Subject: GSJ Internet

Anna and I spoke with Hector (who is very smart and a pleasure as compared to Terrence or Jermaine) from Choice

He explained that we can purchase a new Dragonwave radio and register it on same FCC licensed link we have for LSJ. That radio will receive signal from LSJ tower and existing LSJ controller would be used to access and direct the GSJ radio. Hector believes that we would not need a new tower on GSJ and could use either a pole or mount on an existing structure. Once signal was on GSJ we could spread internet via access points by adding radios to where we would like wifi. Hector and his crew said they would attempt to get to LSJ and GSJ by Wednesday or Thursday or next week...

Please advise if you know where you would like Dragonwave installed on GSJ?

Hi Anna,

Would the area where the red arrow is pointing to be the area the other side of the link would be installed?
