Are you asking me for wiring suggestions? It is less important how it is billed than the fact it shows up asap in Aviloop account, so I can take further steps to divide it between the accounts to satisfy all visa requirents, AS SOON AS POSSIBLE.

100 can be sent in two parts - one billed as commission for buyer representation in the purchase of the G-IV from the entity that bought it and another wire for pilot services for Hyperion air. It would also be safer if the transfer did not come from the account that only contains your name.
