In this plan from Zeff, it's showing 2 kitchen tables at the banquet each 5'6" x 3' in size. Do you want two tables this size? You had said before you wanted 3 pedestal tables, which would require them to be smaller..

The website you found has a huge range of sizes. I've ordered several samples of different colors of linoleum for the tops of the tables as each one is custom made.

Do you like the diner chairs and bar stools they offer as well? I've ordered samples of different colors of chair material as well since these can be custom made too. I think the blue and white is nice to match the booths. I've attached some of the designs they offer, and you can have them made in whatever color you want with contrasting piping, channeling, etc..
