Jeffrey,

I am scheduled to view serial #1030 1987 GIV in Reno Nevada Dec 27th Tuesday at 8:30am,. I will meet with chief pilot and director of Maintenance on the aircraft.

Kennth Hart is the Broker from Welch Aviation. Here are the facts I have learned so far after speaking with Broker,.

- Flight department will be closing
- one owner plane
- The aircrafts owner died several months ago, and the trustee's of estate are selling the aircraft, I am told the plane has its own private hanger and full time mechanic, if this is true, i'm sure a lot of spare parts and ground equipment could be included, I'll be able to judge more during my audit of aircraft on Tuesday,
- total time is 3500 hours which means an average of 140 hours per year only.
- 106 hours since engine overhauls
- HAPP - Honeywell Avionics Protection Plan \$33,014.72 per year, this covers all EFIS tubes and Computer issues, warranty program, very important program to maintain.
- CASP - Collins Avionics Service Plan \$9,300.00

Will keep you updated,.

thx

Larry
