Yes, love is sweet—until you and your beau decide to shack up and combine furniture. He likes the industrial look, while you favor organic modern—or worse yet, someone doesn't want

to say goodbye to a hideous hand-me-down sofa that's survived four years of college. Today we'll walk you through our crowd-pleasing picks for blending two décor styles together for that first grown-up abode. It's not always seamless, but the right versatile pieces in an accommodating palette can do wonders. As for who does the dishes? You'll have to work that part out on your own.
