U are right...
I thought about it and I will start asap.
And as soon as I get home I'll do all the blood tests to make sure everything is fine!
kisses

your medicine will take 20 weeks to work,, if you wait until sept. it won't be right until jan, then there will be no work, and you will have to wait until april again,, i think if you are serious start your medicine immediately and wear sunscreen or stay out of the sun,, it is up to you,, it is a choice, if you choose to stay in the sun, instead of focusing on your career, it's ok with me,, but it is you that will have to live with the consequences of that decision. think hard
