Subject: Re: numbers follow-up

Hi Jeffery -- Fair enough; we could accept that if y=u'd make it 65-35 above 20M and 80-20 above 50M, and if we could close=this right away.

Regards,
Dan

Dear Jeffrey - Regarding ou= conversation yesterday, we'd propose the following for a $1M investme=t:

Any sale at or above $50M, the in=estor gets 20%
Any sale between $30M=and $50M, the investor gets 22%
Any s=le at or below $30M, and the investor's share as a percentage is calcu=ated as .09X^2 - 4.6X + 80, where X is the sale price in millions.

Thi= will guarantee a return on the investment for sales as low as $1.5M (whic= would produce a 10% return). A $4M sale would return the investor $=.5M, a $10M sale would return $4.3M, etc.

Would welcome your tho=ghts and your investment.
