Larry,

Looks like I pushed the limits of your email first go round so I'm going to send a few separate emails with pics.

See below comments.

Larry,

Attached are a few in process pics of water abrading, samples of brite work on service panels/window frames and mask for prime.

You are going to love the polished accents..both the ones we discussed as well as a couple other small touches we've added.

We'll be shooting the initial epoxy primer shortly and follow that up with the Surfacer primer thru the evening. The reps from SW are here in town and will be assisting every step of the way throughout the paint mixing and application process. Will certainly send more pics as soon as we have primer/surfacer applied.

Feel free to call with any questions.

Regards,

Tyson
