Working with Jeff Bateman on finalizing dock drawings for last site to make sure we are good and clear of ESA listed species. Unfortunately we aren't going to be able to submit until we get the NOVA issue with CZM and COE resolved.

As to the cable, there has been some confusion. For some reason Hugo Hodge got informed the cable project was on hold and everything came to a halt. I have told him its a go. And I am just waiting on the cable specs and landing needs.

hope you are well
can you please update me on status of all dock drawings?

in addition any update on permits for underwater cable
thank you
