## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

In other circumstances, particularly when there is an urgent market requirement for such documents, a technical committee may decide to publish other types of normative document:

- an ISO Publicly Available Specification (ISO/PAS) represents an agreement between technical experts in an ISO working group and is accepted for publication if it is approved by more than 50 % of the members of the parent committee casting a vote;
- an ISO Technical Specification (ISO/TS) represents an agreement between the members of a technical committee and is accepted for publication if it is approved by 2/3 of the members of the committee casting a vote.

An ISO/PAS or ISO/TS is reviewed every three years with a view to deciding whether it can be transformed into an International Standard.

Attention is drawn to the possibility that some of the elements of this part of ISO 10303 may be the subject of patent rights. ISO shall not be held responsible for any or all such patent rights.

ISO/TS 10303-323 was prepared by Technical Committee ISO/TC 184, *Industrial automation systems and integration*, Subcommittee SC 4, *Industrial data*.

This International Standard is organised as a series of parts, each published separately. The structure of this International Standard is described in ISO 10303-1.

Each part of this International Standard is a member of one of the following series: description methods, implementation methods, conformance testing methodology and framework, integrated generic resources, integrated application resources, application protocols, abstract test suites, application interpreted constructs, and application modules. This part is a member of the abstract test suite series.

## **ISO/TS 10303-332:2002(E)**

A complete list of parts of ISO 10303 is available from the Internet:

<http://www.nist.gov/sc4/editing/step/titles/>

Annexes A, B and C form a normative part of this part of ISO 10303. Annexes D and E are for information only.

ISO/TS 10303-332:2002(E)

## Introduction

ISO 10303 is an International Standard for the computer-interpretable representation of product information and for the exchange of product data. The objective is to provide a neutral mechanism capable of describing products throughout their life cycle. This mechanism is suitable not only for neutral file exchange, but also as a basis for implementing and sharing product databases, and as a basis for archiving.

This part of ISO 10303 specifies the abstract test suite for ISO 10303-232, Application protocol: Technical data packaging core information and exchange. The abstract test cases presented here are the basis for conformance testing of implementations of ISO 10303-232.

The purpose of an abstract test suite is to provide a basis for evaluating whether a particular implementation of an application protocol actually conforms to the requirements of that application protocol. A standard abstract test suite helps ensure that evaluations of conformance are conducted in a consistent manner by different test laboratories.

This abstract test suite is made up of two major parts:

- the test purposes, the specific items to be covered by conformance testing;
- the set of abstract test cases that meet those test purposes.

The test purposes are statements of the application protocol requirements that are to be addressed by the abstract test cases. Test purposes are derived primarily from the application protocol's information requirements and AIM, as well as from other sources such as standards referenced by the application protocol and requirements stated in the application protocol conformance requirements clause.

The abstract test cases address the test purposes by:

- specifying the requirements for input data to be used when testing an implementation of the application protocol;
- specifying the verdict criteria to be used when evaluating whether the implementation successfully converted the input data to a different form.

The abstract test cases set the requirements for the executable test cases that are required to actually conduct a conformance test. Executable test cases contain the scripts, detailed values, and other explicit information required to conduct a conformance test on a specific implementation of the application protocol.

At the time of publication of this document, conformance testing requirements had been established for implementations of application protocols in combination with ISO 10303-21 and ISO 10303-22. This part of ISO 10303 only specifies test purposes and abstract test cases for a subset of such implementations.

NOTE ISO TC184/SC4 has prepared Standing Documents [1] and [2] for documenting abstract test suites that are prepared as International Standards. Subsequent ISO TC184/SC4 resolutions allow abstract test suites to be prepared as Technical Specifications. This part of ISO 10303 was documented as a Technical Specification using the ISO TC184/SC4 Standing Documents [1] and [2] as a guide. Primary reliance was placed on [2].

## **ISO/TS 10303-332:2002(E)**

Portions of this part of ISO 10303 that relied on [1] are identified in NOTES in the appropriate clause or subclause. Technical differences in documentation of abstract test suites from the Standing Documents [1] and [2] are identified in NOTES throughout this part of ISO 10303. Editorial differences in documentation are not identified in this part of ISO 10303.

For ISO 10303-21, two kinds of implementations, preprocessors and postprocessors, must be tested. Both these are addressed in this abstract test suite.

For ISO 10303-22, a class of applications will possess the capability to upload and download AP-compliant SDAI-models or schema instances to and from applications that implement the SDAI. By providing test case data that correspond with SDAI-models, this abstract test suite addresses such applications in a single-schema scenario.

# Industrial automation systems and integration — Product data representation and exchange — Part 332: Abstract test suite: Technical data packaging core information and exchange

## 1 Scope

This part of ISO 10303 specifies the abstract test suite to be used in the conformance testing of implementations of ISO 10303-232. The following are within the scope of this part of ISO 10303:

- the specification of the test purposes associated with ISO 10303-232;
- the verdict criteria to be applied during conformance testing of an implementation of ISO 10303-232 using ISO 10303-21 or ISO 10303-22;

NOTE The verdict criteria are used to ascertain whether a test purpose has been satisfactorily met by an implementation under test (IUT) within the context of a given test case.

- the abstract test cases to be used as the basis for the executable test cases for conformance testing.

The following are outside the scope of this part of ISO 10303:

- the creation of executable test cases;
- test specifications for tests other than conformance testing such as interoperability or acceptance testing;
- other implementation methods.

## 2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this part of ISO 10303. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this part of ISO 10303 are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid International Standards.

## **3 Terms, definitions, and abbreviations**

### **3.1 Terms defined in ISO 10303-1**

For the purpose of this part of ISO 10303, the following terms defined in ISO 10303-1 apply.

- abstract test suite (ATS);
- application protocol (AP);
- implementation method.

### **3.2 Terms defined in ISO 10303-31**

For the purpose of this part of ISO 10303, the following terms defined in ISO 10303-31 apply.

- abstract test case (ATC);
- conformance testing;
- executable test case;
- implementation under test (IUT);
- postprocessor;
- preprocessor;

- test purpose;
- verdict criterion.

### 3.3 Terms defined in ISO 10303-232

For the purpose of this part of ISO 10303, the following terms defined in ISO 10303-232 apply.

- associated list;
- data definition exchange (DDE);
- data list;
- indentured data list;
- index list;
- parts list;
- TDP element;
- technical data package (TDP).

### 3.4 Other terms and definitions

For the purposes of this part of ISO 10303, the following definitions apply.

#### 3.4.1

##### **application element**

an application object, attribute, or assertion defining the information requirements in clause 4 of an application protocol.

#### 3.4.2

##### **application element test purpose**

a test purpose derived from the application elements in the ARM of an application protocol.

#### 3.4.3

##### **application interpreted model test purpose**

a test purpose derived from the AIM EXPRESS schema of an application protocol.

#### 3.4.4

##### **domain test purpose**

a test purpose that arises from the requirements that are implicit in an application protocol and derived from usage scenarios and the process and information flows in the application domain of an application protocol.

#### 3.4.5

##### **external reference test purpose**

test purpose derived from requirements that arise from standards referenced by an application protocol.

## **ISO/TS 10303-332:2002(E)**

### **3.4.6**

#### **input specification**

the instance model of an abstract test case presented in an unambiguous form, the table format for preprocessors and physical files (ISO 10303-21).

## **3.5 Abbreviations**

AE	application element
AIM	application interpreted model
AP	application protocol
ARM	application reference model
ATS	abstract test suite
CC	conformance class
IUT	implementation under test
TDP	technical data package
UoF	unit of functionality

## **4 Test purposes**

NOTE 1 Portions of this clause have been written in accordance with the Guidelines for the development of abstract test suites [1].

This clause specifies the test purposes for this part of ISO 10303. Clauses 4.1 and 4.2 describe the source and meaning of test purposes that are derived from the information requirement defined in ISO 10303-232, clause 4, and the AIM EXPRESS schema defined in ISO 10303-232, annex A. Each test purpose statement identifies some specific element from the application elements or the AIM. Every test purpose statement implicitly requires that the identified element, as specified in the test purpose statement, will be correctly instantiated by the implementation under test in at least one test case within the test suite.

Implementation method test purposes in 4.3 are derived from ISO 10303-21. Domain test purposes in 4.4 are derived from implicit domain requirements in the AP that are not clearly specified at the application element level. The primary source of these implicit domain requirements is optional mappings specified in ISO 10303-232, clause 5.1. Implementation method and domain test purposes are individually identified by the prefix “other” in the test purpose number. These test purposes are statements of requirements that shall be met by a conforming implementation.

NOTE 2 Not all test purposes are covered by an abstract test case in clause 6 of this edition of this part of ISO 10303. Additional test cases will be added to a future edition to provide more complete coverage of the test purposes.

## 4.1 Application element test purposes

NOTE 1 This clause has been written in accordance with the Guidelines for the development of abstract test suites [1].

AE test purposes are individually identified by the prefix “ae” in the test purpose number. Each test purpose derived from the information requirements shall be interpreted as given in the following statement: the IUT shall preserve the semantics associated with the unique application element from which the test purpose was derived. This implies that the semantics of the application element are preserved by the IUT between the input and output of a test, according to the reference path specified in the mapping table of the AP. AE test purposes apply to the input specifications of both preprocessor and postprocessor test cases. AE test purposes are derived from the AP information requirements as follows:

- application objects (see 4.2 of ISO 10303-232). A test purpose derived from an application object is a simple statement of the object's name. Each application object test purpose is documented in a separate subclause.

NOTE 2 The following application objects function as simple type attributes and do not have separate, derived test purposes: A\_number, A\_real, An\_integer, Identifier, Label, Measure, and Text. See notes 2 and 3 below.

- application objects with categorisations (subtypes) (see 4.2 of ISO 10303-232). Test purposes derived from application objects with categorisations are statements of the application object name as a specific subtype.
- application object attributes (see 4.2 of ISO 10303-232). Test purposes derived from application object attributes are statements of the application object name with a specific attribute name.

NOTE 3 Only the application object attributes whose type is one of the application objects identified in note 1 have test purposes of this kind.

- application assertions (see 4.3 of ISO 10303-232). Test purposes derived from application assertions are statements describing the relationship between two application objects. Application assertion test purposes address the directions of relationships as well as the number (cardinality) of relationships.

NOTE 4 Application assertions that involve one of the application objects identified in note 1 do not have test purposes.

Each application object test purpose is listed as a separate subclause, with its related application object attribute test purposes and assertion test purposes.

### 4.1.1 Accessed\_file

- ae1 Accessed\_file
- ae2 Accessed\_file with path\_information not present
- ae3 Accessed\_file with path\_information
- ae4 Accessed\_file with storage\_node\_identification not present
- ae5 Accessed\_file with storage\_node\_identification
- ae6 Accessed\_file is entry\_files for one Data\_definition\_entry\_item
- ae7 Accessed\_file is entry\_files for many Data\_definition\_entry\_item objects

## ISO/TS 10303-332:2002(E)

- ae8 Accessed\_file is entry\_files for one Data\_definition\_entry\_tdp\_element
- ae9 Accessed\_file is entry\_files for many Data\_definition\_entry\_tdp\_element objects
- ae10 Accessed\_file is file\_entries for one Simple\_list\_of\_files
- ae11 Accessed\_file is file\_entries for many Simple\_list\_of\_files objects

### 4.1.2 Alternate\_element\_identification

- ae12 Alternate\_element\_identification
- ae13 Alternate\_element\_identification with identifying\_number
- ae14 Alternate\_element\_identification with title not present
- ae15 Alternate\_element\_identification with title
- ae16 Alternate\_element\_identification has change\_status of zero Change\_identification
- ae17 Alternate\_element\_identification has change\_status of one Change\_identification
- ae18 Alternate\_element\_identification has design\_activity of one Design\_authority
- ae19 Alternate\_element\_identification has element\_classifications of zero Element\_type
- ae20 Alternate\_element\_identification has element\_classifications of one Element\_type
- ae21 Alternate\_element\_identification has element\_classifications of many Element\_type objects
- ae22 Alternate\_element\_identification has outstanding\_changes of zero Other\_reference\_document
- ae23 Alternate\_element\_identification has outstanding\_changes of one Other\_reference\_document
- ae24 Alternate\_element\_identification has outstanding\_changes of many Other\_reference\_document objects
- ae25 Alternate\_element\_identification is alternate\_identifications for one Element\_identification
- ae26 Alternate\_element\_identification is alternate\_identifications for many Element\_identification objects

### 4.1.3 Alternate\_identification\_of\_item

- ae27 Alternate\_identification\_of\_item
- ae28 Alternate\_identification\_of\_item with identifying\_number of one Identifier
- ae29 Alternate\_identification\_of\_item has identifying\_number of one item\_identifying\_number\_select as Drawing\_suffix\_number\_combination
- ae30 Alternate\_identification\_of\_item with nomenclature\_or\_name not present
- ae31 Alternate\_identification\_of\_item with nomenclature\_or\_name
- ae32 Alternate\_identification\_of\_item has change of zero Change\_identification
- ae33 Alternate\_identification\_of\_item has change of one Change\_identification
- ae34 Alternate\_identification\_of\_item has classifications of zero Item\_type
- ae35 Alternate\_identification\_of\_item has classifications of one Item\_type
- ae36 Alternate\_identification\_of\_item has classifications of many Item\_type objects
- ae37 Alternate\_identification\_of\_item has design\_activity of one Design\_authority
- ae38 Alternate\_identification\_of\_item has source\_information of zero Source\_information\_type
- ae39 Alternate\_identification\_of\_item has source\_information of one Source\_information\_type
- ae40 Alternate\_identification\_of\_item is alternate\_identifications for one Item\_identification
- ae41 Alternate\_identification\_of\_item is alternate\_identifications for many Item\_identification objects

### 4.1.4 Alternate\_item

- ae42 Alternate\_item
- ae43 Alternate\_item with type\_of\_alternate not present
- ae44 Alternate\_item with type\_of\_alternate

- ae45 Alternate\_item with usage\_conditions not present
- ae46 Alternate\_item with usage\_conditions of one An\_integer
- ae47 Alternate\_item with usage\_conditions of many An\_integer elements
- ae48 Alternate\_item with usage\_conditions of one Text
- ae49 Alternate\_item with usage\_conditions of many Text elements
- ae50 Alternate\_item has interchange\_item of one usage\_context as Item
- ae51 Alternate\_item has interchange\_item of one usage\_context as Item\_usage
- ae52 Alternate\_item is alternates for one Item
- ae53 Alternate\_item is alternates for many Item objects

#### **4.1.5 Annotation**

- ae54 Annotation
- ae55 Annotation has annotation\_geometry of zero Geometry
- ae56 Annotation has annotation\_geometry of one Geometry
- ae57 Annotation is annotation\_presentation for one Product\_presentation
- ae58 Annotation is annotation\_presentation for many Product\_presentation objects

#### **4.1.6 Approval**

- ae59 Approval
- ae60 Approval with purpose\_of
- ae61 Approval has approval\_date of one Date
- ae62 Approval has person\_organization of zero Person\_and\_organization
- ae63 Approval has person\_organization of one Person\_and\_organization
- ae64 Approval is approval\_of\_configuration for one Product\_configuration
- ae65 Approval is approval\_of\_configuration for many Product\_configuration objects
- ae66 Approval is effectivity\_approvals for one Effectivity
- ae67 Approval is effectivity\_approvals for many Effectivity objects

#### **4.1.7 Assembly**

- ae68 Assembly

#### **4.1.8 Associated\_list**

- ae69 Associated\_list as Document\_list
- ae70 Associated\_list as Other\_list
- ae71 Associated\_list as Parts\_list
- ae72 Associated\_list has presentation of zero List\_presentation
- ae73 Associated\_list has presentation of one List\_presentation
- ae74 Associated\_list has related\_to of zero drawing\_or\_product\_data\_set
- ae75 Associated\_list has related\_to of one drawing\_or\_product\_data\_set as Drawing
- ae76 Associated\_list has related\_to of one drawing\_or\_product\_data\_set as Product\_data\_set

#### **4.1.9 Body\_presentation**

- ae77 Body\_presentation
- ae78 Body\_presentation has body\_tabulation\_presentation of one Tabulation
- ae79 Body\_presentation has body\_tabulation\_presentation of many Tabulation objects

## ISO/TS 10303-332:2002(E)

- ae80 Body\_presentation is body\_page1\_format for one List\_presentation
- ae81 Body\_presentation is body\_page1\_format for many List\_presentation objects
- ae82 Body\_presentation is body\_pagen\_format for one List\_presentation
- ae83 Body\_presentation is body\_pagen\_format for many List\_presentation objects

### 4.1.10 Change\_identification

- ae84 Change\_identification
- ae85 Change\_identification with change\_code not present
- ae86 Change\_identification with change\_code = change
- ae87 Change\_identification with change\_code = original
- ae88 Change\_identification with change\_code = original with change
- ae89 Change\_identification with change\_code = other
- ae90 Change\_identification with change\_code = revision
- ae91 Change\_identification with change\_code = revision with change
- ae92 Change\_identification with change\_description not present
- ae93 Change\_identification with change\_description
- ae94 Change\_identification with change\_level not present
- ae95 Change\_identification with change\_level
- ae96 Change\_identification with issue\_level not present
- ae97 Change\_identification with issue\_level
- ae98 Change\_identification with revision\_authorization\_identities not present
- ae99 Change\_identification with revision\_authorization\_identities of one Identifier
- ae100 Change\_identification with revision\_authorization\_identities of many Identifier elements
- ae101 Change\_identification with revision\_description not present
- ae102 Change\_identification with revision\_description
- ae103 Change\_identification with revision\_level not present
- ae104 Change\_identification with revision\_level
- ae105 Change\_identification has action\_status of zero Status
- ae106 Change\_identification has action\_status of one Status
- ae107 Change\_identification has change\_date of zero Date
- ae108 Change\_identification has change\_date of one Date
- ae109 Change\_identification has issue\_date of zero Date
- ae110 Change\_identification has issue\_date of one Date
- ae111 Change\_identification has revision\_authorization\_identities of one revision\_authorization\_select as Other\_reference\_document
- ae112 Change\_identification has revision\_authorization\_identities of many revision\_authorization\_select as Other\_reference\_document objects
- ae113 Change\_identification has revision\_date of zero Date
- ae114 Change\_identification has revision\_date of one Date
- ae115 Change\_identification is change for one Alternate\_identification\_of\_item
- ae116 Change\_identification is change for many Alternate\_identification\_of\_item objects
- ae117 Change\_identification is change\_status for one Alternate\_element\_identification
- ae118 Change\_identification is change\_status for many Alternate\_element\_identification objects
- ae119 Change\_identification is change\_status for one Element\_identification
- ae120 Change\_identification is change\_status for many Element\_identification objects
- ae121 Change\_identification is change\_status for one File
- ae122 Change\_identification is change\_status for many File objects
- ae123 Change\_identification is change for one Item\_identification

ae124 Change\_identification is change for many Item\_identification objects

#### **4.1.11 Column\_header**

ae125 Column\_header  
 ae126 Column\_header has single\_column\_header\_titles of one Field\_title  
 ae127 Column\_header has single\_column\_header\_titles of many Field\_title objects  
 ae128 Column\_header is tabulation\_columnar\_headings for one Tabulation  
 ae129 Column\_header is tabulation\_columnar\_headings for many Tabulation objects

#### **4.1.12 Columnar\_data\_content\_holder**

ae130 Columnar\_data\_content\_holder  
 ae131 Columnar\_data\_content\_holder with column\_content\_presentation  
 ae132 Columnar\_data\_content\_holder is tabulation\_columns for one Tabulation  
 ae133 Columnar\_data\_content\_holder is tabulation\_columns for many Tabulation objects

#### **4.1.13 Company**

ae134 Company  
 ae135 Company with address not present  
 ae136 Company with address  
 ae137 Company with name  
 ae138 Company is code\_administrator for one Company\_code  
 ae139 Company is code\_administrator for many Company\_code objects  
 ae140 Company is code\_administrator for one Element\_type  
 ae141 Company is code\_administrator for many Element\_type objects  
 ae142 Company is code\_administrator for one Item\_type  
 ae143 Company is code\_administrator for many Item\_type objects  
 ae144 Company is design\_activity\_identification for one Design\_authority  
 ae145 Company is design\_activity\_identification for many Design\_authority objects  
 ae146 Company is organization for one Person\_and\_organization  
 ae147 Company is organization for many Person\_and\_organization objects  
 ae148 Company is release\_authority for one Release\_authentication  
 ae149 Company is release\_authority for many Release\_authentication objects  
 ae150 Company is target\_company for one System\_destination  
 ae151 Company is target\_company for many System\_destination objects

#### **4.1.14 Company\_code**

ae152 Company\_code  
 ae153 Company\_code with code  
 ae154 Company\_code with type\_of\_code not present  
 ae155 Company\_code with type\_of\_code  
 ae156 Company\_code has code\_administrator of zero Company  
 ae157 Company\_code has code\_administrator of one Company  
 ae158 Company\_code is design\_activity\_code for one Design\_authority  
 ae159 Company\_code is design\_activity\_code for many Design\_authority objects  
 ae160 Company\_code is release\_authority\_code for one Release\_authentication  
 ae161 Company\_code is release\_authority\_code for many Release\_authentication objects

## ISO/TS 10303-332:2002(E)

- ae162 Company\_code is target\_company\_code for one System\_destination
- ae163 Company\_code is target\_company\_code for many System\_destination objects

### 4.1.15 Configuration

- ae164 Configuration
- ae165 Configuration with data\_usage\_rights not present
- ae166 Configuration with data\_usage\_rights
- ae167 Configuration has distribution\_authorizations of zero Distribution\_notice
- ae168 Configuration has distribution\_authorizations of one Distribution\_notice
- ae169 Configuration has distribution\_authorizations of many Distribution\_notice objects
- ae170 Configuration has end\_item\_system\_designation of zero Product\_configuration
- ae171 Configuration has end\_item\_system\_designation of one Product\_configuration
- ae172 Configuration has preparing\_contracts of zero Contract
- ae173 Configuration has preparing\_contracts of one Contract
- ae174 Configuration has preparing\_contracts of many Contract objects
- ae175 Configuration has release\_authorizations of zero Release\_authentication
- ae176 Configuration has release\_authorizations of one Release\_authentication
- ae177 Configuration has release\_authorizations of many Release\_authentication objects
- ae178 Configuration has security\_identifications of zero Security\_classification
- ae179 Configuration has security\_identifications of one Security\_classification
- ae180 Configuration has security\_identifications of many Security\_classification objects
- ae181 Configuration is data\_configuration for one
  - Header\_configuration\_with\_element\_identification
- ae182 Configuration is data\_configuration for many
  - Header\_configuration\_with\_element\_identification objects
- ae183 Configuration is entry\_configuration for one Indentured\_data\_list\_entry
- ae184 Configuration is entry\_configuration for many Indentured\_data\_list\_entry objects
- ae185 Configuration is item\_configuration for one Item
- ae186 Configuration is item\_configuration for many Item objects
- ae187 Configuration is sheet\_configuration for one Sheet
- ae188 Configuration is sheet\_configuration for many Sheet objects

### 4.1.16 Contract

- ae189 Contract
- ae190 Contract with contract\_number
- ae191 Contract with contract\_data\_requirements\_list not present
- ae192 Contract with contract\_data\_requirements\_list
- ae193 Contract with data\_item\_description\_identification not present
- ae194 Contract with data\_item\_description\_identification
- ae195 Contract is delivered\_contract for one Contract\_submission
- ae196 Contract is delivered\_contract for many Contract\_submission objects
- ae197 Contract is preparing\_contracts for one Configuration
- ae198 Contract is preparing\_contracts for many Configuration objects

### 4.1.17 Contract\_submission

- ae199 Contract\_submission
- ae200 Contract\_submission with location

- ae201 Contract\_submission has date\_of\_submission of one Date
- ae202 Contract\_submission has delivered\_contract of one Contract
- ae203 Contract\_submission is available\_from for one Data\_definition\_entry\_item
- ae204 Contract\_submission is available\_from for many Data\_definition\_entry\_item objects
- ae205 Contract\_submission is available\_from for one Data\_definition\_entry\_tdp\_element
- ae206 Contract\_submission is available\_from for many Data\_definition\_entry\_tdp\_element objects
- ae207 Contract\_submission is available\_from for one Data\_list\_entry
- ae208 Contract\_submission is available\_from for many Data\_list\_entry objects
- ae209 Contract\_submission is available\_from for one Indentured\_data\_list\_entry
- ae210 Contract\_submission is available\_from for many Indentured\_data\_list\_entry objects

#### **4.1.18 Data\_definition\_entry\_item**

- ae211 Data\_definition\_entry\_item
- ae212 Data\_definition\_entry\_item with entry\_item\_change\_level not present
- ae213 Data\_definition\_entry\_item with entry\_item\_change\_level of one element
- ae214 Data\_definition\_entry\_item with entry\_item\_change\_level of many elements
- ae215 Data\_definition\_entry\_item has available\_from of zero source\_identification
- ae216 Data\_definition\_entry\_item has available\_from of one source\_identification as Contract\_submission
- ae217 Data\_definition\_entry\_item has available\_from of many source\_identification as Contract\_submission objects
- ae218 Data\_definition\_entry\_item has available\_from of one source\_identification as Reference\_document
- ae219 Data\_definition\_entry\_item has available\_from of many source\_identification as Reference\_document objects
- ae220 Data\_definition\_entry\_item has delivery\_accounting\_references of zero Delivery\_accounting
- ae221 Data\_definition\_entry\_item has delivery\_accounting\_references of one Delivery\_accounting
- ae222 Data\_definition\_entry\_item has delivery\_accounting\_references of many Delivery\_accounting objects
- ae223 Data\_definition\_entry\_item has entry\_files of zero data\_definition\_file\_entry
- ae224 Data\_definition\_entry\_item has entry\_files of one data\_definition\_file\_entry as Accessed\_file
- ae225 Data\_definition\_entry\_item has entry\_files of many data\_definition\_file\_entry as Accessed\_file objects
- ae226 Data\_definition\_entry\_item has entry\_files of one data\_definition\_file\_entry as Exchange\_file
- ae227 Data\_definition\_entry\_item has entry\_files of many data\_definition\_file\_entry as Exchange\_file objects
- ae228 Data\_definition\_entry\_item has entry\_notes of zero Notation
- ae229 Data\_definition\_entry\_item has entry\_notes of one Notation
- ae230 Data\_definition\_entry\_item has entry\_notes of many Notation objects
- ae231 Data\_definition\_entry\_item has special\_conditions of zero Special\_condition
- ae232 Data\_definition\_entry\_item has special\_conditions of one Special\_condition
- ae233 Data\_definition\_entry\_item has special\_conditions of many Special\_condition objects
- ae234 Data\_definition\_entry\_item has superseded\_entry of zero Element\_identification
- ae235 Data\_definition\_entry\_item has superseded\_entry of one Element\_identification
- ae236 Data\_definition\_entry\_item has superseded\_entry of many Element\_identification objects
- ae237 Data\_definition\_entry\_item is entry\_characteristics for one Data\_definition\_indentured\_entry
- ae238 Data\_definition\_entry\_item is entry\_characteristics for many Data\_definition\_indentured\_entry objects

#### 4.1.19 Data\_definition\_entry\_tdp\_element

- ae239 Data\_definition\_entry\_tdp\_element
- ae240 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange not present
- ae241 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = already delivered
- ae242 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = available for access
- ae243 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = fully included
- ae244 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = not deliverable
- ae245 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = not delivered yet
- ae246 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = not received
- ae247 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = partially included
- ae248 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = receipt accepted
- ae249 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = receipt acknowledged
- ae250 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = receipt partially rejected
- ae251 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = receipt rejected
- ae252 Data\_definition\_entry\_tdp\_element with actual\_inclusion\_in\_data\_exchange = resubmission
- ae253 Data\_definition\_entry\_tdp\_element with data\_usage\_rights not present
- ae254 Data\_definition\_entry\_tdp\_element with data\_usage\_rights
- ae255 Data\_definition\_entry\_tdp\_element with entry\_format not present
- ae256 Data\_definition\_entry\_tdp\_element with entry\_format of one Text
- ae257 Data\_definition\_entry\_tdp\_element has entry\_format of one entry\_format\_select as File\_format
- ae258 Data\_definition\_entry\_tdp\_element with entry\_item\_change\_level not present
- ae259 Data\_definition\_entry\_tdp\_element with entry\_item\_change\_level of one element
- ae260 Data\_definition\_entry\_tdp\_element with entry\_item\_change\_level of many elements
- ae261 Data\_definition\_entry\_tdp\_element with master\_file not present
- ae262 Data\_definition\_entry\_tdp\_element with master\_file = TRUE
- ae263 Data\_definition\_entry\_tdp\_element with master\_file = FALSE
- ae264 Data\_definition\_entry\_tdp\_element with master\_file = UNKNOWN
- ae265 Data\_definition\_entry\_tdp\_element has available\_from of zero source\_identification
- ae266 Data\_definition\_entry\_tdp\_element has available\_from of one source\_identification as Contract\_submission
- ae267 Data\_definition\_entry\_tdp\_element has available\_from of many source\_identification as Contract\_submission objects
- ae268 Data\_definition\_entry\_tdp\_element has available\_from of one source\_identification as Reference\_document
- ae269 Data\_definition\_entry\_tdp\_element has available\_from of many source\_identification as Reference\_document objects
- ae270 Data\_definition\_entry\_tdp\_element has delivery\_accounting\_references of zero Delivery\_accounting

