I think you should try doing the brain of a really serious actor. to see changes with different characters.

11:11:49 am

Peter Fenwick

Will send the time line and call to morrow if any good.

04:55:08 pm

jeevacation

Sorry , but hardly rigorous. Not sure how and if to proceed. I like you . I respect you . Today's skype raised more questions than it answered. His lack of controls and sloppy statistics was very troubling . Rhythm alone causes expectation . Lighter is r darker is a 50/50? I read the paper , VERYSLOPPY

12:49:48 pm

2017/04/30

jeevacation

saw that you called. tried back.. as you and your team are trying to break NEW ground. with new discoveries the importance of rigorous controls. is paramount . I have not seen any of note and quite the opposite am left with an impression of cult. when joy spouts brains to brain communication , when someone is merely looking at a subject. its over the line of silly. sorry
