I will review. We need an energy audit for the island, how to reduce usage.
The pumps on the RO plant and the AC in buildings use the most power. Need to start there.

=div>attached is powerpoint presentation from Eric Ryan Company we are using to audit LSJ utilities (WAPA) and
telephones this project was delayed as they were overwhelmed with their current work load they plan to verify rates
with wapa, seek better rates and also audit spikes in usage I expect their report in the next 45 days =div> this company
approach is to do load audit and not a read audit, therefore I am unsure they will provide great results craig =do you
know of any other companies that we can bring in if they are unsuccessful that conduct read audits?