- ae271 Data\_definition\_entry\_tdp\_element has delivery\_accounting\_references of one Delivery\_accounting
- ae272 Data\_definition\_entry\_tdp\_element has delivery\_accounting\_references of many Delivery\_accounting objects
- ae273 Data\_definition\_entry\_tdp\_element has entry\_files of zero data\_definition\_file\_entry
- ae274 Data\_definition\_entry\_tdp\_element has entry\_files of one data\_definition\_file\_entry as Accessed\_file
- ae275 Data\_definition\_entry\_tdp\_element has entry\_files of many data\_definition\_file\_entry as Accessed\_file objects
- ae276 Data\_definition\_entry\_tdp\_element has entry\_files of one data\_definition\_file\_entry as Exchange\_file
- ae277 Data\_definition\_entry\_tdp\_element has entry\_files of many data\_definition\_file\_entry as Exchange\_file objects
- ae278 Data\_definition\_entry\_tdp\_element has entry\_notes of zero Notation
- ae279 Data\_definition\_entry\_tdp\_element has entry\_notes of one Notation
- ae280 Data\_definition\_entry\_tdp\_element has entry\_notes of many Notation objects
- ae281 Data\_definition\_entry\_tdp\_element has size of zero Size\_characteristics
- ae282 Data\_definition\_entry\_tdp\_element has size of one Size\_characteristics
- ae283 Data\_definition\_entry\_tdp\_element has special\_conditions of zero Special\_condition
- ae284 Data\_definition\_entry\_tdp\_element has special\_conditions of one Special\_condition
- ae285 Data\_definition\_entry\_tdp\_element has special\_conditions of many Special\_condition objects
- ae286 Data\_definition\_entry\_tdp\_element has superseded\_entry of zero Element\_identification
- ae287 Data\_definition\_entry\_tdp\_element has superseded\_entry of one Element\_identification
- ae288 Data\_definition\_entry\_tdp\_element has superseded\_entry of many Element\_identification objects
- ae289 Data\_definition\_entry\_tdp\_element is entry for one Data\_definition\_exchange\_simple\_entry
- ae290 Data\_definition\_entry\_tdp\_element is entry for many Data\_definition\_exchange\_simple\_entry objects
- ae291 Data\_definition\_entry\_tdp\_element is entry\_characteristics for one Data\_definition\_indentured\_entry
- ae292 Data\_definition\_entry\_tdp\_element is entry\_characteristics for many Data\_definition\_indentured\_entry objects

#### **4.1.20 Data\_definition\_exchange**

- ae293 Data\_definition\_exchange
- ae294 Data\_definition\_exchange has list\_body of one Data\_definition\_exchange\_body
- ae295 Data\_definition\_exchange has list\_header of one Data\_definition\_exchange\_header
- ae296 Data\_definition\_exchange has presentation of zero List\_presentation
- ae297 Data\_definition\_exchange has presentation of one List\_presentation

#### **4.1.21 Data\_definition\_exchange\_body**

- ae298 Data\_definition\_exchange\_body
- ae299 Data\_definition\_exchange\_body has list\_method of one data\_definition\_exchange\_list\_method as Data\_definition\_indentured\_list\_method
- ae300 Data\_definition\_exchange\_body has list\_method of one data\_definition\_exchange\_list\_method as Simple\_list\_of\_elements
- ae301 Data\_definition\_exchange\_body has list\_method of one data\_definition\_exchange\_list\_method as Simple\_list\_of\_files

## ISO/TS 10303-332:2002(E)

- ae302 Data\_definition\_exchange\_body has notes\_list of zero Notation
- ae303 Data\_definition\_exchange\_body has notes\_list of one Notation
- ae304 Data\_definition\_exchange\_body has notes\_list of many Notation objects
- ae305 Data\_definition\_exchange\_body has revision\_history of zero Revision
- ae306 Data\_definition\_exchange\_body has revision\_history of one Revision
- ae307 Data\_definition\_exchange\_body has revision\_history of many Revision objects
- ae308 Data\_definition\_exchange\_body is list\_body for one Data\_definition\_exchange

### 4.1.22 Data\_definition\_exchange\_header

- ae309 Data\_definition\_exchange\_header
- ae310 Data\_definition\_exchange\_header has common\_header of one Header
- ae311 Data\_definition\_exchange\_header has date\_of\_transfer of zero Date
- ae312 Data\_definition\_exchange\_header has date\_of\_transfer of one Date
- ae313 Data\_definition\_exchange\_header has delivery\_accounting\_references of zero Delivery\_accounting
- ae314 Data\_definition\_exchange\_header has delivery\_accounting\_references of one Delivery\_accounting
- ae315 Data\_definition\_exchange\_header has delivery\_accounting\_references of many Delivery\_accounting objects
- ae316 Data\_definition\_exchange\_header has destinations of zero System\_destination
- ae317 Data\_definition\_exchange\_header has destinations of one System\_destination
- ae318 Data\_definition\_exchange\_header has destinations of many System\_destination objects
- ae319 Data\_definition\_exchange\_header has exchange\_reason of one Reason
- ae320 Data\_definition\_exchange\_header has procurement\_references of zero identification\_select
- ae321 Data\_definition\_exchange\_header has procurement\_references of one identification\_select as Element\_identification
- ae322 Data\_definition\_exchange\_header has procurement\_references of many identification\_select as Element\_identification objects
- ae323 Data\_definition\_exchange\_header has procurement\_references of one identification\_select as Item\_identification
- ae324 Data\_definition\_exchange\_header has procurement\_references of many identification\_select as Item\_identification objects
- ae325 Data\_definition\_exchange\_header is list\_header for one Data\_definition\_exchange

### 4.1.23 Data\_definition\_exchange\_simple\_entry

- ae326 Data\_definition\_exchange\_simple\_entry
- ae327 Data\_definition\_exchange\_simple\_entry has entry of one Data\_definition\_entry\_tdp\_element
- ae328 Data\_definition\_exchange\_simple\_entry has simple\_entry of one Element\_identification
- ae329 Data\_definition\_exchange\_simple\_entry is element\_entries for one Simple\_list\_of\_elements
- ae330 Data\_definition\_exchange\_simple\_entry is element\_entries for many Simple\_list\_of\_elements objects

### 4.1.24 Data\_definition\_indentured\_entry

- ae331 Data\_definition\_indentured\_entry
- ae332 Data\_definition\_indentured\_entry with indenture\_level not present
- ae333 Data\_definition\_indentured\_entry with indenture\_level
- ae334 Data\_definition\_indentured\_entry has effective\_on of zero Effectivity

- ae335 Data\_definition\_indentured\_entry has effective\_on of one Effectivity
- ae336 Data\_definition\_indentured\_entry has entry\_characteristics of one
  - Data\_definition\_entry\_item
- ae337 Data\_definition\_indentured\_entry has entry\_characteristics of one
  - Data\_definition\_entry\_tdp\_element
- ae338 Data\_definition\_indentured\_entry has indentured\_entry of one list\_entry\_select as
  - Item\_parent\_to\_item\_child\_relationship
- ae339 Data\_definition\_indentured\_entry has indentured\_entry of one list\_entry\_select as
  - Item\_parent\_to\_tdp\_element\_child\_relationship
- ae340 Data\_definition\_indentured\_entry has indentured\_entry of one list\_entry\_select as
  - Tdp\_element\_parent\_to\_item\_child\_relationship
- ae341 Data\_definition\_indentured\_entry has indentured\_entry of one list\_entry\_select as
  - Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship
- ae342 Data\_definition\_indentured\_entry has indentured\_entry of one Tdp\_indentured\_item
- ae343 Data\_definition\_indentured\_entry has indentured\_entry of one Tdp\_indentured\_tdp\_element
- ae344 Data\_definition\_indentured\_entry is order\_of for one
  - Data\_definition\_indentured\_list\_method
- ae345 Data\_definition\_indentured\_entry is order\_of for many
  - Data\_definition\_indentured\_list\_method objects

#### **4.1.25 Data\_definition\_indentured\_list\_method**

- ae346 Data\_definition\_indentured\_list\_method
- ae347 Data\_definition\_indentured\_list\_method has method\_of\_entry\_tabulation of one
  - Indentured\_list\_by\_document
- ae348 Data\_definition\_indentured\_list\_method has method\_of\_entry\_tabulation of one
  - Indentured\_list\_by\_part
- ae349 Data\_definition\_indentured\_list\_method has method\_of\_entry\_tabulation of one
  - Indentured\_list\_by\_part\_with\_document\_references\_to\_parts
- ae350 Data\_definition\_indentured\_list\_method has order\_of of one
  - Data\_definition\_indentured\_entry
- ae351 Data\_definition\_indentured\_list\_method has order\_of of many
  - Data\_definition\_indentured\_entry objects
- ae352 Data\_definition\_indentured\_list\_method is list\_method for one
  - Data\_definition\_exchange\_body
- ae353 Data\_definition\_indentured\_list\_method is list\_method for many
  - Data\_definition\_exchange\_body objects

#### **4.1.26 Data\_list**

- ae354 Data\_list
- ae355 Data\_list has body of one Data\_list\_body
- ae356 Data\_list has list\_header of one Data\_list\_header

#### **4.1.27 Data\_list\_body**

- ae357 Data\_list\_body
- ae358 Data\_list\_body has data\_list\_notes of zero Notation
- ae359 Data\_list\_body has data\_list\_notes of one Notation
- ae360 Data\_list\_body has data\_list\_notes of many Notation objects

## **ISO/TS 10303-332:2002(E)**

- ae361 Data\_list\_body has data\_list\_tabulations of one Data\_list\_tabulation
- ae362 Data\_list\_body has data\_list\_tabulations of many Data\_list\_tabulation objects
- ae363 Data\_list\_body has revision\_history of zero Revision
- ae364 Data\_list\_body has revision\_history of one Revision
- ae365 Data\_list\_body has revision\_history of many Revision objects
- ae366 Data\_list\_body is body for one Data\_list

### **4.1.28 Data\_list\_entry**

- ae367 Data\_list\_entry
- ae368 Data\_list\_entry with entry\_item\_change\_level not present
- ae369 Data\_list\_entry with entry\_item\_change\_level
- ae370 Data\_list\_entry has available\_from of zero source\_identification
- ae371 Data\_list\_entry has available\_from of one source\_identification as Contact\_submision
- ae372 Data\_list\_entry has available\_from of many source\_identification as Contact\_submision objects
- ae373 Data\_list\_entry has available\_from of one source\_identification as Reference\_document
- ae374 Data\_list\_entry has available\_from of many source\_identification as Reference\_document objects
- ae375 Data\_list\_entry has entry\_notes of zero Notation
- ae376 Data\_list\_entry has entry\_notes of one Notation
- ae377 Data\_list\_entry has entry\_notes of many Notation objects
- ae378 Data\_list\_entry has list\_entry of one valid\_tdp\_elements\_for\_data\_list as Header
- ae379 Data\_list\_entry has list\_entry of one valid\_tdp\_elements\_for\_data\_list as Reference\_document
- ae380 Data\_list\_entry has list\_entry of one valid\_tdp\_elements\_for\_data\_list as Sheet
- ae381 Data\_list\_entry has special\_conditions of zero Special\_condition
- ae382 Data\_list\_entry has special\_conditions of one Special\_condition
- ae383 Data\_list\_entry has special\_conditions of many Special\_condition objects
- ae384 Data\_list\_entry is data\_list\_entries for one Data\_list\_tabulation
- ae385 Data\_list\_entry is data\_list\_entries for many Data\_list\_tabulation objects

### **4.1.29 Data\_list\_header**

- ae386 Data\_list\_header
- ae387 Data\_list\_header has common\_header of one Header
- ae388 Data\_list\_header is list\_header for one Data\_list

### **4.1.30 Data\_list\_tabulation**

- ae389 Data\_list\_tabulation
- ae390 Data\_list\_tabulation has data\_list\_entries of zero Data\_list\_entry
- ae391 Data\_list\_tabulation has data\_list\_entries of one Data\_list\_entry
- ae392 Data\_list\_tabulation has data\_list\_entries of many Data\_list\_entry objects
- ae393 Data\_list\_tabulation has for\_item of zero Item\_identification
- ae394 Data\_list\_tabulation has for\_item of one Item\_identification
- ae395 Data\_list\_tabulation is data\_list\_tabulations for one Data\_list\_body
- ae396 Data\_list\_tabulation is data\_list\_tabulations for many Data\_list\_body objects

#### 4.1.31 Date

ae397 Date  
 ae398 Date with day not present  
 ae399 Date with day  
 ae400 Date with month not present  
 ae401 Date with month  
 ae402 Date with week not present  
 ae403 Date with week  
 ae404 Date with year  
 ae405 Date has specific\_time of zero Time  
 ae406 Date has specific\_time of one Time  
 ae407 Date is approval\_date for one Approval  
 ae408 Date is approval\_date for many Approval objects  
 ae409 Date is change\_date for one Change\_identification  
 ae410 Date is change\_date for many Change\_identification objects  
 ae411 Date is classification\_date for one Security\_classification  
 ae412 Date is classification\_date for many Security\_classification objects  
 ae413 Date is date\_of\_submission for one Contract\_submission  
 ae414 Date is date\_of\_submission for many Contract\_submission objects  
 ae415 Date is declassification\_date for one Security\_classification  
 ae416 Date is declassification\_date for many Security\_classification objects  
 ae417 Date is end\_date for one Date\_effectivity  
 ae418 Date is end\_date for many Date\_effectivity objects  
 ae419 Date is issue\_date for one Change\_identification  
 ae420 Date is issue\_date for many Change\_identification objects  
 ae421 Date is release\_date for one File\_format  
 ae422 Date is release\_date for many File\_format objects  
 ae423 Date is release\_date for one Release\_authentication  
 ae424 Date is release\_date for many Release\_authentication objects  
 ae425 Date is revision\_date for one Change\_identification  
 ae426 Date is revision\_date for many Change\_identification objects  
 ae427 Date is revision\_date for one Revision  
 ae428 Date is revision\_date for many Revision objects  
 ae429 Date is start\_date for one Date\_effectivity  
 ae430 Date is start\_date for many Date\_effectivity objects

#### 4.1.32 Date\_effectivity

ae431 Date\_effectivity  
 ae432 Date\_effectivity has end\_date of zero Date  
 ae433 Date\_effectivity has end\_date of one Date  
 ae434 Date\_effectivity has start\_date of one Date

#### 4.1.33 Delivery\_accounting

ae435 Delivery\_accounting  
 ae436 Delivery\_accounting with reference\_identification  
 ae437 Delivery\_accounting with reference\_identification\_description  
 ae438 Delivery\_accounting is delivery\_accounting\_references for one Data\_definition\_entry\_item

## **ISO/TS 10303-332:2002(E)**

- ae439 Delivery\_accounting is delivery\_accounting\_references for many Data\_definition\_entry\_item objects
- ae440 Delivery\_accounting is delivery\_accounting\_references for one Data\_definition\_entry\_tdp\_element
- ae441 Delivery\_accounting is delivery\_accounting\_references for many Data\_definition\_entry\_tdp\_element objects
- ae442 Delivery\_accounting is delivery\_accounting\_references for one Data\_definition\_exchange\_header
- ae443 Delivery\_accounting is delivery\_accounting\_references for many Data\_definition\_exchange\_header objects

### **4.1.34 Design\_authority**

- ae444 Design\_authority
- ae4441 Design\_authority with role not present
- ae4442 Design\_authority with role
- ae445 Design\_authority has design\_activity\_identification of one Company
- ae446 Design\_authority has design\_activity\_code of zero Company\_code
- ae447 Design\_authority has design\_activity\_code of one Company\_code
- ae448 Design\_authority has person\_responsible of zero Person
- ae449 Design\_authority has person\_responsible of one Person
- ae450 Design\_authority is design\_activity for one Alternate\_element\_identification
- ae451 Design\_authority is design\_activity for many Alternate\_element\_identification objects
- ae452 Design\_authority is design\_activity for one Alternate\_identification\_of\_item
- ae453 Design\_authority is design\_activity for many Alternate\_identification\_of\_item objects
- ae454 Design\_authority is design\_activity for one Element\_identification
- ae455 Design\_authority is design\_activity for many Element\_identification objects
- ae456 Design\_authority is design\_activity for one Item\_identification
- ae457 Design\_authority is design\_activity for many Item\_identification objects

### **4.1.35 Distribution\_notice**

- ae458 Distribution\_notice
- ae459 Distribution\_notice with distribution\_code not present
- ae460 Distribution\_notice with distribution\_code
- ae461 Distribution\_notice with distribution\_statement not present
- ae462 Distribution\_notice with distribution\_statement
- ae463 Distribution\_notice has distribution\_authority of zero Person\_and\_organization
- ae464 Distribution\_notice has distribution\_authority of one Person\_and\_organization
- ae465 Distribution\_notice is distribution\_authorizations for one Configuration
- ae466 Distribution\_notice is distribution\_authorizations for many Configuration objects
- ae467 Distribution\_notice is distribution\_authorizations for one File
- ae468 Distribution\_notice is distribution\_authorizations for many File objects

### **4.1.36 Document\_list**

- ae469 Document\_list as Indentured\_data\_list
- ae470 Document\_list as Single\_document\_list

#### **4.1.37 Document\_usage\_parameter**

- ae471 Document\_usage\_parameter
- ae472 Document\_usage\_parameter with subject
- ae473 Document\_usage\_parameter with value
- ae474 Document\_usage\_parameter is usage\_parameter for one Reference\_document\_usage
- ae475 Document\_usage\_parameter is usage\_parameter for many Reference\_document\_usage objects

#### **4.1.38 Drawing**

- ae476 Drawing
- ae477 Drawing has heading of one Header
- ae478 Drawing has pages of one Sheet
- ae479 Drawing has pages of many Sheet objects
- ae480 Drawing is related for one Product\_data\_set
- ae481 Drawing is related for many Product\_data\_set objects

#### **4.1.39 Drawing\_suffix\_number\_combination**

- ae482 Drawing\_suffix\_number\_combination
- ae483 Drawing\_suffix\_number\_combination with suffix\_identifier
- ae484 Drawing\_suffix\_number\_combination has drawing\_number of one Element\_identification
- ae485 Drawing\_suffix\_number\_combination is identifying\_number for one Alternate\_identification\_of\_item
- ae486 Drawing\_suffix\_number\_combination is identifying\_number for many Alternate\_identification\_of\_item objects
- ae487 Drawing\_suffix\_number\_combination is identifying\_number for one Item\_identification
- ae488 Drawing\_suffix\_number\_combination is identifying\_number for many Item\_identification objects

#### **4.1.40 Effectivity**

- ae489 Effectivity
- ae490 Effectivity as Date\_effectivity
- ae491 Effectivity as Lot\_effectivity
- ae492 Effectivity as Sequence\_effectivity
- ae493 Effectivity with description not present
- ae494 Effectivity with description
- ae495 Effectivity has effectivity\_approvals of zero Approval
- ae496 Effectivity has effectivity\_approvals of one Approval
- ae497 Effectivity has effectivity\_approvals of many Approval objects
- ae498 Effectivity has product of one Product\_configuration
- ae499 Effectivity is effective\_on for one Indentured\_data\_list\_entry
- ae500 Effectivity is effective\_on for many Indentured\_data\_list\_entry objects
- ae501 Effectivity is effective\_on for one Item\_usage
- ae502 Effectivity is effective\_on for many Item\_usage objects

#### 4.1.41 Element\_identification

- ae503 Element\_identification
- ae504 Element\_identification with identifying\_number
- ae505 Element\_identification with title not present
- ae506 Element\_identification with title
  - ae5061 Element\_identification has alternate\_identifications of zero Alternate\_element\_identification
  - ae5062 Element\_identification has alternate\_identifications of one Alternate\_element\_identification
  - ae5063 Element\_identification has alternate\_identifications of many Alternate\_element\_identification objects
- ae507 Element\_identification has change\_status of zero Change\_identification
- ae508 Element\_identification has change\_status of one Change\_identification
- ae509 Element\_identification has design\_activities of one Design\_authority
- ae5091 Element\_identification has design\_activities of many Design\_authority objects
- ae510 Element\_identification has element\_classifications of zero Element\_type
- ae511 Element\_identification has element\_classifications of one Element\_type
- ae512 Element\_identification has element\_classifications of many Element\_type objects
- ae513 Element\_identification has outstanding\_changes of zero Other\_reference\_document
- ae514 Element\_identification has outstanding\_changes of one Other\_reference\_document
- ae515 Element\_identification has outstanding\_changes of many Other\_reference\_document objects
- ae516 Element\_identification is child for one Item\_parent\_to\_tdp\_element\_child\_relationship
- ae517 Element\_identification is child for many Item\_parent\_to\_tdp\_element\_child\_relationship objects
- ae518 Element\_identification is child for one Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship
- ae519 Element\_identification is child for many Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship objects
- ae520 Element\_identification is document\_identification for one Reference\_document
- ae521 Element\_identification is document\_identification for many Reference\_document objects
- ae522 Element\_identification is drawing\_number for one Drawing\_suffix\_number\_combination
- ae523 Element\_identification is drawing\_number for many Drawing\_suffix\_number\_combination objects
- ae524 Element\_identification is drawing\_number for one Item\_list\_drawing
- ae525 Element\_identification is drawing\_number for many Item\_list\_drawing objects
- ae526 Element\_identification is identification for one Header\_configuration\_with\_element\_identification
- ae527 Element\_identification is identification for many Header\_configuration\_with\_element\_identification objects
- ae528 Element\_identification is parent for one Tdp\_element\_parent\_to\_item\_child\_relationship
- ae529 Element\_identification is parent for many Tdp\_element\_parent\_to\_item\_child\_relationship objects
- ae530 Element\_identification is parent for one Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship
- ae531 Element\_identification is parent for many Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship objects
- ae532 Element\_identification is procurement\_references for one Data\_definition\_exchange\_header
- ae533 Element\_identification is procurement\_references for many Data\_definition\_exchange\_header objects
- ae534 Element\_identification is procurement\_references for one Indentured\_data\_list\_header

- ae535 Element\_identification is procurement\_references for many Indentured\_data\_list\_header objects
- ae536 Element\_identification is referenced\_document\_in\_note for one Notation
- ae537 Element\_identification is referenced\_document\_in\_note for many Notation objects
- ae538 Element\_identification is sheet\_identifier for one Sheet
- ae539 Element\_identification is sheet\_identifier for many Sheet objects
- ae540 Element\_identification is simple\_entry for one Data\_definition\_exchange\_simple\_entry
- ae541 Element\_identification is simple\_entry for many Data\_definition\_exchange\_simple\_entry objects
- ae542 Element\_identification is standardization\_documents\_list for one Indentured\_data\_list\_body
- ae543 Element\_identification is standardization\_documents\_list for many Indentured\_data\_list\_body objects
- ae544 Element\_identification is superseded\_entry for one Indentured\_data\_list\_entry
- ae545 Element\_identification is superseded\_entry for many Indentured\_data\_list\_entry objects
- ae546 Element\_identification is tdp\_element\_item for one Tdp\_element\_list\_item
- ae547 Element\_identification is tdp\_element\_item for many Tdp\_element\_list\_item objects
- ae548 Element\_identification is tdp\_indenture for one Tdp\_indentured\_tdp\_element
- ae549 Element\_identification is tdp\_indenture for many Tdp\_indentured\_tdp\_element objects

#### 4.1.42 Element\_type

- ae550 Element\_type
- ae551 Element\_type with element\_code
- ae552 Element\_type with type\_of\_coding\_scheme not present
- ae553 Element\_type with type\_of\_coding\_scheme
- ae554 Element\_type has code\_administrator of zero Company
- ae555 Element\_type has code\_administrator of one Company
- ae556 Element\_type is element\_classifications for one Alternate\_element\_identification
- ae557 Element\_type is element\_classifications for many Alternate\_element\_identification objects
- ae558 Element\_type is element\_classifications for one Element\_identification
- ae559 Element\_type is element\_classifications for many Element\_identification objects

#### 4.1.43 Exchange\_file

- ae560 Exchange\_file
- ae561 Exchange\_file with included\_in\_exchange = already delivered
- ae562 Exchange\_file with included\_in\_exchange = available for access
- ae563 Exchange\_file with included\_in\_exchange = fully included
- ae564 Exchange\_file with included\_in\_exchange = not deliverable
- ae565 Exchange\_file with included\_in\_exchange = not delivered yet
- ae566 Exchange\_file with included\_in\_exchange = not received
- ae567 Exchange\_file with included\_in\_exchange = partially included
- ae568 Exchange\_file with included\_in\_exchange = receipt accepted
- ae569 Exchange\_file with included\_in\_exchange = receipt acknowledged
- ae570 Exchange\_file with included\_in\_exchange = receipt partially rejected
- ae571 Exchange\_file with included\_in\_exchange = receipt rejected
- ae572 Exchange\_file with included\_in\_exchange = resubmission
- ae573 Exchange\_file has destination\_system of zero System\_declaration
- ae574 Exchange\_file has destination\_system of one System\_declaration
- ae575 Exchange\_file is entry\_files for one Data\_definition\_entry\_item

## **ISO/TS 10303-332:2002(E)**

- ae576 Exchange\_file is entry\_files for many Data\_definition\_entry\_item objects
- ae577 Exchange\_file is entry\_files for one Data\_definition\_entry\_tdp\_element
- ae578 Exchange\_file is entry\_files for many Data\_definition\_entry\_tdp\_element objects
- ae579 Exchange\_file is file\_entries for one Simple\_list\_of\_files
- ae580 Exchange\_file is file\_entries for many Simple\_list\_of\_files objects

### **4.1.44 Explicit\_graphics**

- ae581 Explicit\_graphics
- ae582 Explicit\_graphics has table\_geometry of one Geometry
- ae583 Explicit\_graphics is graphics\_declaration for one Page\_parameters
- ae584 Explicit\_graphics is graphics\_declaration for many Page\_parameters objects

### **4.1.45 External\_graphics\_file**

- ae585 External\_graphics\_file
- ae586 External\_graphics\_file with file\_loadpoint\_x
- ae587 External\_graphics\_file with file\_loadpoint\_y
- ae588 External\_graphics\_file has file\_id of one File
- ae589 External\_graphics\_file is graphics\_declaration for one Page\_parameters
- ae590 External\_graphics\_file is graphics\_declaration for many Page\_parameters objects

### **4.1.46 Field\_content\_holder**

- ae591 Field\_content\_holder as Field\_content\_holder\_singular
- ae592 Field\_content\_holder as Field\_content\_holder\_tabulation
- ae593 Field\_content\_holder with field\_justification
- ae594 Field\_content\_holder with text\_style
- ae595 Field\_content\_holder has location of one Field\_location

### **4.1.47 Field\_content\_holder\_singular**

- ae596 Field\_content\_holder\_singular
- ae597 Field\_content\_holder\_singular with field\_text
- ae598 Field\_content\_holder\_singular is single\_block\_content\_presentation for one Header\_block
- ae599 Field\_content\_holder\_singular is single\_block\_content\_presentation for many Header\_block objects

### **4.1.48 Field\_content\_holder\_tabulation**

- ae600 Field\_content\_holder\_tabulation
- ae601 Field\_content\_holder\_tabulation with one field\_text
- ae602 Field\_content\_holder\_tabulation with many field\_text elements
- ae603 Field\_content\_holder\_tabulation is group\_parent\_content\_presentation for one Group\_parent\_content\_holder
- ae604 Field\_content\_holder\_tabulation is group\_parent\_content\_presentation for many Group\_parent\_content\_holder objects

#### 4.1.49 Field\_location

- ae605 Field\_location
- ae606 Field\_location is location for one Field\_content\_holder
- ae607 Field\_location is location for many Field\_content\_holder objects
- ae608 Field\_location is location for one Field\_title
- ae609 Field\_location is location for many Field\_title objects

#### 4.1.50 Field\_location\_definition

- ae610 Field\_location\_definition
- ae611 Field\_location\_definition has field\_load\_point of one Load\_point

#### 4.1.51 Field\_title

- ae612 Field\_title
- ae613 Field\_title with field\_justification
- ae614 Field\_title with field\_style
- ae615 Field\_title with field\_text
- ae616 Field\_title has location of one Field\_location
- ae617 Field\_title is single\_block\_titles for one Header\_block
- ae618 Field\_title is single\_block\_titles for many Header\_block objects
- ae619 Field\_title is single\_column\_header\_titles for one Column\_header
- ae620 Field\_title is single\_column\_header\_titles for many Column\_header objects
- ae621 Field\_title is single\_group\_parent\_column\_header\_titles for one Group\_parent\_column\_header
- ae622 Field\_title is single\_group\_parent\_column\_header\_titles for many Group\_parent\_column\_header objects
- ae623 Field\_title is single\_group\_parent\_header\_titles for one Group\_parent\_header
- ae624 Field\_title is single\_group\_parent\_header\_titles for many Group\_parent\_header objects
- ae625 Field\_title is single\_tabulation\_header\_titles for one Tabulation\_header
- ae626 Field\_title is single\_tabulation\_header\_titles for many Tabulation\_header objects

#### 4.1.52 File

- ae627 File
- ae628 File as Accessed\_file
- ae629 File as Exchange\_file
- ae630 File as Source\_file
- ae631 File with context\_file\_name not present
- ae632 File with context\_file\_name
- ae633 File with native\_format\_file\_name not present
- ae634 File with native\_format\_file\_name
- ae635 File has change\_status of zero Change\_identification
- ae636 File has change\_status of one Change\_identification
- ae637 File has context\_file\_format of zero File\_format
- ae638 File has context\_file\_format of one File\_format
- ae639 File has distribution\_authorizations of zero Distribution\_notice
- ae640 File has distribution\_authorizations of one Distribution\_notice
- ae641 File has distribution\_authorizations of many Distribution\_notice objects

## **ISO/TS 10303-332:2002(E)**

- ae642 File has security\_identifications of zero Security\_classification
- ae643 File has security\_identifications of one Security\_classification
- ae644 File has security\_identifications of many Security\_classification objects
- ae645 File has size of zero Size\_characteristics
- ae646 File has size of one Size\_characteristics
- ae647 File has source\_system of zero System\_declaration
- ae648 File has source\_system of one System\_declaration
- ae649 File is file\_id for one External\_graphics\_file
- ae650 File is file\_id for many External\_graphics\_file objects

