thanks , i agree the template for the game is going to be musing. . we might add thought cards. . do you have to go around the board a few times to get an experience card. that allows a combination with your initial talent cards on the way and hope to accumulate karmic credits. and land on joy , enlightenment. and peace. . you can either spend some karma points to get out of confusion. or just throw a fixed number so that fate can play a role. maybe as you grow you can even get a extra singular dice. but lose it if you abuse it. . = lots of fun.

on another note. Im sure you will enjoy gromov. . his mathematics of category theory, only invented in the last 50 years. starts with what is called an identity matrix. . ie self aware. it is very complex. in arithmetic $1=1$. Makes no sense. it is very difficult. as the equal sign represents the conclusion of an operation ie , $1+1=2$ / & that makes sense. it is the RESULT of an operation, the most advanced mathematics cannot describe will the identity $1=1$. you must only make an assumption that it doesn't violate your system but it has no a priori definition.
