

IEC TR 62778
(Edition 2 – 2014)

**Application of IEC 62471 for the assessment of blue light hazard to light sources
and luminaires**

C O R R I G E N D U M 1

D.3 Derivation of the formula for average radiance of the full array

Replace Formula (D.1) as follows:

$$E = L \cdot \Omega \Rightarrow E_B = L_{B,array} \cdot \Omega_{array}$$

Replace Formula (D.2) as follows:

$$1 = L_{B,array} \cdot \Omega_{array}$$