### **4.1.53 File\_format**

- ae651 File\_format
- ae652 File\_format with change\_level not present
- ae653 File\_format with change\_level
- ae654 File\_format with format\_code not present
- ae655 File\_format with format\_code
- ae656 File\_format with format\_standard not present
- ae657 File\_format with format\_standard
- ae658 File\_format with revision\_level not present
- ae659 File\_format with revision\_level
- ae660 File\_format has release\_date of zero Date
- ae661 File\_format has release\_date of one Date
- ae662 File\_format is context\_file\_format for one File
- ae663 File\_format is context\_file\_format for many File objects
- ae664 File\_format is entry\_format for one Data\_definition\_entry\_tdp\_element
- ae665 File\_format is entry\_format for many Data\_definition\_entry\_tdp\_element objects

### **4.1.54 Foreign\_defined\_item**

- ae666 Foreign\_defined\_item

### **4.1.55 Geometry**

- ae667 Geometry
- ae668 Geometry is annotation\_geometry for one Annotation
- ae669 Geometry is annotation\_geometry for many Annotation objects
- ae670 Geometry is table\_geometry for one Explicit\_graphics
- ae671 Geometry is table\_geometry for many Explicit\_graphics objects
- ae672 Geometry is part\_shape\_representation for one Shape\_model
- ae673 Geometry is part\_shape\_representation for many Shape\_model objects

### **4.1.56 Group\_parent\_column\_header**

- ae674 Group\_parent\_column\_header
- ae675 Group\_parent\_column\_header has single\_group\_parent\_column\_header\_titles of one Field\_title
- ae676 Group\_parent\_column\_header has single\_group\_parent\_column\_header\_titles of many Field\_title objects
- ae677 Group\_parent\_column\_header is tabulation\_group\_parent\_headings for one Tabulation

ae678 Group\_parent\_column\_header is tabulation\_group\_parent\_headings for many Tabulation objects

#### **4.1.57 Group\_parent\_content\_holder**

ae679 Group\_parent\_content\_holder

ae680 Group\_parent\_content\_holder has group\_parent\_content\_presentation of one Field\_content\_holder\_tabulation

ae681 Group\_parent\_content\_holder is parent\_columns for one Tabulation

ae682 Group\_parent\_content\_holder is parent\_columns for many Tabulation objects

#### **4.1.58 Group\_parent\_header**

ae683 Group\_parent\_header

ae684 Group\_parent\_header has single\_group\_parent\_header\_titles of one Field\_title

ae685 Group\_parent\_header has single\_group\_parent\_header\_titles of many Field\_title objects

ae686 Group\_parent\_header is group\_parent\_headings for one Tabulation

ae687 Group\_parent\_header is group\_parent\_headings for many Tabulation objects

#### **4.1.59 Header**

ae688 Header

ae689 Header with document\_abstract not present

ae690 Header with document\_abstract

ae691 Header with document\_keywords not present

ae692 Header with document\_keywords of one element

ae693 Header with document\_keywords of many elements

ae694 Header with languages not present

ae695 Header with languages of one element

ae696 Header with languages of many elements

ae697 Header with sheet\_count not present

ae698 Header with sheet\_count

ae699 Header has header\_configuration of one Header\_configuration\_with\_element\_identification

ae700 Header has size\_of\_sheet of zero Size\_characteristics\_full\_size

ae701 Header has size\_of\_sheet of one Size\_characteristics\_full\_size

ae702 Header is common\_header for one Data\_definition\_exchange\_header

ae703 Header is common\_header for one Data\_list\_header

ae704 Header is common\_header for one Indentured\_data\_list\_header

ae705 Header is common\_header for one Parts\_list\_header

ae706 Header is heading for one Drawing

ae707 Header is list\_entry for one Data\_list\_entry

ae708 Header is list\_entry for many Data\_list\_entry objects

ae709 Header is list\_entry for one Index\_list\_entry

ae710 Header is list\_entry for many Index\_list\_entry objects

ae711 Header is product\_header for one Product\_data\_set\_with\_format

#### **4.1.60 Header\_block**

ae712 Header\_block

ae713 Header\_block has single\_block\_content\_presentation of zero Field\_content\_holder\_singular

## **ISO/TS 10303-332:2002(E)**

- ae714 Header\_block has single\_block\_content\_presentation of one Field\_content\_holder\_singular
- ae715 Header\_block has single\_block\_content\_presentation of many Field\_content\_holder\_singular objects
- ae716 Header\_block has single\_block\_titles of zero Field\_title
- ae717 Header\_block has single\_block\_titles of one Field\_title
- ae718 Header\_block has single\_block\_titles of many Field\_title objects
- ae719 Header\_block is header\_blocks\_presentation for one Header\_presentation
- ae720 Header\_block is header\_blocks\_presentation for many Header\_presentation objects

### **4.1.61 Header\_configuration\_with\_element\_identification**

- ae721 Header\_configuration\_with\_element\_identification
- ae7220 Header\_configuration\_with\_element\_identification has data\_configuration of zero Configuration
- ae722 Header\_configuration\_with\_element\_identification has data\_configuration of one Configuration
- ae723 Header\_configuration\_with\_element\_identification has identification of one Element\_identification
- ae724 Header\_configuration\_with\_element\_identification is data\_configuration for one Product\_data\_set\_with\_shading
- ae725 Header\_configuration\_with\_element\_identification is data\_configuration for one Product\_data\_set\_without\_format
- ae726 Header\_configuration\_with\_element\_identification is header\_configuration for one Header

### **4.1.62 Header\_presentation**

- ae727 Header\_presentation
- ae728 Header\_presentation has header\_blocks\_presentation of one Header\_block
- ae729 Header\_presentation has header\_blocks\_presentation of many Header\_block objects
- ae730 Header\_presentation has header\_tabulation\_presentation of zero Tabulation
- ae731 Header\_presentation has header\_tabulation\_presentation of one Tabulation
- ae732 Header\_presentation has header\_tabulation\_presentation of many Tabulation objects
- ae733 Header\_presentation is header\_page1\_format for one List\_presentation
- ae734 Header\_presentation is header\_page1\_format for many List\_presentation objects
- ae735 Header\_presentation is header\_pagen\_format for one List\_presentation
- ae736 Header\_presentation is header\_pagen\_format for many List\_presentation objects

### **4.1.63 Indentured\_data\_list**

- ae737 Indentured\_data\_list
- ae738 Indentured\_data\_list has body of one Indentured\_data\_list\_body
- ae739 Indentured\_data\_list has header of one Indentured\_data\_list\_header

### **4.1.64 Indentured\_data\_list\_body**

- ae740 Indentured\_data\_list\_body
- ae741 Indentured\_data\_list\_body has indentured\_tabulation of one Indentured\_data\_list\_tabulation
- ae742 Indentured\_data\_list\_body has notes\_list of zero Notation
- ae743 Indentured\_data\_list\_body has notes\_list of one Notation
- ae744 Indentured\_data\_list\_body has notes\_list of many Notation objects

- ae745 Indentured\_data\_list\_body has revision\_history of zero Revision
- ae746 Indentured\_data\_list\_body has revision\_history of one Revision
- ae747 Indentured\_data\_list\_body has revision\_history of many Revision objects
- ae748 Indentured\_data\_list\_body has standardization\_documents\_list of zero Element\_identification
- ae749 Indentured\_data\_list\_body has standardization\_documents\_list of one Element\_identification
- ae750 Indentured\_data\_list\_body has standardization\_documents\_list of many Element\_identification objects
- ae751 Indentured\_data\_list\_body is body for one Indentured\_data\_list

#### 4.1.65 Indentured\_data\_list\_entry

- ae752 Indentured\_data\_list\_entry
- ae753 Indentured\_data\_list\_entry with entry\_item\_change\_level not present
- ae754 Indentured\_data\_list\_entry with entry\_item\_change\_level
- ae755 Indentured\_data\_list\_entry with indenture\_level not present
- ae756 Indentured\_data\_list\_entry with indenture\_level
- ae757 Indentured\_data\_list\_entry has available\_from of zero source\_identification
- ae758 Indentured\_data\_list\_entry has available\_from of one source\_identification as Contract\_submission
- ae759 Indentured\_data\_list\_entry has available\_from of many source\_identification as Contract\_submission objects
- ae760 Indentured\_data\_list\_entry has available\_from of one source\_identification as Reference\_document
- ae761 Indentured\_data\_list\_entry has available\_from of many source\_identification as Reference\_document objects
- ae762 Indentured\_data\_list\_entry has effective\_on of zero Effectivity
- ae763 Indentured\_data\_list\_entry has effective\_on of one Effectivity
- ae764 Indentured\_data\_list\_entry has entry of one list\_entry\_select as Item\_parent\_to\_item\_child\_relationship
- ae765 Indentured\_data\_list\_entry has entry of one list\_entry\_select as Item\_parent\_to\_tdp\_element\_child\_relationship
- ae766 Indentured\_data\_list\_entry has entry of one list\_entry\_select as Tdp\_element\_parent\_to\_item\_child\_relationship
- ae767 Indentured\_data\_list\_entry has entry of one list\_entry\_select as Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship
- ae7681 Indentured\_data\_list\_entry has entry of one list\_entry\_select as Tdp\_indentured\_item
- ae7682 Indentured\_data\_list\_entry has entry of one list\_entry\_select as Tdp\_indentured\_tdp\_element
- ae7683 Indentured\_data\_list\_entry has entry\_configuration of zero Configuration
- ae7684 Indentured\_data\_list\_entry has entry\_configuration of one Configuration
- ae770 Indentured\_data\_list\_entry has entry\_notes of zero Notation
- ae771 Indentured\_data\_list\_entry has entry\_notes of one Notation
- ae772 Indentured\_data\_list\_entry has entry\_notes of many Notation objects
- ae7721 Indentured\_data\_list\_entry has retrofit of zero Retrofit\_usage
- ae7722 Indentured\_data\_list\_entry has retrofit of one Retrofit\_usage
- ae773 Indentured\_data\_list\_entry has special\_conditions of zero Special\_condition
- ae774 Indentured\_data\_list\_entry has special\_conditions of one Special\_condition
- ae775 Indentured\_data\_list\_entry has special\_conditions of many Special\_condition objects
- ae776 Indentured\_data\_list\_entry has superseded\_entry of zero Element\_identification
- ae777 Indentured\_data\_list\_entry has superseded\_entry of one Element\_identification
- ae778 Indentured\_data\_list\_entry is tabulation\_of\_entries for one Indentured\_data\_list\_tabulation

ae779 Indentured\_data\_list\_entry is tabulation\_of\_entries for many Indentured\_data\_list\_tabulation objects

#### **4.1.66 Indentured\_data\_list\_header**

ae780 Indentured\_data\_list\_header

ae781 Indentured\_data\_list\_header has common\_header of one Header

ae782 Indentured\_data\_list\_header has procurement\_references of zero identification\_select

ae783 Indentured\_data\_list\_header has procurement\_references of one identification\_select as Element\_identification

ae784 Indentured\_data\_list\_header has procurement\_references of many identification\_select as Element\_identification objects

ae785 Indentured\_data\_list\_header has procurement\_references of one identification\_select as Item\_identification

ae786 Indentured\_data\_list\_header has procurement\_references of many identification\_select as Item\_identification objects

ae787 Indentured\_data\_list\_header is header for one Indentured\_data\_list

#### **4.1.67 Indentured\_data\_list\_tabulation**

ae788 Indentured\_data\_list\_tabulation

ae789 Indentured\_data\_list\_tabulation has method\_of\_entry\_tabulation of one indentured\_list\_method as Indentured\_list\_by\_document

ae790 Indentured\_data\_list\_tabulation has method\_of\_entry\_tabulation of one indentured\_list\_method as Indentured\_list\_by\_part

ae791 Indentured\_data\_list\_tabulation has method\_of\_entry\_tabulation of one indentured\_list\_method as Indentured\_list\_by\_part\_with\_document\_references\_to\_parts

ae792 Indentured\_data\_list\_tabulation has tabulation\_of\_entries of one Indentured\_data\_list\_entry

ae793 Indentured\_data\_list\_tabulation has tabulation\_of\_entries of many Indentured\_data\_list\_entry objects

ae794 Indentured\_data\_list\_tabulation is indentured\_tabulation for one Indentured\_data\_list\_body

#### **4.1.68 Indentured\_list\_by\_document**

ae795 Indentured\_list\_by\_document

ae796 Indentured\_list\_by\_document has tdp\_indentured\_tdp\_elements of one Tdp\_indentured\_tdp\_element

ae797 Indentured\_list\_by\_document has tdp\_indentured\_tdp\_elements of many Tdp\_indentured\_tdp\_element objects

ae798 Indentured\_list\_by\_document is method\_of\_entry\_tabulation for one Indentured\_data\_list\_tabulation

ae799 Indentured\_list\_by\_document is method\_of\_entry\_tabulation for many Indentured\_data\_list\_tabulation objects

#### **4.1.69 Indentured\_list\_by\_part**

ae800 Indentured\_list\_by\_part

ae801 Indentured\_list\_by\_part has tdp\_indentured\_items of one Tdp\_indentured\_item

ae802 Indentured\_list\_by\_part has tdp\_indentured\_items of many Tdp\_indentured\_item objects

- ae803 Indentured\_list\_by\_part is method\_of\_entry\_tabulation for one Indentured\_data\_list\_tabulation
- ae804 Indentured\_list\_by\_part is method\_of\_entry\_tabulation for many Indentured\_data\_list\_tabulation objects

#### **4.1.70 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts**

- ae805 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts
- ae806 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts has tdp\_indentured of one item\_or\_element as Tdp\_indentured\_item
- ae807 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts has tdp\_indentured of many item\_or\_element as Tdp\_indentured\_item objects
- ae808 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts has tdp\_indentured of one item\_or\_element as Tdp\_indentured\_tdp\_element
- ae809 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts has tdp\_indentured of many item\_or\_element as Tdp\_indentured\_tdp\_element objects
- ae810 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts is method\_of\_entry\_tabulation for one Indentured\_data\_list\_tabulation
- ae811 Indentured\_list\_by\_part\_with\_document\_references\_to\_parts is method\_of\_entry\_tabulation for many Indentured\_data\_list\_tabulation objects

#### **4.1.71 Index\_list**

- ae812 Index\_list
- ae813 Index\_list has body of one Index\_list\_body
- ae814 Index\_list has list\_header of one Index\_list\_header

#### **4.1.72 Index\_list\_body**

- ae815 Index\_list\_body
- ae816 Index\_list\_body has index\_list\_entries of one Index\_list\_entry
- ae817 Index\_list\_body has index\_list\_entries of many Index\_list\_entry objects
- ae818 Index\_list\_body has list\_notes of zero Notation
- ae819 Index\_list\_body has list\_notes of one Notation
- ae820 Index\_list\_body has list\_notes of many Notation objects
- ae821 Index\_list\_body has revision\_history of zero Revision
- ae822 Index\_list\_body has revision\_history of one Revision
- ae823 Index\_list\_body has revision\_history of many Revision objects
- ae824 Index\_list\_body is body for one Index\_list

#### **4.1.73 Index\_list\_entry**

- ae825 Index\_list\_entry
- ae826 Index\_list\_entry with entry\_item\_change\_level not present
- ae827 Index\_list\_entry with entry\_item\_change\_level
- ae828 Index\_list\_entry has entry\_notes of zero Notation
- ae829 Index\_list\_entry has entry\_notes of one Notation
- ae830 Index\_list\_entry has entry\_notes of many Notation objects
- ae831 Index\_list\_entry has list\_entry of one Header
- ae832 Index\_list\_entry is index\_list\_entries for one Index\_list\_body

ae833 Index\_list\_entry is index\_list\_entries for many Index\_list\_body objects

#### 4.1.74 Index\_list\_header

ae834 Index\_list\_header

ae835 Index\_list\_header has common\_header of one Header

ae836 Index\_list\_header is list\_header for one Index\_list

#### 4.1.75 Item

ae837 Item

ae838 Item with item\_contexts not present

ae839 Item with item\_contexts of one Label

ae840 Item with item\_contexts of many Label elements

ae841 Item has alternates of zero Alternate\_item

ae842 Item has alternates of one Alternate\_item

ae843 Item has alternates of many Alternate\_item objects

ae844 Item has conditions\_defined\_through\_constrained\_document of zero Reference\_document\_usage

ae845 Item has conditions\_defined\_through\_constrained\_document of one Reference\_document\_usage

ae846 Item has conditions\_defined\_through\_constrained\_document of many Reference\_document\_usage objects

ae847 Item has conditions\_defined\_through\_simple\_reference of zero Reference\_document

ae848 Item has conditions\_defined\_through\_simple\_reference of one Reference\_document

ae849 Item has conditions\_defined\_through\_simple\_reference of many Reference\_document objects

ae850 Item has identification of one Item\_identification

ae851 Item has item\_configuration of zero Configuration

ae852 Item has item\_configuration of one Configuration

ae853 Item has item\_weight of zero Weight

ae854 Item has item\_weight of one Weight

ae855 Item has notes of zero Notation

ae856 Item has notes of one Notation

ae857 Item has notes of many Notation objects

ae858 Item has special\_conditions of zero Special\_condition

ae859 Item has special\_conditions of one Special\_condition

ae860 Item has special\_conditions of many Special\_condition objects

ae861 Item is being\_defined\_for for one Item\_usage

ae862 Item is being\_defined\_for for many Item\_usage objects

ae8621 Item is interchange\_item for one Alternate\_item

ae8622 Item is interchange\_item for many Alternate\_item objects

ae863 Item is item\_that\_is\_acting\_as\_stock for one Make\_from\_an\_item

ae864 Item is item\_that\_is\_acting\_as\_stock for many Make\_from\_an\_item objects

ae865 Item is material for one Stock\_material

ae866 Item is material for many Stock\_material objects

ae867 Item is related\_item for one Tdp\_element\_and\_item\_association

ae868 Item is related\_item for many Tdp\_element\_and\_item\_association objects

#### 4.1.76 Item\_identification

- ae869 Item\_identification
- ae870 Item\_identification with identifying\_number of one Identifier
- ae871 Item\_identification has identifying\_number of one item\_identifying\_number\_select as Drawing\_suffix\_number\_combination
- ae872 Item\_identification with nomenclature\_or\_name not present
- ae873 Item\_identification with nomenclature\_or\_name
- ae874 Item\_identification has alternate\_identifications of zero Alternate\_identification\_of\_item
- ae875 Item\_identification has alternate\_identifications of one Alternate\_identification\_of\_item
- ae876 Item\_identification has alternate\_identifications of many Alternate\_identification\_of\_item objects
- ae877 Item\_identification has change of zero Change\_identification
- ae878 Item\_identification has change of one Change\_identification
- ae879 Item\_identification has classifications of zero Item\_type
- ae880 Item\_identification has classifications of one Item\_type
- ae881 Item\_identification has classifications of many Item\_type objects
- ae882 Item\_identification has design\_activity of one Design\_authority
- ae883 Item\_identification has source\_information of zero Source\_information\_type
- ae884 Item\_identification has source\_information of one Source\_information\_type
- ae885 Item\_identification is applicable\_to for one Reason
- ae886 Item\_identification is applicable\_to for many Reason objects
- ae887 Item\_identification is assembly\_item\_list\_applies\_to for one Item\_list\_drawing
- ae888 Item\_identification is assembly\_item\_list\_applies\_to for many Item\_list\_drawing objects
- ae889 Item\_identification is child for one Item\_parent\_to\_item\_child\_relationship
- ae890 Item\_identification is child for many Item\_parent\_to\_item\_child\_relationship objects
- ae891 Item\_identification is child for one Tdp\_element\_parent\_to\_item\_child\_relationship
- ae892 Item\_identification is child for many Tdp\_element\_parent\_to\_item\_child\_relationship objects
- ae8921 Item\_identification is design\_item for one Product\_configuration
- ae8922 Item\_identification is design\_item for many Product\_configuration objects
- ae893 Item\_identification is for\_item for one Data\_list\_tabulation
- ae894 Item\_identification is for\_item for many Data\_list\_tabulation objects
- ae895 Item\_identification is for\_item for one Data\_list\_tabulation
- ae896 Item\_identification is identification for one Item
- ae897 Item\_identification is identification for many Item objects
- ae898 Item\_identification is list\_for for one Item\_list
- ae899 Item\_identification is list\_for for many Item\_list objects
- ae900 Item\_identification is parent for one Item\_parent\_to\_item\_child\_relationship
- ae901 Item\_identification is parent for many Item\_parent\_to\_item\_child\_relationship objects
- ae902 Item\_identification is parent for one Item\_parent\_to\_tdp\_element\_child\_relationship
- ae903 Item\_identification is parent for many Item\_parent\_to\_tdp\_element\_child\_relationship objects
- ae904 Item\_identification is procurement\_references for one Data\_definition\_exchange\_header
- ae905 Item\_identification is procurement\_references for many Data\_definition\_exchange\_header objects
- ae906 Item\_identification is procurement\_references for one Indentured\_data\_list\_header
- ae907 Item\_identification is procurement\_references for many Indentured\_data\_list\_header objects
- ae908 Item\_identification is tdp\_indenture for one Tdp\_indentured\_item
- ae909 Item\_identification is tdp\_indenture for many Tdp\_indentured\_item objects

#### 4.1.77 Item\_list

- ae910 Item\_list
- ae911 Item\_list with type\_of\_component\_list of one Text
- ae912 Item\_list with type\_of\_component\_list = assembly\_defined\_on\_drawing\_component\_list
- ae913 Item\_list with type\_of\_component\_list = installation\_drawing\_component\_list
- ae914 Item\_list with type\_of\_component\_list =
  - item\_not\_defined\_on\_drawing\_next\_higher\_assembly\_component\_list
- ae915 Item\_list with type\_of\_component\_list = made\_from\_component\_list\_of\_one
- ae916 Item\_list with type\_of\_component\_list = net\_change\_list
- ae917 Item\_list with type\_of\_component\_list = synthetic\_part\_number\_component\_list
- ae918 Item\_list has component\_of of one Item\_usage
- ae919 Item\_list has component\_of of many Item\_usage objects
- ae920 (*deprecated*)
- ae921 Item\_list has list\_for of one item\_list\_applies\_to\_select as Item\_identification
- ae922 Item\_list has list\_for of one item\_list\_applies\_to\_select as Item\_list\_drawing
- ae923 Item\_list is parts\_tabulations for one Parts\_list\_body
- ae924 Item\_list is parts\_tabulations for many Parts\_list\_body objects

#### 4.1.78 Item\_list\_drawing

- ae925 Item\_list\_drawing
- ae926 Item\_list\_drawing has assembly\_item\_list\_applies\_to of zero Item\_identification
- ae927 Item\_list\_drawing has assembly\_item\_list\_applies\_to of one Item\_identification
- ae928 Item\_list\_drawing has drawing\_number of one Element\_identification
- ae929 Item\_list\_drawing is list\_for for one Item\_list
- ae930 Item\_list\_drawing is list\_for for many Item\_list objects

#### 4.1.79 Item\_parent\_to\_item\_child\_relationship

- ae931 Item\_parent\_to\_item\_child\_relationship
- ae932 Item\_parent\_to\_item\_child\_relationship has child of one Item\_identification
- ae933 Item\_parent\_to\_item\_child\_relationship has parent of one Item\_identification
- ae934 Item\_parent\_to\_item\_child\_relationship is entry for one Indentured\_data\_list\_entry
- ae935 Item\_parent\_to\_item\_child\_relationship is entry for many Indentured\_data\_list\_entry objects
- ae936 Item\_parent\_to\_item\_child\_relationship is indentured\_entry for one Data\_definition\_indentured\_entry
- ae937 Item\_parent\_to\_item\_child\_relationship is indentured\_entry for many Data\_definition\_indentured\_entry objects

#### 4.1.80 Item\_parent\_to\_tdp\_element\_child\_relationship

- ae938 Item\_parent\_to\_tdp\_element\_child\_relationship
- ae939 Item\_parent\_to\_tdp\_element\_child\_relationship has child of one Element\_identification
- ae940 Item\_parent\_to\_tdp\_element\_child\_relationship has parent of one Item\_identification
- ae941 Item\_parent\_to\_tdp\_element\_child\_relationship is entry for one Indentured\_data\_list\_entry
- ae942 Item\_parent\_to\_tdp\_element\_child\_relationship is entry for many Indentured\_data\_list\_entry objects
- ae943 Item\_parent\_to\_tdp\_element\_child\_relationship is indentured\_entry for one Data\_definition\_indentured\_entry

ae944 Item\_parent\_to\_tdp\_element\_child\_relationship is indentured\_entry for many Data\_definition\_indentured\_entry objects

#### 4.1.81 Item\_type

ae945 Item\_type  
 ae946 Item\_type with item\_code  
 ae947 Item\_type with type\_of\_coding\_scheme not present  
 ae948 Item\_type with type\_of\_coding\_scheme  
 ae949 Item\_type has code\_administrator of zero Company  
 ae950 Item\_type has code\_administrator of one Company  
 ae9501 Item\_type is classifications for one Alternate\_identification\_of\_item  
**ae9502 Item\_type is classifications for many Alternate\_identification\_of\_item objects**  
 ae951 Item\_type is classifications for one Item\_identification  
 ae952 Item\_type is classifications for many Item\_identification objects

#### 4.1.82 Item\_usage

ae953 Item\_usage  
 ae954 Item\_usage as Foreign\_defined\_item  
 ae955 Item\_usage as Locally\_defined\_item  
 ae956 Item\_usage has being\_defined\_for of one Item  
 ae957 Item\_usage has effective\_on of zero Effectivity  
 ae958 Item\_usage has effective\_on of one Effectivity  
 ae959 Item\_usage has list\_item of zero List\_item\_usage  
 ae960 Item\_usage has list\_item of one List\_item\_usage  
 ae961 Item\_usage has quantity\_used\_in\_next\_higher\_assembly of zero Quantity  
 ae962 Item\_usage has quantity\_used\_in\_next\_higher\_assembly of one Quantity  
 ae963 Item\_usage has retrofit of zero Retrofit\_usage  
 ae964 Item\_usage has retrofit of one Retrofit\_usage  
 ae965 Item\_usage has special\_conditions of zero Special\_condition  
 ae966 Item\_usage has special\_conditions of one Special\_condition  
 ae967 Item\_usage has special\_conditions of many Special\_condition objects  
 ae968 Item\_usage is component\_of for one Item\_list  
 ae969 Item\_usage is interchange\_item for one Alternate\_item  
 ae970 Item\_usage is interchange\_item for many Alternate\_item objects

#### 4.1.83 List\_item\_usage

ae971 List\_item\_usage  
 ae972 List\_item\_usage with drawing\_zones not present  
 ae973 List\_item\_usage with drawing\_zones of one Identifier  
 ae974 List\_item\_usage with drawing\_zones of many Identifier elements  
 ae975 List\_item\_usage with entry\_item\_change\_level not present  
 ae976 List\_item\_usage with entry\_item\_change\_level  
 ae977 List\_item\_usage with find\_number not present  
 ae978 List\_item\_usage with find\_number  
 ae979 List\_item\_usage with item\_type not present  
 ae980 List\_item\_usage with item\_type  
 ae981 List\_item\_usage with reference\_designators not present

## **ISO/TS 10303-332:2002(E)**

- ae982 List\_item\_usage with reference\_designators of one Identifier
- ae983 List\_item\_usage with reference\_designators of many Identifier elements
- ae984 List\_item\_usage has entry\_notes of zero Notation
- ae985 List\_item\_usage has entry\_notes of one Notation
- ae986 List\_item\_usage has entry\_notes of many Notation objects
- ae987 List\_item\_usage is list\_item for one Item\_usage

### **4.1.84 List\_presentation**

- ae988 List\_presentation
- ae989 List\_presentation with unit\_of\_length
- ae990 List\_presentation has body\_page1\_format of one Body\_presentation
- ae991 List\_presentation has body\_pagen\_format of zero Body\_presentation
- ae992 List\_presentation has body\_pagen\_format of one Body\_presentation
- ae993 List\_presentation has body\_pagen\_format of many Body\_presentation objects
- ae994 List\_presentation has header\_page1\_format of one Header\_presentation
- ae995 List\_presentation has header\_pagen\_format of zero Header\_presentation
- ae996 List\_presentation has header\_pagen\_format of one Header\_presentation
- ae997 List\_presentation has header\_pagen\_format of many Header\_presentation objects
- ae998 List\_presentation has page\_format of one Page\_presentation
- ae999 List\_presentation is presentation for one Associated\_list
- ae1000 List\_presentation is presentation for many Associated\_list objects
- ae1001 List\_presentation is presentation for one Data\_definition\_exchange
- ae1002 List\_presentation is presentation for many Data\_definition\_exchange objects

### **4.1.85 Load\_point**

- ae1003 Load\_point
- ae1004 Load\_point with load\_point\_x
- ae1005 Load\_point with load\_point\_y
- ae1006 Load\_point is field\_load\_point for one Field\_location\_definition
- ae1007 Load\_point is field\_load\_point for many Field\_location\_definition objects
- ae1008 Load\_point is string\_load\_point for one String\_location\_definition
- ae1009 Load\_point is string\_load\_point for many String\_location\_definition objects

### **4.1.86 Locally\_defined\_item**

- ae1010 Locally\_defined\_item
- ae1011 Locally\_defined\_item as Assembly
- ae1012 Locally\_defined\_item as Made\_from\_stock\_material
- ae1013 Locally\_defined\_item as Make\_from\_an\_item

### **4.1.87 Lot\_effectivity**

- ae1014 Lot\_effectivity
- ae1015 Lot\_effectivity with lot\_identification
- ae1016 Lot\_effectivity with lot\_size
- ae1017 Lot\_effectivity with lot\_unit\_of\_measure

#### **4.1.88 Made\_from\_stock\_material**

ae1018 Made\_from\_stock\_material  
 ae1019 Made\_from\_stock\_material with quantity\_of\_item\_made\_from\_stock not present  
 ae1020 Made\_from\_stock\_material with quantity\_of\_item\_made\_from\_stock  
 ae1021 Made\_from\_stock\_material has specified\_by of zero Reference\_document\_usage  
 ae1022 Made\_from\_stock\_material has specified\_by of one Reference\_document\_usage  
 ae1023 Made\_from\_stock\_material has specified\_by of many Reference\_document\_usage objects  
 ae1024 Made\_from\_stock\_material has size of zero Stock\_size  
 ae1025 Made\_from\_stock\_material has size of one Stock\_size  
 ae1026 Made\_from\_stock\_material has stock of zero Stock\_material  
 ae1027 Made\_from\_stock\_material has stock of one Stock\_material

