Subject: Ariel Fuchs / Jacques Rougerie

Dear Jeffrey,

First of all and again, Jacques Rougerie and I wanted to thank you very much for your trust and confidence put into Jacques' biomimicric vision for architecture and its ability to serve your own vision for building a unique facility on Great Saint James.

Jacques will send you some of his latest design concepts just for an updated vision onto his work and we will be pleased to receive any material (topography, images, aerial views, master plan...) from your side to start shaping the concept to come.

Thank you also for your early interest in SeaOrbiter, our "mission" for the past 10 years and we will be pleased to share more on this with you during your visit in Paris around the 20th of January.

Meanwhile, should you have any request of any kind please feel free to contact me by mail or phone.

Wishing you a wonderful greetings season.

Sincerely,

Ariel
