It was a pleasure to be involved in making these many improvements to Big N, she should give you many years of service, please remember that she is a 40 year old vessel and will need a regular service program to keep systems in good operational order.

These many months of working on her I understand that Big N is a major transport vessel for the Island. My recommendation would be to have a marine surveyor work up a maintenance program for both daily and long term maintenance. It would be a good idea to have this marine surveyor involved now before the vessel leaves our yard so we can review the plan together.

For long term maintenance, in two years time I would recommend to make additional repairs to the forward hold area bottom plating, as corrosion is present and will have to be monitored.
