Jeffrey,
Bell 430 ref:

item #1 According to Mick Bailey Float bags are in storage in his garage, Craig is paying for Floats to be shipped to PremiAir tomorrow at his expense (weight 300lbs), we are going to get photo of bags to make sure he has possession of them tomorrow morning, since floats will not arrive till next week sometime.

item #2 co pilot controls are suppose to be in hanger in Ireland and sellers rep will have confirmation tomorrow morning if they are found. If no controls are located Craig told me he will provide controls at PremiAir's expense since they where listed on spec sheet.

- I met with Maintenance manger at PremiAir Mike Preston today, all set to start annual inspection on Monday if closing occurs. I would like to get auto pilot servos removed and set for overhaul ASAP, PremiAir would remove servos Friday and be ready to ship on Monday to Bell. Very satisfied with PremiAir shop and maintenance tech's most helpful and competent.

Do you want to close if floats are confirmed via photo tomorrow?

thx,
Larry
