I'm sure that you have seen/heard that the Fed will not reduce bond purchases at this time, which surprised all markets. They said that they don't want to "slow the pace of improvement in the economy."

I closed short aud and NZD positions used as delta hedges of short put positions. We are now net long aud, NZD, Gbp in forward contracts. We have strangles in aud Gbp and jpy and short Gbp and cad calls.

Laurie
