Jeffrey,
Thanks again for your intro.
No response, so far, from Richard Merki.

Subject: Following up on our conversation in LA

Thanks for the introduction. I believe that you both were interested in our disruptive technologies (precise, fast and inexpensive) for human genome (and microbiome) engineering -- especially in the context of our PGP biobank human stem cell samples -- which we (& NIST + DA, genomeinabottle.org) feel are the only ones in the world properly consented for broad commercial use. I'd be delighted to discuss this and other projects (e.g. the BRAIN Innovative Neurotech Project that we recently initiated) in more detail -- if you'd like, Meghan (CC'd) can help with scheduling, etc.
