The dry wall and ceiling have been installed in our offices. Tomorrow they will sand in preparation for painting. The estimate did not include painting and I asked the contractor to give us a quote to paint both offices.

The new AC unit which sits above the kitchen (see first picture) is larger than the last one and therefore sits 2" lower. Because of this, we have to put in a new, lower ceiling in the kitchen which will not line up with the ceiling in the hallway. An arch had to be added to square off the kitchen so that the lower ceiling tiles can be installed. This was not part of the quote either so I'm getting an estimate for that as well.