#### **4.1.89 Make\_from\_an\_item**

ae1028 Make\_from\_an\_item  
 ae1029 Make\_from\_an\_item with quantity\_of\_item\_made\_from\_other\_item not present  
 ae1030 Make\_from\_an\_item with quantity\_of\_item\_made\_from\_other\_item  
 ae1031 Make\_from\_an\_item has item\_that\_is\_acting\_as\_stock of one Item

#### **4.1.90 Notation**

ae1032 Notation  
 ae1033 Notation with note  
 ae1034 Notation with note\_parameter not present  
 ae1035 Notation with note\_parameter of one Text  
 ae1036 Notation with note\_parameter of many Text elements  
 ae1037 Notation with note\_title not present  
 ae1038 Notation with note\_title  
 ae1039 Notation with reference\_code not present  
 ae1040 Notation with reference\_code  
 ae1041 Notation with type\_of\_notation not present  
 ae1042 Notation with type\_of\_notation of one Label  
 ae1043 Notation with type\_of\_notation of many Label elements  
 ae1044 Notation has referenced\_document\_in\_note of zero Element\_identification  
 ae1045 Notation has referenced\_document\_in\_note of one Element\_identification  
 ae1046 Notation has referenced\_document\_in\_note of many Element\_identification objects  
 ae1047 Notation is data\_list\_notes for one Data\_list\_body  
 ae1048 Notation is data\_list\_notes for many Data\_list\_body objects  
 ae1049 Notation is entry\_notes for one Data\_definition\_entry\_item  
 ae1050 Notation is entry\_notes for many Data\_definition\_entry\_item objects  
 ae1051 Notation is entry\_notes for one Data\_definition\_entry\_tdp\_element  
 ae1052 Notation is entry\_notes for many Data\_definition\_entry\_tdp\_element objects  
 ae1053 Notation is entry\_notes for one Data\_list\_entry  
 ae1054 Notation is entry\_notes for many Data\_list\_entry objects  
 ae1055 Notation is entry\_notes for one Indentured\_data\_list\_entry  
 ae1056 Notation is entry\_notes for many Indentured\_data\_list\_entry objects  
 ae1057 Notation is entry\_notes for one Index\_list\_entry  
 ae1058 Notation is entry\_notes for many Index\_list\_entry objects  
 ae1059 Notation is entry\_notes for one List\_item\_usage

## **ISO/TS 10303-332:2002(E)**

ae1060 Notation is entry\_notes for many List\_item\_usage objects  
ae1061 Notation is list\_notes for one Index\_list\_body  
ae1062 Notation is list\_notes for many Index\_list\_body objects  
ae1063 Notation is list\_notes for one Parts\_list\_body  
ae1064 Notation is list\_notes for many Parts\_list\_body objects  
ae1065 Notation is notes for one Item  
ae1066 Notation is notes for many Item objects  
ae1067 Notation is notes for one Other\_list\_body  
ae1068 Notation is notes for many Other\_list\_body objects  
ae1069 Notation is notes\_list for one Data\_definition\_exchange\_body  
ae1070 Notation is notes\_list for many Data\_definition\_exchange\_body objects  
ae1071 Notation is notes\_list for one Indentured\_data\_list\_body  
ae1072 Notation is notes\_list for many Indentured\_data\_list\_body objects  
ae1073 Notation is retrofit\_description for one Retrofit\_usage  
ae1074 Notation is retrofit\_description for many Retrofit\_usage objects

### **4.1.91 Number\_with\_units**

ae1075 Number\_with\_units  
ae1076 Number\_with\_units with units\_of  
ae1077 Number\_with\_units with value\_of  
ae1078 Number\_with\_units is a\_length for one Stock\_size\_parameters  
ae1079 Number\_with\_units is a\_length for many Stock\_size\_parameters objects  
ae1080 Number\_with\_units is a\_value for one Volume  
ae1081 Number\_with\_units is a\_value for many Volume objects  
ae1082 Number\_with\_units is diameter for one Stock\_size\_parameters  
ae1083 Number\_with\_units is diameter for many Stock\_size\_parameters objects  
ae1084 Number\_with\_units is height for one Stock\_size\_parameters  
ae1085 Number\_with\_units is height for many Stock\_size\_parameters objects  
ae1086 Number\_with\_units is radius for one Stock\_size\_parameters  
ae1087 Number\_with\_units is radius for many Stock\_size\_parameters objects  
ae1088 Number\_with\_units is wall\_thickness for one Stock\_size\_parameters  
ae1089 Number\_with\_units is wall\_thickness for many Stock\_size\_parameters objects  
ae1090 Number\_with\_units is width for one Stock\_size\_parameters  
ae1091 Number\_with\_units is width for many Stock\_size\_parameters objects

### **4.1.92 Other\_list**

ae1092 Other\_list  
ae1093 Other\_list has list\_body of one Other\_list\_body  
ae1094 Other\_list has list\_header of one Other\_list\_header

### **4.1.93 Other\_list\_body**

ae1095 Other\_list\_body  
ae1096 Other\_list\_body has list\_body\_tables of zero Other\_list\_body\_table  
ae1097 Other\_list\_body has list\_body\_tables of one Other\_list\_body\_table  
ae1098 Other\_list\_body has list\_body\_tables of many Other\_list\_body\_table objects  
ae1099 Other\_list\_body has notes of zero Notation  
ae1100 Other\_list\_body has notes of one Notation

ae1101 Other\_list\_body has notes of many Notation objects  
 ae1102 Other\_list\_body has revision\_history of zero Revision  
 ae1103 Other\_list\_body has revision\_history of one Revision  
 ae1104 Other\_list\_body has revision\_history of many Revision objects  
 ae1105 Other\_list\_body is list\_body for one Other\_list

#### **4.1.94 Other\_list\_body\_table**

ae1106 Other\_list\_body\_table  
 ae1107 Other\_list\_body\_table with description\_of\_tabulation not present  
 ae1108 Other\_list\_body\_table with description\_of\_tabulation  
 ae1109 Other\_list\_body\_table with tabulation\_column\_descriptions not present  
 ae1110 Other\_list\_body\_table with one tabulation\_column\_descriptions  
 ae1111 Other\_list\_body\_table with many tabulation\_column\_descriptions elements  
 ae1112 Other\_list\_body\_table has tabulation\_rows of one Tabulation\_entry  
 ae1113 Other\_list\_body\_table has tabulation\_rows of many Tabulation\_entry objects  
 ae1114 Other\_list\_body\_table is list\_body\_tables for one Other\_list\_body  
 ae1115 Other\_list\_body\_table is list\_body\_tables for many Other\_list\_body objects

#### **4.1.95 Other\_list\_header**

ae1116 Other\_list\_header  
 ae1117 Other\_list\_header has common\_header of one Header  
 ae1118 Other\_list\_header is list\_header for one Other\_list

#### **4.1.96 Other\_reference\_document**

ae1119 Other\_reference\_document  
 ae1120 Other\_reference\_document is authorizing\_documents for one Revision  
 ae1121 Other\_reference\_document is authorizing\_documents for many Revision objects  
 ae1122 Other\_reference\_document is defining\_document for one Retrofit\_usage  
 ae1123 Other\_reference\_document is defining\_document for many Retrofit\_usage objects  
 ae1124 Other\_reference\_document is outstanding\_changes for one Alternate\_element\_identification  
 ae1125 Other\_reference\_document is outstanding\_changes for many  
     Alternate\_element\_identification objects  
 ae1126 Other\_reference\_document is outstanding\_changes for one Element\_identification  
 ae1127 Other\_reference\_document is outstanding\_changes for many Element\_identification objects  
 ae1128 Other\_reference\_document is revision\_authorization\_identities for one  
     Change\_identification  
 ae1129 Other\_reference\_document is revision\_authorization\_identities for many  
     Change\_identification objects

#### **4.1.97 Page\_parameters**

ae1130 Page\_parameters  
 ae1131 Page\_parameters with page\_anchor\_x  
 ae1132 Page\_parameters with page\_anchor\_y  
 ae1133 Page\_parameters with page\_size\_code not present  
 ae1134 Page\_parameters with page\_size\_code  
 ae1135 Page\_parameters with paper\_size not present

## **ISO/TS 10303-332:2002(E)**

ae1136 Page\_parameters with paper\_size  
ae1137 Page\_parameters has graphics\_declaration of zero graphics\_parameters  
ae1138 Page\_parameters has graphics\_declaration of one graphics\_parameters as Explicit\_graphics  
ae1139 Page\_parameters has graphics\_declaration of one graphics\_parameters as External\_graphics\_file  
ae1140 Page\_parameters is page\_master\_parameters for one Page\_presentation  
ae1141 Page\_parameters is page\_master\_parameters for many Page\_presentation objects  
ae1142 Page\_parameters is page1\_parameters for one Page\_presentation  
ae1143 Page\_parameters is page1\_parameters for many Page\_presentation objects  
ae1144 Page\_parameters is pagen\_parameters for one Page\_presentation  
ae1145 Page\_parameters is pagen\_parameters for many Page\_presentation objects

### **4.1.98 Page\_presentation**

ae1146 Page\_presentation  
ae1147 Page\_presentation has page\_master\_parameters of one Page\_parameters  
ae1148 Page\_presentation has page1\_parameters of zero Page\_parameters  
ae1149 Page\_presentation has page1\_parameters of one Page\_parameters  
ae1150 Page\_presentation has pagen\_parameters of zero Page\_parameters  
ae1151 Page\_presentation has pagen\_parameters of one Page\_parameters  
ae1152 Page\_presentation has pagen\_parameters of many Page\_parameters objects

### **4.1.99 Parts\_list**

ae1153 Parts\_list  
ae1154 Parts\_list has list\_body of one Parts\_list\_body  
ae1155 Parts\_list has list\_header of one Parts\_list\_header

### **4.1.100 Parts\_list\_body**

ae1156 Parts\_list\_body  
ae1157 Parts\_list\_body has list\_notes of zero Notation  
ae1158 Parts\_list\_body has list\_notes of one Notation  
ae1159 Parts\_list\_body has list\_notes of many Notation objects  
ae1160 Parts\_list\_body has parts\_tabulations of one Item\_list  
ae1161 Parts\_list\_body has parts\_tabulations of many Item\_list objects  
ae1162 Parts\_list\_body has referenced\_tdp\_elements of zero Tdp\_element\_list\_item  
ae1163 Parts\_list\_body has referenced\_tdp\_elements of one Tdp\_element\_list\_item  
ae1164 Parts\_list\_body has referenced\_tdp\_elements of many Tdp\_element\_list\_item objects  
ae1165 Parts\_list\_body has revision\_history of zero Revision  
ae1166 Parts\_list\_body has revision\_history of one Revision  
ae1167 Parts\_list\_body has revision\_history of many Revision objects  
ae1168 Parts\_list\_body is list\_body for one Parts\_list

### **4.1.101 Parts\_list\_header**

ae1169 Parts\_list\_header  
ae1170 Parts\_list\_header has common\_header of one Header  
ae1171 Parts\_list\_header is list\_header for one Parts\_list

#### **4.1.102 Person**

ae1172 Person  
 ae1173 Person with first\_name not present  
 ae1174 Person with first\_name  
 ae1175 Person with last\_name not present  
 ae1176 Person with last\_name  
 ae1177 Person with middle\_name not present  
 ae1178 Person with middle\_name  
 ae1179 Person with title not present  
 ae1180 Person with title  
 ae1181 Person with unique\_identifier  
 ae1182 Person is person\_identification for one Person\_and\_organization  
 ae1183 Person is person\_identification for many Person\_and\_organization objects  
 ae1184 Person is person\_responsible for one Design\_authority  
 ae1185 Person is person\_responsible for many Design\_authority objects  
 ae1186 Person is person\_responsible for one Release\_authentication  
 ae1187 Person is person\_responsible for many Release\_authentication objects  
 ae1188 Person is target\_person for one System\_destination  
 ae1189 Person is target\_person for many System\_destination objects

#### **4.1.103 Person\_and\_organization**

ae1190 Person\_and\_organization  
 ae1191 Person\_and\_organization with electronic\_mail\_address not present  
 ae1192 Person\_and\_organization with electronic\_mail\_address  
 ae1193 Person\_and\_organization with person\_address not present  
 ae1194 Person\_and\_organization with person\_address  
 ae1195 Person\_and\_organization has organization of zero Company  
 ae1196 Person\_and\_organization has organization of one Company  
 ae1197 Person\_and\_organization has person\_identification of zero Person  
 ae1198 Person\_and\_organization has person\_identification of one Person  
 ae1199 Person\_and\_organization is distribution\_authority for one Distribution\_notice  
 ae1200 Person\_and\_organization is distribution\_authority for many Distribution\_notice objects  
 ae1201 Person\_and\_organization is person\_organization for one Approval  
 ae1202 Person\_and\_organization is person\_organization for many Approval objects  
 ae1203 Person\_and\_organization is revision\_approval for one Revision  
 ae1204 Person\_and\_organization is revision\_approval for many Revision objects

#### **4.1.104 Product\_configuration**

ae1205 Product\_configuration  
 ae1206 Product\_configuration with configuration\_id  
 ae1207 Product\_configuration has approval\_of\_configuration of zero Approval  
 ae1208 Product\_configuration has approval\_of\_configuration of one Approval  
 ae1209 Product\_configuration has approval\_of\_configuration of many Approval objects  
 ae12091 Product\_configuration has design\_item of zero Item\_identification  
 ae12092 Product\_configuration has design\_item of one Item\_identification  
 ae1210 Product\_configuration has product\_name of one Product\_model  
 ae1211 Product\_configuration is end\_item\_system\_designation for one Configuration

## **ISO/TS 10303-332:2002(E)**

ae1212 Product\_configuration is end\_item\_system\_designation for many Configuration objects  
ae1213 Product\_configuration is product for one Effectivity  
ae1214 Product\_configuration is product for many Effectivity objects

### **4.1.105 Product\_data\_set**

ae1215 Product\_data\_set as Product\_data\_set\_with\_format  
ae1216 Product\_data\_set as Product\_data\_set\_with\_shading  
ae1217 Product\_data\_set as Product\_data\_set\_without\_format  
ae1218 Product\_data\_set has file\_configuration of zero Source\_file  
ae1219 Product\_data\_set has file\_configuration of one Source\_file  
ae1220 Product\_data\_set has file\_configuration of many Source\_file objects  
ae1221 Product\_data\_set has related of zero drawing\_or\_product\_data\_set  
ae1222 Product\_data\_set has related of one drawing\_or\_product\_data\_set as Drawing  
ae1223 Product\_data\_set has related of one drawing\_or\_product\_data\_set as Product\_data\_set  
ae1224 Product\_data\_set is related for one Product\_data\_set  
ae1225 Product\_data\_set is related for many Product\_data\_set objects

### **4.1.106 Product\_data\_set\_with\_format**

ae1226 Product\_data\_set\_with\_format  
ae1227 Product\_data\_set\_with\_format has presentation\_of\_product\_data\_set of zero  
    Product\_presentation  
ae1228 Product\_data\_set\_with\_format has presentation\_of\_product\_data\_set of one  
    Product\_presentation  
ae1229 Product\_data\_set\_with\_format has presentation\_of\_product\_data\_set of many  
    Product\_presentation objects  
ae1230 Product\_data\_set\_with\_format has product\_header of one Header

### **4.1.107 Product\_data\_set\_with\_shading**

ae1231 Product\_data\_set\_with\_shading  
ae1232 Product\_data\_set\_with\_shading has a\_shaded\_model of one Shaded\_shape\_model  
ae1233 Product\_data\_set\_with\_shading has data\_configuration of one  
    Header\_configuration\_with\_element\_identification

### **4.1.108 Product\_data\_set\_without\_format**

ae1234 Product\_data\_set\_without\_format  
ae1235 Product\_data\_set\_without\_format has a\_model of zero Shape\_model  
ae1236 Product\_data\_set\_without\_format has a\_model of one Shape\_model  
ae1237 Product\_data\_set\_without\_format has data\_configuration of one  
    Header\_configuration\_with\_element\_identification

### **4.1.109 Product\_model**

ae1238 Product\_model  
ae1239 Product\_model with model\_name  
ae1240 Product\_model is product\_name for one Product\_configuration  
ae1241 Product\_model is product\_name for many Product\_configuration objects

#### **4.1.110 Product\_presentation**

ae1242 Product\_presentation  
 ae1243 Product\_presentation has annotation\_presentation of one Annotation  
 ae1244 Product\_presentation has part\_shape\_views of zero Shape\_model  
 ae1245 Product\_presentation has part\_shape\_views of one Shape\_model  
 ae1246 Product\_presentation has part\_shape\_views of many Shape\_model objects  
 ae1247 Product\_presentation is presentation\_format for one Sheet  
 ae1248 Product\_presentation is presentation\_format for many Sheet objects  
 ae1249 Product\_presentation is presentation\_of\_product\_data\_set for one  
     Product\_data\_set\_with\_format  
 ae1250 Product\_presentation is presentation\_of\_product\_data\_set for many  
     Product\_data\_set\_with\_format objects

#### **4.1.111 Quantity**

ae1251 Quantity  
 ae1252 Quantity with quantity\_accuracy not present  
 ae1253 Quantity with quantity\_accuracy of one Text  
 ae1254 Quantity with quantity\_accuracy = approximate  
 ae1255 Quantity with quantity\_accuracy = as\_required  
 ae1256 Quantity with quantity\_accuracy = exact  
 ae1257 Quantity with value of one A\_number  
 ae1258 Quantity with value of one Text  
 ae1259 Quantity has value of one quantity\_type\_select as Volume  
 ae1260 Quantity has value of one quantity\_type\_select as Weight  
 ae1261 Quantity is quantity\_used\_in\_next\_higher\_assembly for one Item\_usage  
 ae1262 Quantity is quantity\_used\_in\_next\_higher\_assembly for many Item\_usage objects  
 ae1263 Quantity is total\_component\_quantity\_in\_product\_configuration for one Sequence\_effectivity  
 ae1264 Quantity is total\_component\_quantity\_in\_product\_configuration for many  
     Sequence\_effectivity objects

#### **4.1.112 Reason**

ae1265 Reason  
 ae1266 Reason with base not present  
 ae1267 Reason with base = acknowledge receipt of delivery  
 ae1268 Reason with base = engineering design analysis  
 ae1269 Reason with base = interim engineering design review  
 ae1270 Reason with base = final design review  
 ae1271 Reason with base = initial data submittal  
 ae1272 Reason with base = procurement design package  
 ae1273 Reason with base = provisioning data submittal  
 ae1274 Reason with base = request for proposal  
 ae1275 Reason with base = request for quote  
 ae1276 Reason with base = revision update data submittal  
 ae1277 Reason with base = specification design package  
 ae1278 Reason with exchange\_purpose not present  
 ae1279 Reason with exchange\_purpose  
 ae1280 Reason has applicable\_to of zero Item\_identification

## **ISO/TS 10303-332:2002(E)**

- ae1281 Reason has applicable\_to of one Item\_identification
- ae1282 Reason has applicable\_to of many Item\_identification objects
- ae1283 Reason is exchange\_reason for one Data\_definition\_exchange\_header
- ae1284 Reason is exchange\_reason for many Data\_definition\_exchange\_header objects

### **4.1.113 Reference\_document**

- ae1285 Reference\_document as Other\_reference\_document
- ae1286 Reference\_document as Specification\_document
- ae1287 Reference\_document as Standard\_document
- ae1288 Reference\_document has document\_identification of one Element\_identification
- ae1289 Reference\_document is available\_from for one Data\_definition\_entry\_item
- ae1290 Reference\_document is available\_from for many Data\_definition\_entry\_item objects
- ae1291 Reference\_document is available\_from for one Data\_definition\_entry\_tdp\_element
- ae1292 Reference\_document is available\_from for many Data\_definition\_entry\_tdp\_element objects
- ae1293 Reference\_document is available\_from for one Data\_list\_entry
- ae1294 Reference\_document is available\_from for many Data\_list\_entry objects
- ae1295 Reference\_document is available\_from for one Indentured\_data\_list\_entry
- ae1296 Reference\_document is available\_from for many Indentured\_data\_list\_entry objects
- ae1297 Reference\_document is conditions\_defined\_through\_simple\_reference for one Item
- ae1298 Reference\_document is conditions\_defined\_through\_simple\_reference for many Item objects
- ae1299 Reference\_document is document\_referenced for one Reference\_document\_usage
- ae1300 Reference\_document is document\_referenced for many Reference\_document\_usage objects
- ae1301 Reference\_document is list\_entry for one Data\_list\_entry
- ae1302 Reference\_document is list\_entry for many Data\_list\_entry objects

### **4.1.114 Reference\_document\_usage**

- ae1303 Reference\_document\_usage
- ae1304 Reference\_document\_usage with location\_in\_document not present
- ae1305 Reference\_document\_usage with location\_in\_document
- ae1306 Reference\_document\_usage with usage\_code not present
- ae1307 Reference\_document\_usage with usage\_code
- ae1308 Reference\_document\_usage with usage\_description not present
- ae1309 Reference\_document\_usage with usage\_description
- ae1310 Reference\_document\_usage has document\_referenced of one Reference\_document
- ae1311 Reference\_document\_usage has usage\_parameter of zero Document\_usage\_parameter
- ae1312 Reference\_document\_usage has usage\_parameter of one Document\_usage\_parameter
- ae1313 Reference\_document\_usage is conditions\_defined\_through\_constrained\_document for one Item
- ae1314 Reference\_document\_usage is conditions\_defined\_through\_constrained\_document for many Item objects
- ae1315 Reference\_document\_usage is specified\_by for one Made\_from\_stock\_material
- ae1316 Reference\_document\_usage is specified\_by for many Made\_from\_stock\_material objects

### **4.1.115 Release\_authentication**

- ae1317 Release\_authentication
- ae1318 Release\_authentication with authentication
- ae1319 Release\_authentication has person\_responsible of zero Person

ae1320 Release\_authentication has person\_responsible of one Person  
 ae1321 Release\_authentication has release\_authority of one Company  
 ae1322 Release\_authentication has release\_authority\_code of zero Company\_code  
 ae1323 Release\_authentication has release\_authority\_code of one Company\_code  
 ae1324 Release\_authentication has release\_date of one Date  
 ae1325 Release\_authentication is release\_authorizations for one Configuration  
 ae1326 Release\_authentication is release\_authorizations for many Configuration objects

#### **4.1.116 Retrofit\_usage**

ae1327 Retrofit\_usage  
 ae1328 Retrofit\_usage with disposition\_for = add  
 ae1329 Retrofit\_usage with disposition\_for = delete  
 ae1330 Retrofit\_usage with disposition\_for = modify  
 ae1331 Retrofit\_usage has defining\_document of zero Other\_reference\_document  
 ae1332 Retrofit\_usage has defining\_document of one Other\_reference\_document  
 ae1333 Retrofit\_usage has retrofit\_description of zero Notation  
 ae1334 Retrofit\_usage has retrofit\_description of one Notation  
 ae13341 Retrofit\_usage is retrofit for one Indentured\_data\_list\_entry  
 ae13342 Retrofit\_usage is retrofit for many Indentured\_data\_list\_entry objects  
 ae1335 Retrofit\_usage is retrofit for one Item\_usage  
 ae1336 Retrofit\_usage is retrofit for many Item\_usage objects

#### **4.1.117 Revision**

ae1337 Revision  
 ae1338 Revision with revision\_description not present  
 ae1339 Revision with revision\_description  
 ae1340 Revision with revision\_level  
 ae1341 Revision has authorizing\_documents of zero Other\_reference\_document  
 ae1342 Revision has authorizing\_documents of one Other\_reference\_document  
 ae1343 Revision has authorizing\_documents of many Other\_reference\_document objects  
 ae1344 Revision has revision\_approval of zero Person\_and\_organization  
 ae1345 Revision has revision\_approval of one Person\_and\_organization  
 ae1346 Revision has revision\_date of zero Date  
 ae1347 Revision has revision\_date of one Date  
 ae1348 Revision is revision\_history for one Data\_definition\_exchange\_body  
 ae1349 Revision is revision\_history for many Data\_definition\_exchange\_body objects  
 ae1350 Revision is revision\_history for one Data\_list\_body  
 ae1351 Revision is revision\_history for many Data\_list\_body objects  
 ae1352 Revision is revision\_history for one Indentured\_data\_list\_body  
 ae1353 Revision is revision\_history for many Indentured\_data\_list\_body objects  
 ae1354 Revision is revision\_history for one Index\_list\_body  
 ae1355 Revision is revision\_history for many Index\_list\_body objects  
 ae1356 Revision is revision\_history for one Other\_list\_body  
 ae1357 Revision is revision\_history for many Other\_list\_body objects  
 ae1358 Revision is revision\_history for one Parts\_list\_body  
 ae1359 Revision is revision\_history for many Parts\_list\_body objects

#### **4.1.118 Security\_classification**

ae1360 Security\_classification  
ae1361 Security\_classification with item\_classification  
ae1362 Security\_classification with title\_security\_classification not present  
ae1363 Security\_classification with title\_security\_classification  
ae1364 Security\_classification has classification\_date of zero Date  
ae1365 Security\_classification has classification\_date of one Date  
ae1366 Security\_classification has declassification\_date of zero Date  
ae1367 Security\_classification has declassification\_date of one Date  
ae1368 Security\_classification is security\_identifications for one Configuration  
ae1369 Security\_classification is security\_identifications for many Configuration objects  
ae1370 Security\_classification is security\_identifications for one File  
ae1371 Security\_classification is security\_identifications for many File objects

#### **4.1.119 Sequence\_effectivity**

ae1372 Sequence\_effectivity  
ae1373 Sequence\_effectivity with from\_effectivity\_id  
ae1374 Sequence\_effectivity with quantity\_unit\_of\_measure not present  
ae1375 Sequence\_effectivity with quantity\_unit\_of\_measure  
ae1376 Sequence\_effectivity with thru\_effectivity\_id not present  
ae1377 Sequence\_effectivity with thru\_effectivity\_id  
ae1378 Sequence\_effectivity has total\_component\_quantity\_in\_product\_configuration of zero  
Quantity  
ae1379 Sequence\_effectivity has total\_component\_quantity\_in\_product\_configuration of one  
Quantity

#### **4.1.120 Shaded\_shape\_model**

ae1380 Shaded\_shape\_model  
ae1381 Shaded\_shape\_model has part\_shape\_views of one Shape\_model  
ae1382 Shaded\_shape\_model has part\_shape\_views of many Shape\_model objects  
ae1383 Shaded\_shape\_model is a\_shaded\_model for one Product\_data\_set\_with\_shading  
ae1384 Shaded\_shape\_model is a\_shaded\_model for many Product\_data\_set\_with\_shading objects

#### **4.1.121 Shape\_model**

ae1385 Shape\_model  
ae1386 Shape\_model has part\_shape\_representation of one Geometry  
ae1387 Shape\_model is a\_model for one Product\_data\_set\_without\_format  
ae1388 Shape\_model is a\_model for many Product\_data\_set\_without\_format objects  
ae1389 Shape\_model is part\_shape\_views for one Product\_presentation  
ae1390 Shape\_model is part\_shape\_views for many Product\_presentation objects  
ae1391 Shape\_model is part\_shape\_views for one Shaded\_shape\_model  
ae1392 Shape\_model is part\_shape\_views for many Shaded\_shape\_model objects

#### **4.1.122 Sheet**

ae1393 Sheet

ae1394 Sheet with sheet\_size not present  
 ae1395 Sheet with sheet\_size  
 ae1396 Sheet has presentation\_format of zero Product\_presentation  
 ae1397 Sheet has presentation\_format of one Product\_presentation  
 ae1398 Sheet has sheet\_configuration of zero Configuration  
 ae1399 Sheet has sheet\_configuration of one Configuration  
 ae1400 Sheet has sheet\_identifier of zero Element\_identification  
 ae1401 Sheet has sheet\_identifier of one Element\_identification  
 ae1402 Sheet is pages for one Drawing  
 ae1403 Sheet is pages for many Drawing objects  
 ae1404 Sheet is list\_entry for one Data\_list\_entry  
 ae1405 Sheet is list\_entry for many Data\_list\_entry objects

#### **4.1.123 Simple\_list\_of\_elements**

ae1406 Simple\_list\_of\_elements  
 ae1407 Simple\_list\_of\_elements has element\_entries of one Data\_definition\_exchange\_simple\_entry  
 ae1408 Simple\_list\_of\_elements has element\_entries of many  
     Data\_definition\_exchange\_simple\_entry objects  
 ae1409 Simple\_list\_of\_elements is list\_method for one Data\_definition\_exchange\_body  
 ae1410 Simple\_list\_of\_elements is list\_method for many Data\_definition\_exchange\_body objects

#### **4.1.124 Simple\_list\_of\_files**

ae1411 Simple\_list\_of\_files  
 ae1412 Simple\_list\_of\_files has file\_entries of one data\_definition\_file\_entry as Accessed\_file  
 ae1413 Simple\_list\_of\_files has file\_entries of many data\_definition\_file\_entry as Accessed\_file  
     objects  
 ae1414 Simple\_list\_of\_files has file\_entries of one data\_definition\_file\_entry as Exchange\_file  
 ae1415 Simple\_list\_of\_files has file\_entries of many data\_definition\_file\_entry as Exchange\_file  
     objects  
 ae1416 Simple\_list\_of\_files is list\_method for one Data\_definition\_exchange\_body  
 ae1417 Simple\_list\_of\_files is list\_method for many Data\_definition\_exchange\_body objects

#### **4.1.125 Single\_document\_list**

ae1418 Single\_document\_list as Data\_list  
 ae1419 Single\_document\_list as Index\_list

