lets talk today. I have decided that I will no longer invest in any funds. . I can provide bridge financing, off book debt, and other financial assistance, but after a thorough review of the benefits and burdens of a fund investment in any form in any field, the risk vs reward vs liquidity, people issues, , legal all not worth it. can talk at any time

Yes - I'll try to get you the stuff we're working on with MacArthur

It's a bit on their timeline but I think a big deal

12:37:24 pm

Agree its bigger, but it's also not under my control

12:37:35 pm

Whereas the fund is really my responsibility and my main "bread and butter" work that I've built up over 30 years so want to keep it going for now.

I've been thinking about this a bit more and I think I need to get a bit more powerful in MIT to make this work well. It probably takes another year or so of politics, but I'm working on it.
