Subject: Re: Computer

Option 3 - I can work out how to transfer 2k from Barclays into my Chase. Just want to keep you in the loop because before it arrives my ability to do anything takes longer. (But I think I may pay less bank charges in one transfer than drawing many times for Bella) <=r> Sent from my iPhone

Dear Jeffrey...

I did all the research for a machine that can render my rhino work in vray. It must be windows and generally better to order online where they have solid state drives and built in discrete graphics cards. I found one for a good deal.

Dell just phoned me however and said they can't process it on my english card and I have to use an american card.

My amex has a limit so the good thing is I can never exceed that.

I was wondering whether you would mind if I put it on there and then I can do one of two things...=nbsp;

I could draw the money from the bank in increments (probably would take 10 days) and give to Bella, Or if I reach the limit I put anything further for that month on my UK card.

I would rely on school but they are keeping such silly hours for the summer holiday. (They used to be open 24 hours and I could work well into the night)