#### **4.1.126 Size\_characteristics**

ae1420 Size\_characteristics  
 ae1421 Size\_characteristics as Size\_characteristics\_full\_size  
 ae1422 Size\_characteristics as Size\_characteristics\_internal\_divisions  
 ae1423 Size\_characteristics as Size\_characteristics\_sheet\_across\_file  
 ae1424 Size\_characteristics with byte\_size not present  
 ae1425 Size\_characteristics with byte\_size  
 ae1426 Size\_characteristics with sheet\_size not present  
 ae1427 Size\_characteristics with sheet\_size  
 ae1428 Size\_characteristics is size for one Data\_definition\_entry\_tdp\_element

## **ISO/TS 10303-332:2002(E)**

ae1429 Size\_characteristics is size for many Data\_definition\_entry\_tdp\_element objects  
ae1430 Size\_characteristics is size for one File  
ae1431 Size\_characteristics is size for many File objects

### **4.1.127 Size\_characteristics\_full\_size**

ae1432 Size\_characteristics\_full\_size  
ae1433 Size\_characteristics\_full\_size is size\_of\_sheet for one Header

ae1559 System\_destination has target\_person of zero Person

ae1560 System\_destination has target\_person of one Person

ae1561 System\_destination is destinations for one Data\_definition\_exchange\_header

ae1562 System\_destination is destinations for many Data\_definition\_exchange\_header objects

#### **4.1.142 Tabulation**

ae1563 Tabulation

ae1564 Tabulation has group\_parent\_headings of zero Group\_parent\_header

ae1565 Tabulation has group\_parent\_headings of one Group\_parent\_header

ae1566 Tabulation has group\_parent\_headings of many Group\_parent\_header objects

ae1567 Tabulation has parent\_columns of zero Group\_parent\_content\_holder

ae1568 Tabulation has parent\_columns of one Group\_parent\_content\_holder

ae1569 Tabulation has parent\_columns of many Group\_parent\_content\_holder objects

ae1570 Tabulation has tabulation\_columnar\_headings of zero Column\_header

ae1571 Tabulation has tabulation\_columnar\_headings of one Column\_header

ae1572 Tabulation has tabulation\_columnar\_headings of many Column\_header objects

ae1573 Tabulation has tabulation\_columns of one Columnar\_data\_content\_holder

ae1574 Tabulation has tabulation\_columns of many Columnar\_data\_content\_holder objects

ae1575 Tabulation has tabulation\_group\_parent\_headings of zero Group\_parent\_column\_header

ae1576 Tabulation has tabulation\_group\_parent\_headings of one Group\_parent\_column\_header

ae1577 Tabulation has tabulation\_group\_parent\_headings of many Group\_parent\_column\_header objects

ae1578 Tabulation has tabulation\_headings of zero Tabulation\_header

## **ISO/TS 10303-332:2002(E)**

ae1579 Tabulation has tabulation\_headings of one Tabulation\_header  
ae1580 Tabulation has tabulation\_headings of many Tabulation\_header objects

### **4.1.143 Tabulation\_entry**

ae1581 Tabulation\_entry  
ae1582 Tabulation\_entry with one column\_information  
ae1583 Tabulation\_entry with many column\_information elements  
ae1584 Tabulation\_entry is tabulation\_rows for one Other\_list\_body\_table  
ae1585 Tabulation\_entry is tabulation\_rows for many Other\_list\_body\_table objects

### **4.1.144 Tabulation\_header**

ae1586 Tabulation\_header  
ae1587 Tabulation\_header has single\_tabulation\_header\_titles of one Field\_title  
ae1588 Tabulation\_header has single\_tabulation\_header\_titles of many Field\_title objects  
ae1589 Tabulation\_header is tabulation\_headings for one Tabulation  
ae1590 Tabulation\_header is tabulation\_headings for many Tabulation objects

### **4.1.145 Tdp\_element**

ae1591 Tdp\_element as Associated\_list  
ae1592 Tdp\_element as Drawing  
ae1593 Tdp\_element as Product\_data\_set  
ae1594 Tdp\_element as Reference\_document  
ae1595 Tdp\_element is related\_tdp\_element for one Tdp\_element\_and\_item\_association  
ae1596 Tdp\_element is related\_tdp\_element for many Tdp\_element\_and\_item\_association

### **4.1.146 Tdp\_element\_and\_item\_association**

ae1597 Tdp\_element\_and\_item\_association  
ae1598 Tdp\_element\_and\_item\_association has related\_item of one Item  
ae1599 Tdp\_element\_and\_item\_association has related\_tdp\_element of one Tdp\_element

### **4.1.147 Tdp\_element\_list\_item**

ae1600 Tdp\_element\_list\_item  
ae1601 Tdp\_element\_list\_item with reference\_code not present  
ae1602 Tdp\_element\_list\_item with reference\_code  
ae1603 Tdp\_element\_list\_item has tdp\_element\_item of one Element\_identification  
ae1604 Tdp\_element\_list\_item is referenced\_tdp\_elements for one Parts\_list\_body  
ae1605 Tdp\_element\_list\_item is referenced\_tdp\_elements for many Parts\_list\_body objects

### **4.1.148 Tdp\_element\_parent\_to\_item\_child\_relationship**

ae1606 Tdp\_element\_parent\_to\_item\_child\_relationship  
ae1607 Tdp\_element\_parent\_to\_item\_child\_relationship has child of one Item\_identification  
ae1608 Tdp\_element\_parent\_to\_item\_child\_relationship has parent of one Element\_identification  
ae1609 Tdp\_element\_parent\_to\_item\_child\_relationship is entry for one Indentured\_data\_list\_entry

- ae1610 Tdp\_element\_parent\_to\_item\_child\_relationship is entry for many Indentured\_data\_list\_entry objects
- ae1611 Tdp\_element\_parent\_to\_item\_child\_relationship is indentured\_entry for one Data\_definition\_indentured\_entry
- ae1612 Tdp\_element\_parent\_to\_item\_child\_relationship is indentured\_entry for many Data\_definition\_indentured\_entry objects

#### **4.1.149 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship**

- ae1613 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship
- ae1614 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship has child of one Element\_identification
- ae1615 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship has parent of one Element\_identification
- ae1616 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship is entry for one Indentured\_data\_list\_entry
- ae1617 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship is entry for many Indentured\_data\_list\_entry objects
- ae1618 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship is indentured\_entry for one Data\_definition\_indentured\_entry
- ae1619 Tdp\_element\_parent\_to\_tdp\_element\_child\_relationship is indentured\_entry for many Data\_definition\_indentured\_entry objects

#### **4.1.150 Tdp\_indentured\_item**

- ae1620 Tdp\_indentured\_item
- ae1621 Tdp\_indentured\_item has tdp\_indenture of one Item\_identification
- ae1622 Tdp\_indentured\_item is entry for one Indentured\_data\_list\_entry
- ae1623 Tdp\_indentured\_item is entry for many Indentured\_data\_list\_entry objects
- ae1624 Tdp\_indentured\_item is indentured\_entry for one Data\_definition\_indentured\_entry
- ae1625 Tdp\_indentured\_item is indentured\_entry for many Data\_definition\_indentured\_entry objects
- ae1626 Tdp\_indentured\_item is tdp\_indentured for one Indentured\_list\_by\_part\_with\_document\_references\_to\_parts
- ae1627 Tdp\_indentured\_item is tdp\_indentured for many Indentured\_list\_by\_part\_with\_document\_references\_to\_parts objects
- ae1628 Tdp\_indentured\_item is tdp\_indentured\_items for one Indentured\_list\_by\_part
- ae1629 Tdp\_indentured\_item is tdp\_indentured\_items for many Indentured\_list\_by\_part objects

#### **4.1.151 Tdp\_indentured\_tdp\_element**

- ae1630 Tdp\_indentured\_tdp\_element
- ae1631 Tdp\_indentured\_tdp\_element has tdp\_indenture of one Element\_identification
- ae1632 Tdp\_indentured\_tdp\_element is entry for one Indentured\_data\_list\_entry
- ae1633 Tdp\_indentured\_tdp\_element is entry for many Indentured\_data\_list\_entry objects
- ae1634 Tdp\_indentured\_tdp\_element is indentured\_entry for one Data\_definition\_indentured\_entry
- ae1635 Tdp\_indentured\_tdp\_element is indentured\_entry for many Data\_definition\_indentured\_entry objects
- ae1636 Tdp\_indentured\_tdp\_element is tdp\_indentured for one Indentured\_list\_by\_part\_with\_document\_references\_to\_parts

## **ISO/TS 10303-332:2002(E)**

ae1637 Tdp\_indentured\_tdp\_element is tdp\_indentured for many  
    Indentured\_list\_by\_part\_with\_document\_references\_to\_parts objects  
ae1638 Tdp\_indentured\_tdp\_element is tdp\_indentured\_tdp\_elements for one  
    Indentured\_list\_by\_document  
ae1639 Tdp\_indentured\_tdp\_element is tdp\_indentured\_tdp\_elements for many  
    Indentured\_list\_by\_document objects

### **4.1.152 Time**

ae1640 Time  
ae1641 Time with hour  
ae1642 Time with minute not present  
ae1643 Time with minute  
ae1644 Time with second not present  
ae1645 Time with second  
ae1646 Time with zone  
ae1647 Time is specific\_time for one Date  
ae1648 Time is specific\_time for many Date objects

### **4.1.153 Volume**

ae1649 Volume  
ae1650 Volume has a\_value of one Number\_with\_units  
ae1651 Volume is value for one Quantity  
ae1652 Volume is value for many Quantity objects

### **4.1.154 Weight**

ae1653 Weight  
ae1654 Weight with a\_value  
ae1655 Weight with derivation\_method not present  
ae1656 Weight with derivation\_method = calculated  
ae1657 Weight with derivation\_method = estimated  
ae1658 Weight with derivation\_method = weighed  
ae1659 Weight with unit\_of\_measure  
ae1660 Weight is item\_weight for one Item  
ae1661 Weight is item\_weight for many Item objects  
ae1662 Weight is value for one Quantity  
ae1663 Weight is value for many Quantity objects

## **4.2 AIM test purposes**

Test purposes are implicitly derived from the AP AIM EXPRESS, and are not explicitly documented here. AIM test purposes are implicitly derived from the expanded EXPRESS listing contained in annex A of ISO 10303-232 as follows:

- AIM entity data types. A test purpose derived from an AIM entity data type is a simple statement of the entity data type name.

- AIM entity attributes. A test purpose derived from an AIM entity attribute is a statement of the AIM entity data type with a given attribute.

AIM test purposes shall be interpreted as given in the following statement: the postprocessor shall accept the input in accordance with the AIM EXPRESS structure corresponding to this test purpose. This implies that the semantics of the application element represented by the AIM element are preserved by the IUT between the input and output of a test according to the reference path specified in the mapping table of the AP. This also implies no violations of any constraints (local rules or global rules) that apply to the AIM element. AIM test purposes apply to the input specifications of postprocessor test cases only.

### 4.3 Implementation method test purposes

The following test purpose is derived from requirements in ISO 10303-21 and applies to preprocessors only.

other1 The IUT correctly encodes the AIM schema name in the exchange structure.

The following test purposes are derived from requirements in ISO 10303-21 and apply to postprocessors only.

other2 The IUT interprets the ISO 10303-21 header section present in the exchange structure.

other3 The IUT interprets the ISO 10303-21 SCOPE and EXPORT constructs present in the exchange structure.

other4 The IUT interprets the ISO 10303-21 user-defined entity constructs present in the exchange structure.

other5 The IUT interprets various representations of numbers present in the exchange structure in accordance with ISO 10303-21.

other6 The IUT interprets various sequences of symbols present in the exchange structure in accordance with ISO 10303-21.

### 4.4 Domain test purposes

The following test purposes are intended to test for alternative mappings for application elements that are specified in ISO 10303-232, clause 5.1 (mapping table). The test purposes apply to both preprocessors and postprocessors.

other7 Alternate\_item that is a substitute with no concern for whether the item or the substitute is used in an assembly context.

other8 Alternate\_item that is a substitute with concern for whether the item or the substitute is used in an assembly context.

other9 Alternate\_item that is an alternate with one-for-one substitution and that allows for two-way substitution in a particular assembly context.

other10 Approval with a single person signoff.

## **ISO/TS 10303-332:2002(E)**

other11 Approval with a multiple person signoff using AIM ENTITY approval\_relationship.

other12 Change\_identification with a single issue or sequence value.

other13 Change\_identification with explicit relationships between many issue or sequence values using AIM ENTITY product\_definition\_formation\_relationship.

other14 Change\_identification with revision\_level specified for an Item or a Tdp\_element.

other15 Change\_identification with revision\_level specified for a File.

other16 Company\_code with both type\_of\_code and code\_administrator not present.

other17 Company\_code with one of: more than one code or type\_of\_code or code\_administrator.

other18 Configuration with preparing\_contracts applied to a document representation.

other19 Configuration with preparing\_contracts applied to a version of an item or a version of a document.

other20 Configuration with end\_item\_system\_designation when the Configuration is for an item/part.

other21 Configuration with end\_item\_system\_designation when the Configuration is for a group of product data/document and the usage context within the configuration item is required.

other22 Configuration with end\_item\_system\_designation when the Configuration is for a group of product data/document but the usage context within the configuration item is not required.

other23 Data\_definition\_entry\_item with entry\_files that is managed through the item.

other24 Data\_definition\_entry\_item with entry\_files that is just referenced by the item.

other25 Data\_definition\_entry\_item with entry\_files that defines the shape the item.

other26 Data\_list\_entry that is an AP 232 identified drawing, externally defined drawing, AP 232 identified sheet, externally defined sheet, Other\_list, Parts\_list, Product\_data\_set, Data\_list or Reference\_document.

other27 Data\_list\_entry that is an AP 202 defined drawing.

other28 Data\_list\_entry that is an AP 202 defined sheet.

other29 Drawing that is identified within AP 232.

other30 Drawing that is identified as an AP 201 or AP 202 exchange within an AP 232 exchange.

other31 Drawing and Sheet that are identified within AP 232.

other32 Drawing that is identified within AP 232 and Sheet that is identified as an AP 201 or AP 202 exchange within an AP 232 exchange.

other33 Drawing that is defined as an AP 201 or AP202 exchange and the Sheet is identified within AP 232.

other34 Effectivity for a part when the next higher part is known.

other35 Effectivity for a part when the next higher part is not known.

other36 Foreign\_defined\_item is component\_of for an Item\_list that is an assembly where the Foreign\_defined\_item is identified on the assembly drawing but not defined there.

other37 Foreign\_defined\_item is component\_of for an Item\_list that is not an assembly and the Foreign\_defined\_item is just a member of the group of parts listed on the Item\_list for some business reason.

other38 Item with conditions\_defined\_through\_constrained\_document with multiple constraint parameters that are applied together.

other39 Item with conditions\_defined\_through\_constrained\_document with a single constraint parameter applied independently.

other40 Item\_identification with alternate\_identifications for version to version identification such as for supplied parts.

other41 Item\_identification with alternate\_identifications that is not version dependent.

other42 Item\_list for a part or assembly and does not identify the drawing or document that the part or assembly is represented on.

other43 Item\_list for a part or assembly and the Item\_list\_drawing is identified for the part or assembly.

other44 Item\_list is for an Item\_list\_drawing and no part or assembly is identified on the Item\_list\_drawing.

other45 Item\_usage is component\_of for an Item\_list that is for a part or assembly.

other46 Item\_usage is component\_of for an Item\_list that is for an Item\_list\_drawing and no part or assembly is identified on the Item\_list\_drawing.

other47 Item\_usage is interchange\_item for an Alternate\_item.

other48 List\_item\_usage in which the Item\_usage is component\_of for an Item\_list that is for a part or assembly.

other49 List\_item\_usage in which the Item\_usage is component\_of for an Item\_list\_drawing and no part or assembly is identified on the Item\_list\_drawing.

other50 Locally\_defined\_item is component\_of for an Item\_list that is an assembly where the Locally\_defined\_item is identified on the assembly drawing but not defined there. The component part is defined on another drawing.

other51 Locally\_defined\_item is component\_of for an Item\_list that is an assembly where the Locally\_defined\_item is identified and defined on the assembly drawing.

## **ISO/TS 10303-332:2002(E)**

other52 Locally\_defined\_item is component\_of for an Item\_list that is not an assembly and the Locally\_defined\_item is just a member of the group of parts listed on the Item\_list for some business reason.

other53 Product\_presentation as a general capability.

other54 Product\_presentation for use with AIC 517.

other55 Shape\_model as edge\_based\_wireframe\_shape\_representation.

other56 Shape\_model as shell\_based\_wireframe\_shape\_representation.

other57 Shape\_model as geometrically\_bounded\_2d\_wireframe\_shape\_representation.

other58 Shape\_model as geometrically\_bounded\_surface\_shape\_representation.

other59 Shape\_model as non-manifold\_surface\_shape\_representation.

other60 Shape\_model as manifold\_surface\_shape\_representation.

other61 Shape\_model as geometrically\_bounded\_wireframe\_surface\_shape\_representation.

other62 Shape\_model as advanced\_face.

other63 Shape\_model as faceted\_brep\_shape\_representation.

other64 Shape\_model as elementary\_brep\_shape\_representation.

other65 Shape\_model as advanced\_brep\_shape\_representation.

other66 Shape\_model as csg\_shape\_representation.

other67 Shape\_model as shape\_representation.

other68 Sheet that is identified within AP 232.

other69 Sheet that is defined as an AP 202 exchange within the same file.

other70 System\_declaration when system\_operating\_system, creating\_interface, and system\_related\_element\_identifier are needed.

other71 System\_declaration when system\_operating\_system, creating\_interface, and system\_related\_element\_identifier are not needed.

other72 Weight expressed in SI units.

other73 Weight not expressed in SI units.

## 5 General test purposes and verdict criteria

General test purposes are statements of requirements that apply to all abstract test cases, all preprocessor abstract test cases, or all postprocessor abstract test cases. General verdict criteria are the means for evaluating whether the general test purposes are met. General verdict criteria shall be evaluated as a part of every executable test case to which they apply. Each general verdict criterion includes a reference to its associated test purpose.

### 5.1 General test purposes

The following are the general test purposes for this part of ISO 10303:

- g1 The output of an IUT shall preserve all the semantics defined by the input model according to the reference paths specified in the mapping table defined in clause 5 of ISO 10303-232.
- g2 The output of a preprocessor shall conform to the implementation method to which the IUT claims conformance.
- g3 The instances in the output of a preprocessor shall be encoded according to the AIM EXPRESS long form and mapping table as defined in Annex A and clause 5 of ISO 10303-232.
- g4 A postprocessor shall accept input data which is encoded according to the implementation method to which the IUT claims conformance.
- g5 A postprocessor shall accept input data structured according to the AIM EXPRESS long form and the mapping table as defined in clause 5 of ISO 10303-232.

### 5.2 General verdict criteria for all abstract test cases

The following verdict criteria apply to all abstract test cases contained in this part of ISO 10303:

- gvc1 The semantics of the input model are preserved in the output of the IUT according to the reference paths specified in the mapping table defined in ISO 10303-232, clause 5 (g1).

### 5.3 General verdict criteria for preprocessor abstract test cases

The following verdict criteria apply to all preprocessor abstract test cases contained in this part of ISO 10303:

- gvc2 The output of a preprocessor conforms to the implementation method to which the IUT claims conformance (g2).
- gvc3 The instances in the output of a preprocessor are encoded according to the AIM EXPRESS long form and mapping table defined in ISO 10303-232, Annex A and 5.1 (g3).

### 5.4 General verdict criteria for postprocessor abstract test cases

The following verdict criteria apply to all postprocessor abstract test cases contained in this part of ISO 10303:

## **ISO/TS 10303-332:2002(E)**

gvc4 The postprocessor accepts input data that is encoded according to the implementation method to which the IUT claims conformance (g4).

gvc5 The postprocessor accepts input data that is structured according to the AIM EXPRESS long form and mapping table defined in ISO 10303-232, Annex A and 5.1 (g5).

## **6 Abstract test cases**

NOTE 1 Portions of this clause have been written in accordance with the Guidelines for the development of abstract test suites [1].

This clause specifies the abstract test cases for this part of ISO 10303. Each abstract test case addresses one or more test purposes from clause 4. All the test purposes addressed by the test case are referenced either explicitly, in the test purposes covered sections, or indirectly, through the verdicted rows of the preprocessor input specification table.

The abstract test cases are organized by conformance class of ISO 10303-232. The title for an abstract test case signifies the type of TDP element (document) that is being tested and, in some cases, an indication of a particular condition that is being tested within the type of document. All abstract test case names are unique within this part of ISO 10303.

Each abstract test case has a subclause for the preprocessor test information and a subclause for each postprocessor input specification and related test information. The preprocessor and postprocessor input specifications are mirror images of each other: they represent the same semantic information. The preprocessor input model is presented in the form of a table with five columns:

- The Id column contains an identifier for the application element instantiated in a particular row. The identifier may be referenced as the value of an application assertion. The identifier is the same as the test purpose associated with the application element in that row of the table.
- The V column specifies whether or not the element in that row of the table is assigned a verdict in this test case. A blank indicates it is not assigned a verdict in this test case. A '\*' indicates that it is assigned a verdict using a derived verdict criterion. The derived verdict criteria determine whether the semantics associated with the application element are preserved in the output of the IUT according to the reference paths specified in the mapping table defined in ISO 10303-332, 5.1. A number in the V column references a specific verdict criterion defined in the verdict criteria section that follows the preprocessor input specification table.

NOTE 2 Inverse test purposes of the form <application\_object\_1> is <role\_name> for <application\_object\_2> are assigned a verdict at most one time in any test case. The convention used in this ATS is to assign a verdict the first time that such an application element occurs in the test case and not to assign a verdict (i.e., leaving the V column blank) the second and subsequent times that the application element occurs.

EXAMPLE In test case 4UoF\_PL1, two instances of application object Design\_authority occur and in both of these instances the inverse application element Element\_identification to Design\_authority (design\_activities) also occurs. Only the first of these application element instances is assigned a verdict, as indicated by the '\*' in the V column.

- The Application Elements column identifies the particular application element instance that is being defined by the table. For assertions the role is specified in parenthesis.

- The Value column specifies a specific value for the application element. For application objects and attributes the value column defines the semantic value for that element's instance in the input model. A "#<number>" in the column is a reference to an entity instance name in the postprocessor input specification where the corresponding value is specified. For assertions, this column holds a link to the related application object. A "<not\_present>" indicates that the application element is not present in the input model.

NOTE 3 In some cases conditions specified in the mapping table require that more than one value be specified in the Value column. For example, in addition to the AIM element that provides the primary mapping for an application object, additional AIM elements and specific values for attributes of the AIM elements must be present in order to fully represent the application object. In such cases, additional "#<number>" values are specified in the Value column, along with any required attribute values, to refer to the entity instances in the postprocessor input specification.

NOTE 4 In the case of assertions, the mapping table may also specify constraints that take the form of additional AIM elements and values for attributes that must be present. In such cases, in addition to the link to the related application object, "#<number>" values are specified in the Value column, along with the required attribute values, to refer to the entity instances in the postprocessor input specification.

- The Req column specifies whether the value in the Value column is mandatory (M), suggested (S) or constrained (C<n>) where 'n' is an integer referencing a note that follows the table. A suggested value may be changed by a test realiser. A mandatory value may not be changed due to rules in EXPRESS, rules in the mapping table, or the requirements of the test purpose being assigned a verdict. Each constrained value references a note labelled C<number> at the end of the preprocessor input model table and may be modified according to specific constraints specified in it.

The postprocessor input specifications are defined using ISO 10303-21. The values in the postprocessor specifications are suggested unless declared mandatory or constrained by the preprocessor input table.

The abstract test case specifies all the verdict criteria that are used to assign a verdict during testing. Special verdict criteria for preprocessor and postprocessor testing are defined explicitly in each abstract test case subclause. The relevant derived verdict criteria for preprocessor and postprocessor testing are identified in the V column of the preprocessor input table.

## 6.1 1UoF\_DDE\_for\_files

The purpose of this test case is to test the UoF data\_definition\_exchange for files with the minimum of information possible. This minimal test case is constructed by selecting application element Data\_definition\_exchange and including all related, nonoptional application elements. Data\_definition\_exchange for files is constructed by selecting Simple\_list\_of\_files from the data\_definition\_exchange\_list\_method SELECT.

NOTE 1 The method of constructing a minimal test requires application object Configuration which itself has no required attributes. However, one of the optional attribute must be present. This test case has chosen optional attribute preparing\_contracts and related application object Contract.

NOTE 2 See Figure E.1 for an instance diagram of the application elements.

## 6.1.1 Preprocessor

### 6.1.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1 and other19.

### 6.1.1.2 Input specification

**Table 1 – Application elements for 1UoF\_DDE\_for\_files**

### 6.1.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### 6.1.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

c1: The value 'ABSTRACT TEST SUITE' is suggested; all other attribute values are mandatory.

## 6.1.2 Postprocessor

### 6.1.2.1 Test purpose coverage

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### **6.1.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

### **6.1.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## **6.2 2UoF\_DDE\_for\_TDP\_elements**

The purpose of this test case is to test the UoF data\_definition\_exchange for TDP elements with the minimum of information possible. This minimal test case is constructed by selecting application element Data\_definition\_exchange and including all related, nonoptional application elements. Data\_definition\_exchange for TDP elements is constructed by selecting Simple\_list\_of\_elements from the data\_definition\_exchange\_list\_method SELECT.

NOTE 1 The method of constructing a minimal test requires application object Configuration which itself has no required attributes. However, one of the optional attribute must be present. This test case has chosen optional attribute distribution\_authorizations and related application object Distribution\_notice.

NOTE 2 See Figure E.2 for an instance diagram of the application elements.

### **6.2.1 Preprocessor**

#### **6.2.1.1 Test purposes covered**

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1 and other16.

### 6.2.1.2 Input specification

**Table 2 – Application elements for 2UoF\_DDE\_for\_TDP\_elements**

<b>Id</b>	<b>V</b>	<b>Application Elements</b>	<b>Value</b>	<b>Req</b>

### 6.2.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### 6.2.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

c1: The value 'directory/sub\_directory' is suggested; all other attribute values are mandatory.

c2: The value 'file://www.DotCom.com' is suggested; all other attribute values are mandatory.

c3: The value 'ABSTRACT TEST SUITE' is suggested; all other attribute values are mandatory.

## 6.2.2 Postprocessor

### 6.2.2.1 Test purpose coverage

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### 6.2.2.2 Input specification

The postprocessor input specification is provided in electronic form only. See annex C.

### 6.2.2.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## 6.3 4UoF\_PL1

The purpose of this test case is to create a minimal parts list that identifies the parts list document and the part that is the subject of the document using application objects Parts\_list and Tdp\_element\_and\_item\_association and their related, nonoptional application elements. The part has no component parts in its list, so the Parts List serves only to identify the configuration of the part.

NOTE 1 The method of constructing a minimal test requires application object Configuration which itself has no required attributes. However, one of the optional attribute must be present. This test case has chosen optional attribute release\_authorizations and related application object Release\_authentication.

NOTE 2 This test case is a combination of the PDM Implementor Forum [3] Test Cases **pid1**, Minimum Part Master Identification, and **did2**, Document Master Identification in the AP232 UoF Parts List.

NOTE 3 See Figures E.3 and E.4 for instance diagrams of the application elements.

### 6.3.1 Preprocessor

#### 6.3.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other14, and other42.

#### 6.3.1.2 Input specification

### 6.3.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### 6.3.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

C1: The value 'A' is suggested; all other attribute values are mandatory.

## 6.3.2 Postprocessor

Test purpose coverage

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### 6.3.2.1 Input specification

The postprocessor input specification is provided in electronic form only. See annex C.

### 6.3.2.2 Verdict criteria

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## 6.4 4UoF\_PL2

The purpose of this test case is to create a simple parts list consisting of an assembly part with a single component part.

NOTE 1 This test case is an adaptation of the PDM Implementor Form [3] Test Case *ps1*, Basic Assembly Part Structure, to the AP232 UoF Parts List.

NOTE 2 See Figures E.5 and E.6 for instance diagrams of the application elements.

### 6.4.1 Preprocessor

#### 6.4.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other14, and other42.

#### 6.4.1.2 Input specification

**Table 4 – Application elements for 4UoF\_PL2**

#### 6.4.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply:

vc1: One of person.last\_name or person.first\_name must be present, but both attributes do not have to be present at the same time.

#### 6.4.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

c1: The value 'A' is suggested; all other attribute values are mandatory.

c2: The value 'unlimited' is suggested; all other attribute values are mandatory.

## 6.4.2 Postprocessor

### 6.4.2.1 Test purpose coverage

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### 6.4.2.2 Input specification

The postprocessor input specification is provided in electronic form only. See annex C.

### 6.4.2.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## 6.5 4SMPL\_initial

The purpose of this test case is to create the type of Parts List called a Supplier Module Parts List (SMPL) with representation of each type of object that can occur in the SMPL. Application object Parts\_list\_body has three instances of Item\_list in its parts\_tabulations attribute. Two of these instances represent design and manufacturing life cycle stage views, respectively, of the parts tabulation. These two instances select the subject Item of the parts list in the list\_for attribute, satisfying domain test purpose other42. The third instance of Item\_list is a tabulation of parts contained on a drawing identified as the Item\_list\_drawing in the list\_for attribute, providing a test for domain test purpose other43.

NOTE See Figures E.7 through E.14 for instance diagrams of the application elements.

## 6.5.1 Preprocessor

### 6.5.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

## ISO/TS 10303-332:2002(E)

The following other test purposes are covered: other1, other9, other14, other21, other34, other42, other43, other45, and other48.

### 6.5.1.2 Input specification

### 6.5.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply:

vc1: The instances of descriptive\_representation\_item that correspond to @1032.3 through @1032.11 are all referenced by the items attribute of the same instance of representation.

vc2: The instances of descriptive\_representation\_item that correspond to @1032.12 through @1032.14 are all referenced by the items attribute of the same instance of representation.

vc3: The instance of descriptive\_representation\_item that corresponds to @1032.<n> is referenced by the items attribute of a unique instance of representation.

### 6.5.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

c1: The value '1' is suggested; all other attribute values are mandatory.

c2: The value 'A' is suggested; all other attribute values are mandatory.

