Dear Larry,

NOTE: The following technical opinion is furnished to you based on the information that was provided to Pratt & Whitney. This opinion does not constitute FAA / DER approval.

The Global Operations Center (GOC) has reviewed the scenario described below and would concur with the interpretation of the JT8D Engine Manual that if the disk has not accumulated more than 5000 cycles or 7500 hours since new or overhaul (which this one has not) it would not require shot peened again until it reaches that threshold.

A question has come up in regards to proper procedure for Disc overhaul, mainly Shop Peen requirement.

In 2009 the C-11 HPC Disc part #773128 was overhauled properly and placed in storage preserve according to PW procedures including Shop Peen then Nicad application. I understand storage is good for 3 years.

In 2009 the C-11 HPC Disc part #773128 was overhauled properly and placed in storage preserve according to PW procedures including Shop Peen then Nicad application. I understand storage is good for 3 years.

FJTurbines in Miami, purchased this Disc for our install on PWJT8D-219 engine, This C-11 Disc was never installed on an engine after its overhaul in 2009,. In 2014 FJTurbines overhauled the Disc again, so it could be installed on our engine.

According to your procedure, you must shop peen and Nicad each overhaul if 7500 hours or shop Peen was accomplished prior.

*** FJTurbine informs that Shop Peen of this C-11 Disc was NOT required, since it was never installed on an engine after its 2009 overhaul, and proceeded to NiCad the Disc, and utilized the 2009 Shop peen as being complied with, since no hours or cycles happen since its 2009 overhaul.
