Things are going OK down (up?) here.&nbs=; John came home for Spring Break and had knee surgery. Thought he h=d torn ACL, but turned out to be a flap tear of the meniscus. =ut off the flap and shaved the rough off, and he was done. Now has h=s leg in an ice machine for a week & rehab starts this week. His=girlfriend is coming down from Alabama to see him (and the beach) tomorrow= so he'll have someone to take his mind off it. We'll see how resour=efull he is since he can't get traction in an upright position.

I'd like to ask for a favor. If Larry and your helicopter are in=town, could John take his girlfriend for a ride over Palm Beach? &nbs=; She comes tomorrow and flies out on Thursday.

Hope all settles down for you & the royal family.

Steve
