Importance: High
Sensitivity: Private

Hi Jeffrey: =o:p>

President QIU Yong =nformed me of the your recent emails, and asked me write to you on his =ehalf.

First, I have =ommunicated with Martin Nowak and Joichi Ito. Martin Nowak proposes to =eceive annually two Ph.D. graduates from the Tsinghua math department =o work in his PED for a three year term each. He said this is an =nitial step toward further collaboration.

My dialogue with =oichi Ito is in process.

President QIU asked =e to forward his invitation for your visit to Tsinghua campus in the =all. An ideal time is mid-October, say October 9-10, which is after the =ong-week National Day break in China. Beijing is in its best weather =usually for this period. Please advise with your availability for the =isit, and tell me any specifics that you may care. It would also be =ractical for you to appoint a person to communicate with the Liaison =ffice in my staff for the arrangement of your visit. =o:p>

Very best regards,

Jack
