Jeff,

Please have your account on Monday (and=important to do so) wire Isabel's account 10K for all these teams. I have t= continue to pay them, and there are a lot of people working overtime. As y=u can see everyone is working really hard. Again, I am not keeping a single=penny... This is definite value for your money.

If you need the wire info, I can have her resend. =hanks.
Al

Jeff,

Terrific idea. I am all for it! However, can you provide=me with 10,000 word real interviews with all these scientists with that muc= content, questions (real or not) in the time you wanted? Today, tomorrow? E=rly next week? Seriously ... we know what we are doing.

There is a TREMENDOUS time crunch here to get this out f=st as possible. so you can get results as quickly as possible. In time, of c=urse, it will be constructed with other scientists too, both ones you know a=d ones that you don't know, and should, and in your own voice.

The purpose of this is for the search engines, which mea=s, I made it deliberately long, I broke up your questions repeatedly, and r=peated your name over and over in a way that wasn't obvious for what we were trying to accomplish. The fastest first path is th= one we are taking. I used my interview first, because I could control it, a=d I could write it easily, and it had real content, not pseudo-content, and=get it up by today.

Just fyi, it took me several hours to get Murray to give=me only two sentences that I could use.

Other inte=views will be going up, but they are in process of being made. I have asked=for materials from your side, but I can't use just names and generalities i= you want this to be effective. Ok, so, I know most of the people and their=work that you are referring to, but I have to build the content for them, a=d as these are serious people, it needs to be done correctly. Otherwise, it=looks bad on them and bad on you, and we don't want any more of that. =/div>

I am happy to correct any of your questions to put them i= "your voice" if you want to take the time to make such edits. In the meantime, let us get this u= there, and when you have the time and inclination, we can happily change i=. None of this needs to be etched in stone, other than for the express purp=se of achieving your goal.

If you have any existing interviews with anyone that are transcribed or otherwise, I sure would need it asap.

I have my teams actually pulling all nighters. I haven't slept for 48 hours working non-stop on this. So, please Jeff, we are all pulling for you very hard. Myself especially... I don't make a single penny on this.

I know that all of this is frustrating and horribly invasive. I know that you are private. We have to work with the constraints of the system, and we have already gotten discernable results.

I will write more later.

Best,
me

why don't we construct more with other scientists. with real questions and my real voice.

We had to come with a clever way of repeating your name endlessly on a page with unique content to drive it to the top of the search engine. So, in a total stream of consciousness, I constructed the following interview between us together of 9500 words! I apologize if I put words into your mouth, but there is a disclaimer at the end. it is all for a purpose, and to make your science site real... perhaps, you might even find it a slightly interesting read...

This will be going up today on the site with other stuff
