Title: Re: questions for JEE Satillo... Is fine.. The walls should be between 24-30 inches, the road , should look almost flat as you approach the grove

Darren,

Can you please ask JEE about several things

1. The steps at the Info Center (DOES HE WANT MEXICAN SATILLO TILE "QUICKER AND CHEAPER" OR STONE LIKE HIS DRIVEWAY "MORE TIME CONSUMING")
2. How far down does he want us to grate down at the olive grove so we can start building the walls.

Please let him know that I will try to get a sample of concrete stamp for him to see before I leave on vacation. they arrive on LSJ tomorrow and if the rain holds out I will stamp on Thursday.

Thanks
