Jeffrey

I was thinking,, maybe we should hire Manny's guys from FJTurbine to Preform Borescope and evaluate the power assurance runs on the engines,,
Maybe Manny could find something internal with Borescope results that could force a shop visit on one or both engines?
Same idea, as we did with GIV APU and upgraded it due to Borescope findings? Any findings beyond limits that warrant a repair must be addressed,

Just a long shot?