## **ISO/TS 10303-332:2002(E)**

- c3: The value 'B'; is suggested; all other attribute values are mandatory.
- c4: The value 'Work Group.Group Code'; is suggested; all other attribute values are mandatory.
- c5: The value 'STANDARD NOTES'; is suggested; all other attribute values are mandatory.
- c6: The value 'PROPRIETARY'; is suggested; all other attribute values are mandatory.

### **6.5.2 Postprocessor**

#### **6.5.2.1 Test purpose coverage**

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

#### **6.5.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

#### **6.5.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## **6.6 4SMPL\_revised**

The purpose of this test case is to create the type of Parts List called a Supplier Module Parts List (SMPL) with representation of two or more of each type of object that can occur in the SMPL. The SMPL in this test case is a revision of the SMPL from test case 4SMPL\_initial. This test case includes net change information (test purpose ae916) relative to the earlier test case. In addition, this test case creates instances of Notation applied to both design view and manufacturing view of Item\_list and related List\_item\_usage. The view perspective does not occur explicitly in the ARM of AP232; this information occurs only in the exchange structure provided for the postprocessor test.

NOTE See Figures E.15 through E.26 and E.7 for instance diagrams of the application elements.

## 6.6.1 Preprocessor

### 6.6.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other8, other9, other14, other21, other34, other41, other43, other45, other47, and other48.

### 6.6.1.2 Input specification

### 6.6.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply:

vc1: The instances of descriptive\_representation\_item that correspond to @1032.3 through @1032.11 are all referenced by the items attribute of the same instance of representation.

vc2: The instances of descriptive\_representation\_item that correspond to @1032.12 through @1032.14 are all referenced by the items attribute of the same instance of representation.

vc3: The instances of descriptive\_representation\_item that correspond to @1032.25 and @1032.26 are both referenced by the items attribute of the same instance of representation.

## **ISO/TS 10303-332:2002(E)**

vc4: The instance of descriptive\_representation\_item that corresponds to @1032.n is referenced by the items attribute of a unique instance of representation.

### **6.6.1.4 Constraints on values**

The following constraints apply as referenced in the input specification table:

- c1: The value '1' is suggested; all other attribute values are mandatory.
- c2: The value 'B'; is suggested; all other attribute values are mandatory.
- c3: The value 'B'; is suggested; all other attribute values are mandatory.
- c4: The value 'Work Group.Group Code'; is suggested; all other attribute values are mandatory.
- c5: The value 'STANDARD NOTES'; is suggested; all other attribute values are mandatory.
- c6: The value 'PROPRIETARY'; is suggested; all other attribute values are mandatory.

### **6.6.1.5 Execution sequence**

Test cases 4SMPL\_initial and 6SCML\_initial must be completed before this test case can be performed.

## **6.6.2 Postprocessor**

### **6.6.2.1 Test purpose coverage**

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### **6.6.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

### **6.6.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

### 6.6.2.4 Execution sequence

Test cases 4SMPL\_initial and 6SCML\_initial must be completed before this test case can be performed.

## 6.7 4SMPL\_em

The purpose of this test case is to create the type of Parts List called a Supplier Module Parts List (SMPL) for an Exception Module. The main characteristics of the test case are the absence of design revision identification and the presentation of life\_cycle\_stage 'manufacturing' data only.

NOTE See Figures E.27 through E.30 and E.7 for instance diagrams of the application elements.

### 6.7.1 Preprocessor

#### 6.7.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other21, other34, other43, and other48.

#### 6.7.1.2 Input specification

### 6.7.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply:

vc1: The instances of descriptive\_representation\_item that correspond to @1032.2 through @1032.8 are all referenced by the items attribute of the same instance of representation.

vc2: The instance of descriptive\_representation\_item that corresponds to @1032.9 is referenced by the items attribute of a unique instance of representation.

### 6.7.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

c1: The value '1' is suggested; all other attribute values are mandatory.

c2: The value 'B'; is suggested; all other attribute values are mandatory.

c3: The value 'Work Group.Group Code'; is suggested; all other attribute values are mandatory.

c4: The value 'STANDARD NOTES'; is suggested; all other attribute values are mandatory.

c5: The value 'PROPRIETARY'; is suggested; all other attribute values are mandatory.

## 6.7.2 Postprocessor

### 6.7.2.1 Test purpose coverage

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### 6.7.2.2 Input specification

The postprocessor input specification is provided in electronic form only. See annex C.

### 6.7.2.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## 6.8 4SMPL\_instl\_rqmts

The purpose of this test case is to create the Installation Requirements section of the type of Parts List called a Supplier Module Parts List. This Supplier Module Parts List has two kinds of Item\_list instances, as identified by attribute type\_of\_component\_list. The Installation Requirements section is identified by type\_of\_component\_list = "module installation requirements". The second kind of Item\_list instance is identified by type\_of\_component\_list = "module components list".

NOTE See Figures E.31 through E.38 and E.7 for instance diagrams of the application elements.

## 6.8.1 Preprocessor

### 6.8.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other14, other21, other34, other42, other44, other45, and other48.

### 6.8.1.2 Input specification

### 6.8.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply:

vc1: The instances of descriptive\_representation\_item that correspond to @1032.2 through @1032.10 are all referenced by the items attribute of the same instance of representation, identified as instance #41 in the exchange structure.

vc2: The instances of descriptive\_representation\_item that correspond to @1032.2 through @1032.5, @1032.8 through @1032.10, and @1032.19 through @1032.20 are all referenced by the items attribute of the same instance of representation, identified as instance #46 in the exchange structure.

vc3: The instances of descriptive\_representation\_item that correspond to @1032.11 through @1032.13 are all referenced by the items attribute of the same instance of representation.

vc4: The instances of descriptive\_representation\_item that correspond to @1032.14 and @1032.15 are all referenced by the items attribute of the same instance of representation.

vc5: The instance of descriptive\_representation\_item that corresponds to @1032.<n> is referenced by the items attribute of a unique instance of representation.

#### **6.8.1.4 Constraints on values**

The following constraints apply as referenced in the input specification table:

c1: The value '1' is suggested; all other attribute values are mandatory.

c2: The value 'A' is suggested; all other attribute values are mandatory.

c3: The value 'B' is suggested; all other attribute values are mandatory.

c4: The value 'Work Group.Group Code' is suggested; all other attribute values are mandatory.

c5: The value 'STANDARD NOTES' is suggested; all other attribute values are mandatory.

c6: The value 'PROPRIETARY' is suggested; all other attribute values are mandatory.

#### **6.8.2 Postprocessor**

##### **6.8.2.1 Test purpose coverage**

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

##### **6.8.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

### 6.8.2.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## 6.9 4SMPL\_developmental

The purpose of this test case is to create the type of Parts List called a Supplier Module Parts List (SMPL) with the Module at Developmental Phase, which means that the second instance of the Change\_identification object makes use of optional attribute issue\_level.

NOTE See Figures E.39 through E.43 and E.7 for instance diagrams of the application elements.

### 6.9.1 Preprocessor

#### 6.9.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other8, other12, other21, other34, other43, other47, and other48.

#### 6.9.1.2 Input specification

### 6.9.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### 6.9.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

- c1: The value '1' is suggested; all other attribute values are mandatory.
- c2: The value 'A' is suggested; all other attribute values are mandatory.
- c3: The value 'B' is suggested; all other attribute values are mandatory.
- c4: The value 'Work Group.Group Code' is suggested; all other attribute values are mandatory.
- c5: The value 'STANDARD NOTES' is suggested; all other attribute values are mandatory.
- c6: The value 'PROPRIETARY' is suggested; all other attribute values are mandatory.

## 6.9.2 Postprocessor

### 6.9.2.1 Test purpose coverage

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### 6.9.2.2 Input specification

The postprocessor input specification is provided in electronic form only. See annex C.

### 6.9.2.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## 6.10 6UoF\_IDL1

The purpose of this test case is to test the UoF indentured\_data\_list with the minimum of information as determined by application element Indentured\_data\_list and its related, nonoptional application elements. The type of indentured data list is indentured list by document, as specified by attribute method\_of\_entry\_tabulation of object Indentured\_data\_list\_tabulation. The Indentured\_data\_list\_-entry instance, through its attribute entry, relates to the same instance of Tdp\_indentured\_tdp\_element that identifies the top level document for the indentured data list. This construction causes the indentured data list to have an empty list.

NOTE 1 The method of constructing a minimal test requires application object Configuration which itself has no required attributes. However, one of the optional attribute must be present. This test case has chosen optional attribute release\_authorizations and related application object Release\_authentication.

NOTE 2 See Figure E.44 for an instance diagram of the application elements.

### 6.10.1 Preprocessor

#### 6.10.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1 and other14.

### **6.10.1.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### **6.10.1.4 Constraints on values**

The following constraints apply as referenced in the input specification table:

C1: The value 'A' is suggested; all other attribute values are mandatory.

## **6.10.2 Postprocessor**

### **6.10.2.1 Test purpose coverage**

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### **6.10.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

### **6.10.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

## **6.11 6UoF\_IDL2**

The purpose of this test case is to test the UoF indentured\_data\_list with the minimum of information as determined by application element Indentured\_data\_list and its related, nonoptional application elements. The type of indentured data list is indentured list by document, as specified by attribute method\_of\_entry\_tabulation of object Indentured\_data\_list\_tabulation.

NOTE 1 The method of constructing a minimal test requires application object Configuration which itself has no required attributes. However, one of the optional attributes must be present. This test case has chosen optional attribute release\_authorizations and related application object Release\_authentication.

## **ISO/TS 10303-332:2002(E)**

NOTE 2 See Figures E.45 and E.46 for instance diagrams of the application elements.

### **6.11.1 Preprocessor**

#### **6.11.1.1 Test purposes covered**

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1 and other14.

#### **6.11.1.2 Input specification**

### 6.11.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### **6.11.1.4 Constraints on values**

The following constraints apply as referenced in the input specification table:

c1: The value 'A'; is suggested; all other attribute values are mandatory.

### **6.11.2 Postprocessor**

#### **6.11.2.1 Test purpose coverage**

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

#### **6.11.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

#### **6.11.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

### **6.12 6SCML\_initial**

The purpose of this test case is to create an Indentured Data List of the type known as a Supplier Custom Module List (SCML) with at least one instance of each kind of information object that can comprise a SCML and that serves as a reference for additional SCMLs that will show net change information. The type of Indentured Data List is indentured list by item.

NOTE See Figures E.47 through E.51 for instance diagrams of the application elements.

### **6.12.1 Preprocessor**

#### **6.12.1.1 Test purposes covered**

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other10, other14, other21, and other34.

### 6.12.1.2 Input specification

### 6.12.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### 6.12.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

- c1: The value 'A'; is suggested; all other attribute values are mandatory.
- c2: The value '1'; is suggested; all other attribute values are mandatory.
- c3: The value 'B'; is suggested; all other attribute values are mandatory.
- c4: The value '1'; is suggested; all other attribute values are mandatory.
- c5: The value '2'; is suggested; all other attribute values are mandatory.
- c6: The value 'STANDARD NOTES'; is suggested; all other attribute values are mandatory.
- c7: The value 'PROPRIETARY'; is suggested; all other attribute values are mandatory.

### **6.12.1.5 Execution sequence**

Test cases 4SMPL\_initial, 4SMPL\_em, 4SMPL\_instl\_rqmts, and 4SMPL\_developmental must be completed before this test case can be performed.

### **6.12.2 Postprocessor**

#### **6.12.2.1 Test purpose coverage**

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

#### **6.12.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

#### **6.12.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

#### **6.12.2.4 Execution sequence**

Test cases 4SMPL\_initial, 4SMPL\_em, 4SMPL\_instl\_rqmts, and 4SMPL\_developmental must be completed before this test case can be performed.

### **6.13 6SCML\_revised**

The purpose of this test case is to create an Indentured Data List of the type known as a Supplier Custom Module List (SCML) with at least two instances of each kind of information object that can comprise a SCML. In addition this SCML is at Revision B and shows net change information, in the form of Retrofit\_usage objects related to Indentured\_data\_list\_entry objects. The net change in this test case is relative to test case 6SCML\_initial. The type of Indentured Data List is indentured list by item.

NOTE See Figures E.52 through E.57 and E.51 for instance diagrams of the application elements.

## 6.13.1 Preprocessor

### 6.13.1.1 Test purposes covered

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other10, other14, other21, and other34.

### 6.13.1.2 Input specification

### 6.13.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### 6.13.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

- c1: The value 'B' is suggested; all other attribute values are mandatory.
- c2: The value '1' is suggested; all other attribute values are mandatory.
- c3: The value 'A' is suggested; all other attribute values are mandatory.
- c4: The value '1' is suggested; all other attribute values are mandatory.
- c5: The value 'STANDARD NOTES' is suggested; all other attribute values are mandatory.
- c6: The value 'PROPRIETARY' is suggested; all other attribute values are mandatory.

### 6.13.1.5 Execution sequence

Test cases 6SCML\_initial and 4SMPL\_revised must be completed before this test case can be performed.

## 6.13.2 Postprocessor

### 6.13.2.1 Test purpose coverage

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

## **ISO/TS 10303-332:2002(E)**

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

### **6.13.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

### **6.13.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

### **6.13.2.4 Execution sequence**

Test cases 6SCML\_initial and 4SMPL\_revised must be completed before this test case can be performed.

## **6.14 6SCML\_removeSCP**

The purpose of this test case is to create an Indentured Data List of the type known as a Supplier Custom Module List (SCML) that carries net change information indicating the deletion of all indentured items that occurred in the IDL of test case 6SCML\_revised. The type of Indentured Data List is indentured list by item.

NOTE See Figures E.58, E.59, and E.51 for instance diagrams of the application elements.

### **6.14.1 Preprocessor**

#### **6.14.1.1 Test purposes covered**

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any), whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

The following general test purposes are covered: g1, g2, and g3.

The following other test purposes are covered: other1, other14, and other22.

#### **6.14.1.2 Input specification**

### 6.14.1.3 Verdict criteria

The following general verdict criteria apply: gvc1, gvc2, and gvc3.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following preprocessor-specific verdict criteria apply: none apply.

### 6.14.1.4 Constraints on values

The following constraints apply as referenced in the input specification table:

- c1: The value 'C' is suggested; all other attribute values are mandatory.
- c2: The value 'B' is suggested; all other attribute values are mandatory.

c3: The value 'STANDARD NOTES' is suggested; all other attribute values are mandatory.

c4: The value 'PROPRIETARY' is suggested; all other attribute values are mandatory.

### **6.14.1.5 Execution sequence**

Test case 6SCML\_revised must be completed before this test case can be performed.

### **6.14.2 Postprocessor**

#### **6.14.2.1 Test purpose coverage**

The following general test purposes are covered: g1, g4, and g5.

The following other test purposes are covered: other2, other5, and other6.

In the preprocessor input specification table of this test case, the numbers in the Id column (ignoring the part beyond the decimal point, if any) whose rows are not empty in the V column identify the AE test purposes that are covered by this test case.

#### **6.14.2.2 Input specification**

The postprocessor input specification is provided in electronic form only. See annex C.

#### **6.14.2.3 Verdict criteria**

The following general verdict criteria apply: gvc1, gvc4, and gvc5.

The verdict criteria derivable from the application elements with non-blank entries in the V column of the preprocessor input specification table apply.

The following specific verdict criteria apply: none apply.

#### **6.14.2.4 Execution sequence**

Test case 6SCML\_revised must be completed before this test case can be performed.

## Annex A (normative)

### **Conformance classes**

#### **A.1 Conformance class 1**

To conform to conformance class 1 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

- **1UoF\_DDE\_for\_files**

NOTE Additional test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

#### **A.2 Conformance class 2**

To conform to conformance class 2 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

- **2UoF\_DDE\_for\_TDP\_elements**

NOTE Additional test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

#### **A.3 Conformance class 3**

To conform to conformance class 3 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

#### **A.4 Conformance class 4**

To conform to conformance class 4 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

- **4UoF\_PL1**
- **4UoF\_PL2**
- **4SMPL\_initial**
- **4SMPL\_revised**
- **4SMPL\_em**
- **4SMPL\_instl\_rqmts**
- **4SMPL\_developmental**

## A.5 Conformance class 5

To conform to conformance class 5 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

## A.6 Conformance class 6

To conform to conformance class 6 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

- **6UoF\_IDL1**
- **6UoF\_IDL2**
- **6SCML\_initial**
- **6SCML\_revised**
- **6SCML\_removeSCP**

## A.7 Conformance class 7

To conform to conformance class 7 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

## A.8 Conformance class 8

To conform to conformance class 8 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

## A.9 Conformance class 9

To conform to conformance class 9 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

## A.10 Conformance class 10

To conform to conformance class 10 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

### **A.11 Conformance class 11**

To conform to conformance class 11 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

### **A.12 Conformance class 12**

To conform to conformance class 12 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

### **A.13 Conformance class 13**

To conform to conformance class 13 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

### **A.14 Conformance class 14**

To conform to conformance class 14 of ISO 10303-232, an implementation shall pass executable versions of the following abstract test cases:

NOTE Test cases for this conformance class will be added in Edition 2 of ISO/TS 10303-332.

**Annex B**  
**(normative)**

**Information object registration**

To provide for unambiguous identification of an information object system, the object identifier

{ iso standard 10303 part(332) version(1) }

is assigned to this part of ISO 10303. The meaning of this value is defined in ISO/IEC 8824-1 and is described in ISO 10303-1.

**Annex C**  
(normative)

**Computer interpretable postprocessor input specification**

This annex references a listing of the postprocessor input specifications for this part of ISO 10303 without comments or other explanatory text. These specifications are documented using ISO 10303-21. These specifications are available in computer-interpretable form and are provided as attachments to this Technical Specification, and at the following URL:

<http://www.mel.nist.gov/step/parts/part332/ts/>

The postprocessor input specifications for each test case is supplied electronically via the Internet. Table C.1 lists the file name of the postprocessor input specification that is associated with the postprocessor subclause(s) of a test case.

**Table C. 1 Postprocessor input specification file names**

<b>Subclause</b>	<b>Test case</b>	<b>File name</b>
6.1	1UoF_DDE_for_files	1UoF_DDE.stp
6.2	2UoF_DDE_for_TDP_elements	2UoF_DDE.stp
6.3	4UoF_PL1	4UoF_PL1.stp
6.4	4UoF_PL2	4UoF_PL2.stp
6.5	4SMPL_initial	4SMPL_initial.stp
6.6	4SMPL_revised	4SMPL_revised.stp

6.10	6UoF_IDL1	6UoF_IDL1.stp
6.11	6UoF_IDL2	6UoF_IDL2.stp
6.12	6SCML_initial	6SCML_initial.stp
6.13	6SCML_revised	6SCML_revised.stp
6.14	6SCML_removeSCP	6SCML_removeSCP.stp

**Annex D**  
**(informative)**

**Excluded test purposes**

Test purposes for the absence of an attribute or relationship, i.e., test purposes for which the entry in the Value column is <not\_present>, are included one time only in any test case. That is, tests for the absence of an application element are not repeated within a test case that includes multiple instances of an application object.

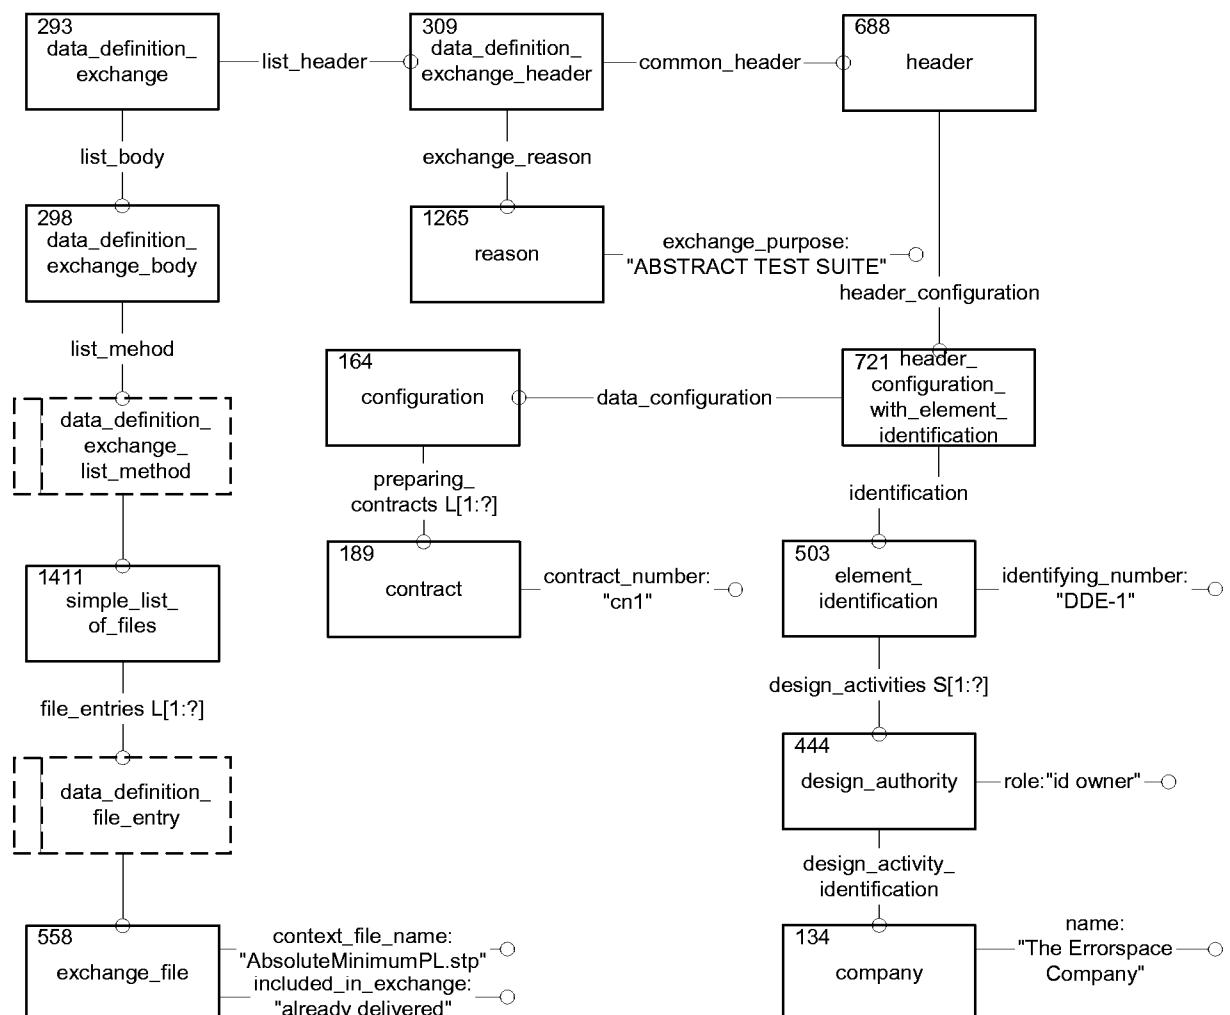

## Annex E (informative)

### Instance diagrams

NOTE In some of the figures in this annex, rectangles that depict instances of application objects are shaded. The shading indicates that the rectangle represents a repetition of an instance that appeared in a preceding figure for the same test case.

