Subject: Re :

Is it possible to make your emails even shorter?

Thank you so much for the ticket, Lesley has sent it to me

Here is the description of the interview that they sent me:

Regarding the interview, on average the interviews last roughly an hour to an hour and a half, I recommend business attire, and encourage advanced preparation on major concepts and events relevant to the subject you are interested in. Postcards are used as a tool to discuss art and for the interviewer to get a feel for the applicant's background and general knowledge. By no means are applicants expected to know every artist and date, though interviewers will assess familiarity with major themes, will expect flexibility in considering alternative methods to analyzing the objects and will request a compare-and-contrast essay, to be taken during the interview, to evaluate writing style. Applicants are also encouraged to treat the interview as an opportunity to ask questions about Christie's Education London: its curriculum, living in London, and career opportunities after the completion of the Master's. We want to make sure you feel equally as comfortable at Christie's Education.
