Subject: Re: Equipment Shipping

Sounds good, thank you!

I will get back with you to finalize equipment specs asap - thanks again.

Greetings Ashley,

Since we will not be able to sail until next week Wednesday, 7/4, the equipment has until Monday 7/1 before 12 noon to be delivered to the port. Of course the sooner the better so we can address any issues that arise.

I am copying my co-managers Anna and Mya to keep them in the loop.

Thank you and kind regards, Daphne

Hi Daphne,

When do the items need to be at the port?

The sizes & weight below are a rough estimate that may change based on which machines we decide to bring that make the most sense with moving them from location to location.

I am waiting to hear back from palletizing company still for estimate - Are you going to check FedEx Freight as well?

As for the Home Depot we were going to order everything here and have it ready for pickup there due to some items being specialty and are going to be shipped in.</div>

Let me know if you need anything else from me.

4 pcs - 37 1/8 x 26 1/2 x 32 1/2 - 140 pounds each

4 pcs - 24 x 22 x 34 - 97 pounds each

Thank you!

Ashley