## E.12 6SCML\_initial

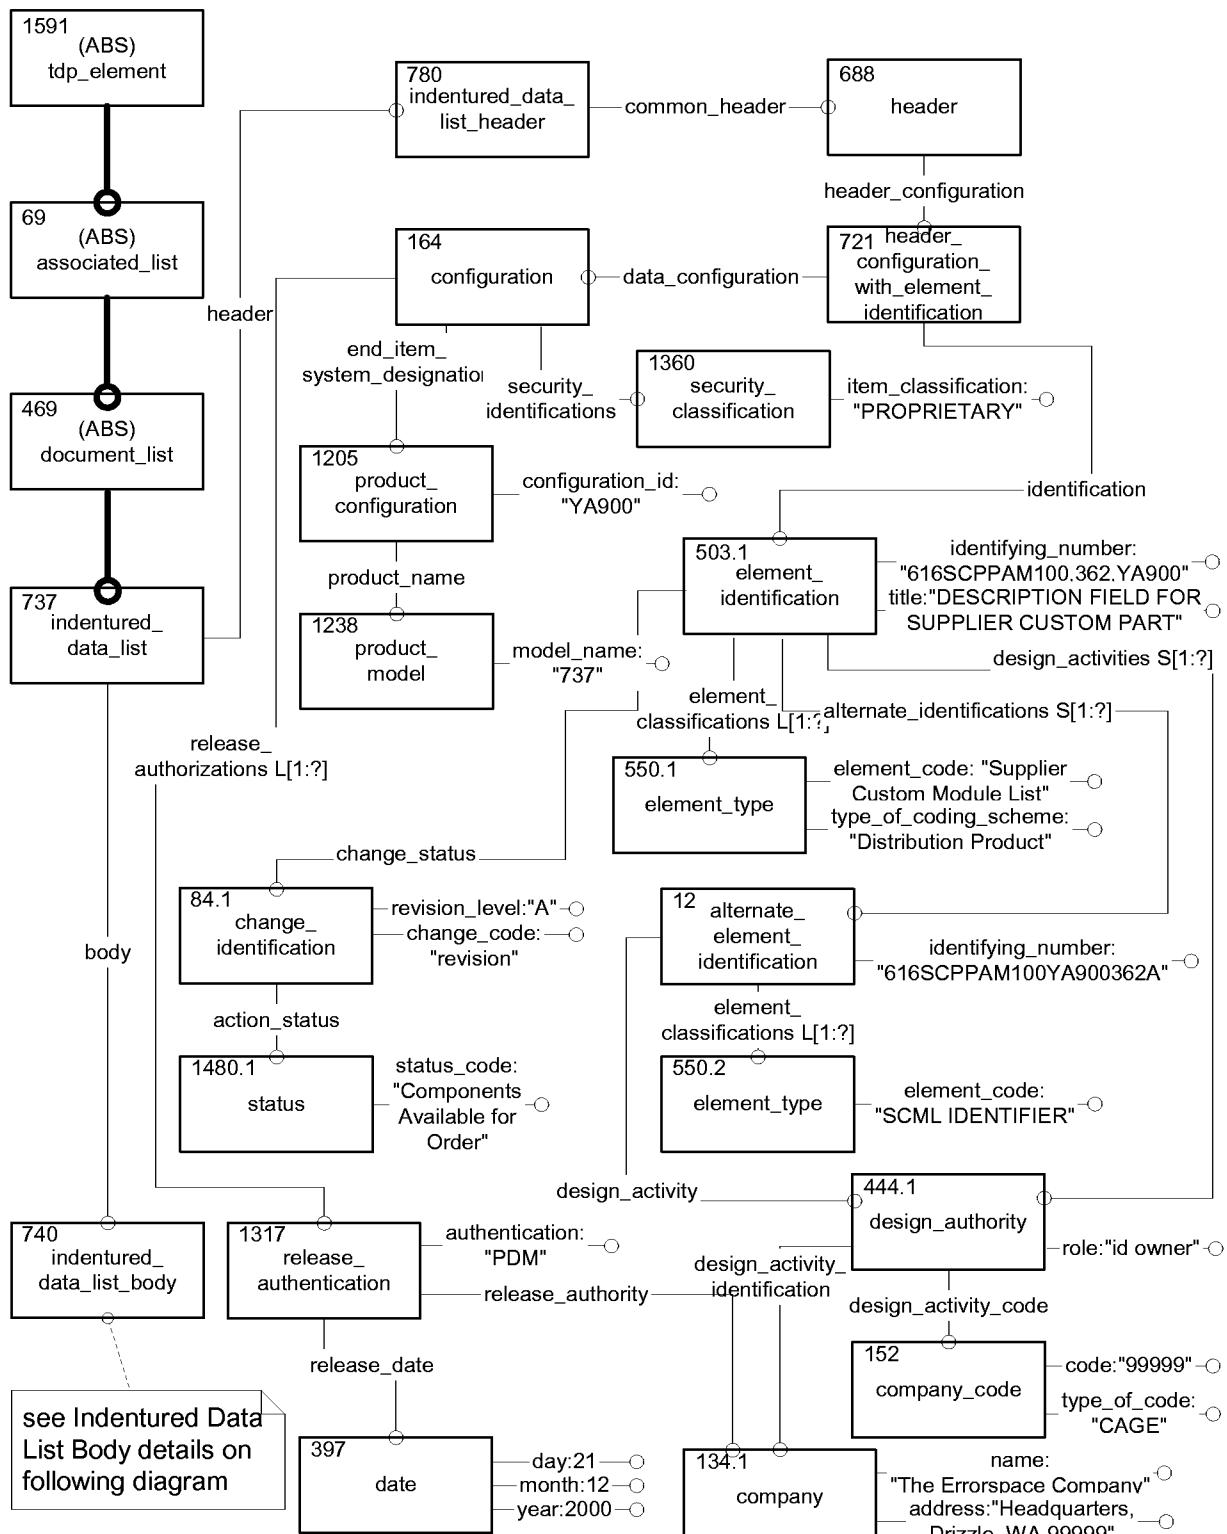

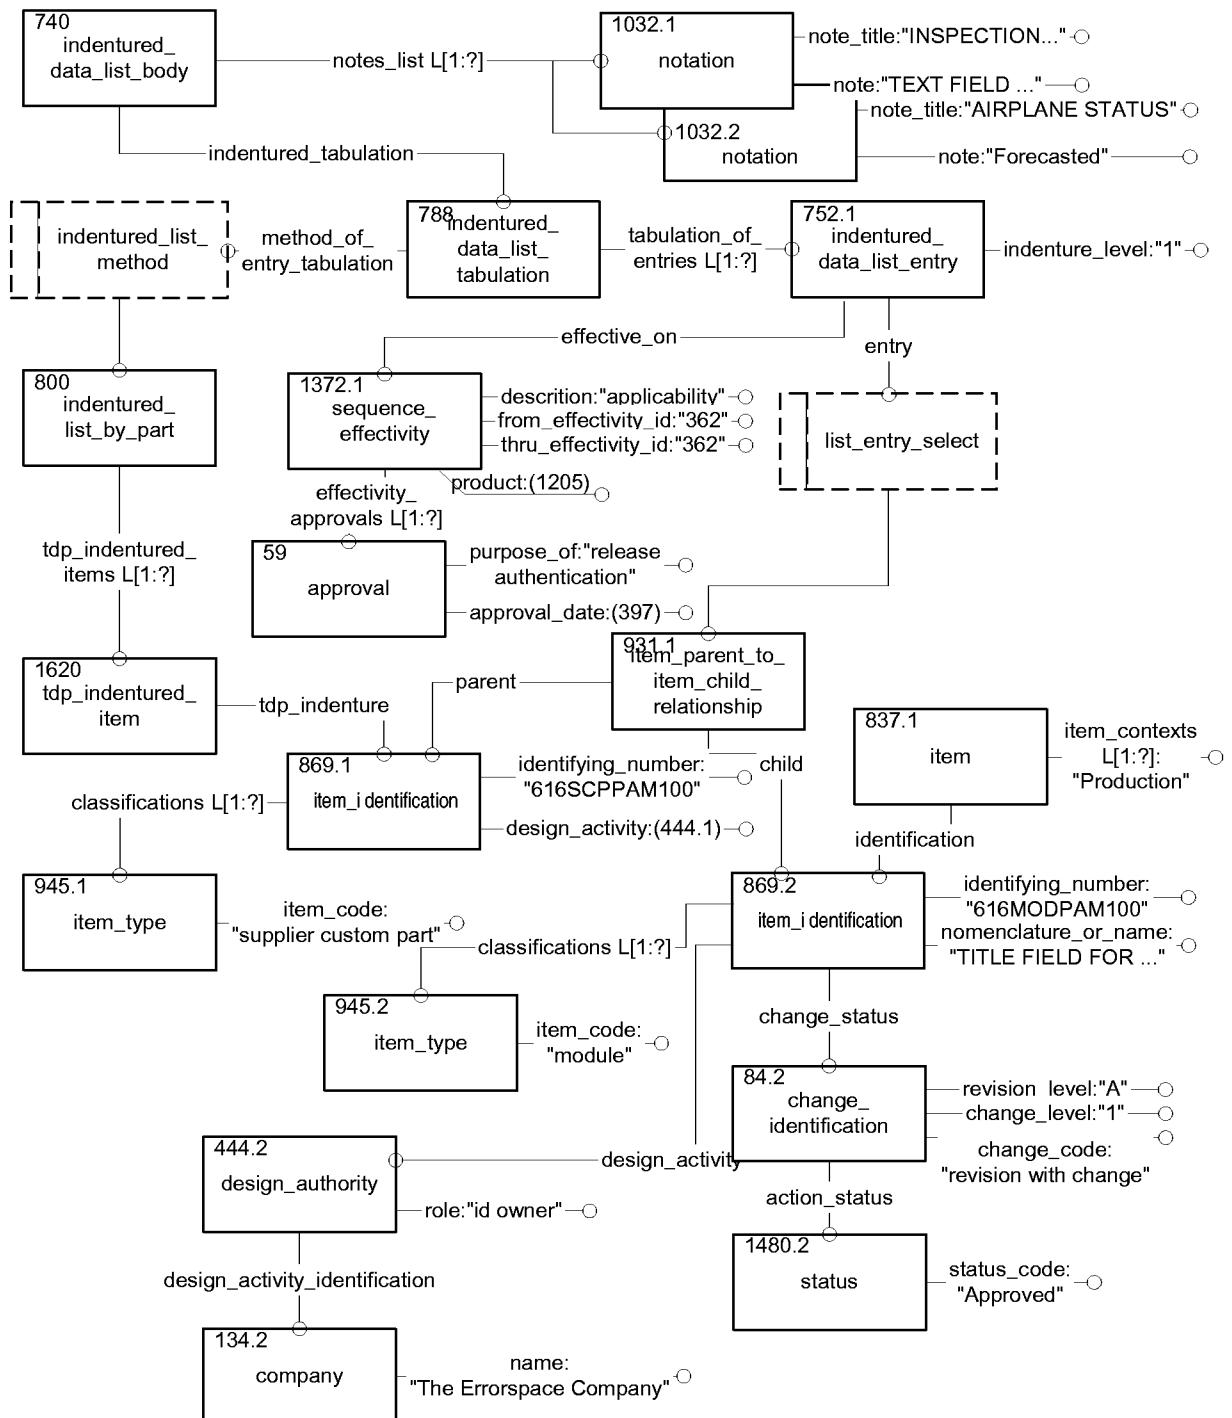

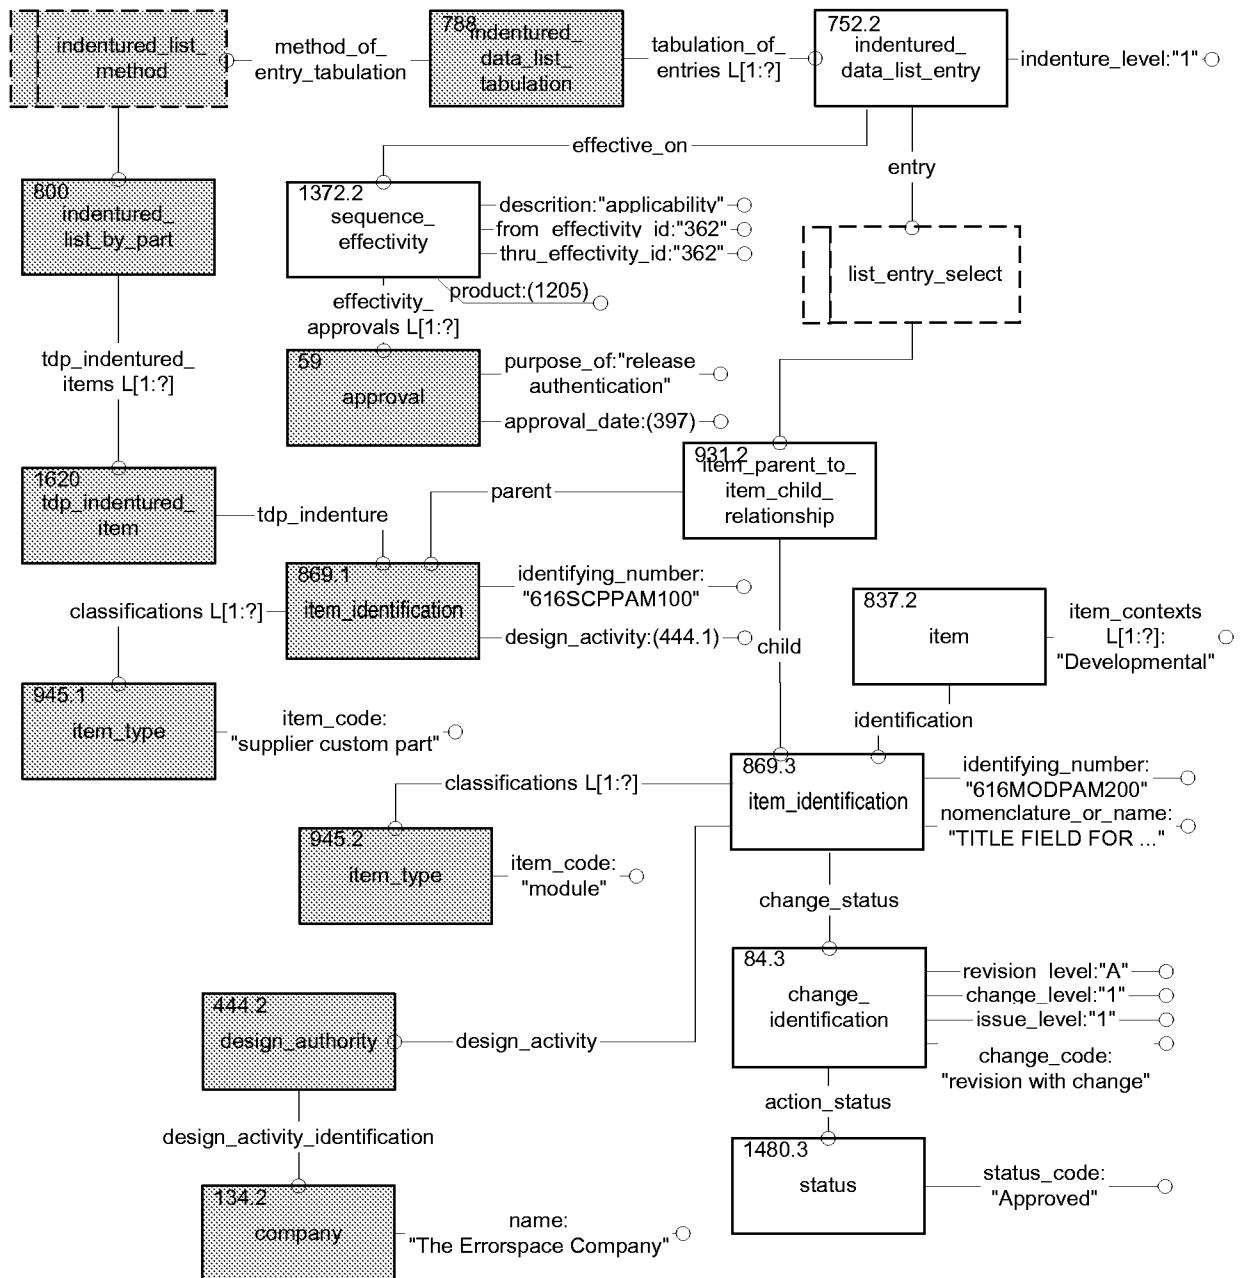

Figure E. 47 – Instance diagram 47 of 59

**Test Case 6SCML\_initial:  
Body Section with component 1**

**Figure E. 48 – Instance diagram 48 of 59**

Test Case 6SCML\_initial: Components 2 and 3

Component 3 consists of: 752.3, 837.3 (with item\_contexts = "Production"), 931.3, 1372.3, 869.4 (with identifying\_number = "616MODPAM900") and 84.2

