A.5).

Section A.10: *change*

WD is the value for a single calibration pass corrected for $CTSp$ [Equation (18)];

$CPSp$ is the correction for the effect of pressure on steel prover [Equation (14)];

$CPLp$ is the correction for compressibility of the water in prover [Equation (16)].

to

WD is the value for a single calibration pass corrected for $CTSp$ [Equation (A.20)];

$CPSp$ is the correction for the effect of pressure on steel prover [Equation (A.16)];

$CPLp$ is the correction for compressibility of the water in prover [Equation (A.18)].
