Hi Jeffrey,

Please see JP's response below. Can we provide transportation to DPNR?
Can you let me know on which side of the island the boat has been grounded?

With warm regards,

Cecile

Good afternoon Mrs de Jongh-

i spoke with Roy Pemberton, Jr., director of the division of fish and wildlife, to see if he could get staff to survey the area of the grounding. Roy indicated that his vessel went in for service this morning, but he would see if it is now available to put it back into the water. if not, would LSJ be able to provide transportation to the island to survey the area?

also, could you let us know where the vessel is actually grounded (north or south side of the island)? it will help us determine whether the boat is subject to further impacts from the waves. i'm hearing that it is extremely choppy on the water today
regards,

JP
