Subject: Jimmy Feedback - July 22, 2013

Greetings Sir,

Feedback from Jimmy:

1. Road - Jimmy says he has all of the information - he just has to put it on paper, which he will do this evening and email me this evening.
2. Entry - Jimmy says it will take him a day or so to get in touch with the 2 masons - he recommends that we arrange a hourly rate (probably will be \$25-30 per hour, plus a helper at \$10-12 per hour) and let them handle their own taxes, etc.
Jimmy says that once they review and project, the masons may be interested in coming on as employees temporarily, it will depend on the size and length of the project.
As per your directive - I will not contact Omar for a quote.
3. Dome - Darryl Podhola submitted additional questions for Jimmy over the weekend. Jimmy says Podhola is seeking a set of plans for the dome before he makes a quote. Jimmy will call him today, and reiterate that there are no plans - if he wants the job, he will quote and build based on the information provided.

Samson Welding of St. John is re-working his quote to fit your budget of \$12,000. He says it will take about a week to re-quote and he asked if he could possibly do a site visit. I will call him on Friday to follow up.
4. Hangar - Jimmy and I are both following up with Capitol Steel Structures to confirm they have all of the information they need - all dimensions and spec recommendations from Larry were forwarded to them - and find out when a quote can be expected.

Respectfully,

Daphne
