Subject: NYC escalade seat problem

Jeffrey

Michael Angelo the person completing the seat Mod for the Escalade just informed me there is a major problem with our seat order and delivery,

GM (General Motors parts department) received the seat Michael ordered today and was going to ship to NYC for installation. The Dealer opened the box containing our "single" seat we ordered, only to find two seats inside the box, a driver's side and passenger side seat, both electric. According to the dealer, we have to purchase both seats. This was not expressed to Michael Angelo when he originally placed this order for one seat!. Michael is contacting the manager at Parts dept where seat was ordered,. Michael is obtaining price for both seats with discount possibility in the event we are unable to purchase only one passenger front seat. If discount is attractive, I'd like to see if we are able to utilize the driver seat in other Suburban or Escalade if you like this modification, either for Zorro or Palm Beach SUV.

[REDACTED] and Januiz,.

Can Januiz bring the Escalade to Michael Angelo's shop today in NY, asap? Januiz knows the location.

There is problem with seat order, and Michael needs to inspect the seat installation.

I will have final answers shortly,.

thank you

Larry
