Hey Richard,

I spoke to Brice yesterday to let him know it would probably be the middle of next week before we get a proposal over. We are running a couple designs with different products to get to 1 GB with the availabilities we are looking for. If you need it sooner let me know and I will apply some internal pressure.

Best regards,

Chris Cappiello

Chris

attached photo's for your reference

Coordinates where taken this morning from each location

I do have some concern regarding direct link from Sandia Crest to Main House

Any other information you may require please let me know

regards Brice

Main House tower

35-16'-2" N

105-58'-13" W

Elevation 6726 ft

Big Tower on ranch

35-14'-13" N

105-58'-46" W

Elevation 6590 ft

Sandia Crest tower

35-12'-60"

106-27'-7"

Elevation 10620 ft

Brice,

Please see the comments below and report back. I'll put a quote together based on your response about the Sandia Crest coordinates and if you would rather have one link direct to the main residence rather than going through DC.

I think Coordinates for Sandia Crest tower are not accurate, please see below screenshot. I have assumed a tower out of multiple towers on the peak E2 GE file attached, please verify coordinates.

Ran at 11 GHz in 40 Mhz channel with HAAM

Sandia Crest tower - ZDC Main tower: 26.8 mile

99.997% at 227 Mbps and 99.992% at 297 Mbps with 3ft-3ftishes

ZDC Main tower - Main Residence: 2.17 mile

99.999% at 297 Mbps with 2ft-2ft dishes.

As per pathloss, a link between Sandia Creat tower and Main =esidence is possible in
case that is desired.

Sandia Creat tower - Main Residence: 27.53 mile

99.997% at 227 Mbps and 99.991% at 297 Mbps with 3ft-3ft =ishes