Figure E. 49 – Instance diagram 49 of 59

## Test Case 6SCML\_initial: Component 4

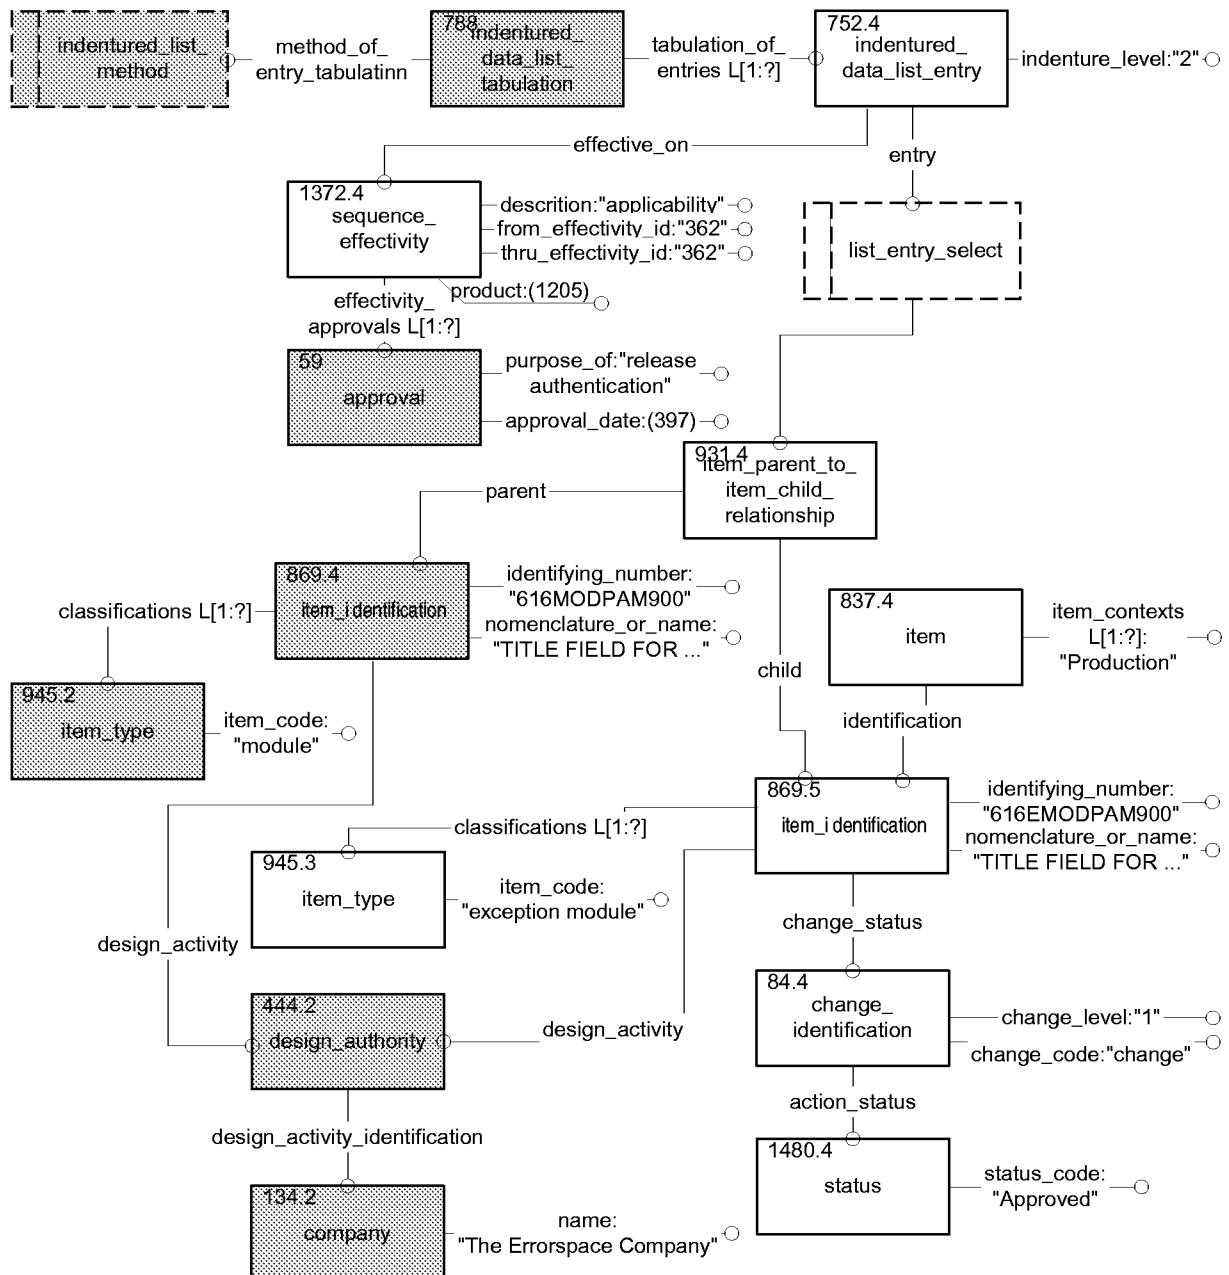

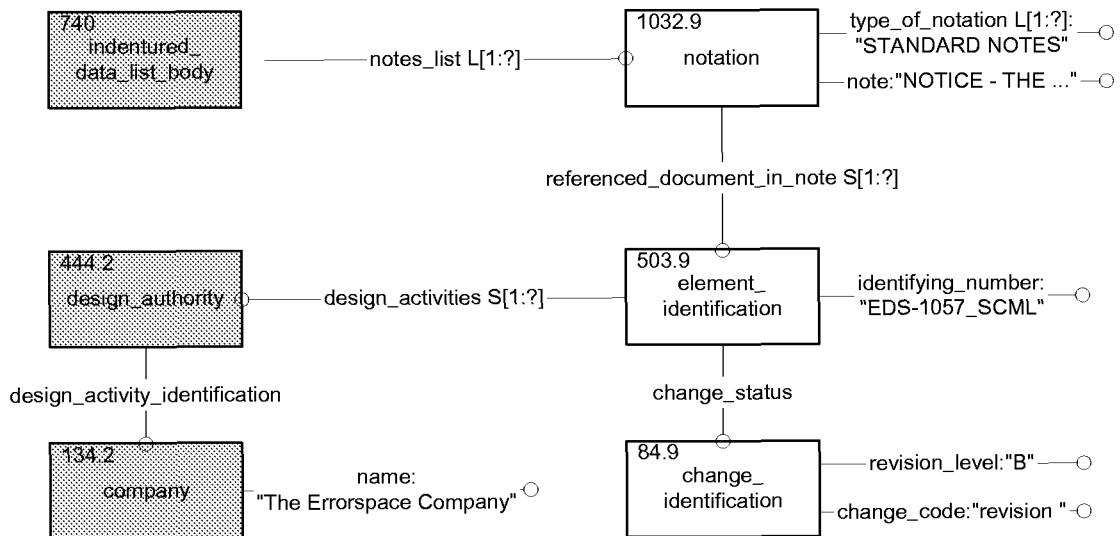

Figure E. 50 – Instance diagram 50 of 59

**Test Case 6SCML\_<all>:  
Standard Notes**

**Figure E. 51 – Instance diagram 51 of 59**

### E.13 6SCML\_revised

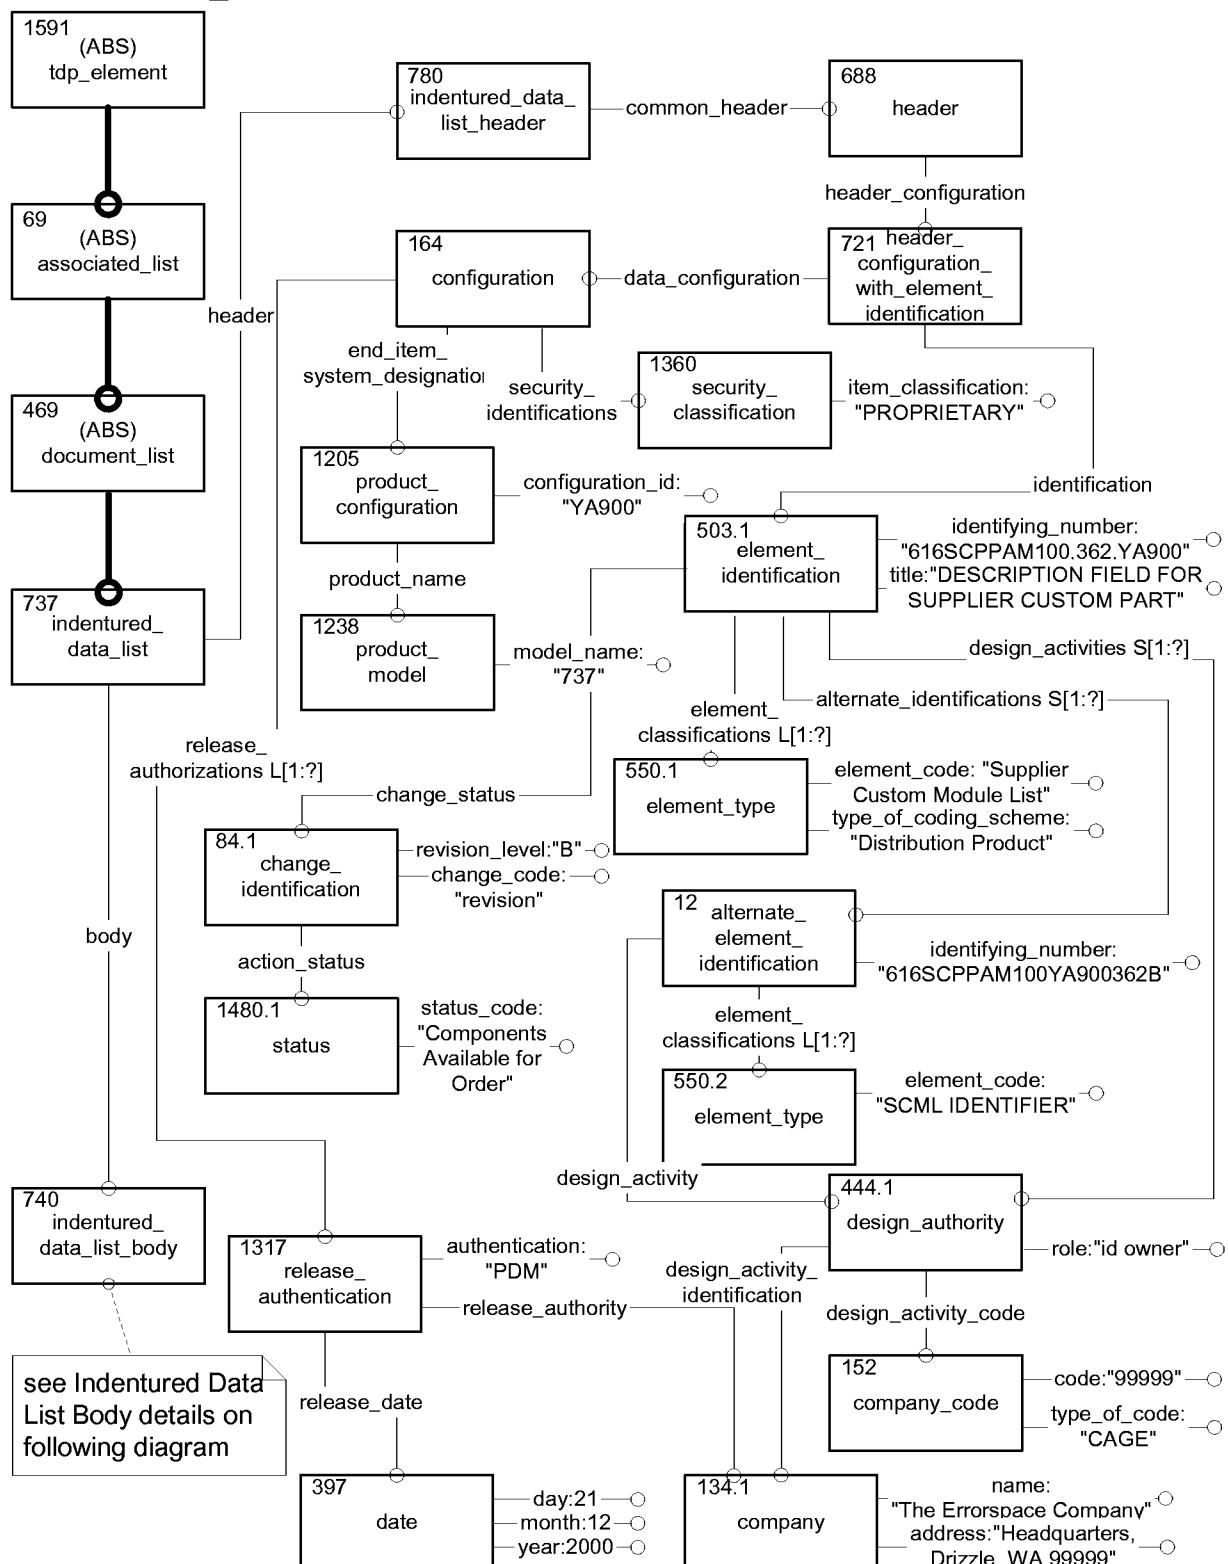

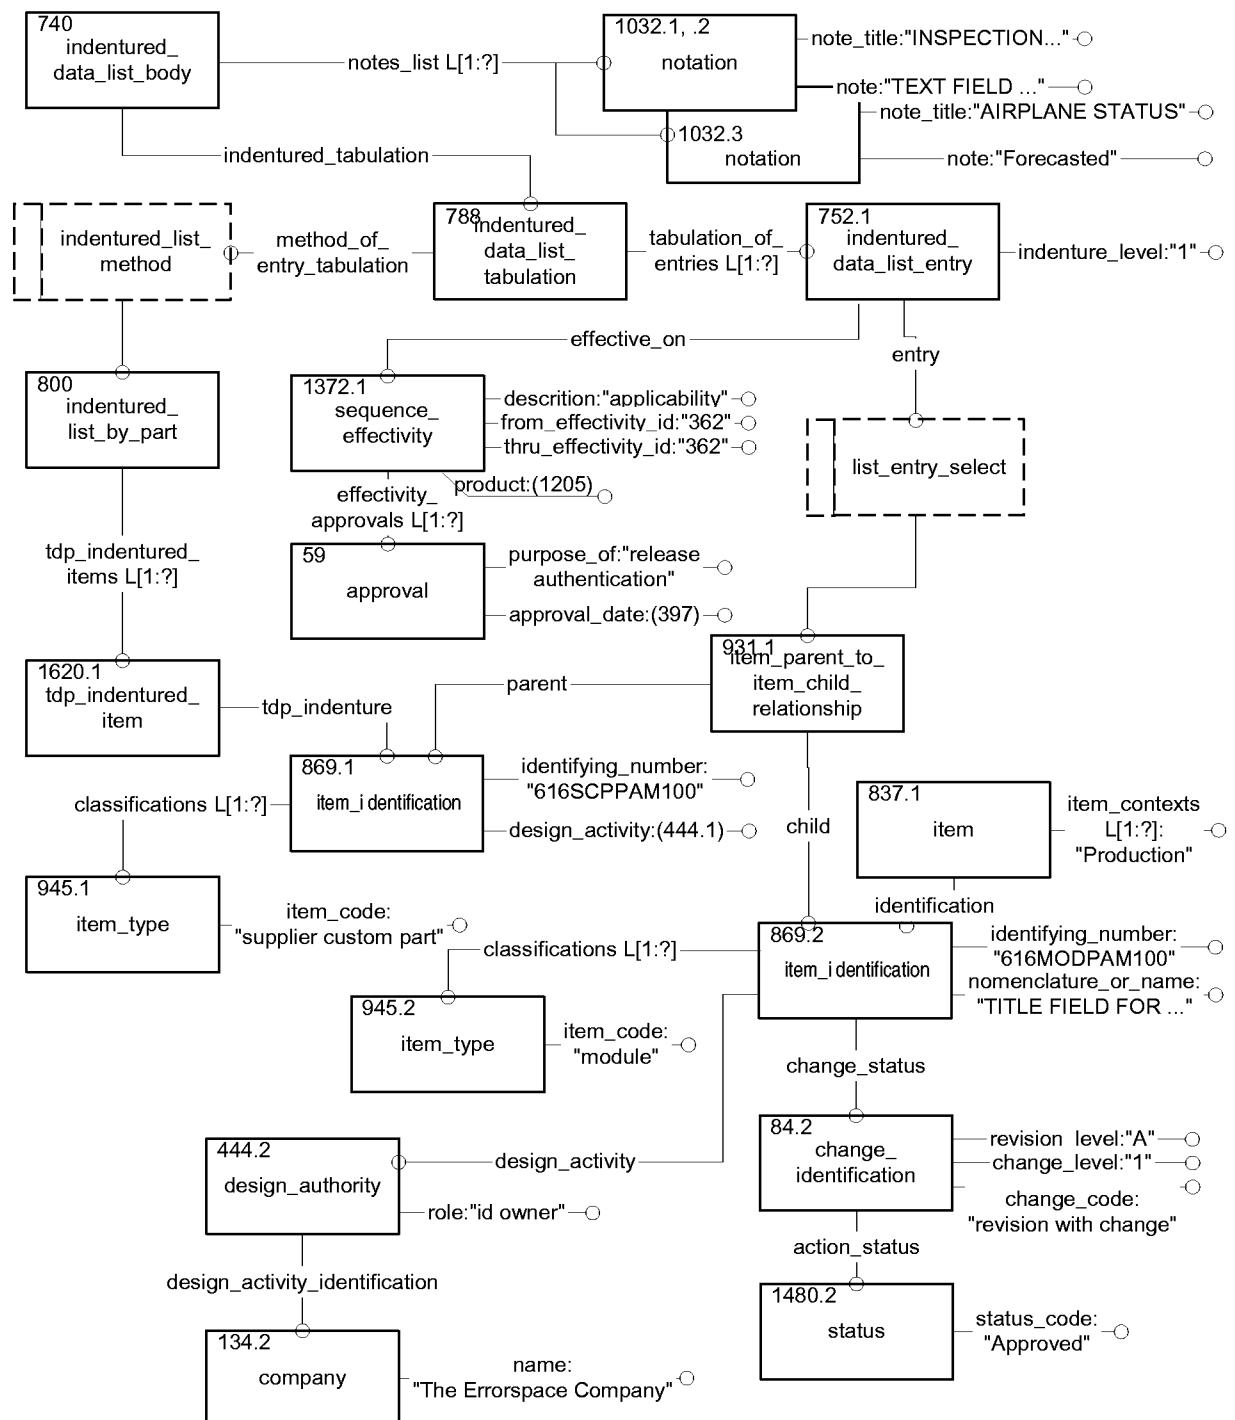

Figure E. 52 – Instance diagram 52 of 59

**Test Case 6SCML\_revised:  
Body Section with component 1**

**Figure E. 53 – Instance diagram 53 of 59**

## Test Case 6SCML\_revised: Component 2

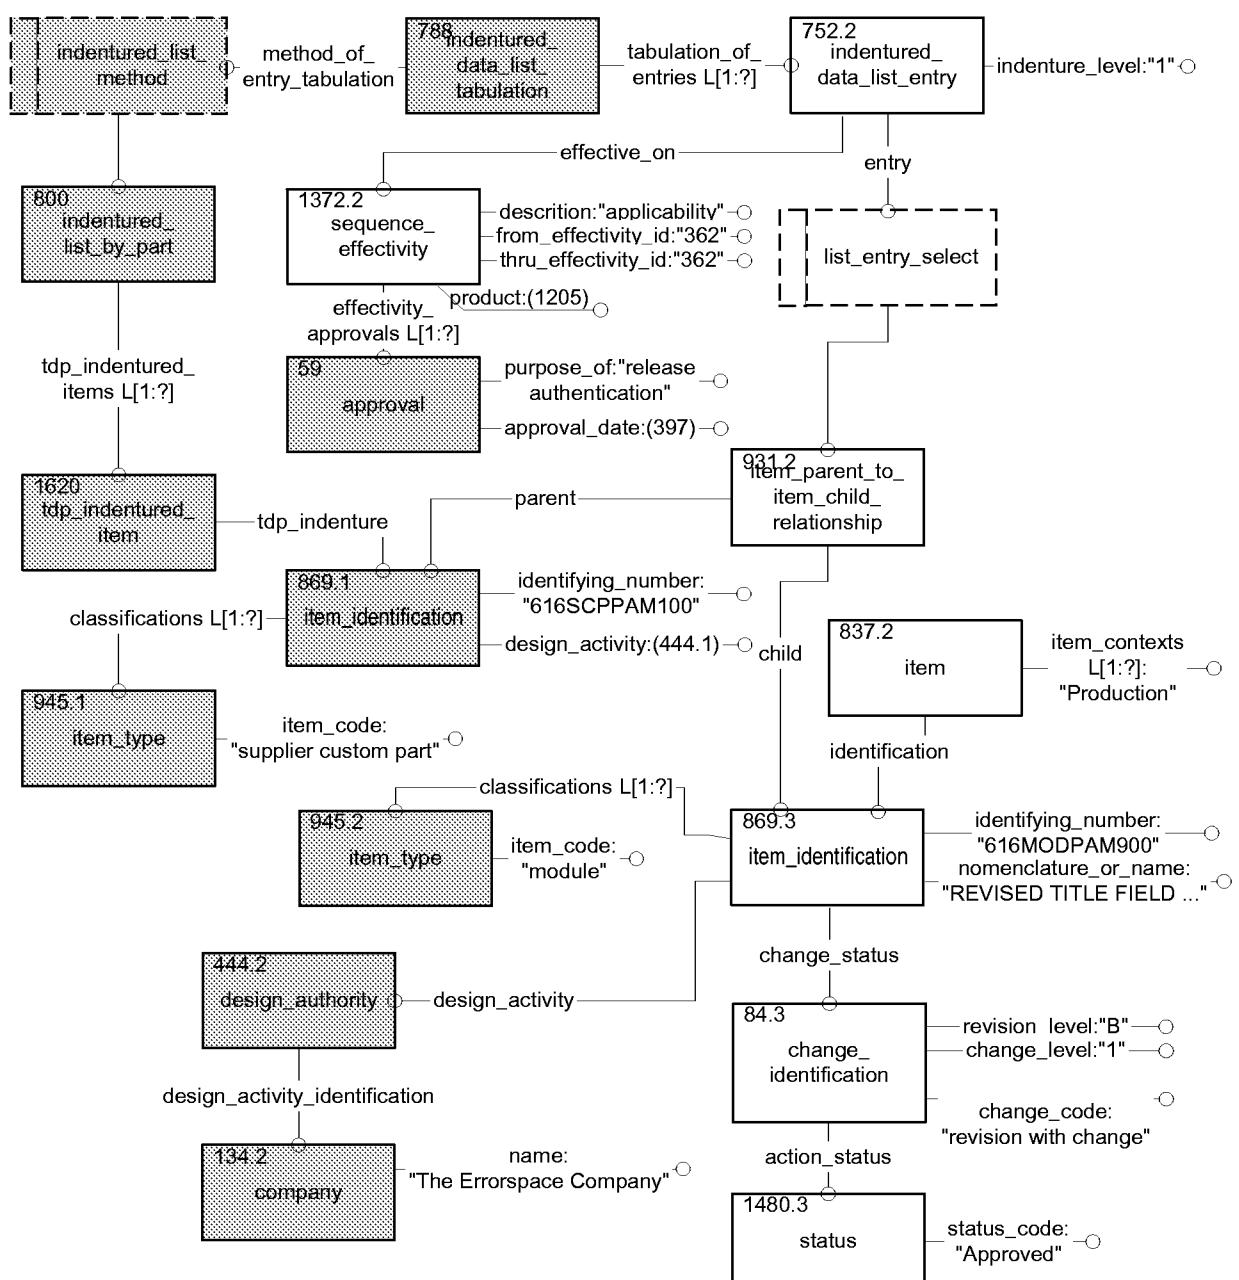

Figure E. 54 – Instance diagram 54 of 59

Test Case 6SCML\_revised: Component 3

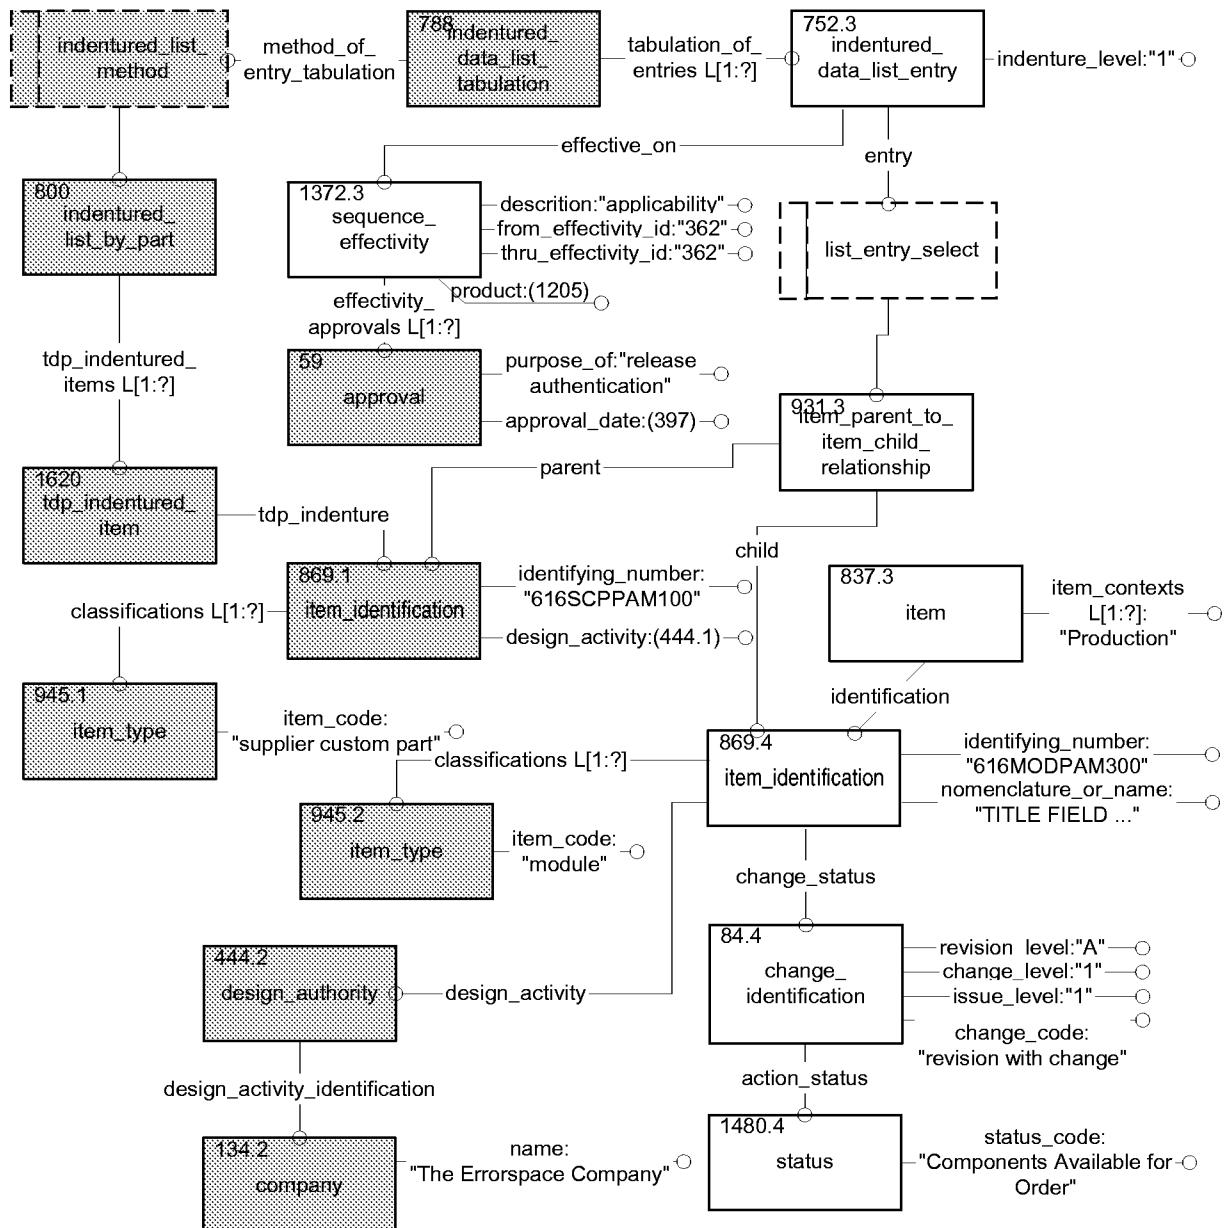

Figure E. 55 – Instance diagram 55 of 59

## Test Case 6SCML\_revised: Net Change

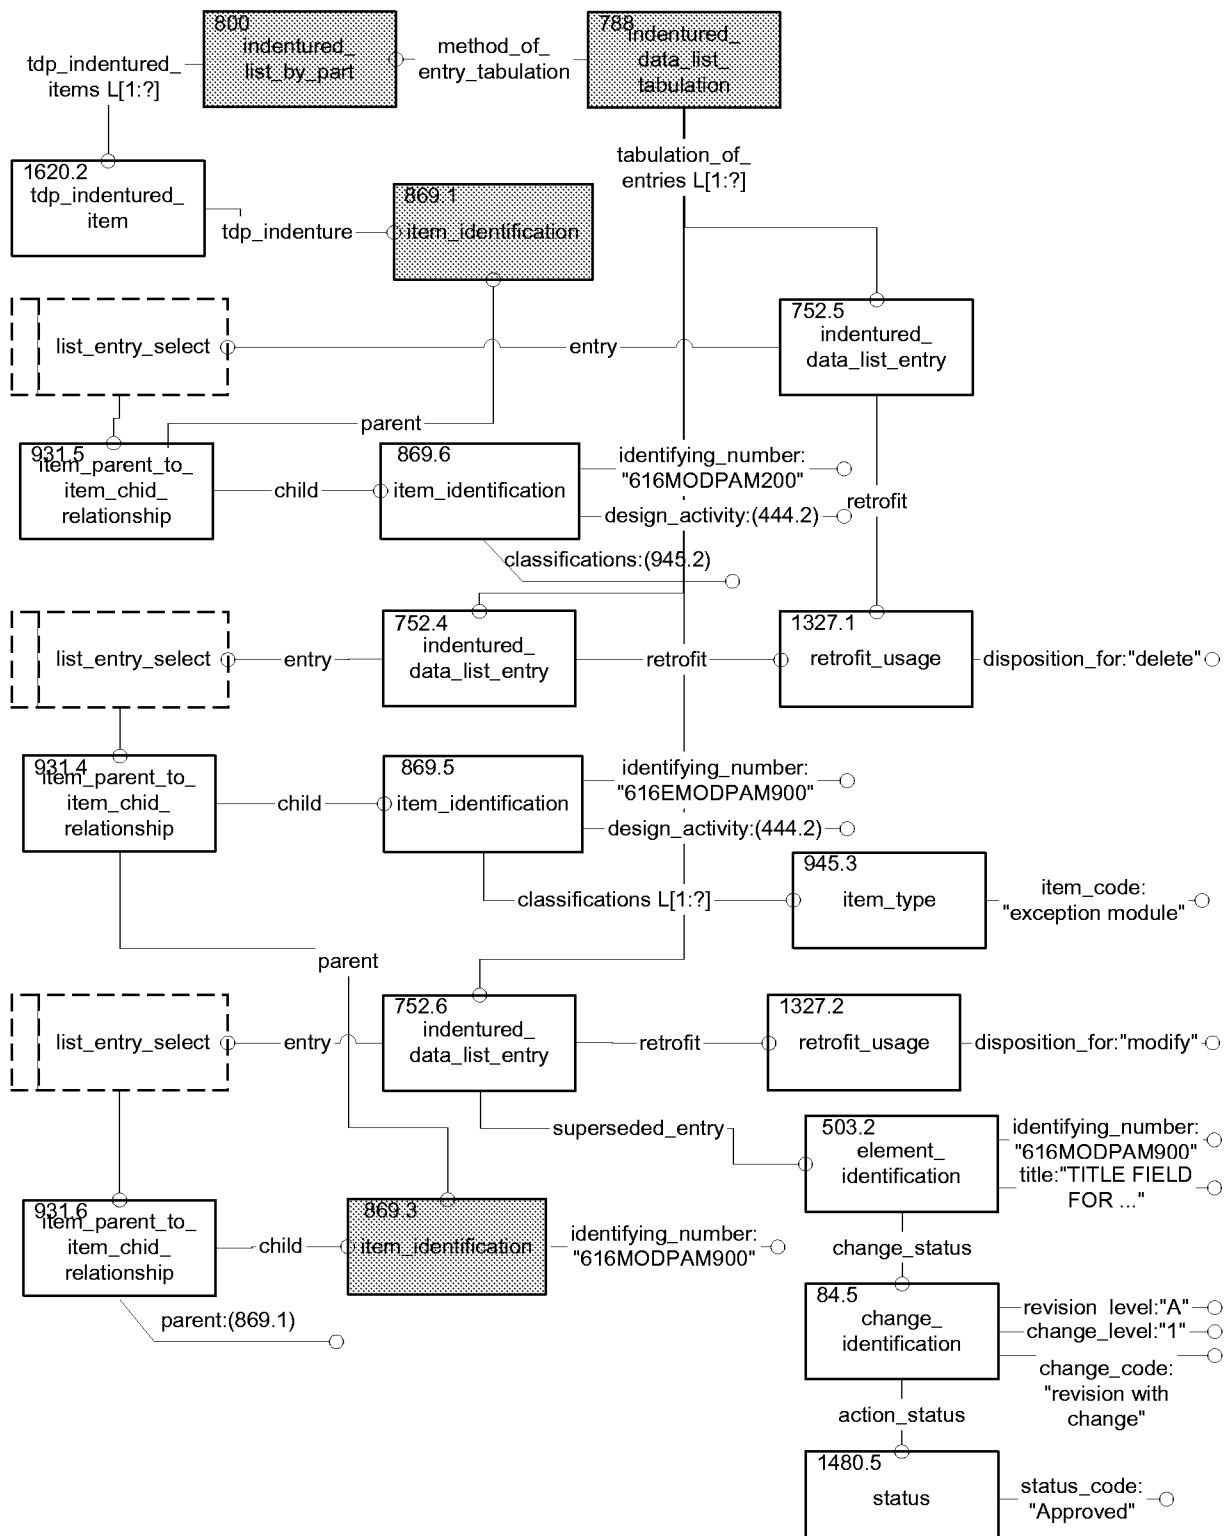

Figure E. 56 – Instance diagram 56 of 59

Test Case 6SCML\_revised: Net Change, cont.

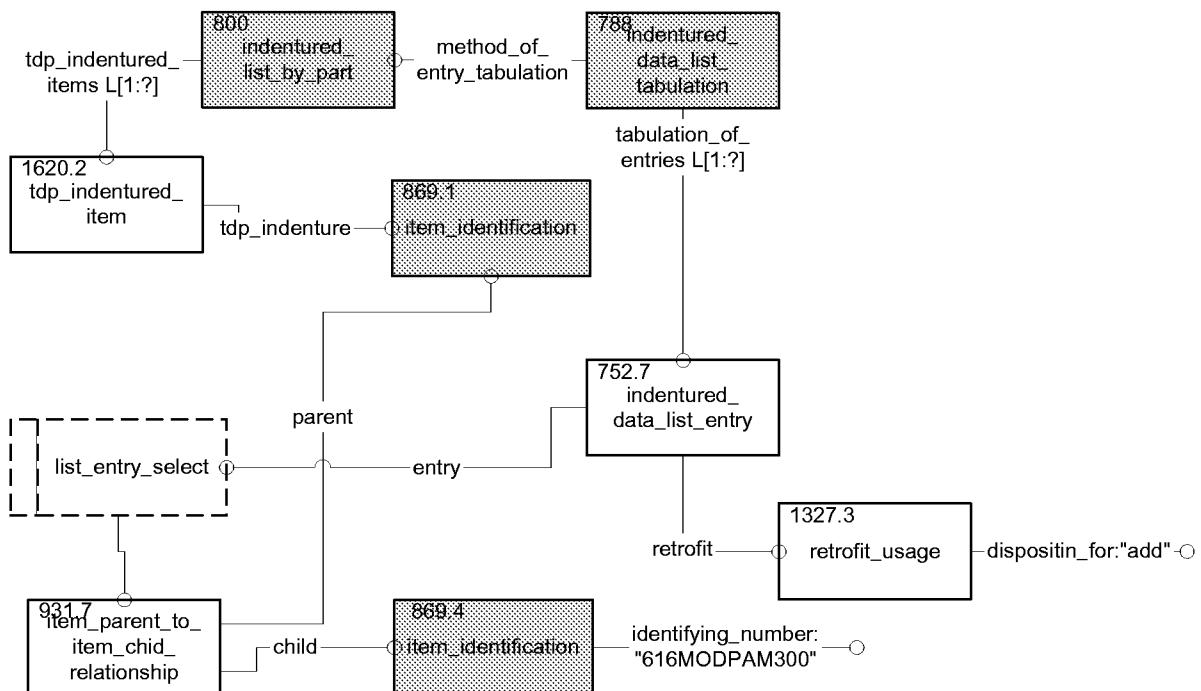

Figure E. 57 – Instance diagram 57 of 59

## E.14 6SCML\_removeSCP

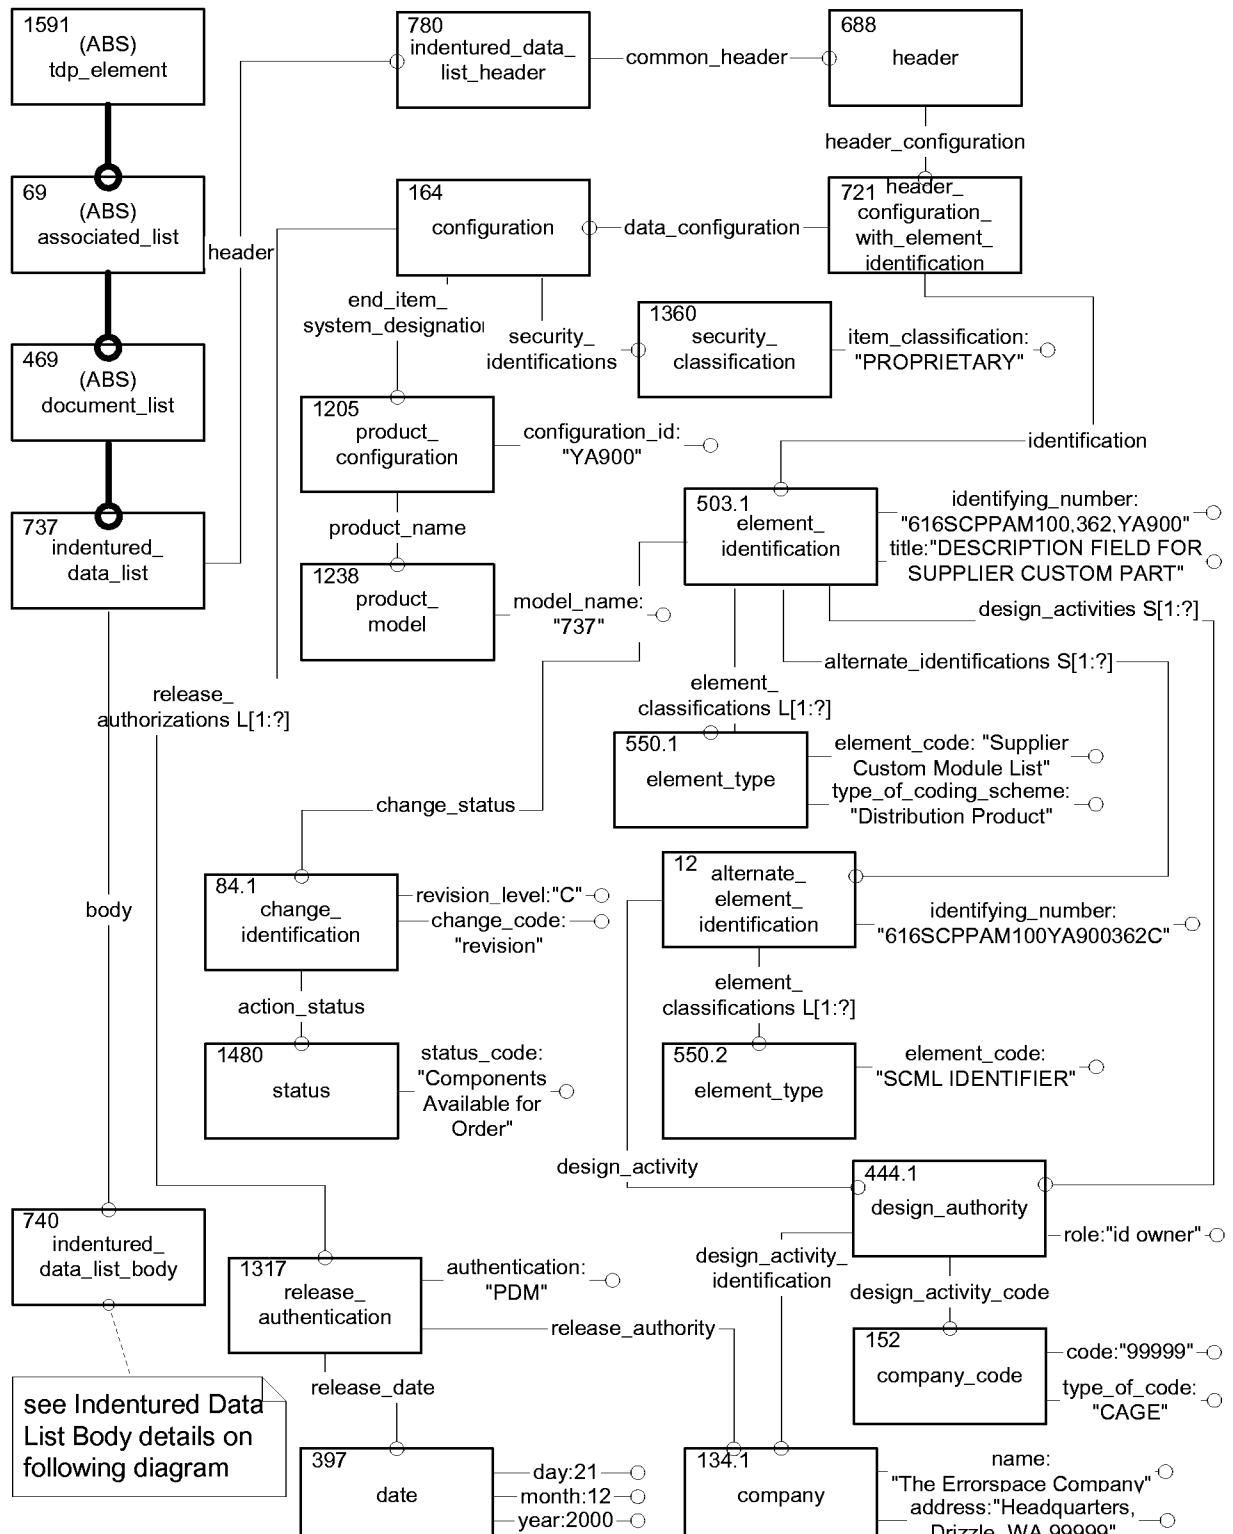

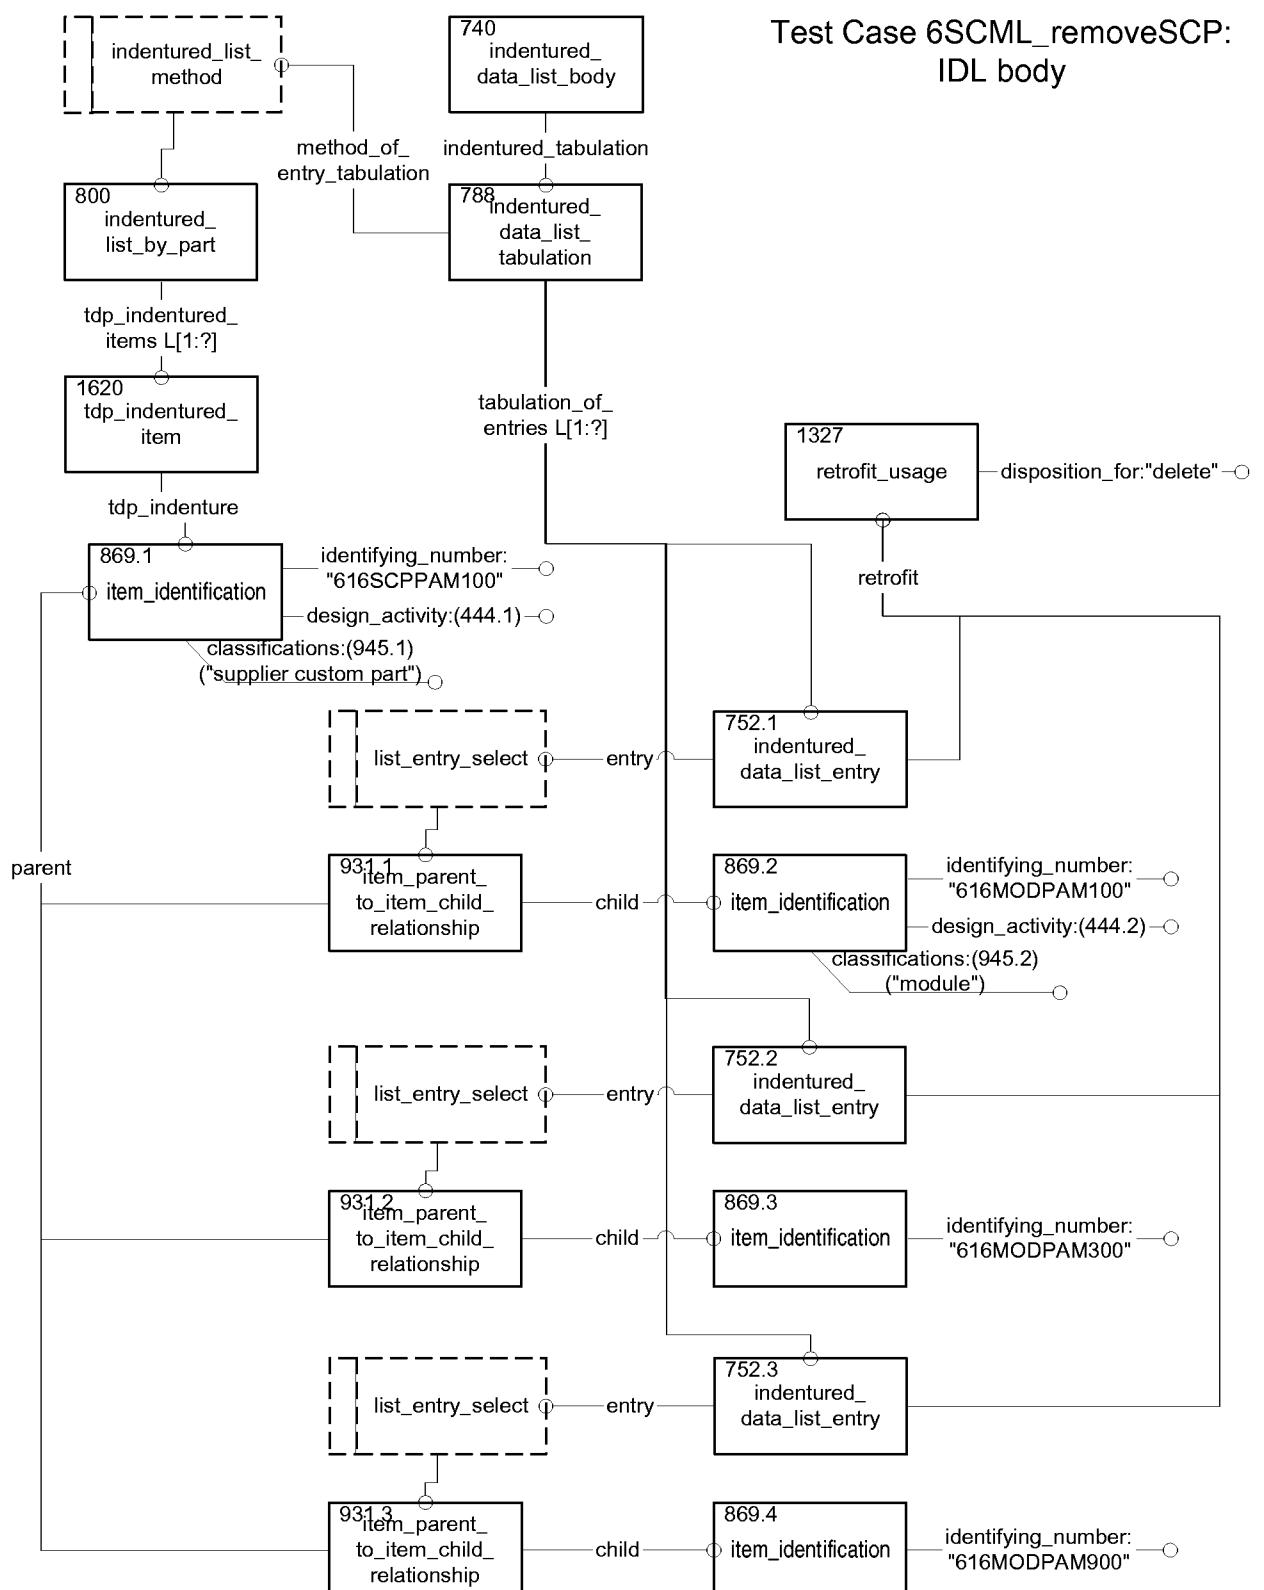

Figure E. 58 – Instance diagram 58 of 59

**Test Case 6SCML\_removeSCP:  
IDL body**

**Figure E. 59 – Instance diagram 59 of 59**
