Greetings Sir,

For your review and comments. I have attached a link for Lorin Industries. This Michigan company produces gold anodized aluminum, but they have never had their product used in the manner of application.

They are willing to produce a sample - 6 inches by 8 inches, free of charge, and send it for your review.

Additionally, I am standing by for the sample from Samson Weiding this afternoon. Mr. Samuel is en route to his shop now to see if the painter dropped it off.

Respectfully,

Daphne

Good afternoon Daphne, <=p>

I discussed your request with our manufacturing group and they feel we can produce material for your application. The minimum order quantity would be 4,320 square feet. We would produce it with an Architectural Class I film. I could have our lab produce a sample if you think this would work for you.

Best regards,

Mark Duplissis <=p>

Greetings Mark,

I am requesting information and pricing on Lorin's gold anodized aluminum, 0.040 inch thick.

The project is a dome, 20 feet in diameter, 11 feet in height. I will have to research the total square area.

The project is located in the Virgin Islands, salt air, constant direct sunlight conditions.

Any information you can provide regarding installation and maintenance of your product would also be appreciated.

Also, if you have available "samples" of the product I would be interested.

Kind regards,

Daphne Wallace
