Jeffery

Manny informs

Core performance improvement to lower margins would cost estimate, \$4.1M

Larry:

A gross estimate for an engine core performance restoration shop visit (without disk replacement) would be about \$4.1 M

Note that a new set of HPT Blades (80 ea) would cost about \$1.1 M. Most P/N blades are not reusable.

Disks are not considered as the engine has very low utilization.

I hope this useful to you.

Regards,
