Hi there
Just a thought

Garry told me that by june your master suite has to be finished and that they would file the Genzler set so that you would get permits by june or july..knowing full well that the design would be altered later.

So with that in place if you wanted to work with me on the master plan changes which will take a while that could begin now as you surely want to build efficiently working from the plans you want rather than Genzlers plan.

At the same time I could be your eyes and ears to get the Master done...bathroom as well as the rest..dressing area and bedroom...carpets ,furniture and lighting.

Plan?
