When you approved Dejongh you did not approve my using Ferrer to do the structural engineering , \$11,680 total for both buildings, that is a very good price as the kitchen slab and roof are complicated.
Approved?

Gary

Jeffrey

When we shut down Gensler I took the kitchen and laundry to Dejongh two weeks ago to get the building permits. He gave me a not to exceed proposal of \$11,000 for each, very reasonable, for permit working drawings. Total of \$22,000, (within what I thought was the limit of my authority)

I assumed I had the authority and asked Bob to proceed, he has submitted a invoice for 1/3 that Rich and Darren tell me it cannot be paid without your approval, as my authority does not apply to consultants) We're about a week from submitting for a permit.

I also will need some structural done by Paul Ferrer for both the kitchen and laundry, do I need to get your approval in advance of having him do any work? (it will be less than the architect's fees) I have a invoice for \$750 for a study I had him do to determine the most cost effective way to design the concrete slab for the laundry and kitchen.

For your approval

1. pay Dejongh \$7,530.50
2. authorize the balance of Dejongh \$15,061.00
2. pay Ferrer \$750
3. authority to enter agreement with Ferrer

Gary
