Lady G was hauled Friday of last week for it's annual bottom job
At this time it was discovered that the rudders and there shoes are in need of repair
To get the rudder off they had to cut the shaft just above the flange, after the
rudder repair

they need to machine a new flange, re weld it to the shaft and re assemble

Have attached photo's of rudder shoes and flange

Cost of Rudder shoes \$4700.00

Rudder repair \$1800.00

Flange work still awaiting estimate

Brice
